PAR. THREE. Among the services rendered to members by the Service Company is that of negotiation for the purchase and the purchase and distribution of merchandise. The lines of merchandise so purchased include flour and many other food materials, required by said members in the production of their products, and a great variety of supplies and equipment, including machinery, used for the manufacture, packaging, storage and distribution of wholesale bakery products. Some of the said described merchandise is purchased outright by the said Service Company, payment being made by it to the vendors. In other cases said company does not pay the purchase price nor take title to the merchandise, but purchases same for and on behalf of respondent members of the Association. In said purchasing service the Service Company sometimes receives the merchandise and reships to the members of the Association, and on other occasions it directs the vendor to ship direct to the members as consignees. The said Service Company and the Association and its members, through the said Service Company as intermediary, caused to be transported the various lines of merchandise so purchased including flour, food materials, supplies, and equipment from the state of location where sold to, into and through the various other states of the United States in which the respective members of said Association are located, and into the State of New York where the Service Company is located. In its said purchasing service the said company is obligated to obtain and actually obtains from vendors the best prices, quality and service that it can on behalf of members and therein acts as intermediary between said vendors and said members.

PAR. FOUR. In the regular course and conduct of its purchasing service, in interstate commerce as hereinabove alleged, respondent Service Company, for more than five years last past has received and accepted from several hundred concerns, or their agents, selling practically all materials, supplies and equipment purchased by said company, valuable price concessions, as brokerages, commissions or other compensation, and allowances or discounts in lieu of brokerage; and the said Service Company now receives and accepts the same from many such concerns, including those corporate respondents hereinafter referred to as "respondent sellers." Each year of its said operations the said Service Company has thus received and accepted substantial sums, and in 1936 received and accepted in the aggregate $181,528.20, as brokerages, commissions or other compensation. The receipts of said company as brokerages and commissions or other compensation all inure to the benefit of the members. One-half thereof is retained by the Service Company for the purpose of operating the various abovementioned services maintained and made available to the entire membership by the said company. The remaining one-half thereof is distributed as patronage dividends, proportionally to the individual members, whose purchases are deemed to have earned the so-called brokerages or commissions or other compensation, in the form of credits against dues charged respectively, by the said company, to said members for such of the services, available at cost, as may be individually subscribed to by them.

Under the circumstances as hereinabove set out,—namely, that all of the stock in the Service Company receiving such brokerage fees, compensations and allowances and allowances or discounts in lieu of brokerage, is owned and held by the member buyers of the Association,—no services connected with the transactions of sale and purchase of the aforesaid materials, supplies and equipment on which such brokerage fees, compensations and other allowances were and are being paid and made, have either been or are being rendered to the said sellers by the Service Company or the Association or its members.

PAR. FIVE. Respondent Washburn Crosby Company, Inc., is a corporation with an office and principal place of business at 80 Broad Street in the City of New York, State of New York. Respondent Pillsbury Flour Mills Company is a corporation with office and principal place of business at 21 West Street in the City of New York, State of New York. Respondent Red Star Milling Company is a corporation with an office and principal place of business in the City of Wichita, State of Kansas. Respondent Consolidated Flour Mills Company is a corporation with an office and principal place of business in the City of Wichita, State of Kansas. Respondent Kansas Milling Company is a corporation with an office and principal place of business in the City of Wichita, State of Kansas. These last named respondents will hereinafter be designated and referred to as "respondent sellers". Said respondents and each of them in this paragraph named are and for more than one year last past have been engaged in the business of manufacturing and selling flour to numerous and divers wholesalers, jobbers, merchants and dealers, including the aforesaid Service Company, respondent, and respondent members of the aforesaid Association, and in the course of such business cause the said flour when sold to be shipped and transported from the state of its location at the time of said sale to, into and through the various other states of the United States in which the said purchasers are located.

Said respondent sellers are fairly typical and representative members of a large group or class of manufacturers, processors, importers and producers engaged in the common practice of selling a substantial portion of their commodities, merchandise, flour, foodstuffs, equipment, supplies and machinery in interstate commerce to the aforesaid Service Company, respondent, and to the members of the aforesaid Association for and on behalf of whom the said Service Company, respondent, acts as intermediary, in the manner and form hereinabove described. Said group or class of

sellers comprises a large number of corporations, partnerships and individuals and are too numerous to be individually named herein as respondents or to be brought before the Commission in this proceeding without manifest inconvenience and delay.

In the course of such commerce said respondent sellers and each of them have paid or granted and are paying or granting to the said Service Company and to the respondent members through that company as intermediary for and in fact for the respondent members of the aforesaid Association, commissions, brokerage fees, and other compensation and allowances or discounts in lieu thereof upon purchases of said commodities made by respondent buyers from said respondent sellers through said Service Company.

PAR. SIX. The payment or granting of such commissions, brokerage fees and other compensations and allowances or discounts in lieu thereof by said respondent sellers to the Service Company, and the receipt and acceptance thereof by the Service Company acting as intermediary for and on behalf of the Association, and for and on behalf of each of the aforesaid member respondents, and the participation in and direction or conduct of such activities by the individual respondents acting as officers and members of the executive committee of the aforesaid respondent Association, all in the manner and form aforesaid, are in violation of the provisions of Subsection (c) of Section 2 of the Act described in the preamble hereof.

Wherefore, the premises considered, the Federal Trade Commission on this 28th day of August, A. D., 1937, now here issues this its complaint against said respondents, stating its charges in such respect as hereinabove set out.

NOTICE

Notice is hereby given you and each of you, the respondents named in the caption of the above complaint, that the 1st day of October, A. D., 1937, at 2:00 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violation of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a short and simple statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * * * *

Failure of the respondent to file answer within the time above provided or failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further hearing or notice to respondent, to proceed in regular course on the charges set forth in the complaint, and to make, enter, issue, and serve upon respondent findings of fact and an order to cease and desist.

If respondent desires to waive hearing on the charges set forth in the complaint and not to contest the proceeding, the answer may consist of a statement that respondent admits all the material allegations of the complaint to be true. Any such answer shall be deemed to waive a hearing thereon, and to authorize the Commission, without trial and without further evidence, or other intervening procedure, to make, enter, issue, and serve upon respondent:

(a) In cases arising under section 5 of the Act of Congress approved September 26, 1914, entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes" (the Federal Trade Commission Act), or under sections 2 and 3 of the act of Congress approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes" (the Clayton Act), or under section 2 of the aforesaid Clayton Act as amended by "An act to amend section 2 of the act entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes' approved October 15, 1914, as amended (U. S. C., title 15, sec. 13), and for other purposes", approved June 19, 1936 (the Robinson-Patman Act), findings of fact and an order to cease and desist from the violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 28th day of August, A. D., 1937.

By the Commission.

[SEAL] C. G. DUGANNE,
*Acting Secretary.*

## PRESIDENT OF THE UNITED STATES.

### GOLD STAR MOTHER'S DAY

By the President of the United States of America

A PROCLAMATION

WHEREAS the preamble to Public Resolution 123, 74th Congress, approved June 23, 1936, recites:

"WHEREAS the service rendered the United States by the American mother is the greatest source of the country's strength and inspiration; and

"WHEREAS we honor ourselves and the mothers of America when we revere and give emphasis to the home as the fountainhead of the state; and

"WHEREAS the American mother is doing so much for the home and for the moral and spiritual uplift of the people of the United States and hence so much for good government and humanity; and

"WHEREAS the American Gold Star Mothers suffered the supreme sacrifice of motherhood in the loss of their sons and daughters in the World War;"

AND WHEREAS the said Public Resolution 123 provides:

"That the President of the United States is hereby authorized and requested to issue a proclamation calling upon the Government officials to display the United States flag on all Government buildings, and the people of the United States to display the flag and to hold appropriate meetings at their homes, churches, or other suitable places, on the last Sunday in September, as a public expression of the love, sorrow, and reverence of the people of the United States for the American Gold Star Mothers.

"SEC. 2. That the last Sunday in September shall hereafter be designated and known as 'Gold Star Mother's Day', and it shall be the duty of the President to request its observance as provided for in this resolution."

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, under and by virtue of the authority vested in me by the aforesaid public resolution, do by this proclamation designate Sunday, September 26, 1937, as Gold Star Mother's Day and direct Government officials to display the United States flag on all Government buildings, and do call upon the people of the United States to display the flag and to hold appropriate meetings at their homes, churches, or other suitable places on that day as a public expression of the affection and reverence of the people of the United States for the American Gold Star Mothers.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 10th day of September in the year of our Lord nineteen hundred and thirty-seven, and of the Independence of the United
[SEAL] States of America the one hundred and sixty-second.

FRANKLIN D ROOSEVELT

By the President:
CORDELL HULL
*Secretary of State.*

## DEPARTMENT OF THE INTERIOR.

### National Bituminous Coal Commission.

[Order No. 41]

AN ORDER DIRECTING ALL DISTRICT BOARDS FAILING TO COMPLY WITH THE COMMISSION'S ORDER NO. 39 TO APPEAR BEFORE THE COMMISSION AND SHOW CAUSE FOR SUCH FAILURE

It appears from the Commission's records that certain District Boards within the areas defined in the Act as Minimum Price Areas Number 1 and Number 2 have not complied in whole or in part with the Commission's Order No. 39, directing each District Board within Minimum Price Areas Number 1 and Number 2 to propose minimum prices for all kinds, qualities and sizes of coal produced in said districts by code members to the Commission on or before the 2nd day of September, 1937.

Now therefore pursuant to Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

That all District Boards within the areas defined in said Act as Minimum Price Areas Number 1 and Number 2 who have failed to comply in whole or in part with the Commission's Order No. 39 appear before the Commission on September 13, 1937, at 10 A. M. at the office of the Commission in the City of Washington, D. C., and show cause for their failure to comply with the provisions of Commission Order No. 39, particularly in failing to file on or before the 2nd day of September, 1937, proposed minimum prices free on board transportation facilities at the mines for all kinds, qualities and sizes of coal produced in said districts by code members and to propose such price variations as to mines, and consuming market areas, values as to uses and seasonal demand, as may be deemed proper and within the authority conferred by the Act.

Further in failing to file complete schedules of such proposed minimum prices, together with the data with which they were computed, including, but without limitation, the factors considered in determining the price relationship and computed by using as a weighted average of the total cost per net ton of their respective minimum price areas, the amounts tentatively established and determined by the Commission for such use.

The Secretaries of each District Board affected by this order are hereby directed to give telegraphic notice of the contents of the order to each member of their respective District Boards.

The Secretary of the Commission shall forthwith mail copies of this order to the Secretaries of such District Boards as appears from the Commission's records have not complied with Order No. 39.

By order of the Commission.
Dated this 9th day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary.*

[F. R. Doc. 37-2728; Filed, September 11, 1937; 12:35 p. m.]

[Order No. 42]

AN ORDER REQUIRING THE SEVERAL DISTRICT BOARDS WITHIN MINIMUM PRICE AREAS NUMBERS 3, 4, 5, 6, 7, 9, AND 10, TO PROPOSE MINIMUM PRICES FOR ALL KINDS, QUALITIES AND SIZES OF COAL PRODUCED BY CODE MEMBERS IN SAID DISTRICTS; PROVIDING FOR THE COORDINATION OF MINIMUM PRICES SO PROPOSED AND GIVING NOTICE OF A PUBLIC HEARING BY THE COMMISSION FOR THE PURPOSE OF RECEIVING EVIDENCE TO ENABLE THE COMMISSION TO APPROVE, DISAPPROVE OR MODIFY SUCH PROPOSED MINIMUM PRICES AND DETERMINE THE EXTENT OF THE APPLICABILITY THEREOF

Pursuant to Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

1. That each District Board within the areas defined in said Act as Minimum Price Areas Numbers Three (3), Four (4), Five (5), Six (6), Seven (7), Nine (9) and Ten (10), shall forthwith proceed to consider and shall on or before the 24th day of September, 1937, propose to the Commission minimum prices free on board transportation facilities at the mines for all kinds, qualities and sizes of coal produced in said district by code members, and propose such price variations as to mines, consuming market areas, values as to uses and seasonal demand, as may be deemed proper and within the authority conferred in said Act.

Schedules of such proposed minimum prices, together with the data upon which they were computed, including, but without limitation, the factors considered in determining price relationship, shall be submitted to the Commission by each District Board within Minimum Price Areas Numbers three (3), Four (4), Five (5), Six (6), Seven (7), Nine (9) and Ten (10), on or before the 24th day of September, 1937, and the Commission may thereupon approve, disapprove or modify such proposed minimum prices to conform to the requirements of subsection (a) of Part II, "Marketing", of section 4 of the Act.

2. In order to facilitate the determination of such proposed minimum prices the several District Boards within the Minimum Price Areas named shall, in determining such proposed minimum prices, use as the weighted average of the total cost per net ton of the tonnage of the Minimum Price Area, as provided in subsection (a) of Part II of Section 4 of the Act, the amount listed below for the Minimum Price Area in which such district is included, which amount is tentatively established and determined by the Commission for such use; subject, however, to the express condition that prior to final approval, disapproval or modification of said proposed minimum prices by the Commission there shall be substituted for each tentative weighted average cost the actual weighted average cost of the tonnage for each Minimum Price Area to be hereafter determined by the Commission in conformity with subsection (a), Part II of Section 4 of the Act, and in making such substitutions such proposed prices shall be modified as to give full effect to the differences, if any, between the tentative and actual weighted average costs.

The tentative weighted average costs to be used by the District Boards in their proposals of minimum prices are as follows:

| | |
|---|---|
| Minimum Price Area No. 3 | $2.57 |
| Minimum Price Area No. 4 | 3.87 |
| Minimum Price Area No. 5 | 1.94 |
| Minimum Price Area No. 6 | 2.63 |
| Minimum Price Area No. 7 | 2.37 |
| Minimum Price Area No. 9 | 2.04 |
| Minimum Price Area No. 10 | 3.35 |

3. Each District Board within the Minimum Price Areas heretofore named in this order shall by formal resolution designate a representative or representatives of the Board with full authority to attend a meeting to be held as herein provided, and to act in its behalf for the purpose of coordinating such proposed minimum prices in conformity with the requirements of subsection (b), of Part II, Section 4 of the Act.

4. Any District Board within Minimum Price Areas Numbers 1 and 2 which deems it necessary to coordinate the minimum prices of such district with the prices proposed by any of the districts previously referred to in this order may, by formal resolution, designate its representative or representatives with full authority to attend the coordination meeting herein provided for and to act in its behalf therein. In event the Commission determines that coordination between any district in Minimum Price Areas Numbers 1 and 2 and any district in other Price Areas named in this order is necessary in the establishment of proper minimum prices, the Commission may by further order require such District Board to designate its representative or representatives to appear and proceed with such coordination.

5. Such coordination meeting is hereby set for 10:00 o'clock A. M., September 28th, 1937, at the office of the Commission in Washington, D. C., and is to be conducted under the direction of the Commission.

6. Coordination of such proposed minimum prices shall be completed and the proposed minimum prices as coordinated shall be submitted to the Commission not later than the 2nd day of October, 1937. The proposed minimum prices, as coordinated and submitted to the Commission, will be on file in the office of the Secretary of the Commission on the 4th day of October, 1937, and will be available for inspection thereafter during office hours to all interested parties until the time for the hearing hereinafter set forth.

7. A hearing shall be held by the Commission on the 7th day of October, 1937, commencing at 10:00 o'clock A. M., in a Hearing Room of the Commission at the Washington Hotel, Washington, D. C., for the purpose of receiving evidence to enable the Commission to establish and make effective minimum prices in accordance with the standards set forth in subsection (a) and (b), Part II, section 4 of the Act and to determine such limitations as may be required to be imposed upon the applicability of said prices.

8. The Secretary of the Commission shall forthwith mail copies of this order to the Consumer's Counsel, to the Secretaries of all District Boards in all Minimum Price Areas and to all Code Members within the districts included in Minimum Price Areas Numbers Three (3), Four (4), Five (5), Six (6), Seven (7), Nine (9) and Ten (10).

By Order of the Commission.
Dated this 10th day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary.*

[F. R. Doc. 37-2737; Filed, September 13, 1937; 12:59 p. m.]

[Order No. 43]

AN ORDER MODIFYING AND AMENDING ORDER NO. 38, REQUIRING THE FILING BY ALL DISTRICT BOARDS OF PROPOSED INITIAL CLASSIFICATIONS OF COAL IN CONFORMITY WITH THE STANDARDS, METHODS AND RULES OF PROCEDURE ESTABLISHED BY THE COMMISSION, PRESCRIBING THE TIME OF FILING SUCH INITIAL CLASSIFICATIONS, PROVIDING FOR INSPECTION THEREOF AND GIVING NOTICE OF PUBLIC HEARING BY THE COMMISSION FOR THE PURPOSE OF RECEIVING EVIDENCE TO ENABLE THE COMMISSION TO ESTABLISH INITIAL CLASSIFICATIONS

Pursuant to act of Congress, entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission by way of modification and amendment to its Order No. 38, hereby orders and directs:

1. That Order No. 38 of the Commission is hereby amended as follows:

(a) Subsection 2 of Section C—*Rules of Procedure in Proposing and Making Initial Classifications*—is hereby modified to read:

2. Each District Board shall have in the hands of all code members within the District, not later than September 16, 1937, the proposed initial classifications for all coals produced at all mines of code members within the District, such proposals to be made in accordance with the standards and methods hereinbefore set forth.

(b) Subsection 3 of Section C—*Rules of Procedure in Proposing and Making Initial Classifications*—is hereby modified to read:

3. In the event that any code member is dissatisfied with the class or classes in which his coals, or the coals of other code members, have been placed for proposed initial classifi-

cation, he shall have the right to protest to the District Board. Each protest shall be in writing, addressed to and filed with, the Secretary of the District Board, and shall set forth the classification claimed applicable by such code member, together with the reasons why the proposed initial classification should be revised and detailed data in support thereof. The Secretary of the District Board shall fix the time and place for a hearing and shall notify the Commission and all interested code members of such protest and the time and place for hearing the same.

(c) Subsection 1 of Section D—*Rules of Procedure in Making Reclassification of Coals*—is hereby modified to read:

1. Proposals to the Commission for reclassification of any coal or coals of any code member within the district may be initiated at any time by the District Board upon its own motion. The District Board shall also consider and review any classification or classifications proposed by it and established by the Commission, upon application by any code member for reclassification of his coals or upon the protest of any code member against an existing classification. In each case the District Board shall give due notice of the time and place of a hearing and shall afford reasonable opportunity to be heard to all code members affected by any proposed reclassification, and following such hearing shall submit its proposal to the Commission.

Protests against existing classifications and applications for reclassification may be made at any time by any code member to the District Board, except that in any case where an application or protest has been made to the District Board and a decision has been rendered by the Commission upon an application made to the District Board or upon a protest against the decision of the District Board, no further protest or application for reclassification shall be made to the District Board as to coals classified and so determined by the Commission within a period of ninety (90) days from the date of the Commission's Order unless the protestant or applicant can produce to the satisfaction of the District Board new evidence which was not available at the time the previous classification was considered by the District Board and proposed to the Commission.

2. That all District Boards shall, on or before September 22, 1937, file with the Secretary of the Commission at Washington, D. C., proposed initial classifications of coals of all code members within their respective districts, classified in conformity with the standards, methods and rules of procedure established by the Commission. Prior to such filing, all protests of code members which have been filed with the District Boards shall, insofar as practicable, have been heard and determined by the District Boards. All protests filed with the District Boards shall be heard and promptly determined by the District Boards but the filing of such protests with a District Board or a petition to the Commission for review of the action of a District Board thereon shall not operate as a stay in classification proceedings before the Commission under this order except by special order of the Commission upon a showing of particular necessity therefor.

The proposals of initial classifications shall be separate and distinct from proposals of minimum prices and shall in each case be accompanied by such pertinent data as will enable the Commission to determine that said proposals are in conformity with the requirements of said Act and the orders of the Commission.

3. That such proposed initial classifications of coals of all code members within the respective districts as submitted to the Commission by the several District Boards will be on file in the office of the Secretary of the Commission on the 23rd day of September, 1937, and will be available for inspection thereafter during office hours by all interested parties until the time for the hearing hereinafter prescribed.

4. That a hearing shall be held by the Commission on the 27th day of September, 1937, commencing at 10:00 o'clock A. M., in the Hearing Room of the Commission at the Carlton Hotel, Washington, D. C., for the purpose of receiving evidence to enable the Commission to establish the initial classifications of coals of all code members within the several districts.

5. Any code member aggrieved by any decision of a District Board in relation to proposed classifications or reclassifications of coals may, as provided in Section 6 (a) of the Act, obtain a review of the action of the District Board upon petition made in conformity with the Rules of Practice and Procedure established by the Commission, and pending hearing and decision upon such petition the Commission may enter such temporary or preliminary order in the case as in its judgment may be appropriate and not inconsistent with the provisions of the Act.

The Secretary of the Commission shall forthwith mail copies of this order to the Consumers' Counsel, to the Secretaries of all District Boards, and to all code members within the respective districts.

By order of the Commission.

Dated this 10th day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary.*

## FEDERAL HOME LOAN BANK BOARD.

### Home Owners' Loan Corporation.

AMENDING REGULATIONS WITH RESPECT TO EMPLOYEES ACTING IN FIDUCIARY CAPACITIES

Be it resolved, That pursuant to the authority vested in the Board by Home Owners' Loan Act of 1933 (48 Stat. 128, 129) as amended by Sections 1 and 13 of the Act of April 27, 1934 (48 Stat. 643–647) and particularly by Sections 4–a and 4–k of said Act as amended, a resolution adopted on June 4, 1936 with respect to employees appointed by a court to act in a fiduciary capacity, be amended to read as follows:

Any claim or suit against an employee who is appointed by a Court to act in a fiduciary capacity for the convenience of the Corporation, which claim or suit is predicted upon duties or responsibilities devolving upon him within the proper scope of his office, shall be handled as if it were a claim or suit against the Corporation, and any expense or liability resulting therefrom which he is required to pay or discharge shall be assumed and paid by the Corporation, provided no willful malfeasance is involved. The General Manager and the General Counsel are hereby authorized to prescribe such instructions and procedure as they may deem necessary for proper administration under these provisions.

Be it further resolved, That the first paragraph contained in said resolution adopted by the Board on June 4, 1936 insofar as it provided for amendment of the Legal Chapters of the Manuals is hereby revoked.

Adopted by the Federal Home Loan Bank Board on September 10, 1937.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 9th day of September, A. D. 1937.

[File No. 43–40]

IN THE MATTER OF MINNESOTA UTILITIES COMPANY

NOTICE OF AND ORDER FOR HEARING

Minnesota Utilities Company, a subsidiary of American Utilities Service Corporation, which is a registered holding company, has filed with this Commission a further amendment to the declaration, as previously amended, heretofore filed by it so as to cause such declaration as amended to relate to the issue and sale by said Minnesota Utilities Company to said American Utilities Service Corporation, for $48,500 in cash, of 2,000 shares of common stock without par value instead of a promissory note in the principal amount of $48,500.

It is ordered that a hearing on such declaration as amended be held on September 21, 1937, at 10:00 o'clock in the forenoon of that day at Room 209, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before September 16, 1937.

It is further ordered that Robert P. Reeder, an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

[File No. 47-16]

IN THE MATTER OF PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE

NOTICE OF AND ORDER FOR HEARING

An application having been duly filed with this Commission, by Public Service Company of New Hampshire, a subsidiary of a registered holding company, pursuant to Section 10 of the Public Utility Holding Company Act of 1935, for approval of its acquisition, through liquidation of its wholly owned subsidiary, Manchester Street Railway, of all the assets and franchises of said Manchester Street Railway;

It is ordered that a hearing on such matter be held on September 30, 1937, at 10:00 o'clock in the forenoon of that day at Room 1103, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before September 25, 1937.

It is further ordered that Charles S. Moore, an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

[File No. 46-67]

IN THE MATTER OF AMERICAN UTILITIES SERVICE CORPORATION

[Public Utility Holding Company Act of 1935, Section 9 (c) (3)]

ORDER GRANTING EXEMPTION OF ACQUISITION OF SECURITIES BY HOLDING COMPANY

American Utilities Service Corporation, a registered holding company, having filed an application with this Commission, pursuant to Section 10 (a) (1) of the Public Utility Holding Company Act of 1935, for approval of its acquisition of 62,912 shares of the common stock of Peoria Service Company, of the par value of $5 per share; a hearing on said application, as amended, having been held after appropriate notice; the record in this matter having been examined; the Commission having made and filed its findings herein; and it appearing that appropriate relief may be granted under Section 9 (c) (3) of the Act;

It is ordered that such acquisition by applicant of the aforesaid securities in accordance with the terms and conditions set forth in, and for the purposes represented by, said application, as amended, be and the same hereby is exempted from the provisions of Section 9 (a) of said Act.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

*United States of America—Before Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 10th day of September, A. D. 1937.

IN THE MATTER OF MARLIN-ROCKWELL CORPORATION COMMON CAPITAL STOCK PAR VALUE $1.00

ORDER POSTPONING HEARING UNDER SECTION 19 (A) (2) OF THE SECURITIES EXCHANGE ACT OF 1934 AS AMENDED AND DESIGNATING OFFICER TO TAKE TESTIMONY

The Commission, having heretofore, on July 3, 1937, ordered that a hearing under Section 19 (a) (2) of the Securities Exchange Act of 1934 as amended be held on July 14, 1937, to determine whether to suspend for a period not exceeding twelve months or to withdraw the registration of the Common Capital Stock, par value $1.00 of the Marlin-Rockwell Corporation on the New York Stock Exchange; and having on July 13, 1937, ordered such hearing postponed to September 13, 1937; and Marlin-Rockwell Corporation having on September 9, 1937, filed certain additional information as a part of its annual report on Form 10-K for the year ended December 31, 1935;

It is ordered that such hearing be postponed to Wednesday, October 13, 1937 at 10:00 A. M. in Room 1103, Securities and Exchange Commission Building, 1778 Pennsylvania Avenue, N. W., Washington, D. C., and continue thereafter at such time and place as the officer hereinafter designated may determine; and

It is further ordered that for the purposes of such proceeding, Richard Townsend, an officer of the Commission, be and he hereby is designated to administer oaths and affirmations, subpoena witnesses, compel their attendance, take testimony and require the production of any books, papers, correspondence, memoranda or other records deemed relevant or material to the inquiry and to perform all other duties in connection therewith authorized by law.

By direction of the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

## VETERANS' ADMINISTRATION.

REVISION OF REGULATIONS

PENSION AND COMPENSATION BENEFITS PAYABLE TO DEPENDENTS OF VETERANS (PUBLIC NO. 304, 75TH CONGRESS)

CONTENTS

Accrued Benefits ..... R–2662, 2664
Awards, Date of ..... R–2574, 2576, 2582, 2590
Awards, Protected ..... R–2611
Eligibility Requirements ..... R–2530(B), 2538, 2548
Rates, Payable ..... R–2622, 2623, 2640
Relationship, Definition ..... R–2508, 2514

*Spanish-American War, Boxer Rebellion, Philippine Insurrection, Peace-Time Service*

R–2508. For the purposes of Public No. 2, 73d Congress (Act of March 20, 1933), the following definitions of relationship shall govern in the adjudication of claims for death pension:

(A) *Widow.*—The term "widow" of a veteran of the Spanish-American War, the Boxer Rebellion, or the Philippine Insurrection, shall mean a person who was married to the veteran prior to September 1, 1922; of a peace-time veteran—who was married to the veteran prior to the expiration of ten years subsequent to his discharge from the enlistment during which the injury or disease, on account of which claim is being filed, was incurred. (V. R. 10 (b), Par. V.) (August 16, 1937.)

(B) *Child.*—The term "child" shall mean a legitimate child or a child legally adopted, unmarried, and under the age of eighteen years, unless prior to reaching the age of eighteen, the child becomes or has become permanently incapable of self-support by reason of mental or physical defect, except that the payment of pension or compensation shall be further continued after the age of eighteen years and until completion of education or training (but not after such child reaches the age of twenty-one years), to any child who is or may hereafter be pursuing a course of instruction at a school, college, academy, seminary, technical institute or university, particularly designated by him and approved by the Administrator, which shall have agreed to report to the Administrator the termination of attendance of such child, and if any such institution of learning fails to make such report promptly the approval shall be withdrawn. (V. R. 10 (a), Par. VI.) The children of a veteran, adopted out of the family of the veteran, are children within the meaning of this paragraph. (A. D. 280.) State laws as to legitimacy are applicable. (12 Sol. 148.)

(C) *Mother-father.*—The term "mother" or "father" shall mean a natural mother or father of the veteran, or mother or father of the veteran through legal adoption. (V. R. 10 Par. VII.) (January 25, 1936.)

R–2510 canceled August 16, 1937.

*World War*

R–2514. For the purposes of adjudicating claims for death compensation pending on August 16, 1937 filed prior to that date, the definition of widow under the laws in effect on August 15, 1937 shall be for application. For the purposes of adjudicating claims for death compensation filed on or after August 16, 1937 under any law granting such benefits to dependents of deceased World War veterans, the following definitions of relationship shall govern.

(A) (1) *Widow.*—The term "widow" of a World War veteran except as to claims arising under Section 1 of Public No. 304, 75th Congress, (Act of August 16, 1937), (See R. & P. R–2514 (A) (2), shall mean a woman:

(a) Who was married prior to July 3, 1931 to the person who served; or

(b) Who was married at any time to the person who served provided a child was born of such marriage; provided that as to (a) and (b) hereof the widow

(c) Must have lived continuously with the person who served from the date of marriage to the date of death, except where there was a separation which was due to the misconduct of or procured by the person who served, without the fault of the widow, and

(d) Must not have remarried since the death of the person who served.

(2) For the purposes of Section 1 of Public No. 304, 75th Congress, (Act of August 16, 1937), the term "widow" of a World War veteran shall mean a woman:

(a) Who was married at any time to the person who served provided a child was born of their marriage and proof of birth of such child is established as provided in R. & P. R–1046 and 2034, and

(b) Who lived continuously with the person who served from the date of marriage to the date of death, except where there was a separation which was due to the misconduct of or procured by the person who served, without the fault of the widow, and

(c) who has not remarried since the death of the person who served.

(B) *Child.*—(1) For the purposes of Public No. 2, 73d Congress (Act of March 20, 1933), the term "child" shall mean the same as under R. & P. R–2508 (B).

(2) For the purposes of Section 28, Title III, Public No. 141, 73d Congress (Act of March 28, 1934), Public No. 484, 73d Congress (Act of June 28, 1934), as amended by Public No. 844, 74th Congress (Act of June 29, 1936) *and Public No. 304, 75th Congress (Act of August 16, 1937)*, the term "child" shall mean a person unmarried and under the age of eighteen years, unless prior to reaching the age of eighteen the child becomes or has become permanently incapable of self-support by reason of mental or physical defect, who is a legitimate child, a child legally adopted, a stepchild if a member of the man's household, an illegitimate child, but as to the father, only if acknowledged in writing signed by him or if he has been judicially ordered or decreed to contribute to such child's support, or has been prior to date of death of the veteran judicially decreed to be the putative father of such child, provided, that the payment of compensation shall be continued after the age of eighteen years and until completion of education or training (but not after such child reaches the age of twenty-one years), to any child who is or may hereafter be pursuing a course of instruction at a school, college, academy, seminary, technical institute, or university particularly designated by him and approved by the Administrator, which shall have agreed to report to the Administrator the termination of attendance of such child, and if any such institution of learning fails to make such report promptly the approval shall be withdrawn. (Section 3, World War Veterans' Act, 1924, as amended.)

(C) *Mother-father.*—(1) For the purposes of Public No. 2, 73d Congress (Act of March 20, 1933) the term "mother" or "father" shall mean the same as under R. & P. R–2508 (C).

(2) For the purposes of Section 28, Title III, Public No. 141, 73d Congress (Act of March 28, 1934) *and Public No. 304, 75th Congress (Act of August 16, 1937)*, the terms "mother" and "father" shall include stepmothers and stepfathers, mothers and fathers through adoption, and persons who have stood in loco parentis to a member of the military or naval forces at any time prior to his enlistment or induction for a period of not less than one year. (Section 3 (5), World War Veterans' Act, 1924, as amended.) (August 16, 1937.)

*Death of Veteran Due to War Time Service: Public No. 2, 73d Congress*

R–2530 (A) *Spanish-American War.*—For the purposes of Public No. 2, 73d Congress, (Act of March 20, 1933), the surviving widow, child or children and/or dependent mother or father of any deceased person who died as a result of injury or disease incurred in or aggravated by active military or naval service during the Spanish-American War, Boxer Rebellion, or Philippine Insurrection, as provided for in Veterans Regulation No. 1 (a), Part I, Paragraph 1, shall be entitled to receive pension at the monthly rates specified in R. & P. R–2622 (A) and (B).

(B) *World War.*—For the purposes of Public No. 2, 73d Congress (Act of March 20, 1933) the surviving widow, child or children and dependent mother or father of any deceased person who died as a result of injury or disease incurred in or aggravated by active military or naval service during the World War, *as* provided for *in Veterans Regulation No.* 1 (a), *Part* 1, *Paragraph* 1, shall be entitled to receive compensation at the monthly rates specified in R. & P. R–2622 (A) and (B) or to compensation at the increased rates provided by Public No. 304, 75th Congress (Act of August 16, 1937), as specified in R. & P. R–2623, under conditions set forth in R. & P. R–2574 and 2582. Effective August 16, 1937, service

prior to July 2, 1921, during an enlistment entered into after November 11, 1918, shall be considered as World War service, provided the person who served, also served after April 5, 1917 and prior to November 12, 1918, and death occurred or was due to a disability incurred, or to the aggravation of a disease or injury suffered, during the reenlistment and prior to July 2, 1921. (Section 5, Public No. 304, 75th Congress.) (August 16, 1937.)

*Death Due to Service, Directly or Presumptively: Section 28, Title III, Public No. 141, 73d Congress*

R–2538. For the purposes of Section 28, Title III, Public No. 141, 73d Congress (Act of March 28, 1934), and Section 3 of Public No. 304, 75th Congress (Act of August 16, 1937) the surviving widow, child or children and dependent parents of a World War veteran who dies or has died from disease or injury and service connection for such disease or injury has been reestablished on or after March 28, 1934, as service-connected under Section 200 of the World War Veterans' Act, 1924, as amended, or which would have been established under said Section 200, had the veteran been living on March 19, 1933, and reestablished on or after March 28, 1934, shall be entitled to receive compensation at the monthly rates specified in R. & P. R–2622 (A) or (B) and R–2623. (Section 28, Public No. 141, 73d Congress, and Section 3, Public No. 304, 75th Congress.)

(A) Death compensation is not payable under Section 28 unless the veteran entered the active military or naval service prior to November 12, 1918, or unless the veteran entered active military service subsequent to November 11, 1918, and served with the United States military forces in Russia prior to April 2, 1920; provided, that effective August 16, 1937 service rendered prior to July 2, 1921, during an enlistment entered into after November 11, 1918, shall be considered as World War service provided the veteran also served after April 5, 1917, and prior to November 12, 1918, provided death occurred, or was due to a disability incurred, or to the aggravation of a disease or injury suffered during the reenlistment and prior to July 2, 1921. (Section 28, Public No. 141, 73d Congress; and Section 2, Public No. 344, 74th Congress; and Section 5, Public No. 304, 75th Congress.) (August 16, 1937.)

*Death of World War Veteran While Receiving or Entitled to Receive Compensation, Pension, or Retirement Pay for Disability of 20 Per Centum or More or 30 Per Centum or More*

R–2548. For the purposes of Public No. 484, 73d Congress, (Act of June 28, 1934), and Public No. 844, 74th Congress (Act of June 29, 1936), the widow, as defined in R. & P. R–2514, (A) (1), and child or children of a person who served with the United States military or naval forces in the World War before November 12, 1918, or before April 2, 1920, if service was in Russia, and who dies or has died of a disability not due to service while receiving or entitled to receive at the time of death, compensation, pension, or retirement pay for a disability of 30 per centum or more directly or presumptively incurred in or aggravated by service after April 5, 1917, and before July 2, 1921, shall be entitled to receive compensation at the monthly rates specified in R. & P. R–2640; provided that in conformity with Section 1 of Public No. 304, 75th Congress, if the person who served was receiving or entitled to receive at the time of death, compensation, pension, or retirement pay for a disability of 20 per centum or more and less than 30 per centum directly or presumptively incurred in or aggravated by service as above provided, the widow as defined in R. & P. R–2514 (A) (2), or if there be no widow, the child or children shall be entitled to receive compensation at the monthly rates specified in R. & P. R–2640.

(A) *Establishment of Service-Connected Disability of 20 Per Centum or More and of 30 Per Centum or More.*—On and after August 16, 1937, the existence of the directly or presumptively service-connected disease or injury *at death* and the determination of a 20 per centum or 30 per centum disability or more resulting from such disease or injury may be based upon evidence filed subsequent to death, but proof of the required percentage of disability at death and evidence as to service connection must be filed not later than three years after August 16, 1937, or the date of death, whichever is the later; provided that a disease or injury or an aggravation thereof will be considered as having been established to the satisfaction of the Veterans Administration where the evidence of record in the Veterans Administration, or in the War or Navy Departments, shows the existence of such disease or injury as having been directly or presumptively incurred in or aggravated by service. Any disability that may be properly directly service connected under the provisions of Public No. 2, 73d Congress, or Section 28, Public No. 141, 73d Congress, or under the law in effect at the time of death will be considered directly service connected for the purpose of Public No. 484, 73d Congress, as amended, and any disability that may be properly presumptively service connected under the provisions of Sections 26, 27, and 28 of Public No. 141, 73d Congress, or under the law in effect at the time of death will be considered presumptively service connected for the purpose of Public No. 844, 74th Congress, as amended. An existing rating of 20 per centum or more or of 30 per centum or more shall not include ratings of temporary total granted solely by reason of hospitalization or treatment.

(B) *Rating of 20 Per Centum or More or 30 Per Centum or More Previously Established Assumed to be Correct.*—In the case of any deceased person who served in the World War in which an existing rating of 20 per centum or more and less than 30 per centum or of 30 per centum or more has been established by a proper rating agency based on a directly or presumptively service connected disease or injury, as defined in subparagraph (A) above, such rating will be assumed to be correct except for fraud, clear, or unmistakable error as to conclusions of fact or law, or misrepresentation of a material fact, regardless of the particular rating schedule under which evaluated, and will be accepted as having established service connection and degree of disability sufficient to constitute title to compensation in the widow, child, or children of the deceased, in accordance with the provisions of Public No. 484, 73d Congress (Act of June 28, 1934) Public No. 844, 74th Congress (Act of June 29, 1936) and Public No. 304, 75th Congress (Act of August 16, 1937).

(C) *Rating schedules to be used in evaluation of disability.*—In any case where a deceased person who served in the World War was receiving or entitled to receive at the date of death, compensation, pension or retired pay for less than a 20 per centum or a 30 per centum disability directly or presumptively incurred in or aggravated by service in the World War, as defined in subparagraph (A) above, and proof of a 20 per centum of a 30 per centum disability or more at date of death has been filed not later than three years subsequent to August 16, 1937, or the date of death, whichever is the later, the degree of disability will be evaluated in accordance with the schedule of disability ratings in effect at the time of death, or the Schedule of Disability Ratings, 1925, and extensions thereto, or the Schedule for Rating Disabilities, 1933, second edition, whichever provides the higher rating for the disease or injury evaluated. In such cases, the burden of proof shall be upon the claimant to show that the 20 per centum or 30 per centum disability existed at the date of death.

(D) *Discharge Requirements.*—The requirements as to discharge must conform to Section 23 of the World War Veterans Act, 1924, as amended (Section 447, Title 38, U. S. Code).

(E) *Federal Income Tax Exemption.*—Exemption from the payment of Federal income tax for the preceding year is a requisite to title to compensation in any person under Public No. 484, 73d Congress (Act of June 28, 1934), as amended.

(F) *"Person Who Served," Definition of.*—The term "person who served" includes both men and women commissioned, enrolled, enlisted or drafted, who were finally accepted for active service, including members of training camps authorized by law, and such other persons as have been heretofore recognized by statute as having a pensionable or compensable status.

(G) *Misconduct.*—Death resulting from misconduct of the person who served is a ground for denial of compensation under the provisions of Public No. 484, 73d Congress but not under Public No. 844, 74th Congress and Public No. 304, 75th Congress. See R. & P. R–2576 (B). (August 16, 1937.)

*Public No. 2 and Sections 28 and 31, Title III, Public No. 141, 73d Congress.*

2574. Original awards of death pension or compensation under Public No. 2, 73d Congress (Act of March 20, 1933), and Sections 28 and 31, Title III, Public No. 141, 73d Congress (Act of March 28, 1934), shall commence as follows:

(A) For the purposes of Public No. 2, 73d Congress, and Sections 28 and 31, Title III, Public No. 141, 73d Congress, the effective date of an award of death pension or compensation shall be fixed in accordance with the facts found, except that no award of death pension or compensation shall be effective prior to the date of the veteran's death, date of the happening of the contingency upon which death pension or compensation is allowed, or *the date of receipt of application therefor*, whichever is the later date; provided that in World War cases, if application is filed on or after August 16, 1937, and within one year from the date of death, the effective date shall be August 16, 1937, or the day following the date of death, whichever is the later, except that the increased rates of death compensation authorized solely under Public No. 304, 75th Congress, shall not be awarded from a date earlier than September 1, 1937. (See R. & P. R–2576.)

(B) Awards pursuant to claims allowed upon new and material evidence relating to the same factual basis as that of a finally disallowed claim shall commence from the date of receipt of such evidence or accompanying communication when such evidence or accompanying communication meets the requirements as to what constitutes an informal claim under current precedents and instructions; provided, if the new and material evidence is submitted within one year from the date of death of veteran, the award shall be effective from the day following the date of the veteran's death, but in no event prior to August 16, 1937. (V. R. No. 2 (d)). See also R. & P. R–1201 and 1205. (August 16, 1937.)

(C) Awards to *children* for whom a widow is in receipt of pension or compensation when her pension or compensation is terminated upon the happening of the contingency upon which it is limited, shall commence from the day following the termination of the widow's award, without the necessity of filing an application. (13 Sol. 689.)

(D) Any claim filed prior to March 19, 1935, *by a dependent mother or father* which was pending on that date and which would have been disallowed for the reason that dependency did not exist within ten years subsequent to the death of the veteran, shall be allowed effective March 19, 1935, provided entitlement is otherwise established. Any claim filed subsequent to March 19, 1933, under Public No. 2, 73d Congress, and disallowed for the reason that dependency was not established within the required period of time, may, upon written notice from the claimant or his representative to the Veterans Administration, be revived at any time prior to March 19, 1936, and when entitlement is otherwise established payments shall commence March 19, 1935. (V. R. No. 2 (d)). (January 25, 1936.)

*Public No. 484, 73d Congress, as Amended by Public No. 844, 74th Congress and Public No. 304, 75th Congress*

2576. Original awards of death compensation under Public No. 484, 73d Congress (Act of June 28, 1934) and Public No. 844, 74th Congress (Act of June 29, 1936), shall commence:

(A) If the person who served died from a disease or injury not service connected and not the result of his own misconduct, as defined in Veterans Regulation No. 10, Paragraph IX, while receiving or entitled to receive compensation, pension, or retirement pay for a 30 per centum disability or more *directly* connected with service:

(1) On June 28, 1934, in those cases in which death of the person who served occurred prior to June 28, 1934:

(2) The date of filing application in those cases wherein death of the person who served occurred on or subsequent to June 28, 1934, except if application is filed on or after August 16, 1937 and within one year from date of death, August 16, 1937 or the day following the date of death, whichever is the later.

(B) If the person who served died under the conditions set forth in subparagraph (A) hereof, except that his death was the result of his own misconduct; or, whether or not the result of misconduct, if death occurred while he was receiving or entitled to receive compensation, pension, or retirement pay for a disability of 30 per centum or more *presumptively* connected with service or under a combined service-connected disability rating of 30 per centum or more when the directly service-connected disability was less than 30 per centum disabling:

(1) The date of filing application or June 29, 1936, whichever is the later, except if application is filed on or after August 16, 1937, and within one year from date of death, August 16, 1937, or the day following the date of death, whichever is the later;

(2) Any claim filed subsequent to March 19, 1933, and prior to June 29, 1936, under Public No. 2, Public No. 141, or Public No. 484, 73d Congress (Acts of March 20, 1933, March 28, 1934, and June 28, 1934) disallowed under Public No. 484, 73d Congress, or abandoned prior to June 29, 1936, under such laws may, upon written notice from the claimant or his representative to the Veterans' Administration, be revived at any time prior to June 30, 1937, and when title is otherwise established payments under Public No. 844, 74th Congress (Act of June 29, 1936) shall commence on the date of its enactment; provided that in any claim adjudicated under Public No. 484, 73d Congress in which the claimant or his representative has not been notified of the allowance thereof, or if a claim under Public No. 2, Public No. 141, or Public No. 484, 73d Congress was pending on June 29, 1936, it shall be considered an application under Public No. 844, 74th Congress without the written notice required herein and, if allowed, payments thereunder shall commence June 29, 1936.

(C) If the person who served died while receiving or entitled to receive compensation, pension, or retirement pay for a 20 per centum or more but less than 30 per centum disability directly or presumptively connected with service:

(1) August 16, 1937, or the day following the date of death, whichever is the later, if application is filed within one year from the date of death:

(2) August 16, 1937, or the date of filing application, whichever is the later, if application is *not* filed within one year from the date of death;

(3) Any claim filed subsequent to March 19, 1933 and prior to August 16, 1937 under any law granting pension or compensation to a widow or child of a World War veteran, disallowed or abandoned prior to August 16, 1937, under such laws, may upon written notice from the claimant or the claimant's representative to the Veterans' Administration, be revived at any time prior to August 16, 1938; and when title is otherwise established, payments under Section 1, Public No. 304, 75th Congress (Act of August 16, 1937) shall commence August 16, 1937, date of approval of the Act, provided that in any claim adjudicated under Public No. 484, 73d Congress or Public No. 844, 74th Congress in which the claimant or the claimant's representative has not been notified of the disallowance thereof, or if a claim under Public No. 2, Public No. 141, or Public No. 484, 73d Congress or Public No. 844, 74th Congress was pending on August 16, 1937, it shall be considered an application under Public No. 304, 75th Congress without the written notice required herein, and, if allowable only under the latter act shall commence August 16, 1937.

(D) In the event a claim filed under this paragraph is not complete at the date of filing thereof in the Veterans' Administration, the claimant will be notified of the evidence necessary to complete the claim and if such evidence is not

received within one year from the date of the request therefor, compensation will not be paid by reason of the filing of that claim. (August 16, 1937.)

*Public No. 2 and Sections 28 and 31, Title III, Public No. 141, 73d Congress*

R–2582. The effective date of an award of increased pension or compensation payable under Public No. 2, 73d Congress, or Sections 28 and 31 Title III, Public No. 141, 73d Congress, shall be fixed in accordance with the facts found, except that:

(A) No award of increased pension or compensation may be effective prior to the date of receipt of the evidence showing entitlement thereto;

(B) For the purposes of the preceding subparagraph, increased pension or compensation shall be taken to mean any award of pension or compensation, amending, reopening, or supplementing a previous award, authorizing any payments not theretofore authorized to the particular individual involved. (V. R. No. 2 (a), Part I, Par. II.)

(C) *World War Widow or Parent on Rolls August 16, 1937.*—Subject to the provisions of subparagraph (A) and (B) of this paragraph, where the widow or parent of a World War Veteran, including a veteran who served as provided in Section 5, Public No. 304, 75th Congress, was on the rolls on August 16, 1937, compensation at the rates provided in Section 3, Public No. 304, 75th Congress, shall be effective August 16, 1937, provided that the rate of compensation shall be as prescribed in subparagraphs (1), (2), or (3) of this subparagraph if the widow or parent was in receipt of Government insurance on August 16, 1937, or thereafter.

(1) The rates under Section 3, Public No. 304, 75th Congress, shall not be payable until the date following the ending date of the insurance award while the combined monthly rates of compensation and insurance being paid on or after August 16, 1937, equal or exceed the rates prescribed in Section 3.

(2) If the combined monthly rates of compensation and insurance being paid on or after August 16, 1937, do *not* equal or exceed the rates prescribed in Section 3, Public No. 304, 75th Congress, and a greater rate of compensation is not payable under Veterans Regulation No. 1 (g) as provided in subparagraph (3) of this subparagraph, the amount of compensation payable while the insurance is being paid shall be that which equals the difference between the amount of the monthly installment of insurance and the rate of compensation otherwise payable under Section 3, subject to increase at the full rate prescribed in Section 3 from the day following the ending date of the insurance award.

(3) Rates and increases of compensation rates shall be paid under Veterans Regulation No. 1 (g) on or after August 16, 1937, in those cases in which the greater amount of compensation is payable under such regulation, without regard to the amount of insurance being paid.

(D) *World War Widow or Parent NOT on the Rolls August 16, 1937.*—Widows or parents in World War cases placed on the compensation rolls effective on or after August 16, 1937 shall be paid for any period over which they may be entitled to compensation at the rates and increases of rates prescribed under subparagraph (C) of this paragraph, except that no rate prescribed under Section 3, Public No. 304, 75th Congress, in excess of the rate provided under Veterans Regulation No. 1 (g) shall be effective prior to September 1, 1937.

(E) For the purposes of subparagraphs (C) and (D) of this section the term "on the rolls" shall include those who are placed on the rolls effective as of a date prior to August 16, 1937. (August 16, 1937.)

*Effective Dates of Readjustment in Rates to Dependents*

Readjustment After Contingency—Public No. 2, 73d Congress (Act of March 20, 1933), Sections 28 and 31, Title III, Public No. 141, 73d Congress (Act of March 28, 1934), Public No. 304, 75th Congress (Act of August 16, 1937), and Public No. 484, 73d Congress (Act of June 28, 1934), as Amended

R–2590. In any claim under Public No. 2, 73d Congress, or Sections 28 and 31, Title III, Public No. 141, 73d Congress, Public No. 304, 75th Congress (Act of August 16, 1937), and Public No. 484, 73d Congress, as amended, in which death pension or compensation is being paid the widow and other dependents of a person who served, and an adjustment in the rates payable becomes necessary because of the death, remarriage or forfeiture of title of one or more of the beneficiaries, readjustment will be made without the filing of a formal application. The rates for the remaining beneficiary or beneficiaries shall be the amount which would have been payable if they had been the sole original beneficiaries and will become effective the day following the date of discontinuance of payments under the prior award. (V. R. No. 2 (a)) (August 16, 1937.)

*Protected Awards—Death Cases*

R–2611. In no event shall Section 4 of Public No. 304, 75th Congress (Act of August 16, 1937) be construed so as to require a reduction or discontinuance of death compensation to widows of deceased World War veterans to whom death compensation payments were authorized prior to the date of enactment of such Act. All widows properly on the rolls on the date of enactment of such Act shall be entitled to the increased rates authorized in Section 3 of such Act (August 16, 1937.)

*Rates Under Public No. 2, 73d Congress (Act of March 20, 1933) and Section 28, Title III, Public No. 141, 73d Congress (Act of March 28, 1934.)*

R–2622. The following rates are payable under the regulations promulgated pursuant to authority of Public No. 2, 73d Congress (Act of March 20, 1933) for death resulting from active military or naval service subsequent to April 20, 1898, and in World War cases prior to the dates when awards under Public No. 304, 75th Congress, (Act of August 16, 1937) become effective. See R. & P. R–2623.

(A) *Rates from March 20, 1933, to March 31, 1935, Inclusive—War-Time Service.*

| | Per Month | |
|---|---|---|
| Widow but no child | $30.00 | |
| Widow and one child (with $6 for each additional child) | 40.00 | |
| No widow but one child | 20.00 | |
| No widow but two children | 30.00 | (equally divided) |
| No widow but three children (with $5 for each additional child; total amount to be equally divided) | 40.00 | (equally divided) |
| Dependent mother or father | 20.00 | |
| (or both) | 15.00 | each |

The total pension payable under this subparagraph shall not exceed $75.00. Where such benefits would otherwise exceed $75.00 the amount of $75.00 may be apportioned as prescribed in R. & P. R–2592. (V. R. No. 1 (a), Part I, Par. IV)

(B) *Rates on and After April 1, 1935, for War-Time Service.*

| | Per Month | |
|---|---|---|
| Widow under 50 years of age | $30.00 | |
| Widow 50 years to 65 years of age | 35.00 | |
| Widow over 65 years of age | 40.00 | |
| Widow with one child, $10 additional for such child up to 10 years of age, increased to $15 from age 10 (with $8 for each additional child up to 10 years of age, increased to $13 from age 10) | | |
| No widow but one child | 20.00 | |
| No widow but two children | 33.00 | (equally divided) |
| No widow but three children | 46.00 | (equally divided) |
| (with $8 for each additional child; total amount to be equally divided) | | |
| Dependent mother or father | 20.00 | |
| (or both) | 15.00 | each |

The total pension payable under this subparagraph shall not exceed $75.00. Where such benefits would otherwise exceed $75.00 the amount of $75.00 may be apportioned as prescribed in R. & P. R–2592. (V. R. No. 1 (g), Par. 1)

(C) *Rates From March 20, 1933, to March 31, 1935, inclusive—For Peace-Time Service.*

| | Per Month | |
|---|---|---|
| Widow but no child | $22.00 | |
| Widow and one child (with $4 for each additional child) | 30.00 | |
| No widow but one child | 15.00 | |
| No widow but two children | 22.00 | (equally divided) |
| No widow but three children (with $3 for each additional child; total amount to be equally divided) | 30.00 | (equally divided) |
| Dependent mother or father | 15.00 | |
| (or both) | 11.00 | each |

The total pension payable under this subparagraph shall not exceed $56.00. Where such benefits would otherwise exceed $56.00 the amount of $56.00 may be apportioned as prescribed by R. & P. R–2592. (V. R. 1 (a) Part II, Par. III.)

(D) *Rates on and after April 1, 1935, for Peace-time Service.*

| | Per Month | |
|---|---|---|
| Widow under 50 years of age | $22.00 | |
| Widow 50 years to 65 years of age | 26.00 | |
| Widow over 65 years of age | 30.00 | |
| Widow with one child, $7 additional for such child up to 10 years of age, increased to $11 from age 10 (with $6 for each additional child up to 10 years of age, increased to $9 from age 10) | | |
| No widow but one child | 15.00 | |
| No widow but two children | 24.00 | (equally divided) |
| No widow but three children | 34.00 | (equally divided) |
| (with $6 for each additional child; total amount to be equally divided) | | |
| Dependent mother or father | 15.00 | |
| (or both) | 11.00 | each |

The total pension payable under this subparagraph shall not exceed $56.00. Where such benefits would otherwise exceed $56.00 the amount of $56.00 may be apportioned as prescribed by R. & P. R–2592. (V. R. No. 1 (g) Par. 2.) (August 16, 1937.)

*Rates Under Public No. 304, 75th Congress (Act of August 16, 1937), World War Only*

R. 2623. The following rates are payable under provisions of Section 3 of Public No. 304, 75th Congress (Act of August 16, 1937) for death resulting from active military or naval service rendered during the World War as defined in R. & P. R–2538 and in accordance with the conditions and limitations specified in R. & P. R–2574 and 2582.

| | Per Month | |
|---|---|---|
| Widow under 50 years of age | $30.00 | |
| Widow 50 years to 65 years of age | 37.50 | |
| Widow over 65 years of age | 45.00 | |
| Widow with one child, $10 additional for such child up to 10 years of age, increased to $15 from age 10 (with $8 for each additional child up to 10 years of age, increased to $13 from age 10). | | |
| No widow but one child | 20.00 | |
| No widow but two children | 33.00 | (equally divided) |
| No widow but three children | 46.00 | (equally divided) |
| (with $8 for each additional child; total amount to be equally divided). | | |
| Dependent mother or father | 45.00 | |
| (or both) | 25.00 | each |

As to the widow, child, or children, the total compensation payable under this paragraph shall not exceed $75.00.

As to a widow, and child or children not in her care and custody, any amount payable under this paragraph may be apportioned as prescribed in R. & P. R–2592. (August 16, 1937.)

*Rates Under Public No. 484, 73d Congress (Act of June 28, 1934), as Amended*

R–2640. Rates of death compensation payable under Public No. 484, 73d Congress (Act of June 28, 1934) as amended by Public No. 844, 74th Congress (Act of June 29, 1936) and as amended by Sections 1 and 2, Public No. 304, 75th Congress (Act of August 16, 1937), where death was not the result of service and a veteran of the World War was receiving or entitled to receive compensation for a 20 per centum or more disability at the time of death. (August 16, 1937.)

| | Per Month | |
|---|---|---|
| Widow but no child | $22.00 | |
| Widow and one child (with $4 for each additional child) | 30.00 | |
| No widow but one child | 15.00 | |
| No widow but two children | 22.00 | (equally divided) |
| No widow but three children (with $3 for each additional child, total amount to be equally divided) | 30.00 | (equally divided) |

The total compensation payable under this paragraph shall not exceed $56.00. Where such benefits would otherwise exceed $56.00, the amount of $56.00 may be apportioned as prescribed in R. & P. R–2592 (F). (January 25, 1936.)

*Accrued Benefits: V. R. No. 2 (a)*

R–2662. Pension, compensation or emergency officers' retirement pay, not paid during the lifetime of the person entitled thereto under Public No. 2, 73d Congress (Act of March 20, 1933), and Sections 26, 27, 28, and 31, Title III, Public No. 141, 73d Congress (Act of March 28, 1934) and under Public No. 304, 75th Congress (Act of August 16, 1937) excepting Sections 1 and 2 (See R. & P. R–2664), shall upon the death of such person be paid under V. R. No. 2 (a), Part I, Par. V, as follows:

(A) *Accrued Amounts Payable to Widow or Children.*—(1) Upon death of the veteran, first to the widow; second, if there is no widow, to his child or children under the age of eighteen years at his death; (2) upon death of the widow, to her children under the age of eighteen years at her death; (3) upon the death of an apportionee prior to payment of all or any part of an apportioned amount of the veteran's pension, compensation, or emergency officers' retirement pay, such apportioned amount not paid shall be payable to the veteran.

(B) *Reimbursement of Burial Expenses.*—In all other cases no payment whatsoever of such pension, compensation, or emergency officers' retirement pay shall be made or allowed except so much as may be necessary to reimburse the person who bore the expense of burial.

(C) *Limitation as to Filing and Perfecting Claim.*—No payment shall be made under subparagraphs (A) and (B) above unless claim therefor shall be filed within one year from the date of the death of the person entitled and perfected by the submission of the necessary evidence within six months from the date of the request of the Veterans Administration therefor. Such payment shall include only payments due and unpaid at the time of death under then existing ratings or decisions. (V. R. No. 2 (a), Par. V).

(D) *Excess Pension, etc., to be Treated as Apportioned.*—See R. & P. R–1285.

(E) *Definition of Term "Widow" for Accrued Claims.*—For the purposes of this paragraph the term "widow" includes "widower" and shall mean the legal widow irrespective of the date of marriage. (V. R. No. 2 series.)

(F) *Definition of Term "Child" for Accrued Claims.*—For the purposes of this paragraph the term "child" shall mean a legitimate child, or an illegitimate child, but as to the father only if acknowledged in writing signed by him or if he has been judicially ordered or decreed to contribute to such child's support or has been judicially decreed to be the putative father of such child, under the age of eighteen years at the date of death of the veteran or widow. (V. R. No. 2 series). (August 16, 1937).

*Accrued Compensation: Public No. 484, 73d Congress (Act of June 28, 1934) as Amended*

R–2664. The amount of compensation which has become payable to a widow or child under Public No. 484, 73d Congress (Act of June 28, 1934), as amended by Public No. 844, 74th Congress (Act of June 29, 1936) and amended by or payable under Sections 1 and 2, Public No. 304, 75th Congress (Act of August 16, 1937) but which has not been paid prior to death, may be awarded only for the purpose

of paying the expenses of last sickness and burial, etc., of the deceased beneficiary and then only in the event that there are no funds available to the estate of the deceased for settlement of those expenses. (August 16, 1937.)

RULES GOVERNING THE SELECTION OF VETERANS TO COMPOSE THE VETERANS CONTINGENT FOR EMERGENCY CONSERVATION WORK

[Supplement No. 7 to Rules Issued October 1, 1934]

SEPTEMBER 4, 1937.

REENROLLMENT

The amendment to Paragraph 13 of Rules Governing the Selection of Veterans To Compose the Veterans' Contingent for Emergency Conservation Work, which was released in Supplement No. 2, September 25, 1935, is hereby amended to read as follows:

The Director of the Civilian Conservation Corps has directed that veterans honorably discharged from the Civilian Conservation Corps on and after September 30, 1935, will not again be eligible for reselection until *six months* after the date of their discharge.

This revision of controlling instructions is for immediate application.

## TREASURY DEPARTMENT.

### Bureau of Internal Revenue.

[T. D. 4761]

VENDING MACHINES FOR TOBACCO PRODUCTS

REGULATIONS NO. 8, RELATING TO THE TAXES ON TOBACCO, SNUFF, CIGARS, AND CIGARETTES, ALSO ON CIGARETTE PAPERS AND TUBES AND PURCHASE AND SALE OF LEAF TOBACCO, AMENDED

*To Collectors of Internal Revenue and Others Concerned:*

Article 163 of Regulations No. 8, as revised, and approved November 12, 1934, is amended to read as follows:

ART. 163. *Vending Machines.*—Vending machines may be used for vending only tobacco products which have been properly packed and stamped by the manufacturers of such products. The tobacco products may be vended either in such packages or directly from such packages as put up by the manufacturers and approved by the Commissioner of Internal Revenue, as provided for in article 109.

Machines designed for the automatic sale of tobacco products must have glass panels through which the packages are plainly visible. The machines must be approved by the Commissioner before their use is authorized. A working model or photographs of such machines, which will show that the construction conforms with the following requirements, must be submitted to the Commissioner for inspection before such machines are used in dispensing tobacco products:

(a) Machines for vending a tobacco product directly from a statutory package must have the glass panels so placed that the internal revenue stamp, together with the required caution notice and marks or brands, are plainly visible. The mechanism for delivery must provide for practically a direct feed of the article from the original stamped package. All of the stamp must remain on the package until the contents are sold, when the emptied package shall be removed immediately and the package and the stamp thereon utterly destroyed. No such emptied package may again be used for a tobacco product under severe penalties imposed by law.

(b) In respect to machines designed to vend only full and unbroken original stamped statutory packages of tobacco products, responsibility for strict compliance with the internal revenue laws and regulations governing the sale of tobacco products will rest with the persons who sell, or offer to sell, tobacco products by means of vending machines, and such persons shall be liable to the penalties prescribed by law for having in possession and selling or offering for sale tobacco products not properly packed and stamped

This Treasury Decision is promulgated under the authority contained in section 321, Revised Statutes and section 3396, Revised Statutes.

[SEAL] GUY T. HELVERING,
*Commissioner of Internal Revenue.*

Approved: September 10, 1937.

ROSWELL MAGILL,
*Acting Secretary of the Treasury.*

### Committee on Enrollment and Disbarment.

[1937 Amendment]

[DEPARTMENT CIRCULAR No. 230 OF 1936 (REVISED)]

LAWS AND REGULATIONS GOVERNING THE RECOGNITION OF AGENTS, ATTORNEYS, AND OTHER PERSONS REPRESENTING CLAIMANTS BEFORE THE TREASURY DEPARTMENT AND OFFICES THEREOF

SEPTEMBER 7, 1937.

Department Circular No. 230 (Revised) of October 1, 1936, Section 2 (y), is hereby amended by the addition of the following sentence thereto: "This requirement shall not be applicable to powers of attorney wherein the authority granted is limited to the filing of tax or information returns." As amended section 2 (y) will read as follows:

(y) No enrolled person shall exact from his client a manifestly unreasonable fee, whether contingent or otherwise, in any matter before the Treasury Department. The reasonableness of a fee in any case is within limits a matter of judgment and depends upon all the facts and circumstances thereof, including the complexity and difficulty of the case, the amount of time and labor required for its proper preparation and presentation, the amount involved, and the professional standing and experience of the attorney or agent.

A wholly contingent fee agreement shall not be entered into with a client by an enrolled person unless the financial status of the client is such that he would otherwise be unable to obtain the services of an attorney or agent. Partially contingent fee agreements are permissible where provision is made for the payment of a minimum fee, substantial in relation to the possible maximum fee, which minimum fee is to be paid and retained irrespective of the outcome of the proceeding. Such minimum fee need not be paid in advance, if provision for its payment is made irrespective of the outcome of the case. The payment of or agreement to pay a nominal minimum fee will not satisfy the requirements of this subsection.

Whenever an enrolled attorney or agent shall enter into a contract to represent a client before the Treasury Department on a wholly or partially contingent basis, he shall file with the Committee a signed statement to that effect, containing the terms of the contract as they relate to compensation.

When a power of attorney is filed with the Treasury Department it shall be the duty of the attorney or agent filing the same to file therewith a statement as follows:

Place _____
Date _____

This is to certify that I {have / have not} entered into a contingent or partially contingent fee agreement for the representation before the Department of _____ in the matter of _____ under the terms of a power of attorney filed with the Treasury Department on _____, and (in case a contingent or partially contingent fee agreement has been made) that a report of such fee agreement {has / has not} been made to the Committee on Enrollment and Disbarment.

_____

This requirement shall not be applicable to powers of attorney wherein the authority granted is limited to the filing of tax or information returns.

[SEAL] WAYNE C. TAYLOR,
*Acting Secretary of the Treasury.*

[F. R. Doc. 37-2747; Filed, September 14, 1937; 12:54 p. m.]

## FARM CREDIT ADMINISTRATION.

[FCA 61]

AMENDMENT OF REGULATION GOVERNING CONSOLIDATION OF NATIONAL FARM LOAN ASSOCIATIONS

In view of the change in the law effected by section 23 of the Farm Credit Act of 1937, approved August 19, 1937, which, on and after September 18, 1937, gives every national farm loan association shareholder one vote and no more, paragraph (3) of Section 40 of the Rules and Regulations approved June 8, 1926, as amended [FLB 989, NFLA EXAM 236, November 12, 1935; Chapter II, Section 18 (c), Federal Register Compilation], is hereby amended to read as follows:

Meetings of stockholders of each constituent association shall be called for the purpose of considering the consolidation and the stockholders present at the meeting, provided there is a quorum present, shall, by a vote of two-thirds of the stockholders present and voting, adopt a resolution ratifying and approving both the resolution which the directors have adopted with respect to the consolidation and the Agreement of Consolidation and Articles of Association executed by the officers on behalf of the associations. The notice of the meeting at which such action is taken must contain a statement that a consolidation will be voted on.

[SEAL] W. J. MCANELLY,
*Acting Land Bank Commissioner.*

## INTERSTATE COMMERCE COMMISSION.

ORDER

At a Session of the Interstate Commerce Commission, Division 5, held at its office in Washington, D. C., on the 9th day of August, A. D. 1937.

[Ex Parte No. MC 10]

IN THE MATTER OF THE CLASSIFICATION OF BROKERS AND MOTOR CARRIERS OF PROPERTY

The matter of classification of brokers and motor carriers of property under Section 204 (c) of the Motor Carrier Act, 1935, being under consideration:

*It is ordered*, That the classification of brokers and carriers of property appearing in the appendix of the attached report be, and it is hereby, approved and adopted:

By the Commission, Division 5.

[SEAL] W. P. BARTEL, *Secretary.*

---

CLASSIFICATION OF MOTOR CARRIERS PROPERTY

IN THE MATTER OF THE CLASSIFICATION OF BROKERS AND MOTOR CARRIERS OF PROPERTY

*Decided August 9, 1937*

Classification of Motor Carriers of Property under Section 204 (c) of the Motor Carrier Act, 1935, Established

REPORT OF THE COMMISSION

DIVISION 5, COMMISSIONERS EASTMAN, LEE, AND CASKIE

BY DIVISION 5:

The Motor Carrier Act, 1935, authorizes and directs us to supervise and regulate the transportation service rendered by motor carriers and brokers. Section 204 (c) provides that

The Commission may from time to time establish such just and reasonable classifications of brokers or of groups of carriers included in the term "common carrier by motor vehicle," or "contract carrier by motor vehicle," as the special nature of the services performed by such carriers or brokers shall require; and such just and reasonable rules, regulations, and requirements, consistent with the provisions of this part, to be observed by the carriers or brokers so classified or grouped, as the Commission deems necessary or desirable in the public interest.

This classification is made pursuant to the provisions of said section.

Because of the importance of this subject in the development of an orderly highway transportation system, we shall discuss briefly the conditions which necessitate a classification and the background of facts and analyses which have resulted in the conclusions herein set forth.

NEED FOR CLASSIFICATION

The need for a classification of brokers and property carriers arises out of the facts that such carriers are of various distinct and differing types; that the identification of these types will in itself tend, in important respects, to facilitate the process of regulation; and that the differihg types often require differing characters of regulation.

It is obvious that such classification is particularly important at this time in connection with the issuance of certificates, permits, and licenses, as it will facilitate the identification and description of the operations to be covered thereby. The problem of classification is made difficult, however, by the fact that a very large proportion of the operators who are subject to the act now have "grandfather" rights. It is not always easy to fit such operators into a definite classification.

This situation precludes any finding which does not make provision for each major type of operation present in the industry today. We are impressed, too, with the fact that a practical classification must not only provide a satisfactory operating sphere for each kind and major type of operator now in existence, but it must also avoid the danger of establishing restrictions which might be burdensome to the industry. The public interest requires that the way be left open for normal healthy growth. Any plan which would retard such growth would defeat the purpose of the act. We have been fully cognizant of these facts throughout the course of our study of this matter.

With due regard for these considerations, we believe it is necessary that a system be developed through which the different kinds of operations may be classified and identified. It is evident that through such a system, the regulations which may become necessary from time to time and which may be promulgated to take care of particular situations can be made to apply to such classes of carriers as may require special treatment. That is to say, the special requirements, rules, or regulations which, from a practical standpoint, are intended to apply to one type or to a few types only, can be avoided so far as other types are concerned.

It is clear, however, that the application of certain rules, regulations, or requirements must, in some instances, depend wholly or partly upon factors other than those used as the basis for this classification. Where this is the case a general classification cannot be relied upon to designate the type of operation or class of carrier which may be subject to or exempt from certain rules or regulations. To meet this situation and to make it possible to limit certain or special regulations to a specific operating condition, a particular kind of carrier or group of carriers, it may be necessary as need therefor arises to divide the industry into certain additional special groupings which will meet our administrative requirements.

An example of this situation is found in the impossibility of determining the extent to which accounting practices should apply to a particular operation based upon such factors as type of vehicle operated or type of commodities transported. A more practical approach to that problem may be made through the size of the carrier's annual business. Thus a special accounting classification of carriers based on annual gross income may be included and made a part of the separate regulations which will govern accounting practices.

The same principle holds true in safety matters. In some instances, certain safety regulations may be directed to certain types of carriers through the use of a general classification. From a practical standpoint, however, it appears that the kind of vehicle, the nature of the commodity carried, or the specific operating conditions must be definitely described in conjunction with the safety rule itself in order to establish the applicability of a specific safety requirement.

While our investigation indicates that it is not possible to establish a general classification which would meet all of the needs for groupings in connection with accounting, safety, or other special problems, it is clear that a general classifica-

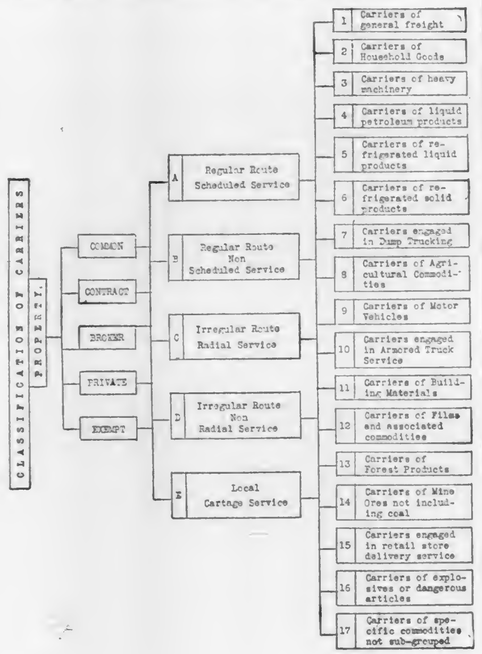
tion can be used to excellent advantage in all of these matters. Those problems which require special groupings will, therefore, be considered separately as a part of such regulations as may be promulgated pertaining to those particulars.

We do not believe, however, that it is now desirable or in accordance with the intent of section 202 to define strictly each type or kind of carrier or broker. Our basic purpose has been to ascertain and define generally the natural divisions which are now present in the industry. In so doing, we have refrained from attaching to any group rules or regulations applying to the transportation activities of the group. The necessity for rules and regulations, special or otherwise, will be brought to our attention through future experience, and will be dealt with in separate proceedings.

SCOPE OF INVESTIGATION

In our investigation of this general subject, representatives of the Bureau of Motor Carriers visited many sections of the country and interviewed representative operators and representatives of motor carrier organizations. A tentative draft of a proposed classification was prepared as a result of these studies and interviews and submitted to the industry. Criticisms and suggestions were invited. Through the courtesy of the American Trucking Associations, Inc., approximately 3,000 copies of this tentative draft were distributed throughout the country. An additional supply of copies was sent to each district office and made available to individual operators.

We gave careful consideration to the suggestions and criticisms which were received from the industry as the result of this tentative draft. A second draft was then prepared. In this revision we endeavored to incorporate all suggestions which had been received and which appeared to be pertinent to the question under consideration. This revised draft was distributed to all interested parties of record and further criticisms and suggestions invited.



Based upon the information and data received, a third draft of a proposed classification was prepared and submitted to a general conference of carriers and carriers' representatives held at our office in Washington. Each proposed grouping of carriers was discussed in detail and the suggestions of the representatives of each such group carefully noted.

In this report careful consideration has been given to all of the material facts which have been presented to us in the several conferences referred to and at other times during the period of the investigation.

FINDINGS

We find, after investigation and analyses, that the classification of property carriers printed in the appendix to this report is a reasonable and practical classification of brokers, common carriers and contract carriers of property by motor vehicle, and it is hereby approved and adopted.

An appropriate order will be entered.

APPENDIX

CLASSIFICATION

OF

BROKERS, AND MOTOR CARRIERS OF PROPERTY

*Classification Chart*

The first page of this classification is a graph or chart which outlines three steps taken in the breakdown of each motor carrier operation. These three steps are the analytical factors which are used to determine the carrier's classification. They include (1) type of carrier, (2) type of carrier's service, and (3) type of commodities transported. Each class is a composite of these three factors. The chart includes a symbol system through which each class may be identified by a code letter and number.

The first division on the chart identifies the type of operation, as fixed by the Motor Carrier Act, 1935. There are five such types of property operators.

Common carrier of property
Contract carrier of property
Private carrier of property
Broker of property transportation
Exempt carrier

The second division on the chart identifies the type of service in which the carrier is engaged as determined by:

(A) Regular route, scheduled service
(B) Regular route, non-scheduled service
(C) Irregular route, radial service
(D) Irregular route, non-radial service
(E) Local cartage service

The third division on the chart describes the type of commodities transported by the carrier. There are seventeen such commodity groups which are of sufficient importance at this time to warrant individual identification. Additional groups may be added as the need therefor is shown.

(1) Carriers of general freight
(2) Carriers of household goods
(3) Carriers of heavy machinery
(4) Carriers of liquid petroleum products
(5) Carriers of refrigerated liquid products
(6) Carriers of refrigerated solid products
(7) Carriers engaged in dump trucking
(8) Carriers of agricultural commodities
(9) Carriers of motor vehicles
(10) Carriers engaged in armored truck service
(11) Carriers of building materials
(12) Carriers of films and associated commodities
(13) Carriers of forest products
(14) Carriers of mine ores not including coal
(15) Carriers engaged in retail store delivery service
(16) Carriers of explosives or dangerous articles
(17) Carriers of specific commodities, not sub-grouped

The symbol system of code identification is derived from the foregoing three groups. *Illustration:* A common carrier may be engaged in transporting household goods over irregular routes in radial service. Such a carrier would be classed as a *Common Carrier* class C–2.

Appropriate definitions or explanations of each class or group appear on the following pages in the order shown above.

*Types of Carriers*

Definitions

The act, section 203, defines carriers by motor vehicle and brokers as follows:

*Motor Carrier.*—The term "motor carrier" includes common carriers by motor vehicle, contract carriers by motor vehicle (section 203 (a) (16)), and private carriers by motor vehicle (section 204 (a) (3)).

*Common Carrier.*—"The term 'common carrier by motor vehicle' means any person who or which undertakes, whether directly or by a lease or any other arrangement, to transport passengers or property, or any class or classes of property, for the general public in interstate or foreign commerce by motor vehicle for compensation, whether over regular or irregular routes, including such motor vehicle operations of carriers by rail or water, and of express or forwarding companies, except to the extent that these operations are subject to the provisions of part I." Section 203 (a) (14).

*Contract Carrier.*—"The term 'contract carrier by motor vehicle' means any person, not included under paragraph (14) of this section, who or which, under special and individual contracts or agreements, and whether directly or by a lease or any other arrangement, transports passengers or property in interstate or foreign commerce by motor vehicle for compensation." Section 203 (a) (15).

*Private Carrier.*—"The term 'private carrier of property by motor vehicle' means any person not included in the terms 'common carrier by motor vehicle' or 'contract carrier by motor vehicle', who or which transports in interstate or foreign commerce by motor vehicle property of which such person is the owner, lessee, or bailee, when such transportation is for the purpose of sale, lease, rent, or bailment, or in furtherance of any commercial enterprise." Section 203 (a) (17).

*Broker.*—"The term 'broker' means any person not included in the term 'motor carrier' and not a bona fide employee or agent of any such carrier, who or which, as principal or agent, sells or offers for sale any transportation subject to this part, or negotiates for, or holds himself or itself out by solicitation, advertisement, or otherwise as one who sells, provides, furnishes, contracts, or arranges for such transportation." Section 203 (a) (18).

*Exempt Carrier.*—Section 203 (b), (1) to (9), inclusive, of the act provides that certain motor vehicles and operations shall be exempt from the operation of said act, "except the provisions of section 204 relative to qualifications and maximum hours of service of employees, and safety of operation or standards of equipment", and subject to an exercise of discretion on the part of the Commission in respect to clauses (8) and (9). Such carriers in this classification are termed "exempt motor carriers."

*Types of Property Carrier Service*

Explanation

(A) *Regular Route, Scheduled Service.*—A regular route scheduled service carrier is any person who or which undertakes to transport property or any class or classes of property in interstate or foreign commerce by motor vehicle for compensation between fixed termini and over a regular route or routes upon established or fixed schedules.

(B) *Regular Route, Non-scheduled Service.*—A regular route non-scheduled service carrier is any person who or which undertakes to transport property or any class or classes of property in interstate or foreign commerce by motor vehicle for compensation between fixed termini and over a regular route or routes at intermittent intervals and not upon an established or fixed schedule.

(C) *Irregular Route, Radial Service.*—An irregular route radial service carrier is any person who or which undertakes to transport property or any class or classes of property in interstate or foreign commerce by motor vehicle for compensation over irregular routes from a fixed base point or points to points or places located within such radial area as shall have been fixed and authorized by the Interstate Commerce Commission in a certificate of public convenience and necessity or permit, or from any point located within such radial area to such carrier's fixed base point or points.

(D) *Irregular Route, Non-radial Service.*—An irregular route non-radial service carrier is any person who or which undertakes to transport property or any class or classes of property in interstate or foreign commerce by motor vehicle for compensation over irregular routes between points or communities located within such general territory as shall have been defined geographically and authorized in a certificate of public convenience and necessity or permit, and any other points or communities located within the same general territory without respect to a hub community or a fixed base point of operation.

(E) *Local Cartage Service.*—A local cartage carrier is any person who or which undertakes to transport property or any class or classes of property by motor vehicle for compensation when such transportation is performed in interstate or foreign commerce wholly within a municipality or between contiguous municipalities or within a zone adjacent to and commercially a part of any such municipality or municipalities.

*Types or Groups of Commodities*

Explanation

(1) *Carriers of General Freight.*—This group comprises both common and contract carriers transporting commodities generally, except such commodities as require special equipment or service.

(2) *Carriers of Household Goods as a Commodity.*—Household goods carriers include carriers, both common and contract, engaged in the transportation of property commonly used in a household when a part of such household equipment or supply; furniture, fixtures, equipment, and the property usual in an office, museum, institution, hospital, or other similar establishment when a part of the stock, equipment, or supply of such office, museum, institution, hospital, or other similar establishment; furniture, fixtures, and equipment of a store; works of art, furniture, musical instruments, display exhibits, and articles requiring the specialized handling and special equipment usually employed in moving household goods.

NOTE.—This type of carrier renders a specialized service requiring skilled workmen. Such special service includes removing furniture from the higher stories of large office buildings when freight elevator service is not available, the proper placing of furniture in the home or office upon delivery at destination, the laying of rugs, hanging of pictures, and other services in connection with the removal of furniture or fixtures from one location to another. A household goods carrier is usually a class C–2 operator but such a carrier may be a class D–2 operator. When the operation is that of a D–2 operator it embraces the transportation of household goods to, from, and between unlimited points of origin and unlimited points of destinations within the territory served by such carrier, over irregular routes, in either direction, outbound, or back haul, or in cross movements.

(3) *Carriers of Heavy Machinery.*—This group includes carriers, both common and contract, engaged in the hauling of heavy machinery and equipment including road machinery, structural steel, oil field rigs, and oil field equipment.

NOTE.—These commodities are grouped together because of the equipment required and the nature of the service performed. The territorial scope of the service is usually similar to that of the household goods carrier described above. Certain auxiliary or accessorial services are also performed in the transportation of these commodities, such as the dismantling and resetting of machinery, often requiring the use of rigging, skidding, and similar devices. A carrier of this class may find that all of his facilities are employed for a considerable period of time in a locality which is only a part of the territory in which he is authorized to serve. This type of carrier is usually a class D–3 operator. The movement

involves and embraces the transportation of heavy machinery and similar equipment, to, from, and between unlimited points of origin and unlimited points of destination within the territory served by such carrier, over irregular routes, in either direction, outbound, or back haul, or in cross movements.

(4) *Carriers of Liquid Petroleum Products.*—Carriers of liquid petroleum products include those carriers who transport such petroleum products as gasoline and other liquid motor fuel, road oil, crude oil, fuel oil, kerosene, and like products in tank vehicles or drums. Such vehicles include solo trucks, semi-trailers, and full-trailers. Carriers of butane, propane, and other derivatives of petroleum are included in this group when such products are transported in tank vehicles. The group also includes carriers of edible oils, coal tar products, and chemicals if transported in tank vehicles but does not include the transportation of milk, fruit juices, or other perishable liquid products which require temperature control.

NOTE.—Carriers who fall within this group may be either common or contract carriers. In either case the service usually involves special tank transport equipment.

(5) *Carriers of Refrigerated Liquid Products.*—This group comprises carriers, both common and contract, which specialize in the transportation of refrigerated or temperature controlled perishable liquid products, such as fruit juices and various beverages in tank vehicles, including solo trucks, semi-trailers, or full-trailers. Those liquid products such as milk which are classified in other commodity groups are not included in this class.

NOTE.—The production area of fruit juices and beverages and the transportation of these products by tank truck is largely restricted to the territories where they are manufactured. While the shipments originate in a restricted area the transportation is usually over long distances and requires operation both day and night. The matter of public health is particularly involved in this type of carriage in view of the nature of the commodity.

(6) *Carriers of Refrigerated Solid Products.*—This group includes that class of carriers, both common and contract, which engages in the transportation of commodities of a perishable nature including fresh fish, meats and meat products, fruits and vegetables, dairy products, etc., requiring the use of special refrigeration or temperature control. It does not include refrigerated or temperature controlled liquid products, otherwise classified herein.

NOTE.—Specially designed and constructed refrigerated equipment is usually necessary for this operation. Dry ice is often used. Extra care in handling shipments must be exercised on account of the danger of spoiling. This operation is the same as that of the ordinary general commodity carrier except as to refrigeration requirements.

(7) *Carriers Engaged in Dump Trucking.*—This group includes both common and contract carriers engaged in the operation of dump trucks and similar vehicles used in the transportation of sand, gravel, dirt, debris, coal, and other similar commodities.

NOTE.—The operations of this group are usually carried on during the daytime and are local in character. When coal is the commodity transported the operation is over both main highways and rural roads. The activities of carriers in this group are somewhat seasonal, especially in connection with building or construction projects. The value of the commodity hauled is usually low.

(8) *Carriers of Agricultural Commodities.*—This group includes carriers engaged exclusively in the transportation of unmanufactured or unprocessed agricultural commodities. It includes carriers of milk, regardless of the type of vehicle used, but does not include carriers engaged in the transportation of fruit juices or other processed agricultural commodities.

NOTE.—While both common and contract carriers are included in this group, it is composed principally of irregular route radial service common carriers. Most commercial agricultural commodities are also handled as general commodities, especially when hauled in small lots such as fruits, vegetables, produce, poultry, milk or cream in cans, grains in sacks, etc. In some instances, special vehicle equipment is required for the movement of such commodities as livestock, small grains in bulk, grass feeds, hay, tobacco (not processed), etc. During certain seasons of the year, this type of carrier transports feeder cattle from the primary market to the farm or feeding territory.

(9) *Carriers of Motor Vehicles.*—This group consists of motor carriers engaged in the transportation of new and used motor vehicles, including automobiles, trucks, trailers, chassis, bodies, and automotive display vehicles, wholly or partially assembled, in interstate or foreign commerce. In this group are included:

(a) Carriers engaged in the transportation of motor vehicles by truckaway method, involving the use of special equipment such as trucks, tractors, trailers, semi-trailers, 4-wheel trailers, tow cars, wrecking service cars, and various combinations of the above in or upon which such motor vehicles are loaded.

(b) Carriers engaged in the transportation of motor vehicles by driveaway method, involving the utilization of the motive power, in whole or in part, of the vehicles being transported, either in single driveaway or in combinations of two or more vehicles by use of towbar mechanism, saddle or bolster mount mechanism, full mount mechanism, or any combinations of the above.

(c) Carriers engaged in transportation of motor vehicles, within the boundaries of a city or single commercial zone, by either truckaway or driveaway method, where such transportation is a part of and is incidental to an interstate shipment or a movement in interstate or foreign commerce.

NOTE.—The transportation of new automobiles, trucks, and trailers is usually a class C–9 movement. The transportation of used automobiles, trucks, and trailers and new or used chassis, bodies, and automotive display vehicles is usually a class D-9 movement. In either case, the operation may be that of a common or contract carrier. When classified as a class D–9 movement, the scope of the operation is territorial in character and includes the transportation of motor vehicles to, from, and between unlimited points of origin and unlimited points of destination within the territory served by such carrier, over irregular routes, in either direction, outbound, or back haul, or in cross movements.

(10) *Carriers Engaged in Armored Truck Service.*—This group includes motor carriers, either common or contract, which by reason of the commodity transported, i. e., gold, silver, currency, valuable securities, jewels, and other property of very high value, use specially constructed armored trucks and provide police protection to safeguard the commodity while it is being transported and delivered. It also includes carriers which operate ordinary equipment in the carriage of high value commodities when guards are necessary to accompany the shipment.

NOTE.—This is a highly specialized type of service and is usually confined to larger cities and industrial areas. It is used by financial institutions for the transfer of funds including bullion, currency, valuable securities, and jewels from dock to vault, pay rolls to industries, bank to bank, etc. It is frequently performed under a specific contract, although there are some carriers engaged in the service that hold themselves out as common carriers. Where the service is entirely local, the operation may be regarded as local cartage within a municipality. Where routes or territory beyond a municipal area are served, the operation becomes that of an irregular route, radial carrier.

(11) *Carriers of Building Materials.*—This group includes both common and contract carriers engaged in the transportation of building materials for compensation, not including sand, gravel, crushed stone, or other building materials, ordinarily transported in dump trucks. It includes haulers of lumber, cut stone, slate, tile, brick, cement plaster in sacks, or other similar materials usually transported on flatbed vehicles.

NOTE.—Usually no special equipment is required, except in the case of the lumber hauler, who uses vehicles equipped with a special unloading device or that of the concrete hauler which mixes en route. Most of the other building materials can be and are hauled in small lots as general commodities. The movement of these commodities is usually in connection with a construction project, in truck loads, and for comparatively short distances. The transportation of lumber between manufacturing plants and from mill to retail yard is an important service rendered by carriers classed in this group.

(12) *Carriers of Films and Associated Commodities.*—This group, composed of both common and contract carriers, includes those carriers which are engaged in the transportation of motion-picture and sound-reproducing films, recording, reproducing, and amplifying devices, supplies, and accessories for the operation of motion-picture theatres or places of exhibition, including the transportation of tickets, advertising matter, displays, and exhibits such as are found in lobbies of motion-picture theatres, and furnishings and supplies necessary in the maintenance and operation of such theatres. This type of operation requires unusual delivery schedules and special personal services.

NOTE.—This group of carriers has, in some instances, undertaken the delivery of newspapers, magazines, publications, yeast, coffee, confectionery, and other dated products. If such commodities were actually transported by a carrier in this group in interstate commerce on and since the grandfather date, such carrier is entitled to continue to transport such items under the law. The transportation of such commodities, however, as a rule is only incidental to and carried on in conjunction with the transportation of films and accessories. In cases of future authorizations involving a showing of public convenience and necessity, these items should not be regarded as being associated with the carriage of films and under no circumstances should the inclusion of these items in grandfather certificates or permits be construed as authorization to the film carrier to engage in the transportation of general freight on the grounds that such general freight is labeled "dated".

(13) *Carriers of Forest Products.*—This group includes both common and contract carriers engaged principally in the transportation of forest products, i. e., logs, poles, piling, fence posts, shingle bolts, pulp-wood, and fuel from the forest to processing points or to market.

NOTE.—In those areas where the timber is large, special truck-equipment is required for the transportation of logs. Such equipment includes bunks, reaches, 2- and 4-wheel trailers, special braking arrangements, and other incidental special equipment. Similar equipment is also frequently used in the transportation of poles and piling. Ordinary vehicles are used to transport the other items referred to herein. This group does not include carriers who are engaged in the transportation of rough or finished lumber or processed products derived from raw forest products nor does it include such operations as are grouped under "carriers of building materials."

(14) *Carriers of Mine Ores Not Including Coal.*—This group comprises both common and contract carriers, engaged principally in the transportation of mining products in the rough, such as iron, copper, or other ores from the mine to the smelter or from the mine to bunkers located on the routes of connecting carriers. It also includes the transportation of products of smelters to refineries or foundries. It does not include coal or coal products or refined or manufactured products of ores which are classified herein under other groupings.

(15) *Carriers Engaged in Retail Store Delivery Service.*—This group includes carriers who render a specialized delivery service for retail store establishments. This service is usually confined to municipal areas, and where that is the case, may be regarded as a city cartage operation. In some instances, however, the service extends beyond municipal areas and in that case the operation may be classified in accordance with the service rendered.

(16) *Carriers of Explosives or Dangerous Articles.*—Carriers of certain explosive or dangerous articles, except liquid petroleum products as described in commodity Group 4, and films as described in commodity Group 12, are those carriers which engage in transporting dangerous, less dangerous, or relatively safe explosives, including non-explosive material such as fuses, cartridge cases, dummy cartridges, etc., inflammable oxidizing materials, corrosive liquids, compressed gases, poisonous articles, and other acceptable dangerous articles other than inflammable liquids in tank vehicles.

NOTE.—The transportation of the commodities classed in this group involves unusual hazards and requires special precautions in the matter of safety. The carriage is usually rendered under special agreement but is also rendered by common carriers when the volume of the movement is not sufficient to warrant a contract operation.

(17) *Carriers of Specific Commodities, not sub-Grouped.*—Throughout the country there are individual truck operators who engage in the transportation of some specific commodity or commodities which do not fall within any of the commodity sub-groups included in this classification.

NOTE.—Usually such transportation is carried on in conjunction with a local industry or local situation and is not of sufficient importance nationally to warrant sub-grouping. In order to provide, however, for the general classification of such operations, miscellaneous commodity Group 17 has been included in this classification. The specific commodity or commodities transported by carriers who may be classified in this group are shown in the carrier's certificate of public convenience and necessity or permit. Commodity Group 17 carriers will be the subject of further study and if need therefor is shown, additional commodity groups will be established from time to time from this miscellaneous group to meet the administrative requirements of the Bureau of Motor Carriers.

*Exceptions to and Changes in Classification*

These classifications and groupings are prescribed for general purposes. The operations of an individual carrier may fall within more than one grouping, in which event they become subject to the rules and regulations of each group into which they fall.

Any group of carriers, or any carrier member of a group, may, upon proper notice, petition the Commission to alter, amend, or otherwise modify any part of this classification or any grouping prescribed herein. Unless exceptions are specifically granted, the general rules and regulations of the Commission shall govern.

*Emergencies.*—In case of emergencies or unforeseen conditions over which the motor carrier affected has no control, which require immediate and extraordinary treatment, the Commission may, without notice, modify, amend, suspend, or vacate any or all classifications or groupings herein prescribed and substitute in lieu thereof such classification groupings or regulations as may be necessary during the period of such emergency.

## RURAL ELECTRIFICATION ADMINISTRATION.

[Administrative Order No. 137]

RESCISSION OF ALLOCATION OF FUNDS FOR LOANS

SEPTEMBER 7, 1937.

I hereby rescind $400 of the allocation of funds for the project, Alabama 19 Limestone, made by Administrative Order No. 16, dated, September 3, 1936. This action is being taken because it was not necessary to use the entire funds allotted.

I hereby rescind $300,000 of the allocation of funds for the project, Illinois 8026G Iroquois, made by Administrative Order No. 119, dated, July 21, 1937. This action is being taken because it was found not necessary to make the allotment to build a generating plant for the reason that a satisfactory wholesale rate has been negotiated with an existing source of supply.

JOHN M. CARMODY, *Administrator.*

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 13th day of September, A. D. 1937.

[File No. 46–72]

IN THE MATTER OF UNITED PUBLIC UTILITIES CORPORATION

[Public Utility Holding Company Act of 1935, Section 10]

NOTICE OF AND ORDER FOR HEARING

An application having been duly filed with this Commission, by United Public Utilities Corporation, a registered holding company, pursuant to Section 10 of the Public Utility Holding Company Act of 1935, for approval of its acquisition of $511,679.98 principal amount of promissory notes due January 1, 1945, bearing interest at the rate of 6% per annum, and of $106,403.40 principal amount of promissory notes due January 1, 1945 and bearing interest, to the extent that such interest is earned, at the rate of

6% per annum, to be issued by Texas Ice and Refrigeration Company, a subsidiary of the applicant, for the purpose of refunding $511,679.98 principal amount of promissory notes of said Texas Ice and Refrigeration Company presently outstanding together with $106,403.40 accrued interest thereon;

It is ordered that a hearing on such matter be held on October 4, 1937, at 10:00 o'clock in the forenoon of that day at Room 1103, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before September 29, 1937.

It is further ordered that Robert P. Reeder, an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

### EXECUTIVE ORDER

WITHDRAWAL OF PUBLIC LAND FOR USE OF THE WAR DEPARTMENT FOR MILITARY PURPOSES

*California*

By virtue of and pursuant to the authority vested in me by the act of June 25, 1910, ch. 421, 36 Stat. 847, as amended by the act of August 24, 1912, ch. 369, 37 Stat. 497, it is ordered as follows:

Section 1. Executive Order No. 6910 of November 26, 1934, as amended, temporarily withdrawing all public lands in certain states for classification and other purposes, is hereby revoked in so far as it affects the following described tracts of land in California:

SAN BERNARDINO MERIDIAN

T. 10 N., R. 7 W., secs. 7 to 11, inclusive, and N½ sec. 12.
T. 9 N., R. 8 W., secs. 4 to 9, inclusive, secs. 16 to 21, inclusive, and secs. 28 to 33, inclusive.
T. 10 N., R. 8 W., sec. 6, N½ and SW¼ sec. 7, S½SE¼ sec. 9, S½ and S½NE¼ sec. 10, secs. 11, 12 and 16, S½, NE¼ and S½NW¼ sec. 17, S½SW¼ and SE¼ sec. 18, secs. 19 to 21, inclusive, NW¼ sec. 30.
T. 8 N., R. 9 W., secs. 1 to 6, inclusive.
T. 9 N., R. 9 W., secs. 1 to 36, inclusive.
T. 10 N., R. 9 W., secs. 1 to 12, inclusive, NW¼ and N½NE¼ sec. 13, SW¼ and N½ sec. 14, secs. 15 to 20, inclusive, N½ and N½SW¼ sec. 21, N½NW¼ sec. 22, S½SW¼ and SE¼ sec. 23, S½, S½NW¼ and NE¼ sec. 24, SW¼ sec. 28.
T. 8 N., R. 10 W., secs. 1 and 2.
T. 9 N., R. 10 W., secs. 1, 2, 11 to 14, inclusive, 23 to 26, inclusive, 35 and 36.
T. 10 N., R. 10 W., secs. 12, 13, 24, 35 and 36.

Section 2. Subject to the conditions expressed in the above mentioned acts and to all valid existing rights, the tracts of land described in section 1 of this order are hereby temporarily withdrawn from settlement, location, sale, or entry, and reserved for use of the War Department for military purposes.

Section 3. The reservation made by section 2 of this order shall remain in force until revoked by the President or by act of Congress.

## WAR DEPARTMENT.

REGULATIONS TO GOVERN THE USE, ADMINISTRATION, AND NAVIGATION OF SOUTH RIVER FROM THE STATE HIGHWAY BRIDGE ON STATE ROUTE NO. 2, AT EDGEWATER, MARYLAND, TO ITS HEAD, AND THE TRIBUTARIES EMPTYING THEREIN, INCLUDING BEARDS CREEK, BROAD CREEK, GINGERVILLE CREEK AND WAREHOUSE CREEK

THE LAW

Section 7 of the River and Harbor Act of August 8, 1917, provides as follows:

That section four of the river and harbor Act of August eighteenth, eighteen hundred and ninety-four, as amended by section eleven of the river and harbor Act of June thirteenth, nineteen hundred and two, be, and is hereby, amended so as to read as follows:

"Sec. 4. That it shall be the duty of the Secretary of War to prescribe such regulations for the use, administration, and navigation of the navigable waters of the United States as in his judgment the public necessity may require for the protection of life and property, or of operations of the United States in channel improvement, covering all matters not specifically delegated by law to some other executive department. Such regulations shall be posted, in conspicuous and appropriate places, for the information of the public; and every person and every corporation which shall violate such regulations shall be deemed guilty of a misdemeanor and, on conviction thereof in any district court of the United States within whose territorial jurisdiction such offense may have been committed, shall be punished by a fine not exceeding $500, or by imprisonment (in the case of a natural person) not exceeding six months, in the discretion of the court."

THE REGULATIONS

In conformity with the above law the following navigation regulations are prescribed for the South River from the State Highway bridge on State Route No. 2 at Edgewater, Maryland, to its head, and for the tributaries emptying therein, including Beards Creek, Broad Creek, Gingerville Creek and Warehouse Creek, to take effect and be in force on and after the date of approval hereof:

No boat shall proceed at any time at a greater speed than eight (8) miles per hour at any time between May 1st and September 15th, inclusive, on these waterways.

Approved, September 3d, 1937.

[SEAL] LOUIS JOHNSON,
*Acting Secretary of War.*

FRANK C. BURNETT,
*Brigadier General,*
*Acting The Adjutant General.*

## DEPARTMENT OF THE INTERIOR.

### National Bituminous Coal Commission.

[Order No. 44]

AN ORDER LIMITING THE TERM OF CONTRACTS AND ORDERS HEREAFTER TO BE ENTERED INTO AND ACCEPTED BY THE MEMBERS OF THE BITUMINOUS COAL CODE; DEFINING THE STATUS OF CONTRACTS AND ORDERS ENTERED INTO AND ACCEPTED PRIOR TO THE DATE OF THIS ORDER AND RESTRICTIONS ON CODE MEMBERS AS TO MAXIMUM DISCOUNTS OR PRICE ALLOWANCES TO DISTRIBUTORS

The Bituminous Coal Act of 1937 provides:

Section 4, Part II, Marketing, Subsection (e)—

No coal subject to the provisions of this section shall be sold or delivered or offered for sale at a price below the minimum or

above the maximum therefor established by the Commission, and the sale or delivery or offer for sale of coal at a price below such minimum or above such maximum shall constitute a violation of the code: *Provided*, That the provisions of this paragraph shall not apply to a lawful and bona fide written contract entered into prior to June 16, 1933. • • • From and after the date of approval of this Act, until prices shall have been established pursuant to subsections (a) and (b) of Part II of this section, no contract for the sale of coal shall be made providing for delivery for a period longer than thirty days from the date of the contract.

In order to give full force and effect to the minimum prices to be established by the Commission, the National Bituminous Coal Commission pursuant to Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, hereby orders and directs:

1. That from and after the date of this order, no contract shall be entered into and no order shall be accepted by any member of the Bituminous Coal Code providing for the delivery of coal for a period longer than thirty (30) days from the date of the contract or order.

The Commission construes the first paragraph of Section 4, Part II, subsection (e), as being applicable to the third paragraph of the same subsection, which limits contracts for the sale of coal from and after the date of the approval of the Act until prices have been established, to a period not longer than thirty (30) days from the date of the contract. The Commission will construe as a violation of the Bituminous Coal Code the shipment or delivery upon any such contract, subsequent to the establishment of minimum prices, of any coal subject to Section 4 of the Act at a price below the minimum price therefor established by the Commission.

The Commission construes the first paragraph of subsection (e) of Section 4, Part II, of the Act as not applicable to any lawful and bona fide written contract entered into prior to June 16, 1933, in the event such contract has been duly authenticated by the Commission in conformity with regulations hereafter to be prescribed.

2. That following the establishment of minimum prices, no code member may, upon the sale of coal to a distributor, grant any maximum discount or price allowance, or any part thereof, hereafter prescribed by the Commission pursuant to subsection (h) of Section 4, Part II, of the Act, for delivery upon a contract for the sale of coal made by such distributor from and after the date of this order and prior to the establishment by the Commission of such distributors' discounts unless the contract price at which the coal has been sold by such distributor is not less than the established code minimum price for the size and grade of coal covered by such contract and in effect at the time of delivery.

The Secretary of the Commission shall forthwith mail a copy of this order to the Consumers' Counsel, to the Secretaries of all District Boards and all code members in the respective districts.

By order of the Commission.

Dated this 14th day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary*.

### 1937 AGRICULTURAL CONSERVATION PROGRAM—NORTHEAST REGION

AMENDMENTS TO BULLETINS NO. NER-B-101, AS AMENDED, FOR THE STATES OF CONNECTICUT, MAINE, MASSACHUSETTS, NEW HAMPSHIRE, NEW JERSEY, NEW YORK, PENNSYLVANIA, RHODE ISLAND, AND VERMONT, DETERMINING PROCEDURE FOR REDUCTION OF CERTAIN MINIMUM PRACTICE REQUIREMENTS

Pursuant to the authority vested in the Secretary of Agriculture under section 8 of the Soil Conservation and Domestic Allotment Act Bulletin No. 101—Connecticut, as amended by Supplements (1) to (6), inclusive, Bulletin No. 101—Maine, as amended by Supplements (1) to (7), inclusive, Bulletin No. 101—Massachusetts, as amended by Supplements (1) to (7), inclusive, Bulletin No. 101—New Hampshire, as amended by Supplements (1) to (5), inclusive, Bulletin No. 101—New Jersey, as amended by Supplements (1) to (5), inclusive, Bulletin No. 101—New York, as amended by Supplements (1) to (9), inclusive, Bulletin No. 101—Pennsylvania, as amended by Supplements (1) to (15), inclusive, Bulletin No. 101—Rhode Island, as amended by Supplements (1) to (8), inclusive, and Bulletin No. 101—Vermont, as amended by Supplements (1) to (4), inclusive, are hereby further amended by entering the following paragraph in Part I of each Bulletin No. 101 immediately preceding the headings "Practice Number" and "Description of Practice and Rate of Payment":

If on any farm it is determined that the application of material in connection with any soil-building practice for which payment is claimed was in an amount per acre less than that established as minimum performance for that practice, the County Committee is authorized to certify that the practice has been carried out on an acreage reduced to that which the amount of materials used would have covered if applied at the minimum rate specified for such practice, *provided*

(1) that the amount of application per acre was not more than 20 percent less than that specified, and

(2) that the County Committee determines that the amount of application per acre was consistent with good farming practice under the conditions prevailing on that farm.

Done at Washington, D. C., this 15th day of Sept., 1937. Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE, *Secretary of Agriculture*.

### Bureau of Agricultural Economics.

ORDER OF DESIGNATION OF TOBACCO MARKETS

NORTH CAROLINA

Whereas, the Act of Congress approved August 23, 1935 (49 Stat., 731) entitled "The Tobacco Inspection Act" contains the following provisions:

SEC. 2. That transactions in tobacco involving the sale thereof at auction as commonly conducted at auction markets are affected with a public interest; that such transactions are carried on by tobacco producers generally and by persons engaged in the business of buying and selling tobacco in commerce; that the classification of tobacco according to type, grade, and other characteristics affects the prices received therefor by producers; that without uniform standards of classification and inspection the evaluation of tobacco is susceptible to speculation, manipulation, and control, and unreasonable fluctuations in prices and quality determinations occur which are detrimental to producers and persons handling tobacco in commerce; that such fluctuations constitute a burden upon commerce and make the use of uniform standards of classification and inspection imperative for the protection of producers and others engaged in commerce and the public interest therein.

SEC. 5. That the Secretary is authorized to designate those auction markets where tobacco bought and sold thereon at auction, or the products customarily manufactured therefrom, moves in commerce. Before any market is designated by the Secretary under this section he shall determine by referendum the desire of tobacco growers who sold tobacco at auction on such market during the preceding marketing season. The Secretary may at his discretion hold one referendum for two or more markets or for all markets in a type area. No market or group of markets shall be designated by the Secretary unless two-thirds of the growers voting favor it. The Secretary shall have access to the tobacco records of the Collector of Internal Revenue and of the several collectors of internal revenue for the purpose of obtaining the names and addresses of growers who sold tobacco on any auction market, and the Secretary shall determine from said records the eligibility of such grower to vote in such referendum, and no grower shall be eligible to vote in more than one referendum. After public notice of not less than thirty days that any auction market has been so designated by the Secretary, no tobacco shall be offered for sale at auction on such market until it shall have been inspected and certified by an authorized representative of the Secretary according to the standards established under this Act, except that the Secretary may temporarily suspend the requirement of inspection and certification at any designated market whenever he finds it impracticable to provide for such inspection and certification because competent inspectors are not obtainable or because the quantity of tobacco available for inspection is insufficient to justify the cost of such service: Provided, That, in the event competent inspectors are not available, or for other reasons, the Secretary is unable to provide for such inspection and certification at all auction markets within a type area, he shall first designate those auction markets where the greatest number of growers may be served with the facilities available to him. No fee or charge shall be imposed or collected for inspection or certification under this section at any designated auction market. Nothing contained in this Act shall be construed to prevent transactions in tobacco at markets not designated by the Secretary or at designated markets where the Secretary has suspended the requirement of inspection or to authorize the Secretary to close any market.

and

Whereas, pursuant to said Act a referendum has been held among the growers of flue-cured tobacco who sold tobacco at auction on the Wendell, North Carolina market during the last marketing season, in which referendum said growers were given an opportunity to vote for or against the designation as provided in Section 5 of said Act; and

Whereas, more than two-thirds of the growers voting in said referendum and who sold tobacco at auction on said market during the last marketing season voted in favor of said designation.

Now, Therefore, by virtue of the authority conferred upon me by Section 5 of The Tobacco Inspection Act and the affirmative results of the referendum conducted thereunder, the tobacco market at Wendell, North Carolina is designated as a market where tobacco bought and sold thereon at auction, or the products manufactured therefrom, moves in commerce.

It is hereby ordered that, effective 30 days from this date no tobacco shall be offered for sale at auction on the abovenamed market until it shall have been inspected and certified by an authorized representative of the United States Department of Agriculture according to standards established under the Act; provided, however, that the requirement of inspection and certification may be suspended at such times as it is found impracticable to provide inspection or when the quantity of tobacco available for inspection is insufficient to justify the cost of such service. No fee or charge shall be imposed or collected for the inspection and certification of tobacco sold or offered for sale at auction on the market designated herein.

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed in the City of Washington, this 14th day of September 1937.

[SEAL] H. A. WALLACE, *Secretary of Agriculture*.

### Bureau of Entomology and Plant Quarantine.

[B. E. P. Q.-386 (4th revision)]

LIST OF ARTICLES EXEMPT FROM CERTIFICATION REQUIREMENTS UNDER THE GYPSY MOTH AND BROWN-TAIL MOTH QUARANTINE (QUARANTINE NO. 45)

SEPTEMBER 13, 1937.

In accordance with the proviso in Notice of Quarantine No. 45, as revised effective November 4, 1935, the following articles, the interstate movement of which is not considered to constitute a risk of moth dissemination, are exempted from the restrictions of the regulations of this quarantine:

Acacia cuttings (for ornamental use) (*Acacia* spp.).
Banana stalks, when crushed, dried, and shredded.
Birch slabs for use as post cards.
Cable reels, when newly manufactured and empty.
Clubmoss (sometimes called "ground pine") (*Lycopodium* spp.).
Evergreen smilax (*Smilax lanceolata*).
Fuchsia (*Fuchsia* spp.).
Galax (*Galax aphylla*).
Geranium (*Pelargonium* spp.).
Heather cuttings (for ornamental use) (*Erica* spp., *Calluna* spp.).
Heliotrope (*Heliotropium* spp.).
Herbarium specimens, when dried, pressed, and treated, and when so labeled on the outside of each container.
Jerusalem-cherry (*Solarum capsicastrum, S. usaudocapsicum, S. hendersoni*).
Leaves of deciduous and evergreen trees that have been treated or dyed.
Mistletoe (*Phoradendron flavescens, Viscum album*, etc.).
Oregon huckleberry (*Vaccinium ovatum*).
Partridgeberry (*Mitchella repens*).
Strawberry plants (*Fragaria* spp.).
Trailing arbutus (*Epigaea repens*).
Verbena (*Verbena* spp.).
Wintergreen (*Gaultheria* spp., *Pyrola* spp.).

LEE A. STRONG, *Chief, Bureau of Entomology and Plant Quarantine*.

[B. E. P. Q.—463]

### STERILIZATION OF IMPORTED VINIFERA GRAPES BY REFRIGERATION

[Approved and effective September 15, 1937]

Recent experimental work by the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture has proved that all stages of the Mediterranean fruit fly in fruit will be destroyed if the fruit is subjected to the following treatment:

Cooling until the approximate center of the fruit in the package reaches a temperature of 34° F. and holding the fruit at or below that temperature for a period of 12 days.

On the basis of the evidence obtained and under the authority of regulation 2 of the rules and regulations supplemental to Notice of Quarantine No. 56, provision is hereby made for the entry, under permit, and sterilization at plants designated for the purpose, of grapes of the Vinifera type from regions in which the Mediterranean fruit fly occurs, at the port of New York and such other northern ports as may be subsequently approved, under the following conditions:

(1) The grapes must be packed in tight barrels or kegs or other approved containers so constructed as to prevent the escape from the containers pending sterilization, of any stages of the Mediterranean fruit fly, should they be present. Unsterilized grapes in broken containers must be immediately repacked under the supervision of an inspector of the Bureau of Entomology and Plant Quarantine or the contents shall be immediately destroyed in a manner satisfactory to the inspector.

(2) Within 24 hours from the time of unlading, the grapes shall be delivered for treatment to a designated cold storage plant.

The Bureau of Entomology and Plant Quarantine will designate only those cold storage plants which are adequately equipped to handle and sterilize the grapes. An application and a written agreement in form prescribed must be filed with the Bureau of Entomology and Plant Quarantine as a condition for designation.

The sterilization of grapes and their movement to and from the sterilization rooms shall be done under the supervision of plant quarantine inspectors of the Bureau of Entomology and Plant Quarantine who shall at all times have access to the grapes.

Shipments offered for entry may be allowed to leave customs custody under redelivery bond for sterilization. Final release of the shipment by the Collector of Customs and cancellation of the bond will be effected after the inspector of the Bureau of Entomology and Plant Quarantine has notified the Collector of Customs that the required treatment has been given.

(3) For the purpose of additional safeguards and to eliminate possible risk that might be occasioned by breakage of containers, the entry of grapes is limited to the period from October 1 to April 15, when susceptible fruits will not be available for oviposition by fruit flies should any escape prior to the containers being placed in the approved sterilization chambers.

In authorizing the entry of Vinifera grapes into the United States subject to sterilization in accordance with the provisions of this circular it should be emphasized that inexactness and carelessness in applying the treatment may result in injury to the grapes. The treatment required for the entry of Vinifera grapes under the provisions of this circular represents a requirement considered necessary to eliminate pest risk and no liability shall attach to the United States Department of Agriculture or to any officer or representative of that Department in the event of injury resulting to fruit offered for entry under the provisions of this circular.

Circular B. E. P. Q.-417 is hereby revoked.

LEE A. STRONG,
*Chief, Bureau of Entomology and Plant Quarantine.*

[B. E. P. Q.-464]

IMPORTATION OF VINIFERA GRAPES AND CERTAIN OTHER DECIDUOUS FRUITS SUBJECT TO IN-TRANSIT STERILIZATION AUTHORIZED

[Approved and effective September 15, 1937]

It has been determined that the refrigeration treatment prescribed in circular B. E. P. Q.—463, as a condition for the entry of Vinifera grapes from regions in which the Mediterranean fruit fly occurs, can be completed while the fruit is in transit on ships equipped with adequate refrigeration facilities, provided the grapes have been cooled to the proper temperature before loading in refrigerated holds in the carrying vessels. It has also been determined that certain other deciduous fruits can be similarly treated.

The treatment prescribed in B. E. P. Q.—463, requires the cooling of the grapes until the approximate center of the fruit in the package reaches a temperature of 34° F. and holding it at or below that temperature for a period of 12 days.

On the basis of the above determination and under the authority of regulation 2 of the rules and regulations supplemental to Notice of Quarantine No. 56, grapes of the Vinifera type, and such other deciduous fruits as may be approved in the permit, which are prohibited entry in the fresh state because of the Mediterranean fruit fly, may therefore be entered under the following conditions:

(1) Before being loaded they shall be cooled to a temperature of 32° F. under the supervision of an official designated by the Secretary of Agriculture, or one holding a comparable position, in the country concerned, in a plant approved for the purpose by the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture.

(2) The temperature of the grapes or other deciduous fruits shall in no case rise above 33° F. between the time they are taken from the precooling plant and the required refrigeration treatment is begun on the carrying vessel.

(3) The grapes or other deciduous fruits shall be held at a temperature of 34° F. or below for a period of 12 days. Such treatment shall be applied only in vessels which have been approved by the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture, and in particular holds or compartments designated by that Bureau for this purpose. Treatments must be completed in the holds or compartments in which they are begun.

(4) Each container of grapes or other deciduous fruits to be imported into the United States under the provisions of this circular shall be marked by an appropriate label, or stencil, or stamp impression, which will enable identification at all times.

(5) A certificate shall be issued in triplicate by an official designated by the Secretary of Agriculture or one holding a comparable position in the country concerned, indicating compliance with the provisions of numbered paragraphs (1) and (2) of this circular. In addition this certificate shall give the identifying marks prescribed in paragraph number (4). The signatures and official position of those designated to sign this certificate shall be submitted to the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture in quadruplicate.

(6) The original and one copy of the certificate required in numbered paragraph (4) hereof shall be verified by the American Consul at the port of export and shall accompany the shipment and be surrendered to the inspector of the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture at the port of entry. The third copy will be retained by the consular office verifying the certification.

(7) When requested, applicants for permits to import Vinifera grapes and certain other deciduous fruits under the provisions of this circular shall furnish or arrange to have furnished, blue prints, plans, specifications, or such other information as may be deemed necessary for considering precooling plants or carrying vessels, for approval by the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture.

(8) When requested, provisions shall be made to authorize representatives of the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture, to inspect and carry on such tests as may be deemed necessary in or on precooling plants and carrying vessels for which approval has been requested under the provisions of this circular.

(9) No permits will be issued for the imporation of Vinifera grapes or other deciduous fruits under the provisions of this circular until the precooling plant at the port of loading and the hold, holds, or compartments of the carrying vessels in which the prescribed in-transit treatment is to be given have been approved by the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture.

(10) Carrying vessels must be equipped with approved temperature-recording instruments located, installed, operated, and maintained in a manner to be prescribed by the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture, for each vessel.

(11) Not more than 3 days prior to the lading of grapes or other deciduous fruits to be given in-transit sterilization as provided in this circular, the temperature-recording instruments of the hold, holds, or compartments approved for the purpose shall be tested for accuracy by an official designated by the Secretary of Agriculture, or one holding a comparable position, in the exporting country, and the thermograph record shall bear an endorsement of said official in form approximately as follows:

Port of Export _____
Date _____

The instruments installed for recording temperature within compartment _____ of the S. S. or M. S. _____ which compartment is loaded with _____ covered by precooling certificate No. _____ of the _____ (Name of certifying Government agency), were tested by me at the place and on the date above indicated, and were accurate to within _____° F.

(If no adjustments were necessary, add a statement to that effect. If adjustments were made, add a statement indicating their character)

Signature _____
(Title of Certifying Officer.)

(12) For entry under the provisions of this circular, there shall be surrendered to the inspector of the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture at the port of transshipment or at the port of entry, the original thermograph record showing the temperatures maintained in the holds or compartments in which the fruit concerned was sterilized. When necessary, additional photostatic copies of such records shall be provided at the expense of the permittee.

(13) Vinifera grapes or other deciduous fruits to be imported into the United States under the provisions of this circular shall not be unloaded from the carrying vessel until evidence satisfactory to the Inspector of the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture has been furnished showing that the grapes or other deciduous fruits have received the refrigeration treatment prescribed in this circular.

(14) Whenever grapes or other deciduous fruits are offered for entry under the provisions of this circular and it cannot be established to the satisfaction of the inspector of the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture that they have received the required refrigeration treatment, they shall either remain on the vessel under safeguards prescribed by the inspector of the Bureau of Entomology and Plant Quarantine and under seal of the Bureau of Entomology and Plant Quarantine, or they shall be transported beyond the territorial limits of the United States under such safeguards as shall be prescribed by the inspector.

(15) Vinifera grapes or other deciduous fruits may be imported under the provisions of this circular throughout the year and no restrictions are placed on the character of containers in which they shall be packed.

(16) In authorizing the entry of Vinifera grapes and certain other deciduous fruits into the United States in accordance with the provisions of this circular, it should be emphasized that inexactness and carelessness in applying the treatment may result in injury to the fruit or its rejection. The treatment required for the entry of fruit under the provisions of this circular represents a requirement considered necessary for the elimination of pest risk and no liability shall attach to the United States Department of Agriculture or to any officer or representative of that Department in the event of injury resulting to fruit offered for entry under the provisions of this circular.

## FEDERAL COMMUNICATIONS COMMISSION.

EXEMPTIONS FROM COMPLIANCE WITH RADIOTELEGRAPH INSTALLATION REQUIREMENT OF SAFETY OF LIFE AT SEA CONVENTION

The Telegraph Division at a special meeting held September 2, 1937, granted extension of time of exemption of vessels of the Puget Sound Navigation Company from the radiotelegraph requirements of the Safety Convention and Public No. 97 approved May 20, 1937, and adopted the following order:

The Commission this day extended the exemption from the radiotelegraph installation requirement of Article 27 of the Safety of Life at Sea Convention and Sections 351 (a) and 359 (a) of Public No. 97, approved May 20, 1937, amending the Communications Act; pursuant to the provisions of Article 28 of the Convention and Section 352 (b) of Public No. 97, which was granted the Puget Sound Navigation Company on March 9, 1937, extended on May 8, 1937, June 7, 1937, July 6, 1937, and August 2, 1937, for the following vessels and voyages:

1. The S. S. *Iroquois* and S. S. *Olympic* for international voyages between Seattle, Washington, and Victoria, B. C., via Port Townsend and Port Angeles.

2. The S. S. *Quilcene*, S. S. *City of Angeles* and S. S. *Rosario* for international voyages between Anacortes, Washington, and Sydney, B. C., via Friday Harbor, San Juan Island, and Orues, Orues Island.

pending further order of the Commission and in any event for a period not to extend beyond September 15, 1937, subject to the same terms and conditions as those specified in the original order of exemption, in order to enable the Commission to further consider information bearing upon the route and conditions of the voyages in question.

By order of the Commission, Telegraph Division.

[SEAL] T. J. SLOWIE, *Secretary.*

[Order No. 15]

TELEPHONE CARRIERS—MONTHLY REPORTS OF SELECTED INCOME AND BALANCE-SHEET ITEMS

The Telephone Division adopted the following Order:

At a meeting of the Federal Communications Commission, Telephone Division, held at its office in Washington, D. C., on the 8th day of September, 1937, the subject of monthly reports of selected income and balance-sheet items being under consideration.

It is ordered, that each and every telephone carrier subject to the provisions of the Communications Act of 1934 having annual operating revenues above $1,000,000 shall, beginning as of January 1, 1938, make, and file, in duplicate, with this Commission monthly reports of selected income and balance-sheet items as provided for in Section 219 of said Act; that said reports shall be in forms prescribed and furnished by the Commission for that purpose and in accordance with the instructions in such forms.

It is further ordered, that each of said carriers with annual operating revenues above $1,000,000 shall mail its monthly reports as aforesaid to the Federal Communications Commission, Washington, D. C., within forty days after the close of the calendar month severally covered by the reports

By the Commission, Telephone Division,

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 8th day of September, 1937.

IN THE MATTER OF MAURICE M. MAHER, DOING BUSINESS AS MAHER & COMPANY, STATE TOWER BUILDING, SYRACUSE, NEW YORK

ORDER REVOKING REGISTRATION PURSUANT TO SECTION 15 (B) OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED

Maurice M. Maher, doing business as Maher & Company, a sole proprietorship, hereinafter called the registrant, having filed with the Commission on June 3, 1935 an application for registration on Form 1-M pursuant to Rule MA2 of the rules then governing the over-the-counter markets; and the said registration having become effective on January 1, 1936 in accordance with the Commission's rules and regulations; and the said registrant having become registered under Section 15 (b) of the Securities Exchange Act of 1934 as amended, by virtue of the provisions of Section 10 of the Act of Congress approved May 27, 1936 providing for the registration of over-the-counter brokers and dealers; and

The Commission having reasonable grounds to believe that the said registrant during the period from June 1, 1937 up to and including August 23, 1937 has wilfully violated the provisions of Sections 5 (a) and 17 (a) of the Securities Act of 1933 as amended in the sale of five (5%) per cent convertible debenture bonds of Transcontinental Petroleum Corporation; and having further reasonable grounds to believe that it is in the public interest to revoke the said registration; and

The said registrant on August 25, 1937 having consented in writing to the revocation of said registration and having waived notice and opportunity for hearing in connection therewith, and the Commission having duly considered the matter and being fully advised in the premises;

It is ordered, pursuant to Section 15 (b) of the Securities Exchange Act of 1934 as amended, that the registration of Maurice M. Maher doing business as Maher & Company as a broker or dealer transacting business on over-the-counter markets be and the same is hereby revoked.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

APPENDIX

1. Authorized Basic Quotas—Army Corps Areas and Selecting Offices (Veterans Administration), Territories from which selections of veterans are made.
2. Selecting Agencies of the Veterans Administration for the Veterans Contingent of the Civilian Conservation Corps.

Pursuant to the provisions of Public No. 163, 75th Congress (H. R. 6551) An Act to establish a Civilian Conservation Corps and for other purposes, approved June 28, 1937, and authority contained in the communication from the Director of the Civilian Conservation Corps dated July 9, 1937, designating the Veterans' Administration as an agency of the government for the purpose of carrying out the provisions of said Act, the following instructions which supersede all previous rules and instructions issued by the Veterans' Administration governing the selection of veterans to compose the veterans contingent of the Civilian Conservation Corps, are hereby issued for the guidance of all concerned.

The instructions contained herein will become effective as of September 7, 1937. Instructions previously issued governing the selection of veterans for the Civilian Conservation Corps under prior legislation not in conflict with the provisions of the Act of June 28, 1937, will remain in full force and effect until the effective date of the instructions contained herein.

1. *Authority.*

A. Section 1 and Section 7 of the Civilian Conservation Corps Act read as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That there is hereby established the Civilian Conservation Corps hereinafter called the Corps, for the purpose of providing employment, as well as vocational training, for youthful citizens of the United States who are unemployed and in need of employment, and to a limited extent as hereinafter set out, for war veterans and Indians, through the performance of useful public work in connection with the conservation and development of the natural resources of the United States, its Territories, and insular possessions: *Provided*, That at least ten hours each week may be devoted to general educational and vocational training: *Provided*, That the provisions of this Act shall continue for the period of three years after July 1, 1937, and no longer.

The Director is authorized to have enrolled not to exceed three hundred thousand men at any one time, of which not more than thirty thousand may be war veterans: *Provided*, That in addition thereto camps or facilities may be established for not to exceed ten thousand additional Indian enrollees, and five thousand additional territorial and insular possession enrollees.

(b) Based upon the provisions of the Act quoted above the Director of the Corps has established the number of war veterans which may be enrolled at any one time in the Corps at 30,000. That portion of the Civilian Conservation Corps which is composed of enrolled veterans will be known as the veterans contingent of the Civilian Conservation Corps. The veterans contingent will form a separate and distinct part of the Civilian Conservation Corps. It will not be mixed or consolidated at any time with other units of the Corps.

B. Pursuant to authority contained in Section 12 of the Civilian Conservation Corps Act the Veterans Administration has been designated as an agency of the government for the purpose of carrying out the provisions of said Act so far as it may relate to the selection of war veterans to compose the veterans contingent of the Corps, and to perform such other functions as may be directly related to the selection of war veterans. In the performance of these functions the Director of the Corps has authorized the Veterans Administration, subject to his general direction and in cooperation with the War Department, to promulgate such rules and regulations as may be required to carry out the functions delegated to it.

2. *Veterans Administration Functions.*

A. *Central Office, Washington, D. C.*

(a) In harmony with the delegation of authority granted by the Director of the Civilian Conservation Corps, it shall be the function of Central Office of the Veterans Administration in coordination with the War Department, to issue controlling instructions necessary in the effective administration of the work incident to the selection of veterans for enrollment in the Corps, and the performance of such other functions as may be directly related to the selection of veterans.

(b) Central Office will act as liaison between the several departments and agencies concerned; furnish general information; establish basic State quotas, and upon advice from the War Department will advise the several Managers of the replacement requirements at the beginning of each replacement period. At the close of each replacement period a consolidated report based upon reports received from the Managers through the Veterans Administration liaison representatives detailed to Corps Area Headquarters, will be prepared for submission to the Director of the Civilian Conservation Corps, showing in detail data indicating the participation of the several activities of the Veterans Administration in the selection and certification of veterans for this work.

B. *Regional Offices, Combined Facilities having Regional Office Functions, and the Contact Division, Central Office.*

Under controlling instructions issued by Central Office it shall be the function of the Managers of the Regional Offices and Combined Facilities, and of the Chief of Contact, Central Office, to furnish application blanks, accept completed applications, and to select veterans for enrollment to fill basic State quotas and replacement requirements requisitioned by the several Corps Area Commanders within quotas previously authorized by Central Office; to certify and notify veterans of the time and place to report for acceptance by the War Department for enrollment, in accordance with information released by Corps Area Headquarters through the liaison representative detailed to such Headquarters; to review and pass upon all requests from veterans who are members of the Civilian Conservation Corps for change in allotment or beneficiary; to handle correspondence and to furnish general information on matters pertaining to the veterans contingent of the Corps. Managers of selecting agencies will be responsible for taking such action as may be indicated to disseminate information to veterans generally with regard to the opportunity for submitting applications for enrollment in the Civilian Conservation Corps, and that contacts regarding matters relating thereto by veterans residing within the territory over which they have jurisdiction should be made with their office or facility.

C. *Liaison Representatives.*

A liaison representative will be detailed to each of the Corps Area Headquarters as his services may be required by the Manager having jurisdiction over the territory in which the Corps Area Headquarters is located, to represent the

Veterans Administration in the performance of the following functions:

(a) To serve as liaison representative between the several Veterans' Administration activities in the Corps Area and the officials of the Corps Area Headquarters.

(b) To keep the several Managers informed of the condition of their respective quotas during enrollment periods in order to avoid the possibility of exceeding their authorized quotas, and to assure that authorized quotas are filled.

(c) To be generally helpful to the Corps Area officials in the effective administration of the work relating to the veterans contingent.

(d) To make adjustments in authorized State replacement quotas within the Corps Area, as provided in Section 7 hereof, in cooperation with the Corps Area Commander, and with the concurrence of the Manager concerned.

(e) To obtain from appropriate officials of Corps Area Headquarters and from the several Managers of the Veterans Administration such data as may be requested by Central Office incident to this work.

(f) To prepare and submit a complete consolidated report to Central Office at the close of each enrollment period of the selection and enrollment of veterans within the Corps Area as of that date.

(g) To perform such other functions secondary to the functions outlined above as may be required to effectively coordinate the work relating to the selection and enrollment of veterans in the Corps amongst the various agencies concerned within controlling instructions.

3. *Selecting Agencies for the Veterans' Contingent.*

The several Regional Offices and Combined Facilities having Regional Office functions and the Contact Division of Central Office of the Veterans' Administration are hereby designated as agencies to select veterans for enrollment by the War Department for the Civilian Conservation Corps. The Managers of the Regional Offices and Combined Facilities and the Chief of Contact, Central Office, are hereby authorized to make selections. This authority may not be redelegated without prior approval of Central Office.

4. *Selection Areas.*

The State in which the authorized selecting agency is located will be the selection area for that authorized agency, except in those States in which there is more than one authorized selecting agency. In those States the agency will make selections from that part of the State over which it has jurisdiction. For example, selections for the entire State of Indiana will be made by the Manager of the Facility at Indianapolis. In those States where there is divided jurisdiction, as in the case of Ohio, the Manager of the Facility at Dayton will make selections only from those counties in southern Ohio coming under his jurisdiction, and the Manager of the Regional Office at Cleveland will make selections from those counties in northern Ohio coming under his jurisdiction. The Veterans' Administration Regional Office at Philadelphia, Pennsylvania, will serve as the selecting agency for veterans residing in the State of Delaware. Selections for this State will be based upon requisitions issued by the Corps Area Commander of the Second Corps Area through the Veterans' Administration liaison representative of the Second Corps Area Headquarters.

5. *Selection for Enrollment.*

(a) The Managers of the selecting agencies authorized to make selections for enrollment in the veterans contingent of the Civilian Conservation Corps will make selections from the number of eligible veterans available as shown by the accepted applications on hand, in time to assure the filling of authorized vacancies preliminary to quarterly enrollment periods. In making selections for enrollment consideration will be given to those veterans found to be eligible in the following order:

1. Those veterans with dependent member or members of their families.

2. Those veterans who elect to make allotments to blood relations not members of their families, or to dependents by obligation as herein defined.

3. Those veterans without dependents.

In considering those veterans within the three classifications enumerated above, first consideration will be given to those veterans within the group considered to be in greatest need of employment.

(b) The term "family" as used herein will be considered to include all persons for whom the veteran is legally responsible for support and maintenance. A veteran may elect to make an allotment to other blood relations or dependents by obligation provided they are, in fact, dependent upon him for support and maintenance, and provided he has no legal dependents. Veterans without dependents will be selected on the condition and with the understanding that a deposit of pay in an amount specified by controlling regulations will be made with the appropriate officials of the War Department in lieu of an allotment.

(c) The basic function of the selecting agencies of the Veterans Administration is to make available through the process of selection, an adequate number of eligible veterans to fill the number of authorized existing vacancies within their respective basic State quotas upon periodic requisitions from the War Department. Such selections should be made from current active applications. Experience has proven that the active file of applications should be kept current so that veterans who have previously filed applications but are no longer interested may not be selected, certified and notified to report for enrollment. Selections should not be made from applications more than approximately thirty days old without first ascertaining from the applicant that he is currently interested in enrollment.

(d) In the event it appears that there may not be available a sufficient number of active applications from which the authorized number of vacancies may be filled, appropriate announcement of the ensuing enrollment period should be publicized through the press and by other usual means of publicity.

(e) If the number of applications exceeds the number required to fill announced quotas, then those veterans who have applied but have not been selected within controlling instructions must seek employment opportunity elsewhere. It cannot be expected that the Civilian Conservation Corps may provide an opportunity for all veterans who apply for enrollment therein.

(f) In harmony with the Veterans Administration's policy to cooperate with the United States Employment Service of the Labor Department and its affiliated public employment services in obtaining jobs for veterans, those veterans who apply for enrollment in the Civilian Conservation Corps and may not be selected and enrolled, should be furnished information as to the location of the public employment office within the community in which they reside, and advised to register for employment with that office. Close cooperation should also be maintained with these employment agencies to the end that veterans registered for employment may be afforded an opportunity to apply for membership in the Civilian Conservation Corps if interested.

6. *Certification and Notification.*

(a) Upon receipt of requisitions from the office of the Corps Area Commander covering the number of veterans to be selected and enrolled to fill vacancies and information as to the time and place to report for acceptance, selected veterans will be certified by the Managers of the selecting agencies for enrollment, ordered to report for acceptance and charged to the authorized quotas. The number of veterans so certified and selected should be adequate to fill existing authorized vacancies and to provide for losses at the place of acceptance due to rejection by reason of failure to pass the physical examination or for other reasons. Those veterans selected in excess of the number of authorized vacancies to meet contingencies relative to rejections, will be considered as alternates and so advised.

(b) The original of the application form of the selected veteran, upon notification to him of the time and place to report to the Army authorities, will be referred direct to the U. S. Army officials at the place he is to report. This reference may be made either by correspondence or personally by an employee of the Veterans Administration, provided no additional expense through such personal reference is incurred. The duplicate copy of the application will be retained for the records of the Veterans Administration.

(c) Veterans selected and certified by the selecting agencies will be notified to report to Army recruiting stations or at such other places as may be designated by the Corps Area Commander.

7. *Enrollments, Reenrollments, and Replacements.*

(a) The second proviso of Section 8 of the Civilian Conservation Corps Act provides in part that enrollments and reenrollments shall be for a period of not less than six months. It also provides for the reenrollment of war veterans without regard to the length of their previous service in the Corps. Subsequent to July 1, 1937 all enrollments or reenrollments in the veterans contingent of the Civilian Conservation Corps will be for a period of six calendar months. There will be four enrollment periods during the fiscal year, namely in July, October, January, and April.

(b) Replacements to fill vacancies caused by discharges or otherwise will be made during the enrollment periods. The number of vacancies within the State quota to be filled during an enrollment period will be that number which represents the difference between the estimated enrollment strength at the end of the enrollment period and the State quota.

(c) In harmony with War Department instructions estimates of the number of vacancies to be filled within the authorized State quotas will be made by the several Corps Area Headquarters. These estimates will be submitted to the War Department, Washington, D. C. Upon receipt of these estimates the War Department will advise Central Office of the Veterans' Administration of the replacement requirements. The War Department and the Veterans' Administration will jointly determine the number of replacements to be authorized. Central Office of the Veterans' Administration will then announce to the Managers of the several selecting agencies the number of vacancies to be filled from the areas coming within their respective jurisdictions, subject to requisition by the appropriate Corps Area Commander. The number specified in the requisition may be in excess of the replacement requirements that provisions may be made for losses due to rejection at the final place of enrollment, but in no instance should the number specified in the requisition be less than the currently authorized requirements.

(d) Such requisitions will be forwarded by the Corps Area Commander concerned to the Manager through the Veterans' Administration liaison representative, together with information as to the time and place that selected veterans should report for initial acceptance.

(e) The number of authorized vacancies to be filled will be apportioned by the Manager to the counties throughout the entire territory under his jurisdiction proportionate to the basic county apportionment and on the basis of the interest indicated by applications on hand.

(f) The liaison representative in cooperation with the Corps Area Commander upon receipt of the certification from a Manager that he will be unable to fill the number of vacancies authorized, and is willing to release a portion thereof for reassignment to those States within the Corps Area that will fill their quota and have a surplus of applications on hand, is authorized to make such adjustments in the authorized vacancies as may be deemed appropriate, provided that such adjustments will not result in the filling of a total number of vacancies for the Corps Area as a whole in excess of the number of vacancies authorized to be filled.

8. *Assignment of Veterans upon Enrollment.*

(a) The assignment of veterans to units of organization in the Civilian Conservation Corps is a function of the War Department. It shall be the general policy, however, so far as controlling conditions and circumstances warrant, to assign veterans to (1) units of organization located within their State of permanent address, and (2) within the Corps Area in which they reside. It is not anticipated that veterans residing in one Corps Area will be transferred to another Corps Area for assignment.

(b) Questions relating to the transfer of veteran enrollees upon their request from one camp to another, will be for the consideration of the War Department. Such requests will be normally denied. However, a veteran may be transferred to a junior company if he so desires to fill the position of senior leader, cook or mess steward. When so transferred he will continue to be classified as an enrollee of the veterans contingent, and accordingly charged against the veterans quota of the State selecting agency which selected him for enrollment. All regulations concerning veterans will continue to apply to him. When relieved from duty as cook or mess steward or upon his request, provided no disciplinary action is pending, he will be transferred back to the veteran unit.

9. *Definition of War Veteran.*

(a) For the purpose of the Civilian Conservation Corps Act war veterans will include only those veterans who performed service with the armed forces of the United States during a period of war. The major wars or expeditions in which the armed forces of the United States have been engaged since 1897 are as follows:

| War | Began | Ended |
|---|---|---|
| Spanish-American War | April 21, 1898 | April 11, 1899. |
| Philippine Insurrection | April 11, 1899 | July 4, 1902. |
| Boxer Rebellion | June 20, 1900 | May 12, 1901. |
| Cuban Pacification | October 6, 1906 | April 1, 1909. |
| Nicaraguan Campaign | August 28, 1912 | November 2, 1913. |
| Vera Cruz Expedition | April 21, 1914 | November 26, 1914. |
| Punitive Expedition into Mexico | March 10, 1916 | February 5, 1917. |
| World War | April 6, 1917 | July 2, 1921. |

(Paragraph 37 of General Appendix of R. and P.)

Reference is made to Paragraphs 36 and 41 of the General Appendix of Regulations and Procedure for a list of the wars, military expeditions, occupations, etc., in which the United States Army, Navy and Marine Corps have participated. Other paragraphs of the General Appendix contain information relative to such participation.

(b) Any veteran who, on or after April 6, 1917 and prior to November 12, 1918, was drafted and reported pursuant to call of the local draft board, and who was rejected or discharged from the draft, will be considered a veteran of the World War for the purposes of selection and certification by the Veterans' Administration for enrollment in the veterans contingent of the Civilian Conservation Corps.

10. *State and Corps Area Quotas for the Veterans' Contingent.*

(a) The total quota for the veterans contingent as authorized by the Director of the Civilian Conservation Corps will be apportioned amongst the various States and the District of Columbia on the basis of the State population as shown by the 1930 census. In those States where there is more than one selecting agency the State quota will be apportioned between the agencies on the basis of the population as shown by the 1930 census in that portion of the State coming under the jurisdiction of the selecting agency. Such apportionments will be made and announced by Central Office. The quotas thus established will be known as State quotas. The sum total of the State quotas within a given Corps Area will constitute the Corps Area quota. The State and Corps Area quotas will not be changed except upon authority of Central Office. In the event a given State within a Corps Area consistently fails to fill existing vacancies within its State quota during replacement periods, or a Corps Area consistently fails to fill vacancies existing in the Corps Area during replacement periods, then consideration will be given to the

permanent adjustment of such quotas through reassignment of the surplus portion thereof to another State within the Corps Area, or to another Corps Area in the event the latter contingency should prevail.

(b) The Managers of the selecting agencies are authorized and instructed to apportion the State quota into local quotas. The county will be used as the basis for establishing such local quotas, and apportionment will be based upon the county population as shown by the 1930 census. In the event the local quota is not filled through the process of selection, the unfilled portion thereof may be reapportioned and filled from some other county or counties as, in the judgment of the Manager, will be most equitable.

11. *Application for Enrollment.*

(a) War veterans interested in enrollment in the veterans contingent of the Civilian Conservation Corps will be required to file application on Form P–130 revised. These forms may be obtained from the Veterans' Administration selecting agencies. They will not be distributed promiscously but will be furnished in duplicate with an accompanying letter of information to each veteran expressing a desire to file application. The form must be prepared and submitted in duplicate. The information called for on the application must be completely filled out. Applications not properly prepared may not be accepted as a basis for certification and should be returned to the veteran for completion. Those veterans personally contacting the Veterans' Administration selecting agencies will be rendered assistance in the preparation of their applications by such employees as the Manager may designate.

(b) Application Forms P–130 revised will be furnished the selecting agencies periodically in sufficient quantities to meet their needs. In the event the supply so furnished should become exhausted the Managers are authorized to mimeograph a supply adequate to meet their immediate needs pending the receipt of the next periodic distribution.

(c) Applications for enrollment in the veterans contingent of the Civilian Conservation Corps will be voluntary on the part of veterans.

12. *Eligibility Requirements for Selection for Enrollment.*

A. *Original Enrollment.*

(a) Veterans who meet the following requirements and who have submitted a properly prepared application, may be considered by the Veterans' Administration selecting agency making selections for original enrollment or subsequent enrollment in the veterans contingent of the Civilian Conservation Corps. Available evidence must establish that the veteran:

1. Has had service in the armed forces of the united States during a period of war
2. Was honorably discharged from such service
3. Is unemployed and in need of employment
4. Is a citizen of the United States
5. Is of good character
6. Is physically able to perform ordinary manual labor
7. Is free from communicable disease, including venereal disease
8. Does not have a history of mental derangement
9. Has not been convicted of a crime or misdemeanor for which he is serving sentence or for which he is currently on parole or probation
10. Has a permanent address within the territory coming under the jurisdiction of the selecting agency which considers his application, and such permanent address is that shown on the application.

(b) The term "unemployed" as used in item #3 above shall be construed to mean that the veteran does not have regular full time employment at a reasonable wage. An unemployed veteran shall be considered to be in need of employment when he does not have adequate income to provide for the essential support of himself and dependents.

(c) A physical examination will not be required incident to the selection of veterans. The selecting agency, however, will give due consideration to the statements contained on the application regarding the veteran's physical condition. A physical examination will be required in connection with the enrollment of the veteran. This examination will be made by the War Department after the veteran has been selected and authorized to report to the place of acceptance.

In determining the possibility of history of mental derangement, reference may be made to office records available to the selecting agency or through inquiry upon personal contact at the selecting agency. However, no investigations are contemplated which will involve additional expense to the government.

(d) Special emphasis is placed upon the importance of establishing the veteran's correct address prior to his selection. If upon review of an application there is reason to question the address as given by the veteran as being his permanent address, selection should be withheld pending development of the facts relative thereto. When a permanent address has been established no change thereof is in order in the absence of conclusive evidence that an error has been made. Should a change of address be authorized the Corps Area Headquarters should be so notified so that the proper record of such change may be made on War Department records.

(e) There are a number of reasons why caution should be exercised in establishing a veteran's permanent address, among which are:

(a) Basic quotas are established in terms of the estimated number of veterans permanently residing within the State or portion thereof coming under the jurisdiction of the selecting agency.

(b) Care must be exercised in the conservation of funds provided for the transportation of members of the Civilian Conservation Corps.

Those veterans who are domiciliary members of a Veterans Administration Facility or who are bona fide members of a soldiers' home, and who are actually present at such Facility or Home, may give the address of the Facility or Home as their permanent address when preparing their applications for enrollment. Their applications will be for the consideration of the Manager having jurisdiction in Civilian Conservation Corps matters in the State in which the Facility or Home is located at which the veteran is a member. Such members should not be encouraged to seek enrollment in the Civilian Conservation Corps, and their applications should not be given preferential consideration because of such membership.

B. *Subsequent Enrollment.*

(a) Veterans who have had previous service in the Civilian Conservation Corps and who were honorably discharged therefrom, as evidenced by their certificate of discharge, may be considered for reselection and enrollment upon submitting a properly completed application form. Veterans who have had previous service in the Civilian Conservation Corps and whose discharge therefrom was other than honorable, or whose previous service was unsatisfactory, as evidenced by their certificate of discharge therefrom, will not be eligible for reselection for enrollment unless the appropriate officials of the War Department upon reconsideration, modify the character of discharge or the notation of unsatisfactory service previously issued.

(b) Veterans who have for any reason and regardless of the character of discharge been separated from the Civilian Conservation Corps or shall be separated from the Civilian Conservation Corps, will not be eligible for reselection for enrollment until the expiration of six calendar months subsequent to the effective date of their discharge, except as hereinafter provided. Veterans selected for enrollment in the Civilian Conservation Corps should be advised of this restriction and urged to remain in the Corps until such time as they have definite assurance of obtaining permanent employment elsewhere.

(c) All veterans to whom this rule is applicable will, at the time of their discharge from the Civilian Conservation Corps, be advised by the War Department of their ineligibility for reselection for a period of six calendar months from the date of discharge, and notation to that effect will be made on the discharge certificate.

(d) Those enrolled veterans who complete an enrollment period and who desire to continue as an enrollee of the veterans contingent in the next succeeding enrollment period, may be reenrolled by the War Department without reference to the selecting agency for continuation of their service. Unless the selecting agency receives notification of a veteran's discharge who has been previously enrolled, it will be assumed that his reenrollment has been accomplished.

(e) At the termination of any enrollment period should both the commanding officer and the project superintendent be of the opinion that an enrollee is not entitled to the privilege of reenrollment because of unsatisfactory performance of service, such reenrollment will be denied him on the basis that he is not considered worthy of reenrollment. Veterans so denied reenrollment will not be eligible for reselection by the selecting agency.

(f) On reenrollments of members by the War Department for an additional enrollment period allottees and allotments will be continued as though no change in the service of the enrollee had occurred.

(g) A veteran who has been honorably discharged from the Civilian Conservation Corps for physical disability not the result of his own misconduct, may be reselected during an enrollment period within six calendar months from the date of his discharge, provided he has overcome such disability, has been physically examined, and certified by the War Department to the proper selecting agency of the Veterans' Administration as physically eligible for reselection. All expense of transportation prior to acceptance for enrollment will be borne by the veteran.

(h) Former veteran enrollees who were discharged to accept positions with the technical agencies (Forestry Service, Park Service, etc.) on the operating staffs of work projects, who are honorably discharged from those positions because of reduction in the number of work projects, and who are otherwise eligible, may be reenrolled in the veterans contingent without reference to the selecting agency within one month from the date of their discharge therefrom, upon application and proper certification by the project superintendent. The appropriate selecting agency should be advised of this action.

(i) Corps Area Commanders are authorized when, in their judgment such action is indicated, to direct a change in the type of discharge whether administrative or dishonorable in character, previously given a veteran enrollee, and to restore him to an honorable status. Such action on the part of the Corps Area Commander will entitle the veteran to reinstatement as an enrollee, without reference to the selecting agency, upon authority of the Corps Area Commander within the six months period for which the veteran had enrolled. Such action on the part of the Corps Area Commander will entitle the veteran to consideration for reselection by the selecting agency during any enrollment period subsequent to the expiration of six calendar months from the effective date of the veteran's discharge.

13. *Pay and Allowances.*

(a) Pursuant to the provisions of Section 9 of the Civilian Conservation Corps Act the basic pay for enrolled members of the veterans contingent of the Civilian Conservation Corps will be $30 a month. Such pay will begin as of the date the veteran is enrolled by the War Department as a member of the Corps.

(b) Veterans assigned as "leaders" will receive pay in the amount of $45 a month, and those assigned as "assistant leaders" will receive pay in the amount of $36 a month. The assignment of leaders and assistant leaders is not a function of the Veterans' Administration.

(c) Pursuant to Section 10 of the Civilian Conservation Corps veteran enrollees will be provided, in addition to the monthly rates of pay, with such quarters, subsistence, and clothing or commutation in lieu thereof, medical attention, hospitalization, and transportation as the Director of the Corps may authorize under the conditions outlined in War Department instructions.

14. *Allotment of Pay.*

A. *Original Allotment.*

(a) All veteran enrollees may receive a cash payment of $8.00 a month from their basic pay. It is required that the remainder be allotted to dependents or deposited with the Chief of Finance, War Department. Those veterans who have legal dependents and those who elect to make an allotment as defined under Paragraph #5 hereof will be required to allot to them from their basic pay an amount not less than that stipulated in the Table of Allotment and Deposit Requirements provided herein. That portion of the basic monthly pay remaining after provisions have been made for the cash payment and the compulsory allotment will be placed on deposit with the Chief of Finance, War Department. Allotments may be made only to dependents for the purpose of their maintenance and support and may not be made for other purposes.

(b) Veteran enrollees without dependents will be required to deposit with the Chief of Finance, War Department, the remaining portion of their basic monthly pay after provisions have been made for the cash payment. Deposits will be repaid to the veterans entitled thereto in case of emergency or upon completion or release from enrollment pursuant to War Department regulations.

*Table of allotment and deposit requirements*

| Dependents | Monthly cash payment | Deposit with chief of finance | Compulsory allotment to dependents | |
|---|---|---|---|---|
| Wife only | $8.00 | $7.00 | $15.00 | |
| Wife and 1 other dependent | 8.00 | 4.00 | 18.00 | Wife $10.00. |
| Wife and 2 other dependents | 8.00 | 2.00 | 20.00 | Dependents |
| Wife and 3 or more dependents | 8.00 | 0.00 | 22.00 | share equally. |
| No wife but: | | | | |
| 1 other dependent | 8.00 | 12.00 | 10.00 | |
| 2 other dependents | 8.00 | 7.00 | 15.00 | Dependents to |
| 3 other dependents | 8.00 | 4.00 | 18.00 | share equally |
| More than 3 other dependents | 8.00 | 2.00 | 20.00 | |
| No dependents | 8.00 | 22.00 | | |

(c) The division of the monthly basic pay as provided in the preceding Table will be for general application. In exceptional cases, however, upon request of the veteran the selecting agency may approve the allotment of the entire amount of the monthly basic pay to the dependents or may approve an allotment equal to the sum of the compulsory allotment and deposit.

(d) In those cases where the veteran has a dependent wife and children and the children are in the care and custody of the wife, the allotment will be made to the wife for her benefit and the benefit of the children jointly. If the children or some of them are not in the care and custody of the wife, the compulsory allotment will be made to the wife for her care and those children under her care and custody, and a separate allotment will be made to some one agreeable to the veteran and acceptable to the Veterans' Administration selecting agency for and on behalf of the children not under the wife's care, with the understanding that the children will share equally in the amount so allotted. For example:

If there is a wife and two children, only one of whom is under her care, there would be an allotment of $15.00 to the wife for her and the one child ($10.00 for the wife and $5.00 for the child), and a separate allotment to some other acceptable person of $5.00 for the other child. The veteran would receive $8.00 cash payment and make a $2.00 deposit with the Chief of Finance, War Department.

This principle will apply generally where separate allotments are required to meet special circumstances.

(e) Veterans who have deposits may make withdrawals therefrom subject to approval by the War Department as provided in War Department regulations to provide additional support and maintenance for their dependents and for emergencies, it being required that evidence satisfactory to the War Department officials will be submitted by the veteran establishing the need for such withdrawal to meet bona fide obligations. Determination as to whether such withdrawals may be approved is a function of the War Department acting independently of the Veterans' Administration.

(f) The veteran in the preparation of his application will be required to designate the dependents legally dependent upon him for support by name, their relationship to him, and their address. Should he have no legal dependents and

elect to make an allotment to a blood relation or dependent by obligation, the name, relationship, and address of such allottee will be designated on the application. Should he have no legal dependents or should he not elect to make an allotment as provided, such statement will be made on the application.

(g) Any veteran enrollee who accepts the return to him of an allotment or any portion thereof made to an allottee while a member of the Civilian Conservation Corps will be subject to discharge under War Department regulations.

B. *Change in Allotments.*

(a) Subsequent to the selection and certification of a veteran by the selecting agency the designated allottee will not be subject to change, and the allotment will not be subject to transfer, reduction or cancellation except upon the approval of the Manager making the selection and certification. In the event conditions should arise which, in the judgment of the veteran, would warrant a change in allottee or allotment, a request therefor together with a full statement of the facts may be referred to the Manager making the selection through the Commanding Officer of the unit of organization to which the veteran is assigned.

(b) No change in allottee or transfer or reduction of allotment upon the request of the veteran will be authorized unless it is established in fact that the allottee is deceased or is no longer dependent upon the veteran for support, or that the person in behalf of whom change in allotment is to be made, has a prior right. The consent of the allottee is not required as a basis for authorizing a change in allottee or allotment if facts otherwise warrant.

(c) A legal dependent as defined in Paragraph #5 hereof may release the veteran from making an allotment in his behalf provided such release is submitted in writing and made a part of the record of the selecting agency and is acceptable to the selecting agency.

(d) A veteran enrollee will be required to comply with an order of a court of proper jurisdiction stipulating that he shall contribute to the support of his legal dependents. In the event it is ascertained that a court order has been issued and the veteran is not complying therewith *within the amount required as a compulsory allotment*, the Manager of the selecting agency which selected the veteran will advise him through the Corps Area Commander concerned of such order and offer him the opportunity to comply therewith by changing his allottee or allotment to conform therewith to the extent of the amount required as a compulsory allotment, and that in the event he refuses to cooperate, consideration of his discharge from the Civilian Conservation Corps will be in order for failure to comply with controlling instructions.

(e) No change in allottee or allotment will be authorized until the facts relative thereto have been fully developed. If in the absence of a request from the veteran a change is indicated by available facts, he will be given the opportunity of making such change as may be required, and in the event of his failure to do so, consideration of his discharge from the Civilian Conservation Corps will be in order for failure to comply with controlling requirements.

(f) The War Department with the consent of the veteran may authorize the increase of an allotment from the approved deposit or cash payment to the veteran, or may authorize an increase in the approved deposit from the cash payment to the veteran without reference to the Veterans Administration selecting agency.

(g) Veteran enrollees who are selected as leaders and assistant leaders will not be required to increase the initial allotment made by them at the time of their selection for enrollment, but may elect to do so with the approval of the ~~War~~ Department without reference to the selecting agency.

(h) No allotment will be paid to an allottee residing in a foreign country. Veterans submitting applications indicating allottees who reside in a foreign country should be advised to that effect, and that their applications will be considered as though they were without dependents, and that a deposit with the Finance Officer will be required as stipulated herein.

(i) Information from allottees to the effect that an allotment has not been received should be referred to the Finance Officer of the Corps Area Headquarters concerned.

(j) Veteran enrollees will be expected to cooperate in all matters relating to the designation of allottees and in making allotments thereto. The provisions of the law and the instructions relative thereto must be applied. Any veteran who fails to cooperate or who furnishes misinformation concerning his legal dependents will be subject to discharge from the Corps upon recommendation of the Manager making the selection. Should the Corps Area Commander not concur in the recommendation made by the selecting agency, the matter will be for the consideration of Central Office of the Veterans Administration, whose decision will be final.

C. *Application of Foregoing Instructions.*

The instructions contained herein governing the allotment of pay are primarily for prospective application. However, adjustments in existing allotments in effect as of the effective date of these instructions will be made to conform therewith upon the request of any person directly interested therein, when the facts establish that an adjustment is in order.

15. *Discharge of Enrollees of the Veterans Contingent.*

(a) The determination as to whether a veteran may be discharged from the Civilian Conservation Corps upon request or otherwise, is not a function of the Veterans Administration. This function is primarily the responsibility of the War Department. In certain instances it is a joint function between the War Department and the technical agencies.

(b) The question of discharges from the Civilian Conservation Corps, however, is of necessity important to the selecting agencies, in that in many cases it relates to the question of reselection. Veterans who subsequent to selection and enrollment are found to be ineligible, may not be continued in the Corps, subject to the War Department's determination. It is therefore important that veterans who are not eligible for enrollment under controlling instructions should not be selected or reselected and certified. This fact necessitates that the selecting agencies give due consideration to the correctness of the representations made by the veteran on his application.

(c) If subsequent to selection and enrollment it should come to the attention of the selecting agency that a veteran obtained his enrollment through misrepresentation of facts, or that he is not otherwise eligible for membership in the Corps, such information should be brought to the attention of the Corps Area Headquarters with appropriate recommendation for such action as may be deemed appropriate under controlling instructions. The appropriate officials of the War Department may likewise bring such cases to the attention of the selecting agency with a request for recommendation. Subsequent to development of the facts it will be the function of the selecting agency to comply with the War Department's request. In all instances wherein the selecting agency submits recommendation to the War Department relative to the discharge of a veteran, a complete report will be made to Central Office of the Veterans' Administration within a reasonable time, together with a statement of the facts, if such recommendations are not accepted and corresponding action taken. The development of the facts necessary to a determination of such questions should be accomplished primarily through the medium of correspondence. Investigations by the selecting agencies which would incur additional expense to the Veterans' Administration are not authorized.

(d) Any action taken by the War Department which will affect the enrollment status of veteran enrollees such as discharged from the Corps, transfer within the Corps, change of allottee, change of allotment, reinstatement upon authority of the Corps Area Commander, will be promptly reported by the appropriate War Department officials in writing to the selecting agency which selected the veteran for enrollment. War Department officials at acceptance and enrollment stations will promptly notify the selecting agency of the rejection of selectees for acceptance or enrollment, stipulating the reasons therefor.

(e) A former veteran member of the Corps who was given an administrative or dishonorable discharge from his former enrollment, if subsequently enrolled fraudulently, will be discharged by the Company Commander and the selecting agency notified.

16. *Transient Veterans.*

(a) Transient veterans desiring to enroll will submit applications to the Manager having jurisdiction over the territory in which the applicant's permanent address, as shown on the application, is located. These applications will be considered by the Manager concerned in connection with other applications received, and if the veteran is selected, appropriate notification will be forwarded to his permanent address.

(b) Transient veterans may obtain applications from any Veterans Administration Regional Office or Combined Facility having Regional Office activities. The form should be prepared in duplicate, and both copies forwarded to the Manager having jurisdiction.

(c) The Managers of Regional Offices and Combined Facilities are instructed to provide assistance to transient veterans who apply in person to their respective stations in the preparation and forwarding of application forms, and to advise such veterans that it will be necessary for them to return to their permanent address to await notification. They should not, however, be given any assurance that they will be selected by the Manager concerned, but advised that their applications will be given due consideration under controlling instructions.

(d) It is incumbent upon transient veterans to return to their place of permanent address before they may be enrolled in the Civilian Conservation Corps, and accordingly veterans who seek enrollment therein should be encouraged to remain at or return to their place of permanent address and make application with the Manager of the Veterans Administration Regional Office or Combined Facility having jurisdiction over the territory in which they reside.

(e) Veterans should not come to Washington seeking enrollment in the Civilian Conservation Corps. Only veterans who have an established permanent address in the District of Columbia will be enrolled therein at Washington. No encouragement should be offered by any employee of the Veterans Administration or by others interested in veterans' welfare to come to Washington for this purpose. Such encouragement will serve to be adverse rather than in the interest of veterans' welfare.

17. *Report of Selection and Enrollment.*

A. *By the Selecting Agency to the Veterans Administration Liaison Representative Detailed to Corps Area Headquarters.*

(a) Immediately following the close of each enrollment period the selecting agency will prepare and submit the original thereof to the Veterans Administration liaison representative detailed to Corps Area Headquarters a statistical report of accomplishments together with narrative explanations that may be required and such comments and recommendations as may be indicated.

(b) The report will consist of eleven items. It should be prepared in tabular form for easy analysis. Abbreviated headings may be used in the tabulation. The purpose of this report is to obtain a record of accomplishments during the enrollment period and a record of the conditions prevailing at the close of the enrollment period in terms of the objective sought, namely, that at the close of the enrollment period there should be in enrollment status from the selection area covered by the report a number of veterans equal to the basic State quota for that area. The report should be prepared without regard to the unit of organization of the Civilian Conservation Corps to which the enrolled veteran may be assigned for duty.

The eleven items to be recorded therein are as follows:

1. Authorized basic State quota
2. Authorized replacement quota announced by Central Office
3. Adjustments in authorized replacement quotas authorized by the liaison representative
4. Replacement quota as adjusted. (Item #2 plus or minus item #3)
5. Number of veterans selected and notified to report for acceptance by the War Department
6. Number of veterans *enrolled* by the War Department
7. Total number of veterans in enrollment status at the close of the enrollment period
8. Shortage or overage in enrollment status in terms of authorized basic State quota (Difference between item #1 and item #7)
9. Total number of veterans in enrollment status at the close of the enrollment period who have made allotments
10. Total number of veterans in enrollment status at the close of the enrollment period who have not made allotments (Item #9 plus item #10 should equal item #7)
11. Number of pending active applications on hand at the close of the enrollment period. This item should cover only those applications of veterans known to be interested in obtaining membership in the Civilian Conservation Corps, but who could not be selected and enrolled because of limitation of the number of authorized vacancies.

This report should be submitted to the liaison representative as promptly as possible subsequent to the termination of the enrollment period.

B. *By the Liaison Representative.*

The liaison representative upon receipt of the reports from the several selecting agencies within the Corps Area will, upon making appropriate check with the Corps Area Commander, with special reference to items #6, 7 and 8 inclusive, prepare a consolidated report by States and forward the original thereof to Central Office, together with narrative explanations which may be required and such comments and recommendations as may be indicated.

C. *Consolidated Report.*

The reports received from the several liaison representatives detailed to Corps Area Headquarters will be consolidated by Central Office into one report for the information of the Director of the Civilian Conservation Corps and others concerned.

The fact that the several reports prepared by the selecting agencies will ultimately be consolidated into one report necessitates that there be uniformity and care in the preparation of such reports.

18. *Civilian Conservation Corps Records.*

A. The applications and correspondence concerning individual veterans relating to enrollment in the veterans contingent of the Civilian Conservation Corps will be maintained in four separate files, the material therein to be arranged in alphabetical order as follows:

1. *Pending File.*—This file should contain the application and correspondence from all veterans who are correctly seeking enrollment in the Civilian Conservation Corps. Any application which is more than six months old and which has not been kept active through an expression of renewed interest on the part of the veteran, will not be considered an active application and should not be carried in this file. This should be the file from which selections are made to fill vacancies in harmony with controlling instructions.

2. *Enrollees' File.*—This file should contain the records of veterans who are actually in enrollment status at any given time.

3. *Discharge File.*—This file should contain the records of veterans who have previously been enrolled in the Civilian Conservation Corps, but who have been discharged therefrom. If a former enrollee subsequently applies for enrollment and is found to be eligible for consideration, then his records should be transferred to the pending file while the question of his enrollment is pending. If he is again enrolled it should be placed in the Enrollees' File; if not, it should be returned to the Discharge File. Care should be exercised not to give consid-

eration to the reselection of a veteran when the individual record clearly indicates that he is ineligible for reselection for enrollment.

4. *Inactive File.*

(a) This file should contain applications, correspondence, and other material on individual veterans who have filed an application or who have expressed an interest in enrolling in the Civilian Conservation Corps, but who have not been enrolled therein and who have not manifested an active interest in obtaining enrollment within a preceding six months.

B. (1) These files must be maintained on a current basis that the Manager may be in a position to furnish Central Office or the liaison representative with pertinent information requested, which may be obtained therefrom and that accurate statistical data may be readily obtainable.

(2) Only material contained in the inactive file may be subject to consideration for destruction or other disposition in harmony with general instructions regarding the disposition of such material. Recommendation should not be submitted for the destruction of material contained in the Pending File, Enrollees' File, or Discharge File.

19. *War Department Regulations.*

(a) "War Department Regulations—Relief of Unemployment—Civilian Conservation Corps" and periodic announcements of changes therein, are distributed to all activities of the Veterans' Administration for their information and guidance in cooperating with the War Department and in answering inquiries concerning this work.

(b) Such matters as physical examination, transportation, discipline, transfers, hours of labor, quarters, subsistence and laundry, allowances, welfare, medical attention and hospitalization, burial, and discharge, etc., are covered in detail in those regulations, and where such matters or other matters which are the function of the War Department are referred to in these instructions, the comment is informative rather than instructional.

(c) In answering inquiries in connection with any matters which are within the jurisdiction of the War Department reference should be made to the War Department Regulations, and where there is any uncertainty concerning the character of information to be furnished, the inquiry should be referred to the office of the Corps Area Commander for appropriate attention.

20. *Responsibility of the Veterans Administration.*

(a) The responsibility of the Veterans Administration will cease upon the forwarding of the original application to the recruiting station and notification of the veteran to report to the recruiting station for completion of enrollment, except as to questions which may arise which are directly related to the veteran's selection or reselection, including questions relating to allottees and allotments. In this connection, however, the Manager will be expected to extend to the veteran, his dependents, the War Department representatives, and others concerned every facility available consistent with existing instructions and regulations, looking toward the equitable disposition of matters relating to the above or any other questions which may be presented incident to this work.

(b) The Managers concerned are directed to take such action as may be necessary to insure that all employees contacting veterans and others on Civilian Conservation Corps matters or who handle applications for enrollment therein are thoroughly familiar with the Instructions Governing the Selection of Veterans to Compose the Veterans Contingent of the Civilian Conservation Corps as contained herein, and as may be sebsequently amended. It should be made the responsibility of all employees concerned to review such instructions periodically that they may be thoroughly conversant therewith.

(c) In view of the nature of the work involved an effort has been made to keep the instructions as free from technicalities as possible and to give the several selecting agencies considerable latitude in the application thereof. However, there are for application certain definite principles and policies which have been clearly stipulated and which are strictly for compliance by officials and employees of the Veterans Administration engaged in this work.

## DEPARTMENT OF THE INTERIOR.

### National Bituminous Coal Commission.

[Order No. 45]

AN ORDER PROVIDING FOR A PUBLIC HEARING ON PETITION OF BITUMINOUS COAL PRODUCERS BOARD FOR DISTRICT NO. 12 FOR DIVISION OF MINIMUM PRICE AREA NO. 2 OR OTHER RELIEF

Bituminous Coal Producers Board for District No. 12 having filed a petition with the Commission pursuant to Section 4, Part I (a) of the Bituminous Coal Act of 1937, petitioning the Commission for a hearing to receive evidence for the purpose of enabling the Commission to determine the advisability of dividing Minimum Price Area No. 2 so as to place District No. 12 in a separate minimum price area, or grant such other relief to District No. 12 as would render the establishment of minimum prices in accordance with all the standards set forth in Subsections (a) and (b) of Part II of Section 4 of the Act, more practicable, or such other relief as the Commission may deem just and equitable in the premises, and pursuant to Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

That a public hearing be held in the City of Washington, D. C., on the 27th day of September, 1937, at the Hearing Room of the Commission in the Hamilton Hotel, commencing at the hour of 10 o'clock A. M., before an Examiner designated by the Commission for the purpose of receiving evidence from all interested parties to enable the Commission to act upon the petition of the Bituminous Coal Producers Board for District No. 12, and to determine, pursuant to subsection (a) of Part I of Section 4 of the Act, whether or not

a change in the territorial boundaries or limits or a division of Minimum Price Area No. 2 is necessary to render the establishment of minimum prices in accordance with all the standards set forth in subsections (a) and (b) of Part II of Section 4 of the Act more practicable, or to grant such other relief to the petitioner as may be deemed just and equitable in the premises.

The Secretary of the Commission shall forthwith give notice of the time, place and purpose of the hearing to be held under this order by publishing a copy of this order for two (2) days in newspapers of general circulation in each of Districts Nos. 9, 10, 11, 12 and 15, and by mailing a copy of this order to the Secretaries of all District Boards, to the Consumers' Counsel, and to all code members within Districts Nos. 9, 10, 11, and 12.

By order of the Commission.

Dated this 15th day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary.*

[F. R. Doc. 37-2769; Filed, September 16, 1937; 10:35 a. m.]

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

Issued September 16, 1937

[General Sugar Regulations Series 2, No. 1]

ENTRY OF SUGAR INTO THE CONTINENTAL UNITED STATES

GENERAL SUGAR REGULATIONS MADE BY THE SECRETARY OF AGRICULTURE UNDER THE SUGAR ACT OF 1937

By virtue of the authority vested in the Secretary of Agriculture by the Sugar Act of 1937, approved September 1, 1937, I, H. A. Wallace, Secretary of Agriculture, in order to carry out the powers vested in me by the said act, do hereby make, prescribe, publish, and give public notice of these regulations, which shall have the force and effect of law and shall remain in force and effect until amended or superseded by regulations hereafter made by the Secretary of Agriculture.

1. All persons are hereby forbidden from bringing or importing into the continental United States sugar or liquid sugar produced in any area outside of continental United States, except through customs ports of entry. The collectors of customs shall not permit any such sugar or liquid sugar to enter continental United States unless and until there shall be furnished proof as to the following matters satisfactory to the collector of customs (an affidavit in duplicate (Form SS-3) subscribed and sworn to by the consignee as to such matters may be accepted by the collector of customs as satisfactory proof thereof): (1) The area in which such sugar or liquid sugar was produced, (2) the port from which such sugar or liquid sugar was brought, (3) the names of the consignor, consignee, shipper, and owner, (4) the kind or type and identification marks of such sugar or liquid sugar, (5) the purpose for which such sugar or liquid sugar is brought into continental United States, to wit, whether such sugar or liquid sugar is for consumption in or for export from continental United States, either in the state in which it is being brought or imported into continental United States, or after it has been further refined or otherwise improved in quality, (6) the allotment, if any, under which such sugar or liquid sugar is being brought or imported into continental United States, and (7) the polarization and the weight of such sugar and the total sugar content and quantity of such liquid sugar.

2. Upon notification by the Secretary of Agriculture that sugar or liquid sugar produced in any particular area outside of continental United States has, during any calendar year, been brought into continental United States for consumption therein in amounts totaling the amount of the quota fixed by the Secretary of Agriculture for that area for such calendar year, collectors of customs shall permit no further sugar or liquid sugar from such area to enter continental United States during such calendar year, except as authorized by the Secretary of Agriculture and in accordance with the terms and conditions of such authorization.

3. After the Secretary of Agriculture has determined and certified that sugar or liquid sugar produced in any particular area outside of continental United States has, during any calendar year, been brought into continental United States for consumption therein in amounts totaling the amount of the quota and/or allotments fixed by the Secretary of Agriculture for that area for such calendar year, the Secretary of Agriculture may nevertheless authorize collectors of customs to permit sugar or liquid sugar from such area to enter continental United States for consumption therein, if and when an equivalent amount of sugar or liquid sugar theretofore entered as a part of the quota from the same producing area is delivered to any collector of customs in the place and stead thereof and in substitution therefor, to be held in customs custody and control until thereafter authorized by the Secretary of Agriculture to be released therefrom: *Provided, however*, That no such authorization will be issued by the Secretary of Agriculture unless and until: (A) An application for such authorization has been filed with the Secretary of Agriculture, or his authorized agent, setting forth the reason for requesting such substitution; (B) there shall first be shown to his satisfaction, by such proof as he may require, that the sugar or liquid sugar tendered in substitution and the sugar or liquid sugar sought to be entered (1) were produced in and brought from the same area, (2) have the equivalent weight translated into terms of pounds of sugar polarizing 96°, or, in the case of liquid sugar, the equivalent quantity translated into terms of 72 per cent total sugar content, and (3) are owned or contracted for by the same person; (C) the owner of the sugar or liquid sugar tendered in substitution shall agree in writing that such sugar or liquid sugar shall be treated in the same manner and shall be subject to the same rules and regulations as the sugar or liquid sugar for which it is tendered in substitution would have been treated and subjected if substitution therefor were not permitted; and (D) the owner of the sugar or liquid sugar tendered in substitution shall agree in writing to be responsible for all storage charges and other expenses in connection with the retention of the substituted sugar or liquid sugar in customs custody and that in the event such sugar or liquid sugar is not withdrawn and all charges thereon paid within 1 year from the date of the assumption of customs custody, it shall become abandoned to the Government and may be sold for the Government account, subject to payment to the said owner of the surplus proceeds, if any, after the payment of all charges and other expenses.

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed in the District of Columbia, city of Washington, this 16th day of September, 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

[F. R. Doc. 37-2770; Filed, September 16, 1937; 12:43 p. m.]

### Bureau of Entomology and Plant Quarantine.

[B. E. P. Q.—462]

[Supersedes P. Q. C. A.—311]

RESTRICTIONS AFFECTING THE IMPORTATION AND INTERSTATE MOVEMENT OF FROZEN-PACK FRUITS

[Approved and effective September 15, 1937]

The importation into the United States and the interstate shipment from Hawaii and Puerto Rico of frozen fruits, other than those which may be entered in the fresh state, are authorized under the provisions of regulation 2 of the rules and regulations supplemental to Notice of Quarantine No. 13; regulation 2 of the rules and regulations supplemental to Notice of Quarantine No. 56; and regulation 3 of the rules and regulations supplemental to Notice of Quarantine No. 56, under the following restrictions and conditions:

(1) Importations and interstate shipments may be made only under permits issued in advance of shipment. Applications for permits should be made to the Bureau of Entomology and Plant Quarantine of the United States Department of Agriculture.

(2) The importation and interstate shipment is not authorized of fruits which may be subject to attack, in the area of origin, of plant pests for which the refrigeration treatment herein prescribed may not, in the judgment of the Chief of the Bureau of Entomology and Plant Quarantine, be completely effective.

(3) Fruit imported from foreign countries or shipped interstate from Hawaii or Puerto Rico under authority of this circular must be frozen solid either before or after packing for shipment and must be at a temperature of 20° F., or below at the time of arrival.

(4) Such fruit may not be removed from the vessel transporting it until it has been determined by inspection by a representative of the Bureau of Entomology and Plant Quarantine that all parts of the shipment at the time of arrival registered a temperature of not more than 20° F. and until it has been released by the said representative of the Bureau of Entomology and Plant Quarantine.

(5) If the fruit in any part of a shipment imported or shipped interstate under authority of this circular is found to be above 20° F. at the time of the inspection required in paragraph (4) of this circular, the entire shipment shall remain on the transporting vessel under such safeguards as may be prescribed by the representative of the Bureau of Entomology and Plant Quarantine until it attains the required temperature of 20° F. or below, or is transported beyond the territorial waters of the United States.

Since the temperature will be determined by thermometers, provision should be made for easy access to the interior of shipments so as to avoid unnecessary mutilation or destruction of containers. It is suggested therefore that cans, casks, or other types of packages of not more than 5-gallon capacity be employed wherever possible.

Applications should include information with respect to the process to be employed—whether the fruit is to be frozen prior to or after placing in the containers—and the approximate length of time that it will be exposed to a temperature of 20° F. or below while in transit.

FROZEN FRUITS WHICH ARE NOT COVERED BY THIS CIRCULAR

This circular does not affect the status of those fruits which may be imported or shipped interstate in the fresh state under the provisions of the rules and regulations supplemental to notices of quarantines nos. 13, 56, and 58. When such fruits are offered for entry or interstate movement in frozen condition they are subject only to the restrictions which apply to their entry or interstate movement as fresh fruits.

LEE A. STRONG,
*Chief, Bureau of Entomology and Plant Quarantine.*

[F. R. Doc. 37-2768; Filed, September 15, 1937; 3:24 p. m.]

## FEDERAL HOME LOAN BANK BOARD.

AMENDMENT TO RULES AND REGULATIONS FOR FEDERAL HOME LOAN BANKS

DEFINITION OF THE TERM "PAID-IN VALUE"

Be it resolved, that pursuant to authority vested in the Federal Home Loan Bank Board by Section 17 of the Federal Home Loan Bank Act (12 U. S. C. 1437), the Rules and Regulations for Federal Home Loan Banks are hereby amended by inserting at the end of Section 14, a new Section 14A, as follows:

SEC. 14A. *Regulations.*—"Paid-in value" of stock means the aggregate par value of stock which is full paid, and the sum of payments on stock issued at par which is not full paid, and, for stock issued at a premium above par, the sum of all payments thereon, less that proportion of the aggregate premium above par which has been paid thereon.

Adopted by the Federal Home Loan Bank Board on September 15, 1937.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

[F. R. Doc. 37-2767; Filed, September 15, 1937; 3:03 p. m.]

AMENDMENT TO RULES AND REGULATIONS FOR FEDERAL HOME LOAN BANKS

DIVIDENDS ON BANK STOCK TO BE PAID TO STOCKHOLDERS OF RECORD ON DIVIDEND DECLARATION DATE; COMPUTATION OF DIVIDENDS

Be it resolved, that pursuant to authority vested in the Federal Home Loan Bank Board by Section 17 of the Federal Home Loan Bank Act (12 U. S. C. 1437), paragraph numbered (4) of subsection (d) of Section 17 of the Rules and Regulations for Federal Home Loan Banks is hereby repealed, and paragraph numbered (3) of said subsection is hereby amended to read as follows:

(3) *Regulations.*—The board of directors of a Bank may, with the approval of the Board, declare dividends out of net earnings or undivided profits to stockholders of record at the close of business on June 30 and/or December 31 (and for no other dates) upon the paid-in value of capital stock outstanding on such record date payable by check on a date to be specified in the resolution declaring said dividend, but in any event within 31 days after said record date.

Dividends shall be declared at an annual rate of percent. On the paid-in value of each share of stock at the beginning of the dividend period (after deducting amounts of stock repurchased, i. e. surrendered and cancelled), dividends shall be computed at the annual dividend rate if the dividend period is for an annual period and at one-half of the annual dividend rate if the dividend period is for a semi-annual period. On payments made on account of stock during the dividend period (after deducting amounts of stock repurchased), dividends shall be computed at the annual dividend rate on an actual day basis for the time invested. For dividend purposes, amounts of stock repurchased within the period covered by a dividend shall be deducted from the latest previous payment (or payments in inverse order) on account of stock.

Adopted by the Federal Home Loan Bank Board on September 15, 1937.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 15th day of September, A. D. 1937.

[File No. 52-1]

IN THE MATTER OF GENESEE VALLEY GAS COMPANY, INC.

[Section 11 (f) of Public Utility Act of 1935]

NOTICE OF AND ORDER FOR POSTPONEMENT OF HEARING

Genesee Valley Gas Company, Inc., a subsidiary of a registered holding company, having filed an application, and amendments thereto, pursuant to Section 11 (f) of the Public Utility Holding Company Act of 1935, for approval of its plan of reorganization in proceedings pending in the United States District Court for the Southern District of New York pursuant to Section 77B of the Federal Bankruptcy Act as amended;

A hearing on said amended application having been held on June 28, 1937; said hearing having been continued; an order having been issued reconvening said hearing on September 20, 1937; and it now appearing that said hearing should be postponed;

It is ordered that said hearing be postponed until October 4, 1937 at ten o'clock in the forenoon of that day in Room 1102, Securities and Exchange Commission, 1778 Pennsylvania Avenue, N. W., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before September 30, 1937.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

[F. R. Doc. 37-2772; Filed, September 16, 1937; 12:44 p. m.]

---

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C. on the 15th day of September, 1937.

[File No. 2-3074]

IN THE MATTER OF HERMAN HANSON OIL SYNDICATE

STOP ORDER

This matter coming on to be heard by the Commission on the registration statement of registrant Herman Hanson Oil Syndicate, a North Dakota corporation, after confirmed telegraphic notice by the Commission to said registrant that it appears that said registration statement includes untrue statements of material facts and omits to state material facts required to be stated therein and omits to state material facts necessary to make the statements therein not misleading, and upon evidence received upon the allegations made in the notice of hearing duly served by the Commission on said registrant, and the Commission having duly considered the matter, and finding that said registration statement includes untrue statements of material facts and omits to state material facts required to be stated therein and material facts necessary to make the statements therein not misleading, all as more fully set forth in the Commission's Findings of Fact and Opinion this day issued, and the Commission being now fully advised in the premises,

It is ordered, pursuant to Section 8 (d) of the Securities Act of 1933, as amended, that the effectiveness of the registration statement filed by Herman Hanson Oil Syndicate, a North Dakota corporation, be and the same hereby is suspended.

By direction of the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

[F. R. Doc. 37-2771; Filed, September 16, 1937; 12:44 p. m.]

*Saturday, September 18, 1937* — *No. 181*

## TREASURY DEPARTMENT.

### Office of the Secretary.

NEWLY-MINED DOMESTIC SILVER

SEPTEMBER 14, 1937.

*Memorandum for the President.*

The Silver Proclamation of December 21, 1933, as amended, provides:

This proclamation shall remain in force and effect until the thirty-first day of December, 1937, unless repealed or modified by Act of Congress or by subsequent proclamation.

As you know, in the normal course a considerable period of time elapses between the date silver is mined and the date when the refining of the silver has been completed and the silver is delivered to a Mint. Accordingly, a question has arisen as to whether domestic silver mined prior to midnight, December 31, 1937, may be received by the mints after that date under said Proclamation.

I am advised by the General Counsel of the Treasury that in his opinion the mints may continue after December 31, 1937, to receive under said Proclamation, domestic silver mined prior to midnight, December 31, 1937, and otherwise complying with the Proclamation. I am in accord with such opinion. Accordingly, if you approve, the mints will be instructed that they may continue after December 31, 1937, to accept under said Proclamation newly-mined domestic silver mined prior to midnight of December 31, 1937.

If you approve of the foregoing, I should appreciate it if you would so indicate below.

[SEAL] H. MORGENTHAU, Jr.,
*Secretary of the Treasury.*

Approved: September 14, 1937.
FRANKLIN D ROOSEVELT
*The White House.*

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

[General Sugar Quota Regulations, Series 4, No. 2, Supplement 3]

PRORATION OF THE 1937 UNITED STATES BEET DEFICIT

[Issued September 16, 1937]

By virtue of the authority vested in the Secretary of Agriculture by the Sugar Act of 1937, approved September 1, 1937 (hereinafter referred to as the "act"), I, H. A. Wallace, Secretary of Agriculture, in order to carry out the powers vested in me by the said act, do hereby make, prescribe, publish, and give public notice of these regulations (constituting a supplement to General Sugar Quota Regulations, Series 4, No. 2, issued September 2, 1937), which shall have the force and effect of law and shall remain in force and effect until amended or superseded by orders or regulations hereafter made by the Secretary of Agriculture.

1. It is hereby determined, pursuant to Section 204 (a) of the said act, that for the calendar year 1937 the domestic beet sugar area will be unable by an amount of 216,352 short tons of sugar, raw value, to market the quota established for that area in General Sugar Quota Regulations, Series 4, No. 2, approved September 2, 1937.

2. An amount of sugar equal to the deficit determined in paragraph one is hereby prorated, pursuant to Section 204 (a) of the said act, to the Mainland Cane Sugar Area, Puerto Rico, Hawaii, the Virgin Islands and Cuba as follows:

| Areas: | *Additional quotas (short tons, raw value)* |
|---|---|
| Mainland Cane Sugar Area (Louisiana & Florida) | 22,299 |
| Puerto Rico | 42,349 |
| Hawaii | 49,782 |
| Virgin Islands | 473 |
| Cuba | 101,449 |
| Total | 216,352 |

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed in the District of Columbia, city of Washington this 16th day of September, 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

[General Order No. 252]

EXEMPTION FROM PAYMENT OF HEAD TAX

AMENDMENT OF SUBPARAGRAPH (D), PARAGRAPH 1, SUBDIVISION B OF RULE 1 OF THE IMMIGRATION RULES, AS AMENDED.

SEPTEMBER 14, 1937

By virtue of and pursuant to the authority conferred by Sections 2 and 23 of the Immigration Act of 1917 (Act of February 5, 1917; 39 Stat. 875, 892; U. S. C., title 8, sections 102, 132), and Executive Order No. 6166, dated June 10, 1933, subparagraph (d), paragraph 1, Sudivision B, Rule 1 of the Immigration Rules of January 1, 1930, as amended up to and including December 31, 1936, and by General Order No. 246, dated May 10, 1937, is hereby amended to read as follows:

Aliens whose legal domicile or bona fide residence was in Canada, Newfoundland, Cuba, or Mexico for at least one year immediately preceding entry and who enter the United States for a temporary period in no instance exceeding one year. This exemption shall not be lost merely by reason of temporary absences of short duration from such countries.

[SEAL] I. F. WIXON,
*Deputy Commissioner of Immigration and Naturalization.*

APPROVED:
FRANCES PERKINS, *Secretary*

## FEDERAL COMMUNICATIONS COMMISSION.

The Telegraph Division at its regular meeting on September 7, 1937, adopted the following Order:

[File No. 1]

IN RE APPLICATION OF PUGET SOUND NAVIGATION COMPANY FOR EXEMPTION OF THE VESSELS "IROQUOIS," "OLYMPIC," "QUILCENE," "CITY OF ANGELES" AND "ROSARIO," PURSUANT TO THE PROVISIONS OF ARTICLE 28 OF THE SAFETY OF LIFE AT SEA CONVENTION AND SECTION 352 (B) OF TITLE III, PART 2, OF THE COMMUNICATIONS ACT OF 1934, AS AMENDED

ORDER

Whereas, there has been filed with the Federal Communications Commission an application of the Puget Sound Navigation Company for exemption pursuant to the provisions of Section 352 (b) of the Communications Act of 1934, as amended, and Article 28 of the Safety of Life at Sea Convention, from the requirement of a radiotelegraph installation, as specified by Title III, Part 2, of the Communications Act of 1934, as amended, and Article 27 of the Safety of Life at Sea Convention, for the following vessels and voyages:

1. The S. S. *Iroquois* and S. S. *Olympic* for international voyages between Seattle, Washington, and Victoria, B. C., via Port Townsend and Port Angeles;

2. The S. S. *Quilcene*, S. S. *City of Angeles*, and S. S. *Rosario*, for international voyages between Anacortes, Washington, and Sydney, B. C., via Friday Harbor, San Juan Island, and Orcas, Orcas Island; and

Whereas, the voyages in question are within the class of voyages for which an exemption from the requirement of a radiotelegraph installation, as specified in Title III, Part 2, of the Communications Act, and Article 27 of the Safety of Life at Sea Convention, may be granted under Section 352 (b) of the Communications Act and Article 28 of the Convention; and

Whereas, the Commission has been informed by the applicant that the vessels in question will be voluntarily equipped with radiotelephone stations having a transmitter power of not less than 50 watts, for communication in event of emergencies with coastal harbor station KOW, Edmonds, Washington, and with the radio telephone stations of the United States Coast Guard; and

Whereas, this Commission granted such exemption on March 9, 1937, pending further order of the Commission and in any event for a period not exceeding 60 days from the date of the order, and subsequently extended said exemption at various times for a period to and including September 15, 1937, during which time the Commission considered all available information bearing upon the route and conditions of the voyages in question; and

Whereas, from the facts and information now before it, the Commission is of the opinion that the requirement of a radiotelegraph installation would be unreasonable and unnecessary in so far as these vessels on the voyages in question are concerned;

It is ordered, that the vessels shall be exempt from compliance with the radiotelegraph installation requirement of Title III, Part 2, of the Communications Act of 1934, as amended, and Article 27 of the Safety of Life at Sea Convention, pending further order of the Commission and in any event for a period not exceeding one year from the date of this order;

*Provided, however*, That nothing contained herein shall constitute a finding by this Commission that compliance with those provisions will be unreasonable or unnecessary if and when any change in the route or conditions of the specified voyages occurs which, in the discretion of the Commission may require compliance therewith;

It is further ordered, that these vessels, on the voyages in question, shall have on board appropriate exemption certificates pursuant to the provisions of Section 359 of the Com-

munications Act of 1934, as amended, and Article 49 of the Safety Convention.

By the Commission, Telegraph Division.

[SEAL] T. J. SLOWIE, *Secretary.*

[F. R. Doc. 37-2773; Filed, September 16, 1937; 3:23 p. m.]

---

The Telegraph Division at its regular meeting on September 7, 1937, adopted the following Order:

[Docket No. (*as hereafter listed*)]

IN RE APPLICATION OF (AS HEREAFTER LISTED) FOR THE EXEMPTION OF THE VESSEL (AS HEREAFTER LISTED) PURSUANT TO THE PROVISIONS OF ARTICLE 28 OF THE SAFETY OF LIFE AT SEA CONVENTION AND SECTION 352 (B) (2) OF TITLE III, PART 2, OF THE COMMUNICATIONS ACT OF 1934, AS AMENDED

ORDER

Whereas, the Division having under consideration an application by (*as hereafter listed*) for exemption pursuant to the provisions of Article 28 of the Safety of Life at Sea Convention and Section 352 (b) (2) of the Communications Act of 1934, as amended, for the vessel (*as hereafter listed*) on voyages (*as set forth in application*) and

Whereas, the Commission is unable to determine from the application that the route or the conditions of the voyage, or other circumstances are such as to render a radio installation unreasonable or unnecessary;

It is ordered, that a hearing shall be held in San Francisco, California, beginning at 10:00 A. M. on the 11th day of October, 1937, upon the issues and in accordance with the procedure set forth in the attached bill of particulars.

By the Commission, Telegraph Division.

[SEAL] T. J. SLOWIE, *Secretary.*

NOTICE

Nature of Application: Exemption under Article 28 of the Safety Convention and Section 352 (b) (2), Title III, Part 2, of the Communications Act of 1934, as amended.

Service: Marine.

File No. _____

Docket No. _____

Applicant: _____

To _____

_____

You are hereby notified that the Federal Communications Commission has examined the above-described application and has designated the foregoing matter for hearing for the following reasons:

1. To determine whether the vessel(s) _____

_____

on voyages _____ is (are) within the class of vessels for which an exemption may be granted under Section 352 (b) (2) of the Communications Act of 1934, as amended;

2. To determine whether the route or conditions of the voyages in question are such as to render navigation in the waters concerned hazardous;

3. To determine the cost to the applicant of complying with the radiotelegraph provisions of the Safety Convention and Title III, Part 2 of the Communications Act of 1934, as amended;

4. To determine the value of radiotelegraph communication to the vessel on the voyages in question as a means of enhancing the safety of life and property at sea, both as a matter or protection to persons and property on board the _____

_____

and as a protection to other shipping in such waters;

5. To determine whether the route or conditions of the voyage, or other circumstances, are such as to render a radio installation unreasonable or unnecessary for the purposes of the Safety Convention or of Title III, Part 2 of the Communications Act of 1934, as amended.

The hearing on the above-mentioned application will be held at _____, beginning at 10:00 A. M., on the _____ day of _____, 1937.

In order to avail itself of the opportunity to be heard, the applicant, within fifteen (15) days from the mailing of this notice, shall file with the Commission a written appearance and statement of desire to be heard, subscribed and verified by the applicant, and a terse yet complete statement, in writing, of the facts which it expects to prove at such hearing.

Within twenty-five (25) days of the publication of this notice of hearing, any person who desires to participate in such hearing shall file with the Commission its appearance and a statement of its desire to be heard, subscribed and verified, and a terse yet complete statement, in writing, of the facts it expects to prove at such hearing. No party, other than the applicant, shall be heard in this proceeding unless and until he shall file his appearance in accordance with the provisions of this paragraph.

Appearances filed in accordance with the preceding paragraphs shall be considered as pleadings but not as evidence of the facts therein stated.

In case no appearance or statement in writing of the facts to be proved upon this hearing is filed by the applicant within the time so specified, or if on the date set for hearing the applicant does not appear and offer evidence in support of his application, the applicant will be deemed in default, and his application denied.

Dated at Washington, D. C., _____, 1937.

FEDERAL COMMUNICATIONS COMMISSION,
TELEGRAPH DIVISION.

T. J. SLOWIE, *Secretary.*

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 16th day of September, A. D., 1937.

[File No. 43-69]

IN THE MATTER OF NORTHERN STATES POWER COMPANY

[Public Utility Holding Company Act of 1935, section 7]

NOTICE OF AND ORDER FOR REOPENING OF HEARING

Northern States Power Company, a Minnesota corporation and a registered holding company, having filed with the Commission a declaration, and amendments thereto, pursuant to the provisions of Section 7 of the Public Utility Holding Company Act of 1935, regarding the proposed reclassification of its outstanding 275,000 shares of Cumulative Preferred Stock, $5 Series, into a like number of shares of Preferred Stock, $5 Cumulative Series, each share of which new preferred stock will be convertible on or before September 2, 1947, at the option of the holder, into four shares of common stock of declarant, subject to adjustment in accordance with the proposed amendment to declarant's articles of incorporation, and which new preferred stock will be subject to provisions whereby declarant will be obligated to reimburse the owner of any shares of such preferred stock for any taxes (other than estate, succession, income and inheritance taxes) that are or may be imposed or paid under the laws of Pennsylvania upon such shares or upon such owner as a resident of Pennsylvania by reason of the ownership of such shares, not exceeding, however, in any year 5 mills upon each dollar of the taxable value of such shares;

A hearing on said amended declaration having been held and closed on August 19, 1937, and the declarant having thereafter requested that said hearing be reopened;

*It is ordered*, That said hearing be reopened and continued on September 23, 1937, at ten o'clock in the forenoon of that day in Room 1103, Securities and Exchange Commission Building, 1778 Pennsylvania Avenue, N. W., Washington, D. C.; and

*Notice of such hearing is hereby given* to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers.

*It is further ordered* That Robert P. Reeder, an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

## DEPARTMENT OF THE INTERIOR.

### Division of Grazing.

WITHDRAWAL FOR PROPOSED GRAZING DISTRICT IN YAVAPAI COUNTY, ARIZONA, VACATED

SEPTEMBER 15, 1937.

Under authority of Departmental order of February 24, 1937, pursuant to section 1 of the act of June 28, 1934 (48 Stat. 1269), as amended by the act of June 26, 1936 (49 Stat. 1976), notice was published on March 12, 1937, that a hearing would be held at Kirkland, Arizona, or at any place or time to which said hearing might be adjourned for the purpose of considering the establishment of a grazing district in Yavapai County, State of Arizona.

The publication of such notice had the effect of withdrawing all public lands within Yavapai County from all forms of entry and settlement.

It has been determined that at the present time, the public lands within the area proposed for withdrawal are not appropriate for administration in a grazing district under the Taylor Grazing Act.

The withdrawal, therefore, is hereby vacated.

CHARLES WEST,
*Acting Secretary of the Interior.*

### Agricultural Adjustment Administration.

Issued September 20, 1937

DETERMINATION OF A FARM PURSUANT TO SUBSECTION (B) OF SECTION 304 OF THE SUGAR ACT OF 1937; AND DETERMINATION OF FARMING PRACTICES TO BE CARRIED OUT IN CONNECTION WITH THE PRODUCTION OF SUGAR BEETS AND SUGARCANE DURING THE CROP YEAR 1937, PURSUANT TO SUBSECTION (E) OF SECTION 301 OF THE SUGAR ACT OF 1937

WHEREAS, Subsection (b) of Section 304 of the Sugar Act of 1937 provides that the Secretary shall determine what constitutes a farm for the purpose of the said Act, and

WHEREAS, Section 301 of the Sugar Act of 1937 authorizes the Secretary to make payments upon certain conditions with respect to sugar or liquid sugar commercially recoverable from the sugar beets or sugarcane grown on a farm for the extraction of sugar or liquid sugar, and

WHEREAS, one of the said conditions for payment, as stated in Subsection (e) of the said Section 301 is,

"That there shall be carried out on the farm such farming practices in connection with the production of sugar beets and sugarcane during the year in which the crop was harvested with respect to which a payment is applied for, as the Secretary may determine, pursuant to this subsection, for preserving and improving fertility of the soil and for preventing soil erosion, such practices to be consistent with reasonable standards of the farming community in which the farm is situated", and

*Whereas*, definite farm practices were set up under the 1937 Agricultural Conservation Program, pursuant to the Soil Conservation and Domestic Allotment Act, as amended, as conditional requirements for payment with respect to sugar beets and sugarcane for sugar, which practices tended to preserve and improve soil fertility and prevent soil erosion.

Now, Therefore, I, Harry L. Brown, Acting Secretary of Agriculture, do hereby determine (1) that, within the limits of continental United States for the purpose of the provisions of the Sugar Act of 1937, a farm means all farm land which is farmed by an operator as a single unit, with work stock, farm machinery, and labor substantially separate from that for any other land, (2) that any farm, as defined above, on which there have been carried out such farming practices in connection with the production of sugar beets and sugarcane during 1937 as would have qualified such farm for at least one half of the maximum payment which could have been made with respect to sugar beets or sugarcane for sugar under the 1937 Agricultural Conservation Program had such farm come within the definition of a farm under such program, shall be deemed to have met the condition with respect to sugar beets and sugarcane, pursuant to Section 301 (e) of the Sugar Act of 1937.

Done at Washington, D. C., this 20th day of Sept., 1937. Witness my hand and the seal of the Department of Agriculture.

[SEAL] HARRY L. BROWN,
*Acting Secretary of Agriculture.*

### Bureau of Entomology and Plant Quarantine.

TERMINATION DATE ON FRUIT AND VEGETABLE RESTRICTIONS UNDER JAPANESE BEETLE QUARANTINE (QUARANTINE NO. 48) ADVANCED TO SEPTEMBER 22 FOR THE YEAR 1937

It has been determined that the active period of the Japanese beetle in its relation to fruits and vegetables has already ceased for the present season and that it is, therefore, safe to permit the unrestricted movement of the fruits and vegetables listed in regulation 5 of the rules and regulations (15th revision) supplemental to Notice of Quarantine No. 48 from the regulated area as defined in regulation 3 of said rules and regulations; therefore it is ordered that all restrictions on the interstate movement of the articles referred to above are hereby removed on and after September 22, 1937. This order advances the termination of the restrictions as to fruits and vegetables provided for in regulation 5 from October 16 to September 22, 1937, and applies to this season only.

Done at the city of Washington this 20th day of September, 1937.

Witness my hand and the seal of the United States Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

## FEDERAL COMMUNICATIONS COMMISSION.

The Broadcast Division at its regular meeting held September 7, 1937, adopted the following press release:

USE OF 550 KILOCYCLES NEAR THE COASTS OF THE UNITED STATES

The Communications Commission and the Navy Department have conferred with respect to the use of 550 kilocycles to avoid interference with naval communication activities. The Commission hereby announces the following policy with respect to licensing broadcast stations on this frequency:

No station will be licensed with greater night power than 1 kilowatt, or day power greater than 5 kilowatts, on 550 kilocycles. No application for a new broadcast station or increase in power or time of operation of an existing station will be considered which is located at a distance less than 300 miles from the nearest coast of the United States, unless approval of the Navy Department is submitted in writing with the application. No new station or increase in power or time of operation of an existing station will be authorized which is located at a distance from 300 to 500 miles from the nearest coast, unless approved by the Navy Department.

The above mileages may be decreased if it is shown that a signal intensity of not greater than 100 microvolts per meter will result at the nearest coast or point of naval communications activities. In case a directional antenna is used that increases the signal toward the coast, the mileage may be increased until not more than 100 microvolts per meter result at the nearest coast or point of naval communication activities.

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 18th day of September, 1937.

IN THE MATTER OF L. P. ATWATER & COMPANY, 1304 HUNT BUILDING, TULSA, OKLAHOMA

ORDER DENYING REGISTRATION PURSUANT TO SECTION 15 (B) OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED

L. P. Atwater, doing business as L. P. Atwater & Company, a sole proprietorship, hereinafter called the applicant, having filed with the Commission on May 8, 1937, an application for registration on Form 5-M pursuant to Rule MB1 of the Commission's rules; and registration having been postponed pending final determination on the question of denial and/or postponement; and

The Commission, on June 3, 1937, having instituted proceedings on the question of denial and/or postponement of registration pursuant to Section 15 (b) of the Securities Exchange Act of 1934, as amended; and the said matter, after appropriate notice, having come on for hearing on June 15, 16, and 17, 1937, in Tulsa, Oklahoma; and the Commission having duly considered the matter and being fully advised in the premises;

*It is ordered*, pursuant to Section 15 (b) of the Securities Exchange Act of 1934, as amended, that the application of L. P. Atwater, doing business as L. P. Atwater & Company, as broker or dealer transacting business on over-the-counter markets be and the same is hereby denied, but without prejudice to any new application filed by the applicant after December 31, 1937.

By the Commission.

## PRESIDENT OF THE UNITED STATES.

FIRE PREVENTION WEEK—1937

By the President of the United States of America

A PROCLAMATION

WHEREAS more than ten thousand lives are lost each year as a result of fires in the United States; and

WHEREAS the property loss from fires in the United States in 1936 was more than $260,000,000, a marked increase over the loss in 1935; and

WHEREAS this upward trend in the devastation wrought by fires can be corrected only through the earnest effort of everyone; and

WHEREAS it has been customary for the President of the United States to request public observance of Fire Prevention Week in an effort to bring home to every citizen a realization of individual responsibility in the movement to curtail losses of life and property from preventable fires;

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, do hereby proclaim and designate the week beginning October 3, 1937, as Fire Prevention Week and invite the active cooperation of all our people in the elimination of fire hazards and the prevention of fire waste, to the end that human life may be safeguarded and the national prosperity increased.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 18" day of September, in the year of our Lord nineteen hundred and [SEAL] thirty-seven, and of the Independence of the United States of America the one hundred and sixty-second.

FRANKLIN D ROOSEVELT

By the President.

CORDELL HULL
*Secretary of State.*

## TREASURY DEPARTMENT.

### Bureau of Customs.

[T. D. 49157]

COUNTERVAILING DUTIES—SUGAR FROM AUSTRALIA

TREASURY DECISIONS REQUIRING ASSESSMENT AND COLLECTION OF COUNTERVAILING DUTIES ON SUGAR CONTENTS OF JAMS, CANNED FRUITS, ETC., OF AUSTRALIA, SUPERSEDED. COLLECTORS OF CUSTOMS INSTRUCTED, PURSUANT TO SECTION 303 OF THE TARIFF ACT OF 1930 (U. S. C., TITLE 19, SEC. 1303) TO REQUIRE DEPOSIT OF ESTIMATED DUTIES AND SUSPENDED LIQUIDATION OF ENTRIES COVERING SUCH MERCHANDISE PENDING DETERMINATION OR ESTIMATION AND DECLARATION OF NET AMOUNTS OF BOUNTIES OR GRANTS PAID OR BESTOWED AND OF AMOUNTS OF COUNTERVAILING DUTIES TO BE COLLECTED

*To Collectors of Customs and Others Concerned:*

Reference is made to Treasury Decision 39310, dated November 16, 1922, as amended by (1923) Treasury Decisions 39541, 39789, and 39812, requiring the assessment and collection of countervailing duties equal to the net amounts of the bounties paid with respect to the sugar contained in certain Australian products.

Official information has been received that at the present time bounties or grants within the meaning of section 303 of the Tariff Act of 1930 (U. S. C., title 19, sec. 1303) are being paid or bestowed with respect to the sugar contained in products of Australia exported from that country at varying rates depending upon the net home consumption price of sugar and an Australian equivalent of the world parity price of that commodity.

In view of the changed conditions with respect to bounties or grants paid or bestowed upon products from Australia containing sugar and pursuant to section 303 of the Tariff Act of 1930, the liquidation of entries covering fruit products and all other manufactured products from Australia containing sugar entered for consumption or withdrawn from warehouse for consumption after 30 days after the publication of this decision in the weekly Treasury Decisions shall be suspended pending declaration of the net amount of the bounty or grant paid or bestowed in each case and the amount of the countervailing duties to be collected. A deposit of estimated countervailing duties in the amount of 20 pounds, 11 shillings, 8 pence (Australian currency) for each ton of 2240 pounds of sugar contained in fruit products, and 22 pounds, 15 shillings, 8 pence (Australian currency) for each ton of 2240 pounds of sugar contained in all manufactured products other than fruit products imported directly or indirectly from Australia shall be required at the time of entry in addition to the deposit of the estimated regular duties.

The facts with respect to each shipment of such merchandise from Australia, imported directly or indirectly, and entered for consumption or withdrawn from warehouse for consumption, on or after the effective date of this decision, shall be reported promptly to the Bureau of Customs.

This treasury decision shall become effective and supersede Treasury Decision 39310, as amended by Treasury Decisions 39789 and 39812, after 30 days after publication in the weekly Treasury Decisions.

The instructions contained in Treasury Decision 39541 relating to the methods for determining the sugar contents of various products shall remain in effect.

[SEAL] H. A. BENNER,
*Acting Commissioner of Customs.*

Approved, September 15, 1937.

WAYNE C. TAYLOR,
*Acting Secretary of the Treasury.*

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

[General Sugar Regulations, Series 2, No. 2]

REGULATIONS GOVERNING NOTICE AND OPPORTUNITY FOR HEARING CONCERNING ALLOTMENT OF QUOTAS OR PRORATIONS THEREOF AND THE ISSUANCE OF ORDERS PERTAINING THERETO

GENERAL SUGAR REGULATIONS MADE BY THE SECRETARY OF AGRICULTURE UNDER THE SUGAR ACT OF 1937

By virtue of the authority vested in the Secretary of Agriculture by the Sugar Act of 1937, approved September 1, 1937, I, H. A. Wallace, Secretary of Agriculture, in order to carry out the powers vested in me by the said act, do hereby make, prescribe, publish, and give public notice of these regulations, which shall have the force and effect of law and shall continue in force and effect until amended or superseded by regulations hereafter made by the Secretary of Agriculture.

*Article I—Definitions*

SECTION 100. As used in these regulations:

(a) The term "Act" means the Sugar Act of 1937, approved September 1, 1937.

(b) The term "Secretary" means the Secretary of Agriculture of the United States.

(c) The term "Department" means the United States Department of Agriculture.

(d) The term "Hearing Clerk" means the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, Washington, D. C.

(e) The term "Federal Register" means the publication provided for by the Act of July 26, 1935.

(f) The term "person" means an individual partnership, corporation, or association.

*Article II—Hearing on Allotments of Quotas and Prorations Thereof*

SECTION 200. *When Held.*—Whenever the Secretary finds that the allotment of any quota or any proration thereof is necessary to assure an orderly and adequate flow of sugar or liquid sugar in the channels of interstate and foreign commerce, or to prevent disorderly marketing or importation of sugar or liquid sugar, or to maintain a continuous and stable supply of sugar or liquid sugar, or to afford all interested persons an equitable opportunity to market sugar or liquid sugar, he shall hold, or cause to be held, one or more hearings and give persons who market or import sugar or liquid sugar due notice and opportunity to be heard.

SEC. 201. *Notice of Hearing.*—

(a) *Contents of Notice.*—The notice with respect to any hearing shall include a brief summary of the purpose of the hearing, the time and place of such hearing, and the place where a summary or outline of any proposed allotment, or of

any proposed revision or amendment of any existing allotment, may be obtained.

(b) *Manner of Giving Notice.*—The Hearing Clerk shall give such notice in the following manner:

(1) By posting a copy of the notice on the official bulletin board maintained by the Hearing Clerk.

(2) By publication of such notice in the FEDERAL REGISTER.

(3) By issuing a press release containing or describing such notice and making the same available to such newspapers as will reasonably tend to bring notice to the persons entitled to allotments.

(4) Such other means may be used to give notice, in addition to the above, as are calculated to give actual notice to such persons.

(5) Proof of giving notice hereunder shall be made by the affidavit of the Hearing Clerk. Such affidavit shall be filed in the Office of the Hearing Clerk and the filing thereof noted on a docket. Whenever such affidavit has been filed, it shall constitute a paper or document of the Department within the meaning of Title 28, section 661, of the United States Code.

(6) Failure to give notice by any one or more of the means herein provided shall not invalidate, or limit the application of, any order allotting any quota or any proration, thereof, provided notice otherwise sufficient has been given.

(c) *Time of Notice.*—Such notice of hearing shall be issued at least ten days prior to the date fixed for the hearing set forth in said notice unless the Secretary shall determine that an emergency exists which requires a shorter period of notice, in which case the period of notice shall be that which the Secretary may determine to be reasonable in the circumstances.

SEC. 202. *Designation and Powers of Presiding Officer.*—Each such hearing shall be conducted by a presiding officer, who shall be the Secretary or such officer or employee of the Department as the Secretary may designate for that purpose. Any such designation may be made or revoked by the Secretary at any time. Such hearing shall be conducted in a manner to be determined by the presiding officer to afford a full, fair, and reasonable hearing, subject to the provisions of the Act and applicable regulations issued pursuant thereto.

SEC. 203. *Continuance of Hearing.*—Each such hearing shall be held at the time and place set forth in the notice of hearing, but may at such time and place be continued from day to day or adjourned to a later day or to a different place without notice other than the announcement thereof at the hearing by the presiding officer.

SEC. 204. *Submission of Evidence.*—All persons, including also the Secretary and those testifying in his behalf, shall be given reasonable opportunity to offer evidence concerning any proposed allotment or any proposed revision or amendment of any existing allotment made pursuant to subsection (a) of section 205 of the Act. Every witness shall, before proceeding to testify, be sworn or make affirmation, after which he shall state his name, address, occupation, and whom he represents at the hearing, and shall give such other information respecting his appearance as the presiding officer may request. Where necessary in order to prevent undue prolongation of the hearing, the presiding officer may limit the number of times any witness may testify, or the length of time any witness may consume in giving testimony, or the length of time to be consumed in the asking of questions. The presiding officer shall confine the evidence to relevant matters but need not apply the technical rules of evidence. Affidavits as to relevant economic facts shall be admitted in evidence and shall be considered by the Secretary, and opinion evidence shall be admitted where the presiding officer is satisfied that the witness is qualified to give such evidence.

SEC. 205. *Order of Procedure.*—

(a) The presiding officer shall read the notice of hearing and the designation of the presiding officer, and shall then outline briefly the procedural rules to be followed. The presiding officer shall then cause the questions to which the hearing relates to be stated without argument or comment.

(b) Evidence shall then be received with respect to the matters indicated in the notice of the hearing in such order as the presiding officer may prescribe. Additions to and modifications of any proposed allotment, or of any proposed revision or amendment of any existing allotment, may be proposed at this time and insofar as practicable shall be in writing, but in any event the record shall show who made such proposal.

SEC. 206. *Transcript of Testimony.*—Testimony given at a hearing shall be reported verbatim. All written statements, charts, tabulations, or similar data offered in evidence at the hearing shall, after identification by the proponent and upon satisfactory showing of the authenticity, relevancy, and materiality of the contents thereof, be numbered as exhibits and received in evidence and made a part of the record. Such exhibits shall, if possible under the circumstances, be submitted in quadruplicate and in typewritten, printed, or mimeographed form. In case the required number of copies should not be made available, the presiding officer shall exercise his discretion as to whether said exhibit shall be read into the transcript of testimony or whether additional copies shall be required to be submitted within a time to be specified by the presiding officer. Where the testimony of a witness refers to a statute, or to a report or published document either of a public or private nature, the presiding officer shall, after inquiries relating to and identification of such document, determine whether the same shall be produced at the hearing and physically be made a part of the record or whether it shall be incorporated into the record of the hearing by reference. Where relevant and material matter offered in evidence is embraced in a document containing matter not material or relevant, such immaterial and irrelevant parts shall be excluded and shall be segregated insofar as practicable.

SEC. 207. *Written Arguments.*—The presiding officer shall announce at the hearing a reasonable period (not less than ten days from the date of the conclusion of the hearing) within which written arguments based solely on the evidence received at the hearing may be filed in the office of the Hearing Clerk. Such period may be extended by the presiding officer for good cause, such as delay in the furnishing of the transcript or the transcript being of such volume that it may not be thoroughly digested within the period first fixed.

SEC. 208. *Filing the Record.*—The presiding officer shall, as soon as possible after the close of a hearing, notify the Hearing Clerk of its close and of the time for filing written arguments, and furnish the Hearing Clerk with such other information as may be necessary. As soon as possible after the close of the hearing, the presiding officer shall transmit to the Hearing Clerk an original and three copies of the transcript of the testimony and the original and all copies of exhibits not already on file in the office of the Hearing Clerk. He shall attach to the original transcript of the testimony a certificate stating that the transcript is a true transcript of the testimony given at the hearing except in such particulars as he shall specify, and that the exhibits transmitted are all the exhibits introduced at the hearing with such exceptions as he shall specify. A copy of such certificate shall be attached to each of the copies of the transcript of testimony. In accordance with such certificate the Hearing Clerk shall note upon each copy of the transcript each correction detailed therein by adding or crossing out (but without obscuring the text as originally transcribed) at the appropriate place any words necessary to make the text conform to the correct meaning.

SEC. 209. *Copies of Record.*—Any person desiring a copy of the transcript of the testimony or of any filed written exhibit or written argument shall be entitled to the same upon application to the Hearing Clerk and upon payment of fees therefor as provided by the regulations of the Department.

*Article III—Issuing Allotments of Quotas and Prorations Thereof*

SECTION 300. *Notice of Issuance of Order of Allotment.*—Whenever, on the basis of the evidence adduced at a hearing, any order of the Secretary allotting any quota, or any proration thereof, or revising or amending any existing allotment, is issued, a duplicate original order thereof shall thereupon be filed in the office of the Hearing Clerk for public inspection there, and such order shall be published in the FEDERAL REGISTER.

SEC. 301. *Copies of Allotment Orders.*—Upon application to the Hearing Clerk, any person shall be entitled to a copy of any order allotting any quota or any proration thereof which has been finally approved.

*Article IV—Public Notice of Foregoing Regulations*

SECTION 400. *How Given.*—Public notice of the issuance of the foregoing regulations shall be given by (a) posting a copy of such regulations on the official bulletin board maintained by the Hearing Clerk; (b) publication in the FEDERAL REGISTER; and (c) issuing a press release containing a description of such regulations and thereafter making available in the office of the Hearing Clerk copies of such regulations for the press.

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed in the District of Columbia, city of Washington, this 21st day of September 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 17th day of September A. D. 1937.

Commissioners: William A. Ayres, Chairman; Garland S. Ferguson, Jr.; Charles H. March, Ewin L. Davis, Robert E. Freer.

[Docket No. 3199]

IN THE MATTER OF ABRAHAM SOHN, AN INDIVIDUAL AND BENJAMIN SOHN, AN INDIVIDUAL, DOING BUSINESS AS SOHN BROS.

ORDER APPOINTING EXAMINER AND FIXING TIME AND PLACE FOR TAKING TESTIMONY

This matter being at issue and ready for the taking of testimony, and pursuant to authority vested in the Federal Trade Commission, under an Act of Congress (38 Stat. 717; 15 U. S. C. A., Section 41).

*It is ordered*, That Robert S. Hall, an examiner of this Commission, be and he hereby is designated and appointed to take testimony and receive evidence in this proceeding and to perform all other duties authorized by law;

*It is further ordered*, That the taking of testimony in this proceeding begin on Friday, October 1, 1937, at ten o'clock in the forenoon of that day (central standard time), in room 1123 New Post Office Building, 433 West Van Buren St., Chicago, Ill.

Upon completion of testimony for the Federal Trade Commission, the examiner is directed to proceed immediately to take testimony and evidence on behalf of the respondent. The examiner will then close the case and make his report.

By the Commission.

[SEAL] OTIS B. JOHNSON, *Secretary.*

*United States of America Before Federal Trade Commission*

[Docket No. 3224]

IN THE MATTER OF E. B. MULLER AND COMPANY, A CORPORATION AND HEINR, FRANCK SONS, INC., A CORPORATION

COMPLAINT

Pursuant to the provisions of an Act of Congress approved September 26, 1914, entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes" (the Federal Trade Commission Act), and pursuant to the provisions of an Act of Congress approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes" (the Clayton Act), as amended by an Act approved June 19, 1936, entitled "An Act to amend section 2 of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes', approved October 15, 1914, as amended (U. S. C., title 15, sec. 13), and for other purposes" (the Robinson-Patman Act), the Federal Trade Commission, having reason to believe that E. B. Muller and Company and Heinr. Franck Sons, Inc., have violated and are now violating the provisions of the said Federal Trade Commission Act and the said Clayton Act, as amended, issues this its complaint against the said E. B. Muller and Company and the said Heinr. Franck Sons, Inc., respondents in this proceeding, and states its charges as follows, to-wit:

*Count I*

PARAGRAPH 1. Said respondent E. B. Muller and Company is a corporation organized and existing under the laws of the State of Michigan and has its principal office and place of business at 220 Quay Street in the City of Port Huron, Michigan.

PAR. 2. Said respondent Heinr. Franck Sons, Inc., is a corporation organized and existing under the laws of the State of Delaware and has its principal office and place of business at 131 Avery Avenue in the City of Flushing, New York.

PAR. 3. The officers of the respondent E. B. Muller and Company are H. Gordon McMorran, President, C. C. McMorran, Vice-President, and Mrs. Charlotte H. McMorran, Secretary-Treasurer. Said officers comprise the board of directors of respondent E. B. Muller and Company. The officers of the respondent Heinr. Franck Sons, Inc., are David McMorran, President, A. F. Kalk, Vice-President, and Eugene Beitter, Secretary-Treasurer. Said last named officers comprise the board of directors of Heinr. Franck Sons, Inc. David McMorran and Mrs. Charlotte H. McMorran are, respectively, husband and wife, and father and mother of H. Gordon McMorran and C. C. McMorran. Respondent E. B. Muller and Company has outstanding 30,000 shares of common stock, of which Mrs. Charlotte H. McMorran owns 25,619 shares. Respondent E. B. Muller and Company has no preferred stock. Respondent Heinr. Franck Sons, Inc., has outstanding 10,000 shares of common stock, all of which is owned by David McMorran, and 5,430 shares of preferred stock, of which David McMorran, through his ownership of the stock of the Michigan Debenture Company, a corporation, owns 4,400 shares and Eugene Beitter owns 1,030 shares. The respondents dominate the market for raw chicory in the United States and purchase and use in their respective businesses the greater part of all raw chicory produced in the United States. The respondents also dominate the granulated chicory market in the United States, manufacturing and selling the greater part of all granulated chicory manufactured and sold in the United States. In the course and conduct of their respective businesses, as is more particularly hereinafter stated, the respondents are engaged in competition with other purchasers and users of raw chicory in the United States and with other manufacturers and sellers of granulated chicory in the United States, and if those competitively engaged with the respondent in the United States in the purchase

and use of raw chicory and the manufacture and sale of granulated chicory are eliminated from the business of purchasing and using raw chicory and manufacturing and selling granulated chicory, the above mentioned David McMorran and Mrs. Charlotte H. McMorran, husband and wife, will have and enjoy, through the respondents, a monopoly in the purchase and use of raw chicory in the United States and in the manufacture and sale of granulated chicory in the United States.

PAR. 4. For more than two years prior hereto the respondents have been, and are now, engaged in the business of manufacturing granulated chicory from raw chicory and in selling and shipping granulated chicory, and in the course and conduct of their respective businesses the respondents have sold and shipped, and do now sell and ship, granulated chicory in commerce between and among the various states of the United States from the states in which their respective factories are located and from states in which they maintain stocks of granulated chicory across state lines to purchasers thereof located in states other than the states in which respondents' said factories are located and other than the states in which respondents maintain stocks of granulated chicory.

PAR. 5. In the course and conduct of their businesses, as aforesaid, the respondents have been, and are now, engaged in substantial competition in commerce with other manufacturers and sellers of granulated chicory who, for more than two years prior hereto have been, and are now, manufacturing granulated chicory from raw chicory and selling and shipping granulated chicory in commerce across state lines between and among the various states of the United States.

PAR. 6. In the course and conduct of their businesses, as aforesaid, with the intent, purpose and effect of injuring, restraining, suppressing and destroying competition in commerce in the manufacture and sale of granulated chicory between themselves and competing manufacturers and sellers of granulated chicory, the respondents have been, and are now, manufacturing granulated chicory and selling, shipping, and delivering the said granulated chicory across state lines to purchasers thereof at prices below the cost to the respondents of manufacturing, selling, shipping and delivering said granulated chicory.

PAR. 7. The effect and result of the sale and delivery by respondents of granulated chicory in commerce across state lines to purchasers thereof at prices below the cost to the respondents of manufacturing, selling, shipping, and delivering the same, as aforesaid, have been, and are now, unduly and substantially to injure, restrain and suppress competition between respondents and their competitors in the manufacture of granulated chicory and the sale and shipment thereof in commerce across state lines and to tend to create in respondents a monopoly in the manufacture and sale of granulated chicory.

PAR. 8. The sale of granulated chicory by the respondents below cost as above alleged in Paragraph Six hereof, with the effect and result as alleged in Paragraph Seven hereof, is to the injury and prejudice of the public and to the injury and prejudice of respondents' competitors and constitutes an unfair method of competition in commerce within the intent and meaning of Section 5 of the aforesaid Federal Trade Commission Act approved September 26, 1914.

*Count II*

PARAGRAPH 1. Paragraph One, Paragraph Two, Paragraph Three, Paragraph Four and Paragraph Five of Count I of this complaint are, by reference, incorporated herein and made a part hereof as fully and completely as if set out verbatim.

PAR. 2. In the course and conduct of their respective businesses, as aforesaid, since June 19, 1936, the respondents have been, and are now, discriminating in price between different purchasers of granulated chicory of like grade and quality sold and shipped by the respondents in commerce across state lines to said purchasers for use, consumption and resale by them within the United States, in that the respondents have sold and shipped, and are now selling and shipping, granulated chicory in commerce across state lines, for use, consumption and resale within the United States, to certain purchasers of said granulated chicory at prices below the prices at which the respondents have sold and shipped, and are now selling and shipping, in commerce across state lines, for use, consumption and resale within the United States, granulated chicory of like grade and quality to other purchasers of said granulated chicory engaged in competition with the former purchasers in the use, consumption and resale within the United States of said granulated chicory, and the respondent E. B. Muller and Company has been, and is now, further and additionally discriminating in price between different purchasers of granulated chicory of like grade and quality sold and shipped by the said respondent E. B. Muller and Company in commerce across state lines to said purchasers for use, consumption and resale by them within the United States, in that upon the said respondent E. B. Muller and Company's sales to purchasers of granulated chicory of like grade and quality, sold and shipped in commerce across state lines by the said respondent E. B. Muller and Company to said purchasers for use, consumption and resale by them within the United States, the said respondent E. B. Muller and Company has been, and is now, granting, allowing and paying to certain favored purchasers rebates upon said favored purchasers' purchases of granulated chicory from the said respondent E. B. Muller and Company and denying to other purchasers engaged in competition with said favored purchasers rebates upon said other purchasers' purchases of granulated chicory from the said respondent E. B. Muller and Company.

PAR. 3. The effect of said discriminations in price made by the respondents in the sale of granulated chicory as above set forth in Paragraph Two of this Count has been and may be substantially to lessen competition or to injure, destroy or prevent competition between respondents and their competitors in the manufacture, sale and distribution of granulated chicory, and to tend to create in respondents a monopoly in the manufacture, sale and distribution of granulated chicory and has been and may be substantially to lessen competition or to injure, destroy or prevent competition in the use, consumption or resale of granulated chicory within the United States between those customers of respondents who receive the benefit of the lower prices or rebates above mentioned in Paragraph Two of this Count and those customers of respondents engaged in competition with them who do not receive the benefit of said lower prices or said rebates.

PAR. 4. The aforesaid discriminations in price made by the respondents as above stated in Paragraph Two of this count constitute a violation of the provisions of Paragraph (a) of Section 2 of the above mentioned Clayton Act, as amended.

*Wherefore, the premises considered*, The Federal Trade Commission, on this 11th day of September, A. D. 1937, hereby issues this its complaint against said respondents.

*Notice*

Notice is hereby given you, E. B. Muller and Company, a corporation, and Heinr. Franck Sons, Inc., a corporation, respondents herein, that the 15th day of October, A. D. 1937, at 2:00 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Acts, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a short and simple statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * * *

Failure of the respondent to file answer within the time above provided or failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further hearing or notice to respondent, to proceed in regular course on the charges set forth in the complaint, and to make, enter, issue and serve upon respondent findings of fact and an order to cease and desist.

If respondent desires to waive hearing on the charges set forth in the complaint and not to contest the proceeding, the answer may consist of a statement that respondent admits all the material allegations of the complaint to be true. Any such answer shall be deemed to waive a hearing thereon, and to authorize the Commission, without trial and without further evidence, or other intervening procedure, to make, enter, issue, and serve upon respondent:

(a) In cases arising under section 5 of the act of Congress approved September 26, 1914, entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes" (the Federal Trade Commission Act), or under sections 2 and 3 of the act of Congress approved October 15, 1914, entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes" (the Clayton Act), or under section 2 of the aforesaid Clayton Act as amended by "An act to amend section 2 of the act entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes' approved October 15, 1914, as amended (U. S. C., title 15, sec. 13), and for other purposes", approved June 19, 1936 (the Robinson-Patman Act), findings of fact and an order to cease and desist from the violations of law charged in the complaint.

*In witness whereof*, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 11th day of September, A. D. 1937.

By the Commission.

[SEAL] OTIS B. JOHNSON, *Secretary*.

## SECURITIES AND EXCHANGE COMMISSION.

SECURITIES ACT OF 1933,

RULE AS TO NON-DISCLOSURE OF CERTAIN INFORMATION

The Securities and Exchange Commission acting pursuant to authority conferred upon it by the Securities Act of 1933, particularly Section 19 (a) thereof, and finding that the disclosure of information obtained in the course of examinations and investigations conducted pursuant to Sections 8 (e) and 20 (a) would be contrary to the public interest and would interfere with the execution of the functions vested in the Commission, hereby adopts the following rule:

RULE 122—NON-DISCLOSURE OF INFORMATION OBTAINED IN THE COURSE OF EXAMINATIONS AND INVESTIGATIONS

Information or documents obtained by officers or employees of the Commission in the course of any examination or investigation pursuant to Section 8 (e) or 20 (a) shall, unless made a matter of public record, be deemed confidential. Officers and employees are hereby prohibited from making such confidential information or documents available to anyone other than a member, officer, or employee of the Commission, unless the Commission authorizes the disclosure of such information or the production of such documents as not being contrary to the public interest. Any officer or employee who is served with a subpoena requiring the disclosure of such information or the production of such documents shall appear in court and, unless the authorization described in the preceding sentence shall have been given, shall respectfully decline to disclose the information or produce the documents called for, basing his refusal upon this rule. Any officer or employee who is served with such a subpoena shall promptly advise the Commission of the service of such subpoena, the nature of the information or documents sought, and any circumstances which may bear upon the desirability of making available such information or documents.

The foregoing action shall be effective immediately upon publication.

By the Commission.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 21st day of September, A. D. 1937.

[File No. 51-5]

IN THE MATTER OF LOEB & SHAW, INC.

NOTICE OF AND ORDER FOR HEARING

An application having been duly filed with this Commission, by Loeb & Shaw, Inc., a subsidiary company of North American Gas and Electric Company, a registered holding company, pursuant to Section 12 & Rule 12C-2 thereunder of the Public Utility Holding Company Act of 1935, for approval of the payment of dividends by applicant out of unearned surplus (which applicant states is created by reduction in its capital stock) in an amount aggregating $17,000;

*It is ordered*, That a hearing on such matter be held on October 7, 1937, at ten o'clock in the forenoon of that day at Room 1103, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceedings may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party

to such proceeding shall file a notice to that effect with the Commission on or before October 2, 1937.

*It is further ordered,* That Robert P. Reeder an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

[File No. 34-7]

IN THE MATTER OF MIDLAND UTILITIES COMPANY

NOTICE OF AND ORDER FOR HEARING

An application having been duly filed with this Commission, by Melvin L. Emerich, Robert P. Minton and Leo J. Sheridan, as a committee for the holders of debentures of Midland Utilities Company pursuant to Section 11 (g) of the Public Utility Holding Company Act of 1935, for a report on a proposed plan of reorganization for Midland Utilities Company, a subsidiary of Midland United Company, both registered holding companies, which is presently the subject of reorganization proceedings pursuant to Section 77B of the Bankruptcy Act in the United States District Court for the District of Delaware.

*It is ordered,* That a hearing on such matter be held on October 12, 1937, at 10:30 o'clock in the forenoon of that day at Room 1103, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before October 7, 1937.

*It is further ordered,* That Charles S. Lobingier, an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

## UNITED STATES MARITIME COMMISSION.

[General Order No. 11]

APPLICATIONS UNDER TITLE V, MERCHANT MARINE ACT 1936, FOR CONSTRUCTION DIFFERENTIAL SUBSIDIES

1. Effective immediately General Order No. 7, dated March 19, 1937, including the regulations thereto attached, is rescinded.

2. The Commission hereby adopts the following forms:

a. Form VA-1—Application for aid in the construction of a new vessel to be operated in foreign commerce.

b. Form VA-9—Application for aid in the construction of a new vessel to be operated in domestic trade.

3. Each application for a construction differential subsidy shall be filed on the appropriate form above designated and in accordance with the instructions annexed thereto.

By order of the United States Maritime Commission.

[SEAL] W. C. PEET, JR., *Secretary.*

AUGUST 23, 1937.

---

FORM VA 1

APPLICATION FOR AID IN THE CONSTRUCTION OF A NEW VESSEL TO BE OPERATED IN FOREIGN COMMERCE

The undersigned Applicant, _____, hereby applies under Section 501 (a) of the Merchant Marine Act, 1936, for a construction-differential subsidy to aid in the construction of a new vessel hereinafter described (herein sometimes referred to as "the new vessel") to be used on a service, route, or line in the foreign commerce of the United States, determined to be essential under Section 211 of the Act, as hereinafter set forth, and submits in support of its application the following information:

A. *As to the Applicant; Its Citizenship and Affiliations.*—

1. Exact name.
2. Form or type of organization.
3. State or other sovereign power under the laws of which organized.
4. Address of principal executive offices, and of important branch offices, if any.
5. A list of (a) all subsidiaries and (b) all parent companies of the Applicant, together with an indication of the nature of the business transacted by each. This information may be furnished in the form of a chart, indicating clearly the relationships between the persons named, and the nature and extent of control.
6. The following information with respect to each officer and director of the Applicant:

| Name and address | Office | Nationality | Capital shares owned |
|---|---|---|---|
| | | | |
| | | | |
| | | | |
| | | | |

7. The name, address and nationality of, and number of capital shares owned by, each person not named in answer to Item 6, owning of record, or beneficially if known, more than 5 per cent of the outstanding capital shares of any class of the Applicant. If necessary, furnish additional data necessary to establish the fact that, as required by Section 2 of the Shipping Act, 1916, the controlling interest in the Applicant is owned by citizens of the United States.
8. A brief statement of the general effect of each voting agreement, voting trust, or other arrangement whereby the voting rights in any shares of the Applicant are owned, controlled or exercised, or whereby the control of the Applicant is in any way held or exercised by any person not the holder of legal title to such shares. Give the name, address, nationality, and business of any such person, and, if not an individual, the form of organization.

B. *As to the Business of the Applicant and Proposed Use of the New Vessel.*—

9. A brief description of (a) the shipping business of the Applicant; and (b) any other business activities of the Applicant during the preceding five years. If within such period the Applicant has acquired the business of another person or has been reorganized, there should be included a brief description of such acquisition or reorganization.
10. A brief description of the general character and location of the principal property of the Applicant, other than vessels, employed in its business.
11. A list of vessels owned by the Applicant, including (a) name; (b) gross tonnage; (c) net tonnage; (d) deadweight tonnage; (e) age; (f) type; (g) speed; (h) registry; and (i) identification of route or service on which operated.
12. Information similar to that specified in Item 11 as to any vessels chartered to and operated by the Applicant.
13. Briefly, the general terms of each charter for operation (a) of vessels owned by the Applicant and chartered by it to other persons, and (b) of vessels chartered by the Applicant from other persons.
14. Full details concerning the services, routes, or lines on which vessels owned or chartered by the Applicant are now operated, including ports of call, terminal and dock facilities at all such ports, frequency of sailings per year, description of services and voyages, and names of vessels segregated according to services, routes, or lines.
15. Type and kind of cargo now carried in the trade served as stated in the answer to Item 14, information as to how the service or line may be developed for carrying additional types and kinds of cargo, and any factors influencing cargo expectations for the future. If the new vessel is to be a combination passenger and freight vessel, state also, by classes, the passenger accommodations and the number of passengers carried and any factors influencing traffic expectations for the future.
16. Information similar to that called for by the two preceding items with respect to any new service, route, or line which the Applicant proposes presently to establish.
17. Identification of the service, route, or line described in answer to Item 14 or Item 16, on which the Applicant proposes to operate the new vessel, brief description of passengers accommodations and statement of type and kind of cargo to be carried by the new vessel. Any special requirements of such service, route, or line and the manner in which they may be met by the use of the new vessel should be discussed briefly. Any changes in existing services, routes, or lines which the Applicant proposes to make in connection with the use of the new vessel should also be indicated.
18. A statement as to whether or not the new vessel is to be used to replace a vessel now operated by the Applicant and, if so, the name of such vessel and the proposed disposition to be made of it by Applicant; particularly, whether or not the applicant desires the Commission to purchase such vessel pursuant to Section 507 of the Act.

C. *As to the Management of the Applicant.*—

19. A brief description of the principal business activities during the past five years of each director and each principal executive officer of the Applicant.
20. The name and address of each other organization engaged in shipping activities with which any person named in answer to the preceding item has any present substantial business connection, the name of such person and, briefly, the nature of such connection.
21. The name and address of any person who is now acting or within the past five years has acted as managing or operating agent of the Applicant or in any similar capacity, and briefly, the general terms of any agreement with reference thereto.

D. *As to Financial Matters.*—

22. If the Applicant has filed within the past five years with the Commission or with any organization to which the Commission has succeeded, any annual report and general financial statement or other financial information on forms prescribed or approved by the Commission or such predecessor, an identification of each such report or statement, including the dates covered, and the date on which delivered to the Commission or its predecessor.
23. A brief statement of the nature of any substantial changes in the financial condition of the Applicant or the results of its operations since the preceding December 31. For details financial statements may be furnished or reference made to statements annexed as exhibits.
24. The estimated cost of construction of the new vessel and full details as to the manner in which the Applicant proposes to obtain the amount needed to defray its part of the cost of such construction (that is, 25 per centum of the construction cost of the vessel, excluding cost of national-defense features). There shall be included full details of any proposed security issue, including names of underwriters; if the Applicant believes that furnishing of such information might be prejudicial to pending negotiations, such information may be submitted under separate cover in a sealed envelope addressed to the Chairman, United States Maritime Commission, marked "Confidential", and enclosed in an inner envelope addressed the same way and labeled "Information required under Item 24 of Construction Aid Application, submitted under confidential cover."

E. *As to the New Vessel.*—

25. The general characteristics of the proposed new vessel including (a) principal dimensions; (b) gross and deadweight tonnage; (c) bale and grain capacities of all cargo holds; (d) capacities of all tanks, storage spaces, refrigerator cargo spaces and separately chilled cargo spaces; (e) number and classes of passenger accommodations; (f) type and power, and in case of steam machinery, the gauge pressure, total temperature, and vacuum expected of propulsive machinery; (g) kind of fuel to be burned; and (h) sustained sea speed at designed load draft. There should also be given the name of the proposed supervising architect and a brief statement of his experience and qualifications.

26. A general description of the vessel, including a statement of how the proposed construction will result in a vessel which will meet the needs of the service, route, or line for which intended, and the requirements of commerce with emphasis on the following factors: (a) cargo accommodations—cargo space and fittings and appliances for handling and stowing cargo; (b) passenger accommodations; (c) construction and design; and (d) accommodations for officers and crews. There shall here be set forth a statement of the estimated operating expenses and revenues of the new vessel on a voyage basis and a comparison with similar figures for a typical vessel of the fleet now serving the trade route for which the new vessel is intended. The relative differences in performance from an economic and business standpoint should be pointed out.

F. *As to Exhibits Furnished.*—

27. A list of exhibits, properly identified, which shall include, at the time of original filing, the following:

*Exhibit I.*—A copy of the Certificate of Incorporation of the Applicant or other organization papers, including all amendments thereto presently in effect.

*Exhibit II.*—A copy of the By-Laws or other governing instruments of the Applicant, including all amendments thereto presently in effect.

*Exhibit III.*—A copy of each contract or agreement presently in effect, referred to in the answer to Item 8, Item 13, Item 21 or Item 24.

*Exhibit IV.*—A copy (specimen if available) of each form of bonds or notes included in the funded debt of the Applicant, and a copy of each indenture or other instrument under which such securities were issued, including all amendments thereto presently in effect.

*Exhibit V.*—Unless, as set forth in answer to Item 22, such information has previously been furnished, a copy of the financial statements and related schedules and statistical data which would be required to be furnished if the Applicant had been obligated to the United States of America for a construction loan on and after the preceding December 31. The information included in this exhibit shall be similar to that specified in pages 12 through 54 of the Commission's form of "Annual Report and General Financial Statement for Calendar Year 1936" for various persons, including companies obligated to the United States of America for construction loans.

28. After the information required by the form and the specification of exhibits set forth in Item 27 has been received and considered by the Commission, the following information or data with respect to the new vessel, when requested by the Commission, shall be furnished by the Applicant. Such information or data when so requested and furnished shall become a part of the application and a list thereof shall be furnished as an amendment to this Item 28.

*Exhibit VI—Hull Specifications.*—

These specifications are to be in sufficient detail to cover fully the construction of the hull and shall include the following data:

Dimensions.
Block, prismatic and other coefficients.
Designed drafts, light and loaded.
Metacentric heights at full load, ⅔ cargo, ⅓ cargo, and at light condition.
Sustained sea speed at designed load draft, (to be demonstrated as hereinafter required).
Radius of action at sustained sea speed at designed load draft.
Standard of subdivision adopted.
Bale and grain capacities of all cargo holds. Capacities of all tanks, store spaces, refrigerated cargo spaces, and chilled cargo spaces, in cubic feet.
Estimated deadweight and gross tonnage.
Total displacement.

*Exhibit VII—Hull Plans.*—

Midship section, approved by Classification Society acceptable to the Commission.
Outboard profile, general arrangement.
Inboard profile, general arrangement.
General arrangement of all decks and holds.
Fire screen diagram, inboard profile.
Fire screen diagram, all decks.
Lines.
Hydrostatic curves.

Power curves, model tank experimental run shall be made at the designed load draft.

Floodable length curves, together with basic supporting data therefor, worked out by the method used by Bureau of Marine Inspection & Navigation, Department of Commerce.

Stability data and curves, showing the effect of damage resulting in flooding, in alternate locations, a compartment or group of adjacent compartments corresponding to the number of such compartments for which the ship is basically designed. The data presented should cover the effect of damage at drafts ranging from the departure condition to the arrival condition, with full cargo, ⅔ cargo and ⅓ cargo, and should show loss of metacentric height at such drafts due to damage, the metacentric height available before damage, and the amount of ballast, liquid or otherwise, required if necessary to insure positive residual stability in the event of damage.

*Exhibit VIII—Machinery Specifications.*—

These are to be in sufficient detail to include the following data:

Type of main propelling machinery.
Shaft horsepower and propeller revolutions.
Percentage of propelling power in excess of normal power requirements.
Engine revolutions per minute for normal power.
Astern power in percentage of normal ahead power.
Steam pressure and total temperature at superheater outlet or, when no superheat is used, the steam pressure at boiler outlet.
Steam pressure and total temperature in high pressure steam chest.
Vacuum and the temperature of sea water.
Water rate, straight condensing (prime mover only).
Heat balance diagram.

The rate of fuel consumption per shaft horsepower per hour for all purposes, for average climatic conditions under which the vessel will normally operate, for either steam or Diesel installation, as the case may be, shall be the result obtained by dividing the total weight in pounds of fuel consumed per hour by the shaft horsepower transmitted to the propeller shaft, when main propelling machinery is developing the shaft horsepower specified for sustained sea speed. The shaft horsepower specified for sustained sea speed is the normal shaft horsepower, i. e., without any overload.

The characteristics of the fuel on which the fuel rate is based shall be submitted with the fuel rate. The Applicant shall state the average temperature of the outside air and sea water in degrees Fahrenheit, representing average climatic conditions, upon which is based the computation of the rate of fuel consumption.

Diameter and pitch of propeller.
Type of drive and principal characteristics.
Particulars of all auxiliary machinery, including water rates of steam driven units.

*Exhibit IX—Machinery Plans.*—

Arrangement of main propelling and auxiliary machinery.
Electrical generating plant.
Refrigerating plant.

*Exhibit X—Communication Facilities.*—

Data covering facilities for communication by radio, searchlight, sound or other means.

GENERAL INFORMATION FOR APPLICANTS

An application under Section 501 (a) of the Merchant Marine Act, 1936, for a construction-differential subsidy to aid in the construction of a new vessel to be used on a service, route, or line in the foreign commerce of the United States, determined to be essential under Section 211 of the Act, may be made by any citizen of the United States.

Each application should contain sufficient information to enable the Commission to make the necessary determinations as to (a) citizenship of the Applicant, (b) ability of the Applicant to make the required payment of not less than 25 per cent of the construction cost of the vessel (excluding cost of national-defense features) and to pay the balance of the purchase price within twenty years in not to exceed twenty equal annual installments with interest at 3½ per centum per annum, and (c) the suitability of the proposed vessel to the service, route or line for which intended. Section 501 (b) of the Act requires that the plans and specifications be submitted to the Navy Department for its examination and suggestions. The Commission may call for any information which it deems pertinent in addition to that specified in the approved form of application.

The Commission has prescribed the following particular requirements affecting design of vessels to be constructed with Commission aid for operation in foreign commerce of the United States:

(a) The standard to be followed in regard to all types of vessels shall be as required by the Report dated November 27, 1936, of the Technical Committee on Safety at Sea of the Sub-Committee on Department of Commerce and Merchant Marine of the Senate Committee on Commerce, pursuant to Senate Resolution No. 7 (74th Congress) as appearing in Senate Report No. 184 (75th Congress—1st Session).

(b) The vessel must be entitled to receive from the American Bureau of Shipping certificates evidencing highest ratings or classifications in all particulars.

(c) Cargo vessels shall be at least one compartment ships.

(d) Provision for fuel and reserve feed water shall be sufficient to insure a radius of action of not less than six thousand (6,000) nautical miles at designed load draft and at the specified sustained sea speed, unless it can be shown that such a requirement will constitute a definite handicap.

(e) The stem is to be so designed as to make it suitable for the installation of paravane gear of the sliding shoe type.

(f) Necessary stiffening of deck shall be provided during construction of the vessel, suitable for mounting such guns as may be specified by the Navy Department after consideration of the plans.

(g) The specifications and plans must represent a vessel which in all her parts, appurtenances, equipment, and outfit will comply with all the laws of the United States applicable thereto, including the requirements of the Bureau of Marine Inspection & Navigation, Commerce Department, the Navy Department, and the United States Public Health Service and all laws of all foreign countries whose ports will be visited by the vessel in the course of its regular operation.

INSTRUCTIONS AS TO PREPARATION OF APPLICATION

1. The application shall be made in triplicate, at least one copy of which shall be signed. The Applicant shall furnish promptly such number of additional copies of the application or any part thereof as the Commission may request.

2. Each application shall be complete. Items or parts of items which are inapplicable may, however, be omitted. The information required by Article 28 need be furnished only as stated in that item. Detailed descriptions of exhibits need not be given The Applicant may incorporate by specific reference information previously furnished the Commission, provided that such information so incorporated shall have been furnished at least in triplicate and is readily available in the files of the Commission.

3. If any information called for by an applicable item is not furnished, an explanation of the omission shall be given. The Applicant may furnish such relevant information as it may desire, in addition to that specified in the form.

4. Any additional information called for by the Commission from time to time shall be furnished as an amendment or amendments to the application. Each amendment shall be filed in triplicate, shall refer to the application, and shall be numbered and dated. Without any specific request from the Commission, the Applicant shall file from time to time as amendments any information necessary to keep current and correct while the application is pending the information contained therein or furnished in connection therewith.

---

FORM VA 9

APPLICATION FOR AID IN THE CONSTRUCTION OF A NEW VESSEL TO BE OPERATED IN THE DOMESTIC TRADE

The undersigned Applicant, _____, hereby applies under Section 509 of the Merchant Marine Act, 1936, for aid in the construction of a new vessel hereinafter described (herein sometimes referred to as "the new vessel") to be operated by it in the domestic trade, as hereinafter set forth, and submits in support of its application the following information:

A. *As to the Applicant; Its Citizenship and Affiliations.*—

1. Exact name.
2. Form or type of organization.
3. State or other sovereign power under the laws of which organized.
4. Address of principal executive offices, and of important branch offices, if any.
5. A list of (a) all subsidiaries and (b) all parent companies of the Applicant, together with an indication of the nature of the business transacted by each. This information may be furnished in the form of a chart, indicating clearly the relationships between the persons named, and the nature and extent of control.

6. The following information with respect to each officer and director of the Applicant:

| Name and address | Office | Nationality | Capital shares owned |
|---|---|---|---|
| | | | |
| | | | |
| | | | |
| | | | |

7. The name, address and nationality of, and number of capital shares owned by, each person not named in answer to Item 6, owning of record, or beneficially if known, more than 5 per cent of the outstanding capital shares of any class of the Applicant. If necessary, furnish additional data necessary to establish the fact that, as required by Section 2 of the Shipping Act, 1916, at least 75 per cent of the interest in the Applicant is owned by citizens of the United States.

8. A brief statement of the general effect of each voting agreement, voting trust, or other arrangement whereby the voting rights in any shares of the Applicant are owned, controlled or exercised, or whereby the control of the Applicant is in any way held or exercised by any person not the holder of legal title to such shares. Give the name, address, nationality, and business of any such person, and, if not an individual, the form of organization.

B. *As to the Business of the Applicant and Proposed Use of the New Vessel.*—

9. A brief description of (a) the shipping business of the Applicant; and (b) any other business activities of the Applicant during the preceding five years. If within such period the Applicant has acquired the business of another person or has been reorganized, there should be included a brief description of such acquisition or reorganization.

10. A brief description of the general character and location of the principal property of the Applicant, other than vessels, employed in its business.

11. A list of vessels owned by the Applicant, including (a) name; (b) gross tonnage; (c) net tonnage; (d) deadweight tonnage; (e) age; (f) type; (g) speed; (h) registry; and (i) identification of route or service on which operated.

12. Information similar to that specified in Item 11 as to any vessels chartered to and operated by the Applicant.

13. Briefly, the general terms of each charter for operation (a) of vessels owned by the Applicant and chartered by it to other persons, and (b) of vessels chartered by the Applicant from other persons.

14. Full details concerning the services, routes, or lines on which vessels owned or chartered by the Applicaut are now operated, including ports of call, terminal and dock facilities at all such ports, frequency of sailings per year, description of services and voyages, and names of vessels segregated according to services, routes, or lines.

15. Type and kind of cargo now carried in the trade served as stated in the answer to Item 14, information as to how the service or line may be developed for carrying additional types and kinds of cargo, and any factors influencing cargo expectations for the future. If the new vessel is to be a combination passenger and freight vessel, state also, by classes, the passenger accommodations and the number of passengers carried and any factors influencing traffic expectations for the future.

16. Information similar to that called for by the two preceding items with respect to any new service, route, or line which the Applicant proposes presently to establish.

17. Identification of the service, route, or line described in answer to Item 14 or Item 16, on which the Applicant proposes to operate the new vessel, brief description of passenger accommodations, and statement of type and kind of cargo to be carried by the new vessel. Any special requirements of such service, route, or line and the manner in which they may be met by the use of the new vessel should be discussed briefly. Any changes in existing services, routes, or lines which the Applicant proposes to make in connection with the use of the new vessel should also be indicated.

18. A statement as to whether or not the new vessel is to be used to replace a vessel now operated by the Applicant and, if so, the name of such vessel and the proposed disposition to be made of it by the Applicant.

C. *As to the Management of the Applicant.*—

19. A brief description of the principal business activities during the past five years of each director and each principal executive officer of the Applicant.

20. The name and address of each other organization engaged in shipping activities with which any person named in answer to the preceding item has any present substantial business connection, the name of such person and, briefly, the nature of such connection.

21. The name and address of any person who is now acting or within the past five years has acted as managing or operating agent of the Applicant or in any similar capacity, and briefly, the general terms of any agreement with reference thereto.

D. *As to Financial Matters.*—

22. If the Applicant has filed within the past five years with the Commission or with any organization to which the Commission has succeeded, any annual report and general financial statement or other financial information on forms prescribed or approved by the Commission or such predecessor, an identification of each such report or statement, including the dates covered, and the date on which delivered to the Commission or its predecessor.

23. A brief statement of the nature of any substantial changes in the financial condition of the Applicant or the results of its operations since the preceding December 31. For details financial statements may be furnished or reference made to statements annexed as exhibits.

24. The estimated cost of construction of the new vessel and full details as to the manner in which the Applicant proposes to obtain the amount needed to defray its part of the cost of such construction (that is, 25 per centum of the cost of the vessel, excluding cost of national-defense features). There shall be included full details of any proposed security issue, including names of underwriters; if the Applicant believes that furnishing of such information might be prejudicial to pending negotiations, such information may be submitted under separate cover in a sealed envelope addressed to the Chairman, United States Maritime Commission, marked "Confidential", and enclosed in an inner envelope addressed the same way and labeled "Information required under Item 24 of Construction Aid Application, submitted under confidential cover."

E. *As to the New Vessel.*—

25. The general characteristics of the proposed new vessel including (a) principal dimensions; (b) gross and deadweight tonnage; (c) bale and grain capacities of all cargo holds; (d) capacities of all tanks, storage spaces, refrigerator cargo spaces and separately chilled cargo spaces; (e) number and classes of passenger accommodations; (f) type and power, and in case of steam machinery, the gauge pressure, total temperature, and vacuum expected of propulsive machinery; (g) kind of fuel to be burned; and (h) sustained sea speed at designed load draft. There should also be given the name of the proposed supervising architect and a brief statement of his experience and qualifications.

26. A general description of the vessel, including a statement of how the proposed construction will result in a vessel which will meet the needs of the service, route, or line for which intended, and the requirements of commerce with emphasis on the following factors: (a) cargo accommodations—cargo space and fittings and appliances for handling and stowing cargo; (b) passenger accommodations; (c) construction and design; and (d) accommodations for officers and crews. There shall here be set forth a statement of the estimated operating expenses and revenues of the new vessel on a voyage basis and a comparison with similar figures for a typical vessel of the fleet now serving the trade route for which the new vessel is intended. The relative differences in performance from an economic and business standpoint should be pointed out.

F. *As to Exhibits Furnished.*—

27. A list of exhibits, properly identified, which shall include, at the time of original filing, the following:

*Exhibit I.*—A copy of the Certificate of Incorporation of the Applicant or other organization papers, including all amendments thereto presently in effect.

*Exhibit II.*—A copy of the By-Laws or other governing instruments of the Applicant, including all amendments thereto presently in effect.

*Exhibit III.*—A copy of each contract or agreement presently in effect, referred to in the answer to Item 8, Item 13, Item 21 or Item 24.

*Exhibit IV.*—A copy (specimen if available) of each form of bonds or notes included in the funded debt of the Applicant, and a copy of each indenture or other instrument under which such securities were issued, including all amendments thereto presently in effect.

*Exhibit V.*—Unless, as set forth in answer to Item 22, such information has previously been furnished, a copy of the financial statements and related schedules and statistical data which would be required to be furnished if the Applicant had been obligated to the United States of America for a construction loan on and after the preceding December 31. The information included in this exhibit shall be similar to that specified in pages 12 through 54 of the Commission's form of "Annual Report and General Financial Statement for Calendar Year 1936" for various persons, including companies obligated to the United States of America for construction loans.

28. After the information required by the form and the specification of exhibits set forth in Item 27 has been received and considered by the Commission, the following information or data with respect to the new vessel, when requested by the Commission, shall be furnished by the Applicant. Such information or data when so requested and furnished shall become a part of the application and a list thereof shall be furnished as an amendment to this Item 28.

*Exhibit VI—Hull Specifications.*—

These specifications are to be in sufficient detail to cover fully the construction of the hull and shall include the following data:

Dimensions.
Block, prismatic and other coefficients.
Designed drafts, light and loaded.
Metacentric heights at full load, ⅔ cargo, ⅓ cargo, and at light condition.
Sustained sea speed at designed load draft, (to be demonstrated as hereinafter required).
Radius of action at sustained sea speed at designed load draft.
Standard of subdivision adopted.
Bale and grain capacities of all cargo holds. Capacities of all tanks, store spaces, refrigerated cargo spaces, and chilled cargo spaces, in cubic feet.
Estimated deadweight and gross tonnage.
Total displacement.

*Exhibit VII—Hull Plans.*—

Midship section, approved by Classification Society acceptable to the Commission.
Outboard profile, general arrangement.
Inboard profile, general arrangement.
General arrangement of all decks and holds.
Fire screen diagram, inboard profile.
Fire screen diagram, all decks.
Lines.
Hydrostatic curves.
Power curves, model tank experimental run shall be made at the designed load draft.
Floodable length curves, together with basic supporting data therefor, worked out by the method used by Bureau of Marine Inspection & Navigation, Department of Commerce.
Stability data and curves, showing the effect of damage resulting in flooding, in alternate locations, a compartment or group of adjacent compartments corresponding to the number of such compartments for which the ship is basically designed. The data presented should cover the effect of damage at drafts ranging from the departure condition to the arrival condition, with full cargo, ⅔ cargo, and ⅓ cargo, and should show loss of metacentric height at such drafts due to damage, the metacentric height available before damage, and the amount of ballast, liquid or otherwise, required if necessary to insure positive residual stability in the event of damage.

*Exhibit VIII—Machinery Specifications.*—

These are to be in sufficient detail to include the following data:

Type of main propelling machinery.
Shaft horsepower and propeller revolutions.
Percentage of propelling power in excess of normal power requirements.
Engine revolutions per minute for normal power.
Astern power in percentage of normal ahead power.
Steam pressure and total temperature at superheater outlet or, when no superheat is used, the steam pressure at boiler outlet.
Steam pressure and total temperature in high pressure steam chest.
Vacuum and the temperature of sea water.
Water rate, straight condensing (prime mover only).
Heat balance diagram.
The rate of fuel consumption per shaft horsepower per hour for all purposes, for average climatic conditions under which the vessel will normally operate, for either steam or Diesel installation, as the case may be, shall be the result obtained by dividing the total weight in pounds of fuel consumed per hour by the shaft horsepower transmitted to the propeller shaft, when main propelling machinery is developing the shaft horsepower specified for sustained sea speed. The shaft horsepower specified for sustained sea speed is the normal shaft horsepower, i. e., without any overload.
The characteristics of the fuel on which the fuel rate is based shall be submitted with the fuel rate. The Applicant shall state the average temperature of the outside air and sea water in degrees Fahrenheit, representing average climatic conditions, upon which is based the computation of the rate of fuel consumption.
Diameter and pitch of propeller.
Type of drive and principal characteristics.
Particulars of all auxiliary machinery, including water rates of steam driven units.

*Exhibit IX—Machinery Plans.*—

Arrangement of main propelling and auxiliary machinery.
Electrical generating plant.
Refrigerating plant.

*Exhibit X—Communication Facilities.*—

Data covering facilities for communications by radio, searchlight, sound or other means.

GENERAL INFORMATION FOR APPLICANTS

Applications under Section 509 of the Merchant Marine Act, 1936, for aid in the construction of new vessels to be operated in the domestic trade may be made by citizens of the United States.

Each application should contain sufficient information to enable the Commission to make the necessary determinations as to (a) citizenship of the Applicant, (b) ability of the Applicant to make the required payment of not less than 25 per cent of the cost of the vessel (excluding cost of national-defense features) and to pay the balance of the purchase price within twenty years in not to exceed twenty equal annual installments with interest at 3½ per centum per annum, and (c) the suitability of the proposed vessel to the service, route or line for which intended. Section 501 (b) of the Act requires that the plans and specifications be submitted to the Navy Department for its examination and suggestions. The Commission may call for any information which it deems pertinent in addition to that specified in the approved form of application.

The Commission has prescribed the following particular requirements affecting design of vessels to be constructed with Commission aid for operation in the domestic trade:

(a) The standard to be followed in regard to all types of vessels shall be as required by the Report dated November 27, 1936, of the Technical Committee on Safety at Sea of the Sub-Committee on Department of Commerce and Merchant Marine of the Senate Committee on Commerce, pursuant to Senate Resolution No. 7 (74th Congress) as appearing in Senate Report No. 184 (75th Congress—1st Session).

(b) The vessel must be entitled to receive from the American Bureau of Shipping certificates evidencing highest ratings or classifications in all particulars.

(c) Cargo vessels shall be at least one compartment ships.

(d) Provision for fuel and reserve feed water shall be sufficient to insure a radius of action of not less than six thousand (6,000) nautical miles at designed load draft and at the specified sustained sea speed, unless it can be shown that such a requirement will constitute a definite handicap.

(e) The stem is to be so designed as to make it suitable for the installation of paravane gear of the sliding shoe type.

(f) Necessary stiffening of deck shall be provided during construction of the vessel, suitable for mounting such guns as may be specified by the Navy Department after consideration of the plans.

(g) The specifications and plans must represent a vessel which in all her parts, appurtenances, equipment, and outfit will comply with all the laws of the United States applicable thereto, including the requirements of the Bureau of Marine Inspection & Navigation, Commerce Department, the Navy Department, and the United States Public Health Service.

INSTRUCTIONS AS TO PREPARATION OF APPLICATION

1. The application shall be made in triplicate, at least one copy of which shall be signed. The Applicant shall furnish promptly such number of additional copies of the application or any part thereof as the Commission may request.

2. Each application shall be complete. Items or parts of items which are inapplicable may, however, be omitted. The information required by Article 28 need be furnished only as stated in that item. Detailed descriptions of exhibits need not be given. The Applicant may incorporate by specific reference information previously furnished the Commission, provided that such information so incorporated shall have been furnished at least in triplicate and is readily available in the files of the Commission.

3. If any information called for by an applicable item is not furnished, an explanation of the omission shall be given. The Applicant may furnish such relevant information as it may desire, in addition to that specified in the form.

4. Any additional information called for by the Commission from time to time shall be furnished as an amendment or amendments to the application. Each amendment shall be filed in triplicate, shall refer to the application, and shall be numbered and dated. Without any specific request from the Commission, the Applicant shall file from time to time as amendments any information necessary to keep current and correct while the application is pending the information contained therein or furnished in connection therewith.

[F. R. Doc. 37-2799; Filed, September 20, 1937; 4:28 p. m.]

---

[General Order No. 12]

INFORMATION AND PROCEDURE REQUIRED UNDER THE OPERATING DIFFERENTIAL SUBSIDY AGREEMENT

In compliance with the terms of the Operating-Differential Subsidy Agreement, the following information shall be submitted to the Commission by operators who are parties to such agreements:

*Sailing Schedules, Routes, Etc.*—On or before the 15th day of each month, there shall be submitted, for approval by the Commission, a statement in triplicate of all sailings scheduled to be made during the ensuing month by the vessels covered in the agreement. This statement shall show, in respect to each vessel, the anticipated sailing dates, ports of call and whether carrying passengers or freight. Each monthly statement shall be numbered serially in accordance with present practice.

This supersedes Traffic Circular No. 1.

*Condition of Vessels, Inspection and Repairs.*—In order that the Commission may have an opportunity to participate in the inspection of the vessels, the operator is required to give twenty-four hours' notice as to the time and place of making inspections. In the event inspection is made in absence of Commission's representative, the operator shall proceed with inspection, reporting on U. S. M. C. Form TD 100B and sworn to by persons making the inspection and submitted to the Commission.

The operator shall give due notice of the port date and time when making repairs and/or replacements in the United States.

Repairs are to be performed within the continental limits of the United States, except in emergency cases, the necessity for which operators should be prepared to justify upon audit.

*Insurance.*—There shall be submitted to the Commission, for its approval, signed copies of the cover notes issued by your brokers at the time the insurance was bound, setting forth the amounts covered by hull, disbursements and other forms of total loss protection as well as by P. & I. insurance. They shall include the rates, the amounts placed in the different markets, the companies interested with the numbers of their policies and the amount underwritten by each, and the amount of the deductible average, if any. On request of the Commission, the policies are to be temporarily submitted for examination.

The Commission should be advised promptly if any cancellations, changes in the terms or companies interested, of any lay-up periods which will permit of the collection of return premiums and of any major casualty or total loss which may occur.

The insurance arranged in conformity with the requirements of the mortgage, held by the United States will be sufficient and no other information shall be necessary, even though the vessels are also covered by the subsidy agreement.

The Commission desires to have as much of this insurance, as is practicable, placed in the American market and when negotiating for the renewal of the current insurance, it is requested that particular attention be given to the desires of the Commission with regard to the markets in which the insurance is to be placed and that the Commission be notified in ample time so that facts can be given consideration and

the insurance approved or changes can be made prior to attachment.

*Inventories.*—Twenty-four hours notice should be given as to the time and place of inventorying classification required spare parts, ships spare equipment, fuel and stores as are customarily inventoried and the cost of which is charged to the voyage accounts. If, upon giving the above required notice, the Commission's representatives are not present, the operator is to proceed with his inventory in the normal way. The operator may use his own inventory forms, one copy of which shall be sworn to by the persons taking the inventory and which shall be included in the voyage account.

*Partial Payments on Account.*—When partial payments on account of the operating-differential subsidy are desired, the operator should communicate with the Chief, Examining Section, who shall forward necessary instructions and forms to be used.

*Current Financial Reports.*—The operator should submit, not later than the 20th of each month, balance sheets, operating and profit and loss statements for the preceding month in such form as is customarily prepared for the operator's own use.

It is understood that such statements will not reflect final adjustments which may be necessary to correctly reflect the accounts in all cases; if no balance sheets and operating and profit and loss statements are customarily prepared for the operator's own use, monthly trial balances may be submitted instead.

*General.*—All reports and other communications called for by the foregoing, should be addressed to: Chief, Examining Section, United States Maritime Commission, Washington, D. C.

By order of the United States Maritime Commission.

[SEAL] W. C. PEET, Jr., *Secretary.*

AUGUST 26, 1937.

[General Order No. 13]

## APPLICATION FOR OPERATING DIFFERENTIAL SUBSIDY UNDER TITLE VI, MERCHANT MARINE ACT, 1936

General Order No. 5, relating to the form of application for operating-differential subsidies, is hereby rescinded and the attached form VI–A is hereby adopted as the required form of application for operating subsidies under Title VI of the Merchant Marine Act of 1936.

Applications for subsidies to become effective on January 1, 1938, are required to be filed on or before October 4, 1937.

By order of the United States Maritime Commission.

[SEAL] W. C. PEET, Jr., *Secretary.*

SEPTEMBER 17, 1937.

---

### FORM VI–A

APPLICATION FOR OPERATING-DIFFERENTIAL SUBSIDY UNDER TITLE VI, MERCHANT MARINE ACT, 1936

The undersigned Applicant, _____, a citizen of the United States, hereby applies under Title VI of the Merchant Marine Act, 1936, (herein referred to as the Act) for financial aid in the operation of vessels which are to be used in the essential service in the foreign commerce of the United States, and in order to induce the Commission to act favorably on this application, the Applicant submits in support of its application the following information:

A. *As to the Applicant; Its Citizenship and Affiliations.*—

1. Exact name.
2. Form or type of organization.
3. State or other sovereign power under the laws of which organized.
4. Address of principal executive offices, and of important branch offices, if any.
5. A list of (a) all subsidiaries, (b) all parent companies, (c) and all affiliated companies of the Applicant, together with an indication of the nature of the business transacted by each. If practicable, this information should be supplemented by a chart, indicating clearly the relationships between the persons named, and the nature and extent of control.
6. The following information with respect to each officer and director of the Applicant.

| Name and address | Office | Salary | Nationality | Capital shares owned | Other business connections |
|---|---|---|---|---|---|
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

7. The name, address and nationality of, and number of capital shares owned by, each person not named in answer to Item 6, owning of record, or beneficially if known, more than 5 per cent of the outstanding capital shares of any class of the Applicant. If necessary, furnish additional data necessary to establish the fact that, as required by Section 2 of the Shipping Act, 1916, the controlling interest in the Applicant is owned by citizens of the United States.
8. A brief statement of the general effect of each voting agreement, voting trust, or other arrangement whereby the voting rights in any shares of the Applicant are owned, controlled or exercised, or whereby the control of the Applicant is in any way held or exercised by any person not the holder of legal title to such shares. Give the name, address, nationality, and business of any such person, and, if not an individual, the form of organization.
9. A statement (as required by Section 602 (b) of the Act) disclosing the names of all persons having any pecuniary interest, direct or indirect, in this application or in the ownership or use of the vessel or vessels, routes, or lines covered thereby, and the nature and extent of any such interest. In answer to this item, information furnished under other items of this application may be incorporated by reference and need not be set forth again in detail.

B. *As to the Applicant; Its Business Activities and Relationships.*—

10. A brief description of (a) the shipping business of the Applicant; and (b) any other business activities of the Applicant during the preceding five years. If within such period the Applicant has acquired the business of another person or has been reorganized, there should be included a brief description of such acquisition or reorganization.
11. A brief description of the general character and location of the principal property of the Applicant, other than vessels, employed in its business.
12. Full details concerning the services, routes, or lines on which vessels owned or chartered by the Applicant are now operated, including ports of call, terminal and dock facilities at all such ports, frequency of sailings per year during recent years, description of services and voyages, and names of vessels segregated according to services, routes, or lines.
13. Type and kind of cargo now carried in the trade served as stated in the answer to Item 12, information as to how the service or line may be developed for carrying additional types and kinds of cargo, and any factors influencing cargo expectations for the future. State also, by classes, the passenger accommodations and the number of passengers carried and any factors influencing traffic expectations for the future.
14. Information similar to that called for by the two preceding items with respect to any new service, route, or line which the Applicant proposes presently to establish.
15. A statement of the minimum and maximum number of annual sailings which the Applicant desires to make under the proposed subsidy agreement, and a brief summary of traffic statistics and other facts in support thereof. If the Applicant is required to make extra sailings to meet seasonal traffic movements, a comprehensive statement should be furnished outlining the program normally followed by the Applicant in handling such business during these periods.
16. A general description of the manner in which the Applicant obtains stevedoring, ship repair, ship chandler, towboat, and kindred services to vessels which it owns or operates. Give the name and address of each person, and identify each class of persons, furnishing any such service and, in each case, describe the services rendered, and summarize the terms of any contractual or other arrangements therefor. State whether or not any relationship exists which would have caused the employment of any such person or class of persons by the Applicant to be unlawful under Section 803 of the Act if the services were supplied to a subsidized or chartered vessel, and, if so, describe such relationship.
17. A statement of whether or not there exists or is known to be presently contemplated any relationship which would have caused the employment by the Applicant of any person or class or persons referred to in answer to Item 18 (in the absence of approval by the Commission) to be unlawful under Section 803 of the Act if the services were supplied to a subsidized or chartered vessel. If so, describe such relationship and if it is to be terminated with respect to any vessels referred to in answer to Item 21, the time and manner of the proposed termination. Refer also to any application for waiver of the provisions of Section 803 of the Act which the Applicant proposes to file pursuant to Section 6 of the annexed instructions.

18. State whether or not there exists or is known to be presently contemplated any foreign-flag connection or relationship which (in the absence of waiver by the Commission) would be unlawful under Section 804 of the Act if the Applicant were receiving an operating-differential subsidy under Title VI of the Act. If so, describe such connection or relationship, state the amount of profit resulting from each of such activities, and if they are to be terminated, the time and manner of the proposed termination.
19. State whether or not the Applicant has contracted or expects to contract with any holding company, affiliate company, or associate company, for the use of terminal facilities. If so, furnish a copy of the contract and a financial statement setting forth the profit or loss resulting to such holding company, affiliate company or associate company from its ownership and/or operation of such terminal facilities (a) during the past five years, and (b) under the contemplated arrangement.
20. State whether the Applicant or any holding company, subsidiary or affiliate or associate of the Applicant or any officer, director, agent or executive thereof, directly or indirectly, owns, operates, or charters any vessel or vessels engaged in the domestic, intercoastal or coastwise services or owns any pecuniary interest, directly or indirectly, in any person or concern that owns, charters or operates any vessel or vessels in the domestic, intercoastal or coastwise service. If so, state whether the Applicant or other person above mentioned or a predecessor in interest was in bona fide operation as a common carrier by water in such domestic, intercoastal or coastwise trade in 1935 over the route or routes or in the trade or trades above mentioned, and has so operated since that time, or, if engaged in furnishing seasonal services only, was in bona fide operation in 1935 during the season ordinarily covered by its operations.
21. State whether the Applicant employs or expects to employ any other person or concern as the managing or operating agent of the Applicant. If so, furnish financial statements indicating the profits or losses, if any, resulting to such other person or concern from its managing or operating agency (a) during the past five years, and (b) under the contemplated arrangement. Also attach a copy of the contract covering such services.

C. *As to the Applicant; Its Qualifications for a Subsidy Under Section 601 of the Act.*—

22. A full and complete statement of the circumstances, facts, and other proof which, in the opinion of the Applicant, would support each of the following determinations required to be made by the Commission (pursuant to Section 601 of the Act) prior to approval by it of this application:
    (a) That the operation of the vessel or vessels in the service, route, or line referred to in answer to Item 23 is required to meet foreign-flag competition and to promote the foreign commerce of the United States;
    (b) That the Applicant owns, or can and will build or purchase, a vessel or vessels of the size, type, speed, and number, and with the proper equipment required to enable it to operate and maintain the service, route, or line, in such manner as may be necessary to meet competitive conditions, and to promote foreign commerce;
    (c) That the Applicant possesses the ability, experience, financial resources, and other qualifications necessary to enable it to conduct the proposed operations of the vessel or vessels as to meet competitive conditions and promote a foreign commerce; and
    (d) That the granting of the aid applied for is necessary to place the proposed operations of the vessel or vessels on a parity with those of foreign competitors, and is reasonably calculated to carry out effectively the purposes and policy of the Act.

In answer to this item, information furnished under other items of this application may be incorporated by reference and need not be set forth here in detail.

D. *As to the Applicant; Its Vessels and Replacement Program.*—

23. A list and description of all vessels owned by the Applicant, including (a) name; (b) gross tonnage; (c) net tonnage; (d) deadweight tonnage; (e) year built; (f) type; (g) fuel capacity and consumption; (h) speed; (i) registry; (j) identification of route or service on which operated; and (k) amount of refrigeration. If Applicant owns vessels which are not to be subsidized, such vessels should be listed separately.
24. Information similar to that specified in Item 12 as to any vessels chartered to and operated by the Applicant.
25. Briefly, the general terms of each charter for operation (a) of vessels owned by the Applicant and chartered by it to other persons, and (b) of vessels chartered by the Applicant from other persons.
26. Information sufficient to demonstrate that each of the vessels for which a subsidy is requested is (a) of steel or other acceptable metal, (b) propelled by steam or motor, and (c) as nearly fireproof as practicable; also that such vessels were built in a domestic yard or have been documented under the laws of the United States not later than February 1, 1928, or were actually ordered and under construction for the account of a citizen of the United States prior to such date.
27. A description and summary of the program for replacement of the Applicant's subsidized vessels. The description should include full information concerning the following, if practicable:
    (a) The number, size, and type of vessels to be constructed, general characteristics of the proposed vessel including (a) principal dimensions; (b) gross and deadweight tonnage; (c) bale and grain capacities of all cargo holds; (d) capacities of all tanks, storage spaces, refrigerator cargo spaces and separately chilled cargo spaces; (e) number and classes of passenger accommodations; (f) type and power, and in case of steam machinery, the gauge pressure, total temperature, and vacuum expected of propulsive machinery; (g) kind of fuel to be burned; and (h) sustained sea speed at designed load draft. There should also be given the name of the proposed supervising architect and a brief statement of his experience and qualifications.
    (b) The proposed arrangement for financing the new construction.
    (c) Amount of construction subsidy that the Applicant will expect.
    (d) The effect of the operation of new vessels on the subsidized services. In this connection the information should cover (a) the effect of the new vessels upon turn around days, changes in frequency of sailings, re-alignment or reduction of fleet, and (b) by the operating results, economies, expenses, and capital costs that are expected to result from the replacement program, and (c) the effect of the replacement program on the amount of operating subsidy required by the Applicant. Operating forecasts giving effect to the above should supplement this information.

E. *As to the Applicant; Its Foreign-flag Competition.*—

28. List and describe all services, whether American flag or foreign, which are claimed to compete directly with the lines operated by the Applicant. The services competing with each of the Applicant's lines should be stated and described separately, and ownership and registry of each competing service should be identified in sufficient detail to permit a comparison with the Applicant. In this connection, the name, registry, year built, type, gross, net and deadweight tonnage, and speed of the vessels operated by the Applicant's competitors, and the comparative freight and passenger rates of such competitors should be stated. Describe also any new foreign-flag competition which may originate during the next calendar year and any existing competition which may disappear during such period.
29. Furnish a detail and comprehensive analysis, indicating the percentage of the total passenger and freight business on each of the Applicant's routes which is carried (a) by the Applicant, (b) by all other American services, and (c) by all competing foreign-flag services as a unit. Also furnish a breakdown indicating the percentage of the total foreign-flag business which is handled by each of the foreign-flag competitors. These analyses should, if practicable, be computed on the basis of (a) of comparative receipts of the competing lines, and also (b) upon the comparative tonnage and number of passengers carried by such lines and schedules reflecting such earnings and carryings should be furnished. The source of information in each case should be indicated.
30. Describe briefly all conferences and pools now in effect in any of the routes served by the Applicant. State whether the Applicant is a member of each such pool or conference and the effect of such pool or conference upon the division or allocation of freight or passenger business, and the establishment of rate differentials.
31. If it is desired that the Commission consider any indirect foreign-flag competition in determining the amount of the operating differential subsidy, the Applicant should furnish information similar to that required by Item 26 above as to all such indirect foreign-flag competitors. A full explanation should be offered as to the reason why indirect competition should be considered by the Commission.
32. Using the quotient 100 to express the total foreign-flag competition on each route served by the Applicant, state the percentage of the total foreign-flag competition which is represented (a) by each foreign-flag competitor, and (b) by all the lines of each nation represented among the foreign-flag competitors. The basis upon which the allocation is made should be set forth in detail. It is assumed that the Applicant will take into account in this connection not only the percentage of the total cargo and number of passengers carried by each competing service, but also all other pertinent factors such as the capacity and speed of ships employed and the frequency and regularity of sailings, the passenger and freight rates charged, the type of cargo, and class of passengers carried, etc.

F. *As to the Amount of the Operating-Differential Subsidy.*—

33. List all of the items for which an operating-differential subsidy is requested and state the amount requested for each item (a) in the aggregate, and (b) on each route. The amounts should be stated (a) in differential percentages, (b) in average voyage subsidy cost, and (c) in annual subsidy cost.
34. As to all expense items sought to be included in the operating-differential subsidy, furnish for each of the Applicant's routes a statement of the present day costs of each item (a) on a voyage basis, and (b) on an annual basis. The estimates should be supported by a comparative statement indicating the total and average cost of each item, both on a voyage basis (for each type of vessel and for each route) and on an annual basis (a) in 1935, (b) in 1936, (c) during the first six months of 1937, and (d) on terminations since July 1, 1937. Increases or decreases in

American cost in any of the above periods should be reconciled by marginal comments.

In regard to 1937 expenses, the comparative statement should be prepared as follows: Wages paid in the Deck Department, the Engine Department, and the Steward's Department should be stated separately. Wages should also be broken down to show the amount represented by overtime and vacations. Subsistence should be broken down to show separately (a) the subsistence of officers and crew, and (b) the subsistence cost of passengers and others, and the cost per man per day under each classification. If separate messes for officers and crews are not maintained, a description of the method utilized in determining the costs should be furnished. The item of repairs should be segregated so as to indicate (a) repairs deferred from preceding accounting or subsidy periods, (b) current capital repairs, and (c) current operating repairs. If any of the operating repairs are of an unusual nature, that fact should be set forth in a marginal comment. If insurance is included among the items for which a subsidy is requested, the statement of insurance cost should be broken down to show separately the net premiums (rates and amounts) paid to others for each form of coverage and the estimated cost of self-assumed risks. In all cases except wages and insurance, the Applicant should indicate that portion of the expenditures which were made in foreign countries. Actual wage scales and manning scales should be attached as exhibits if they differ from the minimum scales established by the Commission.

35. The following information should be furnished in regard to each route served by the Applicant, using the quotient 100 to represent the American cost in each case: (a) a schedule setting forth the comparative cost to each substantial foreign competitor on such route as to each of the items of expense for which a subsidy is claimed, and (b) a schedule setting forth the comparative costs to all foreign competitors as a unit of each of the items of expense for which a subsidy is claimed. For the latter schedule, differentials applicable to each competitor should be weighted in accordance with the degree of competition furnished by such competitor, and the basis upon which the differentials have been weighted should be stated, explained, and justified.

36. Submit full, comprehensive, and complete documentary and other proof as to the present day competitive advantages enjoyed by each foreign competitor in connection with each of the items of expenditure for which a subsidy is requested. The documentary evidence may be attached as an exhibit and summarized in the body of the application if desired. The source of the information, as well as the date when it was received, should be stated in each case.

37. State whether the Applicant has any information as to the extent to which each of the Applicant's substantial foreign competitors (a) employs American seamen; (b) patronizes American repair yards, ship chandlers or other ship suppliers; or (c) otherwise purchases or acquires in this country any of the items for which an operating subsidy is being requested by the Applicant. If the Applicant has any information in this connection, the same should be summarized, and the sources from which and the dates when same was obtained, should be indicated.

38. Set forth all items, other than the items of expense mentioned in Paragraph 35 above, as to which a subsidy is being claimed by the Applicant. State the basis for including such additional items in the operating subsidy computation, and present such full and complete documentary and other proof as will justify the awarding of a subsidy for such additional items.

G. *As to Financial Matters.*—

39. Furnish the following financial statements:

(a) Comparative balance sheets of the Applicant as of January 1, 1936; January 1, 1937; June 30, 1937; and January 1, 1938 (the balance sheet for January 1, 1938, to be estimated). Any material changes between the above balance sheets should be reconciled by marginal notations. Information should also be furnished as to the basis used in valuing the Applicant's vessels and other principal assets.

(b) A comparative operating statement of the Applicant showing the results of operations for the following periods: (a) 1936; (b) the first six months of 1937; and (c) the last six months of 1937 as estimated by the Applicant. If Applicant engages in the protected trade, the percentage of revenue arising out of such protected trade should be indicated. Also, if the Applicant serves more than one route, individual operating statements should be furnished for each route in addition to the general operating statement reflecting all of the Applicant's operations.

(c) A comparative statement of voyage accounts covering all 1937 voyage terminations and the corresponding voyage terminations in 1936, with marginal comments reconciling the material changes that have occurred since 1936.

(d) A forecast of operations (a) for the six-month period ending December 31, 1937; and (b) for one or more calendar years beginning January 1, 1937, supported by marginal explanations reconciling all substantial changes from the preceding calendar year.

For the above statements mail pay and subsidy should be stated separately.

40. Describe any contemplated plan of reorganization or recapitalization involving new capital, the consolidation or merger of Applicant with affiliated or other companies, debt elimination, or other changes or modifications in the corporate structure, and indicate by appropriate financial statements the anticipated results thereof.

H. *As to Exhibits Furnished.*—

41. A list of exhibits properly identified, which shall include, at the time of original filing, the following:

*Exhibit I.*—A copy of the Certificate of Incorporation of the Applicant or other organization papers, including all amendments thereto presently in effect.

*Exhibit II.*—A copy of the By-Laws or other governing instruments of the Applicant, including all amendments thereto presently in effect.

*Exhibit III.*—A copy (specimen if available) of each form of bonds or notes included in the funded debt of the Applicant, and a copy of each indenture or other instrument under which such securities were issued, including all amendments thereto presently in effect.

*Exhibit IV.*—Unless such information has previously been furnished, a copy of the financial statements and related schedules and statistical data which would be required to be furnished if the Applicant had been obligated to the United States of America for a construction loan on and after the preceding December 31. The information included in this exhibit shall be similar to that specified in pages 12 through 54 of the Commission's form of "Annual Report and General Financial Statement for Calendar Year 1936" for various persons, including companies obligated to the United States of America for construction loans.

*Exhibit V et seq.*—Such of the financial statements, copies of contracts, schedules, and other data required hereunder which Applicant desires to attach as exhibits instead of incorporating in the body of the application.

My commission expires ---.

INSTRUCTIONS AS TO PREPARATION OF APPLICATION

1. The application shall be made in triplicate originals, and should be executed and verified by one of Applicant's principal officers. Applications shall be printed, multigraphed or mimeographed, or prepared in some equivalent manner so as to insure legibility of all copies. Applications should be indexed and, if practicable, the pages should be approximately 8½ by 11 inches in size. The Applicant shall furnish three originals and fifteen copies of the application to the Commission.

2. Each application shall be complete. Items or parts of items which are inapplicable may, however, be omitted. Detailed descriptions of exhibits need not be given. The Applicant may incorporate by specific reference information previously furnished the Commission, if voluminous, provided that such information so incorporated shall have been furnished at least in triplicate and is readily available in the files of the Commission.

3. If any information called for by an applicable item is not furnished, an explanation of the omission shall be given. The Applicant may furnish such relevant information as it may desire, in addition to that specified in the form.

4. Any additional information called for by the Commission from time to time shall be furnished as an amendment or amendments to the application. Each amendment shall be filed in triplicate originals, shall refer to the application, and shall be numbered and dated. Without any specific request from the Commission, the Applicant shall file from time to time as amendments any information necessary to keep current and correct while the application is pending the information contained therein or furnished in connection therewith.

5. Applications under Sections 803, 804, 805 (a) and (d), 605 (b) should, if practicable, accompany the application. Instructions to cover the form of such special applications will be issued shortly.

## PRESIDENT OF THE UNITED STATES.

### COLUMBUS DAY

By the President of the United States of America

A PROCLAMATION

WHEREAS Public Resolution 21, Seventy-third Congress, approved April 30, 1934, provides:

"That the President of the United States is authorized and requested to issue a proclamation designating October 12 of each year as Columbus Day and calling upon officials of the Government to display the flag of the United States on all Government buildings on said date and inviting the people of the United States to observe the day in schools and churches, or other suitable places, with appropriate ceremonies expressive of the public sentiment befitting the anniversary of the discovery of America.";

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, under and by virtue of the authority vested in me by the aforesaid public resolution, do by this proclamation designate October 12, 1937, as Columbus Day and do direct that on that day the flag of the United States be displayed on all Government buildings; and, further, I do invite the people of the United States to observe the day with appropriate ceremonies in schools and churches, or other suitable places.

IN WITNESS WHEREOF I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 18" day of September, in the year of our Lord nineteen hundred and [SEAL] thirty-seven, and of the Independence of the United States of America the one hundred and sixty-second.

FRANKLIN D ROOSEVELT

By the President:
CORDELL HULL
*Secretary of State.*

[No. 2253]

### GENERAL PULASKI MEMORIAL DAY

By the President of the United States of America

A PROCLAMATION

WHEREAS General Casimir Pulaski crossed the seas to offer his services to General Washington and to the young Republic in its hour of need; and

WHEREAS General Pulaski organized the cavalry unit known as the Pulaski Legion, which he commanded with distinction until the day when he fell mortally wounded while leading a charge at Savannah; and

WHEREAS he died from the wounds thus received on October 11, 1779; and

WHEREAS Public Resolution 24, Seventy-fifth Congress, approved on April 13, 1937, provides:

"That the President of the United States is authorized and directed to issue a proclamation calling upon officials of the Government to display the flag of the United States on all governmental buildings on October 11, 1937, and inviting the people of the United States to observe the day in schools and churches or other suitable places, with appropriate ceremonies in commemoration of the death of General Casimir Pulaski."

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, do direct that the flag shall be displayed upon all Government buildings on October 11, 1937, as a mark of respect to the memory of General Casimir Pulaski, and do hereby invite the people of the United States to observe that day as General Pulaski Memorial Day and to participate with appropriate ceremonies in schools and churches or other suitable places in the solemn commemoration of General Pulaski's death on October 11, one hundred and fifty-eight years ago.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 18" day of September, in the year of our Lord nineteen hundred and [SEAL] thirty-seven, and of the Independence of the United States of America the one hundred and sixty-second.

FRANKLIN D ROOSEVELT

By the President:
CORDELL HULL
*Secretary of State.*

### EXECUTIVE ORDER

INSPECTION OF INCOME, PROFITS, AND CAPITAL STOCK TAX RETURNS BY THE COMMITTEE ON INTERSTATE COMMERCE, UNITED STATES SENATE

By virtue of the authority vested in me by section 257 (a) of the Revenue Act of 1926 (44 Stat. 9, 51), section 55 of the Revenue Act of 1934 (48 Stat. 680, 698), sections 105 (e) and 106 (c) of the Revenue Act of 1935 (49 Stat. 1014, 1018, 1019), and section 55 of the Revenue Act of 1936 (49 Stat. 1648, 1671), it is hereby ordered that income, profits, and capital stock tax returns made under the Revenue Act of 1935, as amended by the Revenue Act of 1936, and the Revenue Act of 1936 shall be open to inspection by the Committee on Interstate Commerce, United States Senate, or any duly authorized subcommittee thereof, for the purpose of, and to the extent necessary in, the investigation of interstate railroads and affiliates with respect to financing, reorganizations, mergers, and certain other matters, which such Committee or subcommittee is authorized and directed to make by Senate Resolution 71 agreed to May 20, 1935 (74th Cong., 1st Sess.); such inspection to be in accordance and upon compliance with the rules and regulations prescribed by the Secretary of the Treasury in the Treasury Decision relating to the inspection of returns by that Committee, approved by me this date.

FRANKLIN D ROOSEVELT

THE WHITE HOUSE,
*August 31, 1937.*

[No. 7700-A]

[T. D. 4762]

REGULATIONS GOVERNING THE INSPECTION OF INCOME, PROFITS AND CAPITAL STOCK TAX RETURNS MADE UNDER THE REVENUE ACT OF 1935, AS AMENDED, AND THE REVENUE ACT OF 1936, BY THE COMMITTEE ON INTERSTATE COMMERCE, UNITED STATES SENATE

AUGUST 20, 1937.

*To Collectors of Internal Revenue and Others Concerned:*

Pursuant to the provisions of section 257 (a) of the Revenue Act of 1926; section 55 of the Revenue Act of 1934; sections 105 (e) and 106 (c) of the Revenue Act of 1935; and section 55 of the Revenue Act of 1936, income tax returns made under the Revenue Act of 1936 and capital stock and excess-profits tax returns made under the Revenue Act of 1935, as amended, may be inspected by the Committee on Interstate Commerce, United States Senate, or any duly authorized subcommittee thereof, for the purpose of, and to the extent necessary in the investigation of interstate railroads and affiliates with respect to financing, reorganizations, mergers, and certain other matters, which the committee or an authorized subcommittee thereof is

authorized and directed to make by Senate Resolution 71 (Seventy-fourth Congress, first session), passed May 20, 1935. The inspection of returns herein authorized may be by the committee or a duly authorized subcommittee thereof, acting directly as a committee or a subcommittee, or by or through such examiners or agents as the committee or subcommittee may designate or appoint. Upon written notice by the chairman of the committee or of the authorized subcommittee to the Secretary of the Treasury, giving the names and addresses of the taxpayers whose returns it is necessary to inspect and the taxable periods covered by the returns, the Secretary and any officer or employee of the Treasury Department shall furnish such committee or subcommittee with any data relating to or contained in any such return, or shall make such return available for inspection by the committee or subcommittee or by such examiners or agents as the committee or subcommittee may designate or appoint, in the office of the Commissioner of Internal Revenue. Any information thus obtained by the committee or the subcommittee thereof, which is relevant or pertinent to the purpose of the investigation, may be submitted by the committee or the subcommittee to the Senate.

WAYNE C. TAYLOR,
*Acting Secretary of the Treasury.*

Approved, August 31, 1937.

[T. D. 49160]

REGULATIONS PROMULGATED PURSUANT TO SECTION 403 OF THE SUGAR ACT OF 1937

*To Collectors of Customs:*

Pursuant to the authority contained in section 403 (a) of the Sugar Act of 1937 (Public No. 414—75th Congress, approved September 1, 1937), the following regulations are hereby promulgated for your information and guidance:

(a) Sections 403 and 406, title IV, and section 513, title V, of the Sugar Act of 1937, provide as follows:

IMPORT COMPENSATING TAX

SEC. 403. (a) In addition to any other tax or duty imposed by law, there shall be imposed, under such regulations as the Commissioner of Customs shall prescribe, with the approval of the Secretary of the Treasury, a tax upon articles imported or brought into the United States as follows:

(1) On all manufactured sugar testing by the polariscope ninety-two sugar degrees, 0.465 cent per pound, and for each additional sugar degree shown by the polariscopic test, 0.00875 cent per pound additional, and fractions of a degree in proportion;

(2) On all manufactured sugar testing by the polariscope less than ninety-two sugar degrees 0.5144 cent per pound of the total sugars therein;

(3) On all articles composed in chief value of manufactured sugar 0.5144 cent per pound of the total sugars therein.

(b) Such tax shall be levied, assessed, collected, and paid in the same manner as a duty imposed by the Tariff Act of 1930, and shall be treated for the purposes of all provisions of law relating to the customs revenue as a duty imposed by such Act, except that for the purposes of sections 336 and 350 of such Act (the so-called flexible-tariff and trade-agreements provisions) such tax shall not be considered a duty or import restriction, and except that no preference with respect to such tax shall be accorded any articles imported or brought into the United States.

* * * * * *

EFFECTIVE DATE

SEC. 406. The provisions of this title shall become effective on the date of enactment of this Act.

SEC. 513. No tax shall be imposed on the * * * importation of sugar after June 30, 1941 * * *.

(b) *Effective date.*—The import compensating taxes prescribed by section 403 are applicable to manufactured sugar and articles composed in chief value of manufactured sugar entered for consumption or withdrawn from warehouse for consumption after the opening of business on September 1, 1937. Collectors of customs should proceed with the liquidation of entries covering such merchandise in the usual course. The Bureau's telegram of September 3, 1937, insofar as it related to the suspension of liquidation of duties accruing in connection with entries or withdrawals made on September 1, 1937, is modified accordingly.

(c) *Definitions.*—The terms "manufactured sugar", "total sugars", and the "United States", as used in these regulations, are defined in section 401, title IV of the Sugar Act of 1937, as follows:

SEC. 401. For the purposes of this title—

* * * * * *

(b) The term "manufactured sugar" means any sugar derived from sugar beets or sugarcane, which is not to be, and which shall not be, further refined or otherwise improved in quality; except sugar in liquid form which contains nonsugar solids (excluding any foreign substance that may have been added) equal to more than 6 per centum of the total soluble solids, and except also sirup of cane juice produced from sugarcane grown in continental United States.

The grades or types of sugar within the meaning of this definition shall include, but shall not be limited to, granulated sugar, lump sugar, cube sugar, powdered sugar, sugar in the form of blocks, cones, or molded shapes, confectioners' sugar, washed sugar, centrifugal sugar, clarified sugar, turbinado sugar, plantation white sugar, muscovado sugar, refiners' soft sugar, invert sugar mush, raw sugar, sirups, molasses, and sugar mixtures.

(c) The term "total sugars" means the total amount of the sucrose (Clerget) and of the reducing or invert sugars. The total sugars contained in any grade or type of manufactured sugar shall be ascertained in the manner prescribed in paragraphs 758, 759, 762, and 763 of the United States Customs Regulations (1931 edition).

(d) The term "United States" shall be deemed to include the States, the Territories of Hawaii and Alaska, the District of Columbia, and Puerto Rico.

The terms "testing by the polariscope * * * sugar degrees" and "sugar degree shown by the polariscopic test", as used in section 403 (a) (1) and (2), supra, mean the percentage of sucrose contained in manufactured sugar shown by direct polarimetric estimation.

(d) *Accounting.*—The taxes imposed by section 403 shall be levied, assessed, collected and paid in accordance with the Customs Regulations of 1937, as heretofore or hereafter amended, insofar as they are applicable, and shall be scheduled, deposited, reported, and accounted for as and with other collections of duties on imports, in the same manner as duties imposed by the Tariff Act of 1930 (U. S. C., title 19, sec. 1001).

(e) *Application of tax.*—The taxes imposed by section 403 are applicable to manufactured sugar and articles composed in chief value of manufactured sugar imported into the United States, as defined in section 401 (d), from all foreign countries, including Cuba, or coming into the United States from its territories and possessions other than those named in section 401 (d), supra.

(f) *Exemptions.*—Sugar of the grades or types which are included within the term "manufactured sugar", as hereinbefore defined, but which is to be further refined or otherwise improved in quality, may be released without deposit of the import compensating taxes upon compliance with the following conditions:

1. There shall be filed in connection with the entry an affidavit of the importer that such sugar is to be further refined or otherwise improved in quality.

2. If the sugar is entered for consumption there shall also be filed in connection with the entry a bond on customs Form 7551 or 7553 with an added condition, concurred in by the surety, for the payment of the tax prescribed by section 403 in the event the sugar is not further refined or otherwise improved in quality. If the importer has on file a general term bond for the entry of merchandise, as provided for in article 1253 of the Customs Regulations of 1937, the sugar may be charged against such bond provided there is added thereto, with the concurrence of the surety, the before-mentioned condition. When the sugar is entered for warehouse the regular warehouse entry bond, customs Form 7555, shall be given, unless the importation is charged against a general term bond for the entry of merchandise, and withdrawals shall be made on customs Form 7506. Liquidation of the consumption entries and warehouse entries shall be suspended pending the submission of proof that the sugar has been further refined or otherwise improved in quality.

3. Within three years from the date of entry (in the case of warehouse entries as well as consumption entries) the importer shall submit to the collector of customs at the port of entry an affidavit of the superintendent or manager of the refinery or plant at which the sugar has been processed, showing: (a) The name and location of the refinery or plant. (b) The entry number, date, and port of entry. (If the refinery or plant is not in possession of this information a reference to invoices, purchase orders or other documents which link the shipment with the entry may be substituted.) (c) The date or inclusive dates of the processing of the sugar, and (d) A description of the processing in sufficient detail to enable the collector to determine whether such processing constitutes a refining or improving in quality.

In appropriate cases the processing of sugar covered by more than one entry may be included in one affidavit. Such affidavits shall be based on adequate and carefully kept refinery, plant, and import records, which shall be open at all times to customs agents or other employees of the customs service. The affidavits shall be filed in duplicate, one copy to be forwarded to the comptroller of customs.

Upon satisfactory proof that the sugar has been further refined or otherwise improved in quality the entry may be liquidated free of the import compensating tax imposed by section 403, supra. When such proof is not filed within three years from the date of the entry, the entry shall be liquidated with the assessment of the import compensating tax at the appropriate rate prescribed by section 403.

(g) *Drawback.*—The taxes collected under section 403 will be subject to drawback under the same conditions as duties paid under the Tariff Act of 1930.

[SEAL] JAMES H. MOYLE,
*Commissioner of Customs.*

Approved, September 20, 1937.
WAYNE C. TAYLOR,
*Acting Secretary of the Treasury.*

DEPARTMENT OF COMMERCE.

Bureau of Marine Inspection and Navigation.

NOTICE OF HEARING WITH REGARD TO THE AMENDMENT OF RULES AND REGULATIONS GOVERNING TANK VESSELS

SEPTEMBER 13, 1937.

Notice is hereby given of a public hearing to be held by the Bureau of Marine Inspection and Navigation in the Auditorium of the Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D. C., commencing at 10:00 o'clock in the morning of Monday, October 11, 1937, and continuing from day to day thereafter until the hearing shall have been concluded, upon the question of the amendment, pursuant to the authority contained in the Act of June 23, 1936, (49 Stat., 1889).

A copy of the tentative draft of the changes in the proposed rules and regulations governing the subject will be sent to any interested party making a written request for same to the Director, Bureau of Marine Inspection and Navigation, Washington, D. C. The purpose of the hearing is to obtain the views of all interested therein, so as to aid the Bureau in making appropriate recommendations to the Secretary of Commerce as to the proper amendments to the rules and regulations which ultimately should be adopted. regulations are purely tentative and that any or all of the said rules and regulations may be deleted, amended or altered It is to be understood that the changes in the rules and, also, that such amendments to the rules and regulations as may be recommended to the Secretary for adoption, as a result of the hearing, are subject to the approval of the Secretary and shall become effective only upon his approval.

It will be expected that appearances will be for an amendment by addition, revision, or elimination of a specific section or sections. Mere generalities will not be accepted. Before any discussion is undertaken, there must be handed the Director in triplicate a statement for each such proposal in the form set forth below:

SUGGESTED CHANGES IN THE RULES FOR TANK VESSELS

Proposed: Addition _____. Amendment _____. Deletion _____.

Presented at public hearing, Washington, D. C., October 11, 1937, by _____ representing _____ address _____.

1. Suggested re-wording of Item No. ____, Page No. ____, Section No. ____, Rule No. ____.
2. Submitted by _____.
3. Present wording of Item ____:

_____

_____

4. Suggested re-wording of Item:

_____

_____

5. Brief statement of reason for re-wording suggested:

_____

_____

The proceedings will be recorded in full. Those wishing to procure the record or any part thereof must make arrangements with the recorder during the session. Copies will not be distributed gratuitously as no funds have been provided for this purpose.

An Executive Committee of the Board of Supervising Inspectors will meet at the same time for the purpose of initiating the appropriate action necessary to promulgate these amendments into regulations.

Approved:

METHOD OF ACCOUNTING FOR MONIES RECEIVED FROM SALE OF DUPLICATE CONTINUOUS DISCHARGE BOOKS, DUPLICATE CERTIFICATES OF IDENTIFICATION AND DUPLICATE CERTIFICATES OF DISCHARGE

*To Supervising Inspectors, Local Inspectors, Shipping Commissioners, Collectors of Customs and Others Concerned:*

Under the provisions of Subsection (h) of Section 4551 R. S., as amended by the Act of March 24, 1937, Public Law No. 25—75th Congress, if a seaman loses his Continuous Discharge Book, Certificate of Identification or Certificate of Discharge otherwise than by shipwreck, or other casualty, he will be required to pay for a duplicate an amount equal to the cost of such book or certificate to the Government, which for the current supply will be as follows:

| | |
|---|---|
| Duplicate Continuous Discharge Book | $1.00 |
| Duplicate Certificate of Identification | .75 |

| | |
|---|---|
| Duplicate Certificate of Discharge | .35 |
| Each additional duplicate Certificate of Discharge issued to the same man at the same time | .05 |

When the payment is made to a Collector or Deputy Collector of Customs, a receipt will be issued on Cat. 1008 and the payments will be scheduled on Cat. 1001 as "Reimbursement for Loss of Continuous Discharge Books, etc., Bureau of Marine Inspection and Navigation", symbol number 134236. These collections are to be listed on a separate schedule from Navigation fees, and are also to be listed as a separate item on the Account Current with the title and symbol number as given above.

When the money is collected by a Shipping Commissioner or Local Inspector, he will issue to the seaman an informal receipt, stating thereon the number of the document issued and the amount collected. The Shipping Commissioner or Local Inspector will pay over to the Collector of Customs of his port all monies received from this source, such payment to be made not later than the first business day of the week succeeding that in which the collection is made. The Collector will issue a receipt to the Shipping Commissioner or Local Inspector on Cat. 1008 for the monies so paid, and the Collector will follow the procedure outlined in the above paragraph in accounting for the monies so transferred to him.

The seaman will be required to make affidavit in duplicate as to the loss of his Continuous Discharge Book, Certificate of Identification or Certificate of Discharge on Form 719–e, which affidavit is to be executed before a Shipping Commissioner, Collector or Deputy Collector of Customs, or U. S. Local Inspector. The original copy will be forwarded to the Bureau of Marine Inspection and Navigation at Washington and the Director of the Bureau will cause to be prepared a duplicate of the lost document which will be sent to the proper office for completion and delivery to the seaman.

Approved, September 22, 1937.

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 21st day of September, 1937.

IN THE MATTER OF SECURITIES EXCHANGE CORPORATION 922 TERMINAL BUILDING LINCOLN, NEBRASKA

ORDER DENYING REGISTRATION PURSUANT TO SECTION 15 (B) OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED

Securities Exchange Corporation, hereinafter called the applicant, having filed with the Commission on June 8, 1937, an application for registration on Form 3–M pursuant to Rule MB1 of the Commission's rules; and the effective date of registration having been postponed first for fifteen (15) days until July 23, 1937, and then having been further postponed pending final determination as to whether registration should be denied or postponed; and

The Commission, on June 29, 1937, having instituted proceedings on the question of denial and/or postponement of registration pursuant to Section 15 (b) of the Securities Exchange Act of 1934, as amended; and the said matter, after the applicant's waiver of the requirement of service of notice seven (7) days prior to the date of the hearing, having come on for hearing on July 12, 1937, in Denver, Colorado; and the Commission having duly considered the matter and being fully advised in the premises;

*It is ordered*, Pursuant to Section 15 (b) of the Securities Exchange Act of 1934, as amended, that the application of Securities Exchange Corporation for registration as broker or dealer on the over-the-counter markets be and the same is hereby denied.

By the Commission.

[File Nos. 46–69 and 46–70]

IN THE MATTER OF THE APPLICATIONS OF UTILITIES POWER & LIGHT CORPORATION LIMITED

ORDER POSTPONING HEARING

Utilities Power & Light Corporation Limited having filed with this Commission two applications (File Nos. 46–69 and 46–70) pursuant to the Public Utility Holding Company Act of 1935 and relating to the proposed acquisition by the applicant of certain securities;

Said applications having been set down for joint hearing on September 22, 1937, and the staff of the Commission having made a motion that said hearing be postponed subject to call promptly after determination by the Circuit Court of Appeals for the Seventh Circuit of an appeal therein pending with reference to the appointment of a trustee for Utilities Power & Light Corporation, of which the beforementioned applicant is a wholly-owned subsidiary;

Said motion having duly come on to be heard before this Commission and at said hearing the applicant having requested that said hearing set for September 22, 1937 be postponed to October 13, 1937;

*It is ordered*, That the Commission reserve decision on the aforesaid motion;

*It is further ordered*, That the hearing in said matter now set for September 22, 1937 be and the same hereby is postponed to October 13, 1937 at 10:00 o'clock in the forenoon, Room 1102, Securities and Exchange Building, 1778 Pennsylvania Avenue, N. W., Washington, D. C.; subject, however, to any order which the Commission may hereafter enter in connection with the aforesaid motion.

## PRESIDENT OF THE UNITED STATES.

EXECUTIVE ORDER

DESIGNATING JOHN D. BIGGERS ADMINISTRATOR OF AN UNEMPLOYMENT CENSUS

By virtue of and pursuant to the authority vested in me by the act of August 30, 1937 (Public No. 409, 75th Congress), providing for a census of partial employment, unemployment, and occupations, I hereby designate as Administrator thereof John D. Biggers and delegate to him the following functions and duties:

1. The Administrator, as the administering agency, is authorized and directed to conduct the said census and upon completion thereof to issue a report of findings.

2. The Administrator is authorized to appoint, as temporary employees, and fix the compensation, without regard to the Classification Act of 1923, as amended, of such officers, agents, and other personnel, and to make such other expenditures, as may be necessary to carry out the provisions of said act of August 30, 1937, including purchase of materials, supplies, and office equipment, newspapers, periodicals and press clippings, printing and binding, communication services, travel, rent at the seat of Government and elsewhere, contract stenographic reporting services, special messenger service, mimeographing and other duplicating services, rental or purchase of machines and labor saving devices.

To meet the expenses of conducting the said census, allocations will be made, pursuant to the provisions of section 3 of the said act of August 30, 1937, in a total amount not exceeding $5,000,000 from the appropriation contained in the Emergency Relief Appropriation Act of 1937.

### Bureau of Air Commerce.

CIVIL AIR REGULATIONS

Pursuant to the authority contained in the Air Commerce Act of 1926 (44 Stat. 568) as amended, and as furthe- amended by the Act of June 19, 1934 (48 Stat. 1113), and the Act of June 19, 1934 (48 Stat. 1116), the following civil air regulations are hereby made, established, and issued to be known as

Chapter 00. Aircraft Registration Certificate
Chapter 01. Aircraft Certificates
Chapter 02. Aircraft Identification Mark
Chapter 03. Aircraft Title Transfer
Chapter 04. Airplane Airworthiness
Chapter 13. Aircraft Engine Airworthiness
Chapter 14. Aircraft Propeller Airworthiness
Chapter 15. Aircraft Equipment Airworthiness
Chapter 18. Repair and Alteration of Aircraft

Any and all rules or regulations made, established, and issued by the Secretary of Commerce under the authority of such act, as amended, as are inconsistent with the provisions of the above specified civil air regulations are hereby repealed.

Approved, to take effect November 1, 1937, unless otherwise specifically provided in a particular chapter or part thereof.

*Secretary of Commerce.*

00. AIRCRAFT REGISTRATION CERTIFICATE

00.0 Provision for Issuance
00.1 Eligibility
00.2 Application
00.20 Documentary Evidence of Ownership
00.3 Issuance
00.30 Temporary Certificate
00.4 Display
00.5 As Evidence
00.6 Duration
00.7 Non-Transferability
00.8 Suspension or Revocation
00.9 Surrender

CHAPTER 00. AIRCRAFT REGISTRATION CERTIFICATE

00.0. *Provision for issuance.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the granting of registration to aircraft eligible therefor, a registration certificate will be issued by the Secretary for purposes of identifying the aircraft and determining its nationality, upon request of the owner and approval of application made and proofs submitted, for any aircraft duly shown to be eligible for such registration as an aircraft of the United States. A record of such registration will be maintained by the Secretary.

00.01. Except for changes in eligibility and/or ownership, the validity of the present registration of each aircraft shall be concurrent with the validity of its license for airworthiness in force on the date these regulations go into effect.

00.1. *Eligibility.*—No aircraft shall be eligible for registration unless

(a) it is a civil aircraft owned by a citizen of the United States and is not registered under the laws of any foreign country, or unless

(b) it is a public aircraft of a Federal Government or of a State, Territory or possession, or of a political subdivision thereof.

00.2. *Application.*—The owner of any aircraft, who desires a registration certificate for the aircraft as an aircraft of the United States, shall make application therefor to the Secretary upon a form supplied for the purpose, which may be combined with the application for a certificate of airworthiness under CAR 01.

00.20. *Documentary evidence of ownership.*—The following documents may be considered as acceptable evidence of ownership for the registration of aircraft.

00.200. New aircraft, owned by the manufacturer, and for which the manufacturer applies for registration: The appropriate application form.

00.201. *Registered aircraft.*—The registration certificate, issued for such aircraft, executed in accordance with the provisions of CAR 03. If such registration certificate has been lost or destroyed, an affidavit to that effect must be submitted, together with an application for registration on the appropriate form, accompanied by

(a) A certified copy of a bill of sale which transfers all right, title and interest in and to the aircraft to the purchaser, or

(b) A duly authenticated bill of sale from a public officer duly authorized to issue same, with the authority of said officer certified thereon;

(c) A certified copy of an order of court of competent jurisdiction determining title.

00.3. *Issuance.*—Upon approval of an application duly made and proofs submitted, a registration certificate will be issued by the Secretary, together with an identification mark as provided in CAR 02.20.

00.30. *Temporary certificate.*—Pending the issuance of a certificate, a Bureau inspector may issue a temporary registration certificate, together with an identification mark as provided in CAR 02.21.

00.4. *Display.*—The registration certificate shall be carried in the aircraft at all times, and shall be presented for inspection upon the demand of any authorized official or employee of the Department of Commerce, or upon the reasonable request of any other person.

00.5. *As evidence.*—For the purpose of exercising any privilege granted by any international convention, or of enforcing national laws, the registration certificate (or registration) will be deemed prima facie evidence of the nationality of the aircraft.

00.6. *Duration.*—A registration certificate, when issued, will remain effective for an indeterminate time, or until

(a) the aircraft is no longer eligible for registration as an aircraft of the United States, or

(b) ownership of the aircraft is transferred, or

(c) registration of the aircraft is cancelled at the written request of the owner, or

(d) registration of the aircraft is suspended or revoked.

00.7. *Non-transferability.*—A registration certificate is not transferable. (For effect of transfer of title on the registration certificate, see CAR 03.)

00.8 *Suspension or revocation.*—A registration certificate may be suspended or revoked for any of the following reasons:

(a) Any false statement by the owner in his application for said certificate, or in any information accompanying the application.

(b) Loss of eligibility as defined in CAR 00.1.

(c) Any other reason causing the aircraft to become ineligible for registration as an aircraft of the United States.

00.9. *Surrender.*—Upon notice from the Secretary of the suspension or revocation of a registration certificate, the owner of the aircraft to whom same has been issued shall promptly return such certificate to the Secretary.

CHAPTER 01. AIRCRAFT CERTIFICATES

01.0. *General.*—

01.00. *Provision for issuance.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of aircraft as to their airworthiness, the Secretary will issue aircraft certificates as defined in CAR 01.12 through 01.15 and in accordance with the following provisions.

01.1. *Definitions.*—

01.10. *Certificated aircraft.*—The Air Commerce Act and the Civil Air Regulations provide that an aircraft rated as to airworthiness must first be registered as an aircraft of the United States. Therefore, as used throughout the Civil Air Regulations, the term "certificated aircraft" means any aircraft for which an aircraft certificate other than a registration certificate has been issued.

01.11. *Airworthy.*—As used herein the term "airworthy" when applied to a particular aircraft or component thereof denotes the ability of such aircraft or component thereof to perform its function satisfactorily throughout a range of operations determined by the Secretary in rating the aircraft or component thereof.

01.12. *Experimental.*—As used herein, the term "experimental" when applied to an aircraft denotes that such aircraft is certificated for experimentation in flight with a view to determining or improving its characteristics or those of its components or equipment, and that inspection has disclosed no unairworthy feature of such aircraft with respect to structural integrity, workmanship or flight characteristics.

01.13. *Airworthiness certificate.*—An airworthiness certificate is hereby defined as a document issued by the Secretary to the registered owner of an aircraft, certifying that the aircraft in question is airworthy when operated and maintained in accordance with the terms of said certificate.

01.14. *Experimental certificate.*—An experimental certificate is hereby defined as a document which may be issued by the Secretary to the registered owner of an aircraft, certifying that the aircraft in question is an experimental aircraft and specifying such operation limitations as are deemed necessary by the Secretary.

01.15. *Type certificate.*—A type certificate is hereby defined as a document issued by the Secretary to a manufacturer or designer of aircraft or certain components thereof (See CAR 13, 14 and 15), certifying that the type of aircraft or component, as represented by authenticated data in the form of specifications, descriptions and drawings on file in the Office of the Secretary, has been found to be suitable as a basis for the manufacture of airworthy aircraft or components constructed in accordance with such data.

01.16. *Production certificate.*—A production certificate is hereby defined as a document issued by the Secretary to a manufacturer of aircraft or certain components thereof (See CAR 13, 14 and 15), for which a type certificate has been granted, certifying that said manufacturer has complied with the requirements of CAR 01.5 for the production of aircraft or components thereof in quantities of an exact similarity of type, structure, materials, assembly and workmanship with the specifications, descriptions and drawings forming the basis for said type certificate.

01.17. *Aircraft.*—The term "aircraft" as defined in the Air Commerce Act means any contrivance now known or hereinafter invented, used or designed for navigation of or flight in the air, except a parachute or other contrivance designed for such navigation but used primarily as safety equipment. For the purpose of these regulations aircraft are further classified in the following paragraphs.

01.170. *Airplane.*—A mechanically driven fixed-wing aircraft, heavier than air, which is supported by the dynamic reaction of the air against its wings.

01.171. *Glider.*—An aircraft heavier than air, similar to an airplane but without a powerplant.

01.0172. *Rotorplane.*—A form of aircraft whose support in the air is chiefly derived from the vertical component of the force produced by rotating airfoils.

01.0173. *Aerostat (lighter-than-air aircraft).*—An aircraft whose support is chiefly due to buoyancy derived from aerostatic forces. Aerostats are further classified as balloons and airships.

01.2. *Airworthiness certificates.*

01.20. *Eligibility for airworthiness certificate.*—Application for an airworthiness certificate may be made by the owner of any aircraft eligible for registration as an aircraft of the United States including, in addition to those aircraft for which such certificate is required as provided in CAR 60, the following:

(a) Aircraft used solely for pleasure or non-commercial purposes.

(b) Aircraft belonging to the United States.

(c) Aircraft belonging to any State, Territory or possession of the United States or to a political subdivision thereof, and used exclusively in the governmental service.

01.21. *Application for airworthiness certificates.*—Application for an airworthiness certificate shall be made to the Secretary on a form supplied for the purpose.

01.22. *Kinds of airworthiness certificates.*—Airworthiness certificates are classified by the symbols C and R, for the meaning of which see CAR 02. Airworthiness certificates are further classified and modified by means of operation limitations which will appear on the certificate.

01.220. *Classification of airworthiness certificates for airplanes.*—Airworthiness certificates for airplanes are classified as to one or more operations as follows:

(a) Non-airline carrier use.
(b) Airline carrier use (Goods).
(c) Airline carrier use (Passengers).
(d) Visual-contact flying.
(e) Instrument flying.
(f) Day flying.
(g) Night flying.
(h) No passengers to be carried at any time.
(i) Flights to be confined to 100 miles from fixed base.
(j) Special industrial operations.

01.221. *Classification of airworthiness certificates for gliders.*—Airworthiness certificates for gliders are classified as to operation as follows:

(a) Acrobatic flying.
(b) Airplane towing.
(c) Auto towing.
(d) Shock launching.
(e) Commercial use.
(f) Non-commercial use.
(g) Day flying.
(h) Night flying.
(i) No passengers to be carried at any time.

01.222. *Classification of airworthiness certificates for rotorplanes.*—Airworthiness certificates for rotorplanes are classified as to operation as outlined in CAR 01.220 for airplanes.

01.223. *Classification of airworthiness certificates for aerostats.*—Airworthiness certificates for aerostats are classified as to operation as outlined in CAR 01.220 for airplanes.

01.23. *Requirements for issuance of airworthiness certificates.*

01.230. *Airworthiness requirements.*—For certain classes of aircraft and for definite types of operation the requirements for airworthiness hereinafter specified shall be complied with. They are set forth in the following:

Airplanes, CAR 04
Gliders, CAR 05
Rotorplanes, CAR 06
Aerostats, CAR 07

01.2300. A new aircraft manufactured subsequent to the effective date of these regulations and in accordance with an approval previously issued will be eligible for airworthiness certification after inspection showing compliance with the terms of the current Aircraft Specification previously issued therefor.

01.2301. Aircraft holding a valid commercial license will be eligible for airworthiness certification on expiration of such license and after inspection showing continued airworthiness and compliance with the terms of the current Aircraft Specification previously issued therefor.

01.231. *Inspection of aircraft.*—Each individual aircraft for which an airworthiness certificate is desired shall be presented for inspection to a designated representative of the Secretary for the purpose of determining the airworthiness of the aircraft.

01.2310. The registered owner of any aircraft shall offer full cooperation with respect to any inspection which may be made of said aircraft upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of an airworthiness certificate.

01.232. *Display of Identification Data.*—To facilitate inspection of the aircraft and for purposes of identifying the aircraft with the documents accepted as the basis of the airworthiness certificate, certain manufacturer's and other data shall be displayed as follows, so far as applicable to the type of aircraft involved:

01.2320 (a). An aircraft identification mark in accordance with the provisions of CAR 02.

01.2321 (b). The identification plate and other identifying information required under the pertinent airworthiness requirements of CAR 04, 05, 06 or 07, as the case may be.

01.24. *Issuance.*—Upon application duly made and proofs submitted, an airworthiness certificate will be issued in an appropriate form.

01.25. *Display.*—An airworthiness certificate which has been issued for an aircraft shall be carried therein at all times and shall be posted therein where it may be readily seen by passengers, and any such certificate shall be presented for inspection upon the demand of any passenger, any authorized representative of the Bureau and any State or municipal official charged with enforcing local laws or regulations involving Federal compliance, or upon the reasonable request of any other person.

01.26. *Duration, renewal and non-transferability.*—

01.260. *Duration.*—An airworthiness certificate will remain in force for a period of one year from date of issuance unless specifically limited to a shorter period, or until sooner suspended, revoked or canceled in accordance with the provisions of CAR 01.26.

01.261. *Renewal.*—The term of an airworthiness certificate may be renewed for additional periods of one year, or for shorter periods, on application of the registered owner to the Secretary or to a designated Bureau inspector, provided proof is made satisfactorily to show

(a) that the aircraft is still airworthy, and
(b) that the ownership is still as registered.

01.262. *Non-transferability.*—An airworthiness certificate is not transferable. However, such certificate may be reissued to an owner other than the original holder thereof provided such other owner meets all the requirements pertaining thereto and makes proper application and proofs therefor in accordance with the provisions of CAR 03.

01.27. *Suspension, revocation, cancellation and surrender.*—

01.270. *Suspension or revocation.*—An airworthiness certificate may be suspended or revoked by reason of any of the following on the part of the holder thereof:

01.2700 (a). The making of any false statement in an application for such certificate, or in any information accompanying such application, or in any report required by the Secretary.

01.2701 (b). Failure to make any report required by the Secretary.

01.2702 (c). Using or displaying such airworthiness certificate for a fraudulent purpose or using or displaying any airworthiness certificate or identification mark in any manner contrary to the public safety or interest.

01.2703 (d). Moral irresponsibility.

01.2704 (e). Violation, or permitting violation, of any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

01.2705 (f). Operating, or permitting the operation of, the aircraft in violation of any of the terms of its airworthiness certificate.

01.2706 (g). Failure to maintain the aircraft in an airworthy condition in accordance with CAR 01.72.

01.271. *Automatic suspension.*—

01.2710 (a). When an aircraft possessed of a valid airworthiness certificate is removed from the continental limits of the United States for the purpose of air navigation wholly within a foreign country, such certificate automatically becomes invalid, and may be suspended or revoked unless prior approval has been received from the Secretary.

01.2711 (b). When an aircraft possessed of a valid airworthiness certificate has been damaged, such certificate automatically becomes invalid until the aircraft has been repaired, inspected and re-rated in accordance with the provisions of CAR 18.

01.272. *Cancellation.*—An airworthiness certificate issued to the registered owner of an aircraft will be canceled upon the written request of such owner.

01.273. *Surrender.*—Upon notice from the Secretary of the suspension or revocation of an airworthiness certificate, or in case of cancellation thereof, the registered owner of the aircraft to whom it has been issued shall immediately return such certificate to the Secretary.

01.3. *Experimental certificates.*—

01.30. *Eligibility for experimental certificate.*—Application for an experimental certificate may be made by the registered owner of the following aircraft:

(a) Aircraft used solely for experimental purposes as defined in CAR 01.12 herein.
(b) Aircraft belonging to the United States.
(c) Aircraft belonging to any State, Territory or possession of the United States or to a political subdivision thereof, and used exclusively in the governmental service.

01.31. *Application for experimental certificate.*—Application for an experimental certificate shall be made to the Secretary upon a form supplied for the purpose.

01.32. *Kinds of experimental certificates.*—Experimental certificates are classified by the symbol X, for the meaning of which see CAR 02. Experimental certificates are further classified and modified by means of operation limitations which will appear on the certificate.

01.33. *Requirements for issuance of experimental certificates.*—

01.330. *Minimum requirements.*—Applicant shall show that the aircraft is to be used for experimental purposes as defined in CAR 01.12 and the aircraft shall satisfactorily undergo the inspection required by CAR 01.331.

01.331. *Inspection of aircraft.*—An aircraft for which an experimental certificate is desired shall be presented for inspection to a designated representative of the Secretary for the purpose of determining that it is an experimental aircraft as defined in CAR 01.12 and that no unairworthy feature with respect to structural integrity, workmanship or flight characteristics is evident. After inspection, such representative will establish suitable operation limitations for incorporation in the certificate when issued.

01.3310. The registered owner of any aircraft shall offer full cooperation with respect to any inspection which may be made of said aircraft upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of an experimental certificate.

01.332. *Display of identification data.*—To facilitate inspection and for purposes of identifying the aircraft as an experimental aircraft, certain data shall be displayed as follows:

01.3320 (a). An aircraft identification mark in accordance with the provisions of CAR 02.

01.3321 (b). A metal plate permanently affixed in a visible location in the pilot's cockpit or compartment bearing the date of manufacture and the name of manufacturer, the manufacturer's serial number and the model designation.

01.34. *Issuance.*—Upon approval of application duly made and proofs submitted, an experimental certificate will be issued in appropriate form.

01.35. *Display.*—An experimental certificate which has been issued for an aircraft shall be carried therein at all times and shall be posted therein where it may be readily seen, and any such certificate shall be presented for inspection upon the demand of any authorized representative of the Bureau and any State or municipal official charged with enforcing local laws or regulations involving Federal compliance, or upon the reasonable request of any other person.

01.36. *Duration, renewal and non-transferability.*—

01.360. *Duration.*—An experimental certification will remain in force for such a period from date of issuance as specifically stated thereon, or until sooner suspended, revoked or canceled in accordance with the provisions of CAR 01.36.

01.361. *Renewal.*—The term of an experimental certificate may be renewed for additional periods on application of the registered owner to the Secretary or to a designated Bureau inspector, provided proof is made satisfactorily to show:

(a) that the aircraft is still being used for experimental purposes as set forth in CAR 01.330, and.
(b) that the ownership is still as registered.

01.362. *Non-transferability.*—An experimental certificate is not transferable. However, such certificate may be reissued to an owner other than the original holder thereof provided such other owner meets all the requirements pertaining thereto and makes proper application and proofs therefor in accordance with the provisions of CAR 03.

01.37. *Suspension, revocation, cancellation and surrender.*—

01.370. *Suspension or revocation.*—An experimental certificate may be suspended or revoked by reason of any of the following on the part of the holder thereof:

01.3700 (a). The making of any false statement in an application for such certificate, or in any information accompanying the application, or in any report required by the Secretary.

01.3701 (b). Using or displaying such experimental certificate for a fraudulent purpose, or using or displaying any experimental certificate or identification mark in any manner contrary to the public safety or interest.

01.3702 (c). Moral irresponsibility.

01.3703 (d). Violation, or permitting violation, of any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

01.3704 (e). Operating, or permitting the operation of, the aircraft in violation of any of the terms of its experimental certificate.

01.371. *Cancellation.*—An experimental certificate issued to the registered owner of an aircraft will be canceled upon the written request of such owner.

01.372. *Surrender.*—Upon notice from the Secretary of the suspension or revocation of an experimental certificate, or in case of cancellation thereof, the registered owner of the aircraft for which it has been issued shall immediately return such certificate to the Secretary.

01.4. *Type certificates.*—

01.40. *Application for type certificate.*—Application for a type certificate for any aircraft, engine, propeller, or other aeronautical equipment as provided for in CAR 15, shall be made to the Secretary upon a form supplied for the purpose.

01.41. *Kinds of type certificates.*—Type certificates are classified as to type of aircraft or component for which issued.

01.42. *Requirements for issuance of type certificates.*—

01.420. *Airworthiness of type.*—As one requisite to the issuance of a type certificate, the airworthiness of the type of aircraft or component shall be established to the satisfaction of the Secretary. This will require the construction of at least one complete aircraft or component of the type for which the type certificate is desired. In the case of aircraft it is further required that an airworthiness certificate (see CAR 01.2) be obtained for an aircraft of the type in question. For certain classes of aircraft and components the requirements for airworthiness, including special requirements for type certification, are specified hereinafter as follows:

Airplanes, CAR 04.
Gliders, CAR 05.
Rotorplanes, CAR 06.
Aerostats, CAR 07.
Aircraft Engines, CAR 13.
Aircraft Propellers, CAR 14.
Aircraft Equipment, CAR 15.

01.421. *Technical data required.*—The applicant for a type certificate shall submit, together with the application or following such application, technical data representing the type of aircraft or component for which a type certificate is desired. Such data shall comply with the requirements specifically provided for this purpose. (See CAR 01.420 for reference thereto.)

01.422. *Inspection.*—The applicant for a type certificate shall offer full cooperation with respect to any inspection which may be made upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of such type certificate.

01.43. *Issuance.*—Upon approval of an application duly made and proofs submitted, a type certificate will be issued in an appropriate form.

01.44. *Certification under type certificate.*—An aircraft or component manufactured under a type certificate and in accordance with the terms thereof may be certificated as airworthy on the basis of the airworthiness rating of the original article of the type for which said type certificate was issued, upon proof that the article in question conforms exactly with the authenticated data forming a part of said type certificate; provided, however, that each article shall satisfactorily pass such inspections as to workmanship, installation, assembly and flight characteristics as the Secretary may deem necessary.

01.45. *Display.*—Any type certificate, including such papers and data as may be a part thereof, shall be presented for inspection upon the demand of any authorized representative of the Bureau and of any State or municipal official charged with enforcing local laws or regulations involving Federal compliance.

01.46. *Duration, transfer and license.*—

01.460. *Duration.*—A type certificate will be issued for an indeterminate period of time and shall remain effective until it is suspended or revoked, or is canceled upon the written request of the holder thereof.

01.461. *Transfer and license.*—A type certificate is transferable and the benefits of such certificate may be extended by licensing arrangements.

01.47. *Suspension, revocation, cancellation and surrender.*—

01.470. *Suspension or revocation.*—A type certificate may be suspended or revoked in the event of unsatisfactory or unsafe performance in service of aircraft, engines, propellers or other aeronautical equipment for which such type certificate has been issued, and by reason of any of the following on the part of the holder thereof:

01.4700. (a) The making of any false statement in an application for said certificate, or in any information accompanying the application, or in any report required by the Secretary.

01.4761. (b) Failure to make any report required by the Secretary.

01.4702. (c) Use or display of any type certificate or other official notification from the Bureau for a fraudulent purpose; or misrepresentation of any certificated product; or use or display of any type certificate or other official notification from the Bureau in any manner contrary to the public safety or interest.

01.4703. (d) Alteration of the basic design or specifications of an aircraft, engine, propeller or other aeronautical equipment for which a type certificate has been issued, without first having such alteration approved by the Secretary.

01.4704. (e) Refusal to submit to inspection upon proper demand by an authorized representative of the Secretary or to render any reasonable assistance in connection therewith.

01.4705. (f) Moral irresponsibility.

01.4706. (g) Violation of the Air Commerce Act or any rule or regulation duly issued thereunder.

01.471. *Cancellation.*—A type certificate will be canceled on the request of the holder thereof.

01.472. *Surrender.*—Upon notice from the Secretary of the suspension or revocation of a type certificate, or in case of cancellation thereof, the holder thereof shall immediately return such certificate to the Secretary.

01.48. *Confidential nature of data.*—Technical data furnished by manufacturers or designers of aircraft, engines, propellers or other aeronautical equipment, in compliance with the procedure established for the issuance of a type certificate therefor, will be treated as confidential by all em-

ployees of the Department of Commerce for such time as the certificate is in force.

01.5. *Production certificates.*—

01.50. *Application for production certificate.*—Application for a production certificate for any aircraft, engine, propeller, or other aeronautical equipment shall be made to the Secretary upon a form supplied for the purpose.

01.51. *Kinds of production certificates.*—Production certificates are classified as to type of aircraft or component for which issued.

01.52. *Requirements for issuance of production certificates.*—

01.520. *Type certificate required.*—As one requisite to the issuance of a production certificate the applicant therefor shall hold a type certificate for the type of article to be manufactured or shall have secured the rights to manufacture such article under an existing type certificate.

01.521. *Production facilities.*—The applicant for a production certificate shall demonstrate to the satisfaction of the Secretary the adequacy of his production facilities, including qualified personnel, for the manufacture, in quantities, of aircraft or components which such production certificate is to cover. The production facilities shall be such as to insure the reproduction of articles of an exact similarity of type, structure, materials and workmanship with the specifications and other data forming the basis of the type certificate or type certificates for which the production certificate is issued.

01.522. *Inspection of facilities.*—The applicant for a production certificate shall offer full cooperation in respect of any inspection of facilities which may be made upon proper demand by any authorized representative of the Secretary prior and subsequent to the issuance of such production certificate.

01.523. *Inspection of aircraft.*—If the applicant for a production certificate is not the manufacturer of the aircraft which was subjected to the inspections and tests conducted in the fulfillment of the requirements for the type certificate issued, the first article manufactured by him under each production certificate shall satisfactorily undergo the inspection and flight tests required for the issuance of a type certificate.

01.53. *Issuance.*—Upon approval of an application duly made and proofs submitted a production certificate, specifying the type certificate numbers for which the production certificate is valid and whatever detailed inspection procedure may be required prior to the issuance of airworthiness certificates for aircraft manufactured under said production certificate, will be issued in an appropriate form.

01.54. *Certification under production certificate.*—Aircraft or component parts manufactured under a production certificate and in accordance with the terms thereof may be certificated as airworthy on the basis of the airworthiness rating of the original article of the type represented by the type certificate for which said production certificate was issued; provided, however, that each article shall satisfactorily undergo such inspections as may be required under the terms of said production certificate.

01.55. *Display.*—Any production certificate, including such papers and data as may be a part thereof, shall be presented for inspection upon the demand of any authorized representative of the Bureau and of any State or municipal official charged with enforcing local laws or regulations involving Federal compliance.

01.56. *Duration and nontransferability.*—

01.560. *Duration.*—A production certificate will be issued for an indeterminate period of time and shall remain effective so long as the aircraft or components for which it is issued are being manufactured in accordance with terms of such certificate and so long as manufacturing facilities and personnel are continuously maintained at the standards which formed the basis for issuance of such certificate, or until said certificate is sooner suspended or revoked, or canceled upon the written request of the holder thereof.

01.561. *Nontransferability.*—A production certificate is not transferable. However, such certificate may be reissued to a manufacturer other than the original holder thereof provided such other manufacturer meets all the requirements pertaining thereto.

01.57. *Suspension, revocation, cancellation and surrender.*—

01.570. *Suspension or revocation.*—A production certificate may be suspended or revoked in the event of unsatisfactory or unsafe performance in service of aircraft, engines, propellers or other aeronautical equipment manufactured under a production certificate, and by reason of any of the following on the part of the holder thereof:

01.5700. (a) The making of any false statement in an application for said certificate, or in any information accompanying the application, or in any report required by the Secretary.

01.5701. (b) Failure to make any report required by the Secretary.

01.5702. (c) Use or display of any production certificate or other official notification from the Bureau for a fraudulent purpose; or misrepresentation of any certificated product; or use or display of any production certificate or other official notification from the Bureau in any manner contrary to the public safety or interest.

01.5703. (d) Alteration of the basic design or specifications of an aircraft, engine, propeller or other aeronautical equipment for which a production certificate has been issued, without first having such alteration incorporated in the type certificate on which the production certificate is based.

01.5704 (e). Refusal to submit to inspection of facilities, personnel or products upon proper demand by an authorized representative of the Secretary or to render any reasonable assistance in connection therewith.

01.5705 (f). Moral irresponsibility.

01.5706 (g). Violation of the Air Commerce Act or any rule or regulation duly issued thereunder.

01.571. *Surrender.*—Upon notice from the Secretary of the suspension or revocation of a production certificate, or in case of cancellation thereof, the holder thereof shall immediately return such certificate to the Secretary.

01.58. *Confidential nature of data.*—Technical data furnished by manufacturers or designers or aircraft, engines, propellers or other aeronautical equipment, in compliance with the procedure established for the issuance of a production certificate therefor, will be treated as confidential by all employees of the Department of Commerce for such time as the certificate is in force.

01.6. *Registration certificates.*—See CAR 00.

01.7. *Certificate rules.*—

01.70. *Operation of certificated aircraft.*—

01.700. No aircraft certificated as airworthy shall be flown, or authorized to be flown, in violation of the operating or other terms of its airworthiness certificate, nor in violation of any provision of CAR 60, nor unless its airworthiness has been maintained in accordance with CAR 01.72.

01.701. No aircraft certificated as experimental shall be flown, or authorized to be flown, in violation of the operating or other terms of its certificate, nor in violation of any provision of CAR 60.

01.702. No person shall be carried in flight in any aircraft certificated in the classification R or X (See CAR 02.111 and 02.112) except such members of the crew as are necessary for the operation thereof in accordance with the limitations stated in the pertinent certificate.

01.703. The registered owner or the operator of a certificated aircraft shall not permit it to be flown by any person other than one possessed of a pilot certificate valid for the type of aircraft and operation involved.

01.71. *Operation of damaged or altered certificated aircraft.*—

01.710. No flight of a certificated aircraft which has been damaged or altered shall be made, or authorized to be made, until the aircraft has been re-rated as to airworthiness in accordance with the provisions of CAR 18, or has been re-rated as an experimental aircraft.

01.711. When a certificated aircraft has undergone repairs or alterations as set forth in CAR 18.11, 18.12, 18.23, or 18.24, or when a new, old or re-conditioned engine has been installed therein, such aircraft shall be test flown before any passenger is carried therein.

01.72. *Maintenance of airworthiness.*—

01.720. After an airworthiness certificate has been issued to the owner of an aircraft, and between the times that it is inspected by a Bureau inspector for airworthiness and for conformity with approved specifications, the owner shall be charged with the duty of maintaining the aircraft in a good and proper state of repair and flying condition so that it shall continue at all times to be airworthy and to conform with such specifications.

01.721. *Line inspection.*—The owner of a certificated aircraft (other than an aircraft engaged in scheduled interstate or foreign passenger airline carrier operation for which inspection and maintenance requirements are provided elsewhere in these regulations) shall be charged with the duty of having such aircraft given a line inspection by a person possessed of a valid pilot or mechanic certificate, at least once in 7 days preceding flight, provided, however, that there shall be at least one inspection for each 25 hours of flying time. The result thereof shall be entered in the aircraft log-book over the signature of the person making such inspection. The line inspection so required shall be made to ascertain the working condition and state of repair of the following:

01.7210 (a). open control wires, all control wires and pulleys open to inspection through apertures, and all hinges on control surfaces;

01.7211 (b). landing gear structure, wheels, fittings, and shock absorbers;

01.7212 (c). fuselage parts open to visual inspection;

01.7213 (d). main plane external bracing, including fittings and struts, external wires, cables, turnbuckles, and fabric or covering;

01.7214 (e). control surface fabric or covering;

01.7215 (f). engine exhaust manifolds and exhaust-pipe extensions (the engine shall be given a warming-up test, during which the proper functioning of the engine instruments shall be ascertained);

01.7216 (g). carburetors and fuel-feed lines open to visual inspection, to insure proper functioning;

01.7217 (h). cooling system and connections;

01.7218 (i). cowling, to insure that the cowlings are properly secured and safetied, and

01.7219 (j). propellers, as to condition.

01.722. *Periodic inspection.*—The owner of a certificated aircraft shall be charged with the duty, after each 100 hours of flight of the aircraft, of having such aircraft given a periodic inspection by a person possessed of a valid mechanic certificate, and the result thereof shall be entered in the aircraft logbook by the person making such inspection. The periodic inspection shall be made to ascertain the working condition and state the repair of the following:

01.7220 (a). powerplant installation,

01.7221 (b). control systems throughout,

01.7222 (c). propeller alignment,

01.7223 (d). fuselage fittings open or openable to inspection, and

01.7224 (e). all items specified in paragraphs CAR 01.7210 through 01.7219.

01.723. The Bureau inspector or other authorized representative of the Secretary shall be permitted by the owner, operating agency or pilot of any certificated aircraft to inspect it at any time and place for the purpose of determining its flying condition and state of repair. For such purposes, the owner, operating agency or pilot shall give to such inspector or representative free and uninterrupted access to the aircraft and to the area or shelter where the aircraft is located.

01.7230. Upon the presentation for inspection of an aircraft for renewal of its airworthiness certificate, all inspection plates and cowlings shall have been removed and all parts cleaned. The aircraft and engine logbooks, in current form, and the aircraft certificate shall be presented at the same time.

01.73. *Log-Books.*—

01.730. *Aircraft log.*—The registered owner of a certificated aircraft shall maintain an aircraft log-book therefor and shall be responsible for recording in such log-book current reports of line and periodic inspections, the flight time of the aircraft, rigging changes in the aircraft, and repairs and alterations of the aircraft structure and of the propeller.

01.731. *Engine log.*—The registered owner of a certificated aircraft shall maintain an engine log-book for each engine installed therein and shall be responsible for recording in such log-book current reports of line and periodic inspections, the duration of the running time of the engine both on the ground and in the air, changes in the engine installation, and of the overhaul and alteration of the engine.

01.732. The log-books required in CAR 01.730 and 01.731 shall be carried in such aircraft at all times when it is away from the landing area regularly used as its base of operations, provided, however, that log-books for certificated airline aircraft may be maintained and kept at terminals.

01.74. *Aircraft flight reports.*—

01.740. The registered owner of a certificated aircraft engaged in flying (as other than a scheduled airline carrier) shall, on the first day of January and of July of each year, transmit to the Secretary the following information:

01.7400 (a). A navigation summary report showing the hours flown in each kind of non-scheduled operation during the 6 months immediately preceding the rendering of the report, and

01.7401 (b). such other data as may be specified from time to time on forms provided for such purpose by the Secretary.

01.741. When a certificated aircraft is not flown during any semi-annual period ending on the last day of December or of June in any year, such fact shall be reported to the Secretary immediately on the termination of such period.

01.75. *Accident reports.*—When serious injury to a person or to property is suffered or when death results by virtue of the operation of a certificated aircraft, the registered owner or the pilot of such aircraft shall immediately report, by telephone or telegraph, to the Secretary as to the identification mark of the aircraft and the time and place of the accident. All accidents occurring in the operation of certificated aircraft which results in damage to the aircraft shall be immediately reported to the Secretary by the registered owner or the pilot on a form supplied for the purpose, except that this shall not apply in the case of gliders unless serious injury or death results to persons.

01.76. *Production reports.*—A manufacturer to whom a type, an approved type, or a production certificate has been issued shall file his affidavit with the Secretary on January 1 and July 1 of each year showing the number of aircraft, engines, propellers or other equipment, as the case may be, constructed in exact accordance with the terms of such certificate during the preceding 6 months. This report shall include the serial numbers or other identification marks of all the articles involved, the dates of manufacture and any other pertinent information.

CHAPTER 02. AIRCRAFT IDENTIFICATION MARK

02.0. *Provision for issuance.*—Pursuant to the provisions of the Air Commerce Act declaring that the Government of the United States has, to the exclusion of all foreign nations, complete sovereignty of the airspace over the lands and waters of the United States, including the Canal Zone, and requiring the Secretary of Commerce to establish air traffic rules for the navigation, protection, and identification of aircraft, the following regulations are prescribed for the assignment, approval, issuance and display of identification marks.

02.1. *Character.*—An aircraft identification mark will consist of one or more Roman capital letters and a number.

02.10. *International symbol.*—The Roman capital letter N will appear first in the identification mark of aircraft of the United States.

02.11. *Classification symbol.*—The international symbol N will be followed in the mark by the Roman capital letter C, R, or X, or by a bar, for the purpose of classifying the aircraft as to its airworthiness, as follows:

02.110 (a). The letter C will classify an aircraft as complying fully with the airworthiness requirements of CAR 01 and 04, 05, 06, or 07, as the case may be, for the purpose of carrying persons or property, for or without hire.

02.111 (b). The letter R will classify an aircraft as complying in some limited respect with the airworthiness requirements of CAR 01 and 04, 05, 06, or 07, as the case may be. The certificate of an aircraft in this classification will specify the use, or uses, for which such aircraft is deemed airworthy, but such use, or uses, shall exclude passenger carrying, and shall be for industrial purposes only.

02.112 (c). The letter X will classify an aircraft as one which has been issued an experimental certificate in accordance with CAR 01.3. An aircraft so classified has been found by inspection to possess no apparent unairworthy features.

02.113 (d). The bar symbol, —, will classify the aircraft as one whose airworthiness rating has not been established. An aircraft so classified is an uncertificated aircraft.

02.12. *Number.*—The classification symbol will be followed in the mark by a number issued for purposes of further identification.

02.2. *Issuance.*—

02.20. *Assignment.*—The aircraft identification mark will be assigned by the Secretary at the time of issuance of the registration or the airworthiness certificate, will be inserted in the body of either thereof, as the case may be, and will be issued as a part thereof.

02.21. *Provisional assignment.*—Pending issuance by the Secretary a provisional assignment may be made by a Bureau inspector.

02.3. *Location for display.*—

02.30. *Conventional airplanes and gliders.*—The mark on such aircraft shall be located on the lower surface of the lower left wing and on the upper surface of the upper right wing. If, in a biplane, the lower left wing space is less than one-half that of the upper left wing, the mark shall be located on the lower surface of the upper left wing, as far to the left as is possible. The top of the letters and figures shall be toward the leading edge. The height shall be at least four-fifths of the mean chord; provided, however, that in the event four-fifths of the mean chord is more than 30 inches, the height of the letters and figures need not be more but shall not be less than 30 inches. In the case of a monoplane, the mark shall be displayed on the lower surface of the left wing and the upper surface of the right wing in the manner thus described. On gliders the letters or figures shall be displayed in the same manner and place prescribed for airplanes except the minimum height shall be 15 inches. The mark shall also be located on both sides of the vertical tail surface, or size as large as a 2-inch margin will permit.

02.31. *Unconventional aircraft.*—Marks on such aircraft will be located as deemed satisfactory by the Secretary upon examination of a three-view drawing to scale, of the aircraft.

02.32. *Airships.*—The mark on such aircraft shall be located on both sides at a distance back from the nose equal to one-fourth of the total airship length, and so located vertically as to lie halfway between the bottom line of the airship surface and the point of maximum beam. The height of the letters and figures shall be one-twelfth of the maximum cross-sectional circumference, but need not exceed four feet.

02.33. *Conventional balloons.*—The mark on such aircraft shall be located at two opposite points near but below the maximum horizontal perimeter. The height of the letters and figures shall equal at least one-twelfth of such perimeter but need not exceed four feet.

02.34. *Unconventional balloons.*—The mark on such aircraft shall be located as deemed satisfactory by the Secretary.

02.4 *Lettering.*—

02.40. *Type.*—The width of the letters and figures (except the figure 1) shall be at least two-thirds of their height. The width of each stroke shall be at least one-sixth of the height of the letters and figures, which shall be of uniform size.

02.41. *Color.*—The letters and numbers shall be painted on the aircraft in any color on any background provided there is a strong contrast, as deemed suitable by the Secretary.

02.42. *Legibility.*—Except with the approval of the Secretary, no other design, mark, symbol or description shall be placed upon an aircraft if such design, etc., modifies, adds to, detracts from, or confuses the assigned mark or destroys its legibility. The assigned marks shall be kept clean and clearly visible.

02.5. *Identification mark rules.*—

02.50. *Domestic aircraft.*—Every aircraft (except a foreign aircraft) entering the airspace over the lands and waters of the United States, including the Canal Zone, shall be possessed of and display an identification mark assigned and issued therefor by the Secretary.

02.51. *Foreign aircraft.*—Foreign aircraft shall be subject to the provisions of CAR 02.50 unless specifically given other authorization pursuant to Section 6 of the Air Commerce Act.

02.52. *Domestic aircraft for foreign delivery.*—An aircraft manufactured in the United States for delivery to a foreign purchaser may display appropriate and duly assigned and/or issued foreign identification marks or insignia and may be navigated for the sole purpose of delivery to said foreign purchaser by the most practical direct air route or for demonstration purposes for a limited time within the immediate vicinity of the manufacturer's airport on application made to and approved by the Secretary.

03. AIRCRAFT TITLE TRANSFER
03.0 Provision for Issuance
03.1 Seller's Report of Title Transfer
03.2 Purchaser's Application for Registration Certificate
03.3 Purchaser's Application for Aircraft Certificate
03.4 Interim Status of Aircraft
03.5 Interim Operation of Aircraft

CHAPTER 03. AIRCRAFT TITLE TRANSFER

03.0. *Provision for issuance.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the granting of registration to aircraft eligible therefor, and to provide for the rating of aircraft as to airworthiness, the following regulations are made to provide for the situations arising from the transfer of title to aircraft.

03.1. *Seller's report of title transfer.*—On the date of transfer of title of an aircraft registered as an aircraft of the United States, the registered owner thereof shall report the transaction in writing to the Secretary on Form AC 03–1 supplied for the purpose, and shall surrender his registration certificate for said aircraft, properly executed as to transfer of title, to the purchaser.

03.2. *Purchaser's application for registration certificate.*—On or after the date of transfer of title of an aircraft registered as an aircraft of the United States the purchaser thereof who desires to register such aircraft as an aircraft of the United States, shall make application therefor to the Secretary in accordance with the provisions of CAR 00.2.

03.3. *Purchaser's application for aircraft certificate.*—On or after the date of transfer of title of an aircraft the purchaser thereof, who desires an aircraft certificate therefor, shall make application to the Secretary in accordance with the appropriate provisions of CAR 01.

03.4. *Interim status of aircraft.*—In the interval of time between the date of transfer of title of an aircraft of the United States and the date of issuance of a registration certificate for such aircraft to the purchaser thereof, as provided in CAR 03.2 such aircraft is unregistered and shall not be flown within the navigable airspace of the United States, unless such purchaser fully complies with the provisions of CAR 03.5.

03.5. *Interim operation of aircraft.*—Pending the completion of the record of transfer of title by the Secretary and the issuance of a registration certificate and an aircraft certificate, if any, the purchaser, if a citizen of the United States, may operate the aircraft under the registration certificate and valid aircraft certificate, if any, previously issued to it, for a period of 60 days from the date of transfer upon the following conditions:

03.50 (a). On the date of transfer of title of an aircraft registered as an aircraft of the United States, the registered owner thereof shall have endorsed the date of transfer and name of the transferee in the blank space provided for such purpose on the face of the registration or aircraft certificate.

03.51 (b). On the date of transfer the proper application form shall have been either mailed to the Secretary or delivered directly to a designated Bureau inspector.

03.52 (c). The aircraft be operated in conformity with the terms of the valid aircraft certificate, if any, issued for such aircraft prior to the transfer of title.

03.53 (d). If the aircraft was issued an experimental certificate, special authority for its interim operation shall first be obtained from the Secretary.

CHAPTER 04. AIRPLANE AIRWORTHINESS

04.0. *General.*—

04.00. *Scope.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of aircraft as to their airworthiness, the requirements hereinafter set forth shall be used as a minimum basis for establishing such rating for airplanes.

04.000. *Airworthiness certificate.*—The general requirements for the issuance of an airworthiness certificate, and other information concerning such certificates, are set forth in CAR 01. The airworthiness requirements which shall be used as a basis for the certification of airplanes are specified hereinafter. (See 04.003.)

04.001. *Type certificate.*—The general requirements for the issuance of a type certificate are set forth in CAR 01. In addition to the requirements hereinafter specified for an airworthiness certificate, the special requirements designated as (TC) shall apply when a type certificate is sought.

04.002. *Production certificate.*—The requirements for the issuance of, and the procedure for obtaining, a production certificate are set forth in CAR 01.

04.003. *Deviations.*—These requirements are based on the present development in the science of airplane design. Experience indicates that, when applied to conventional types of construction, they will result in an airworthy and well-proportioned aircraft. New types of aircraft and new types of construction may, however, incorporate features to which these requirements cannot be logically applied. In such cases, special consideration will have to be given the particular new problems involved. In cases where the deviation from conventional practice is small, approval may be granted if sufficient evidence is submitted to show that the proposed deviation will not be detrimental to the airworthiness of the design. When the deviation from conventional practice is considerable, special rulings covering the feature or features in question shall be obtained from the Secretary.

04.01. *Classification of airplanes.*—For the purpose of applying these requirements, airplanes are classified as follows:

(a) *Normal.*—airplanes not included in class (b) below.

(b) *Light.*—airplanes having a gross weight of less than 1000 pounds and a wing loading of not more than 6 pounds per square foot.

04.010. Such airplanes are further classified as:

(a) Landplanes
(b) Seaplanes (Boat and Float Seaplanes)
(c) Amphibians (combination of (a) and (b))
(See also CAR 01 for classification as to operation.)

04.02. *Airworthiness requisites.*—As a basis for an airworthiness rating, compliance with the quantitative and qualitative requirements herein with respect to the following factors shall be demonstrated to the Bureau in a manner satisfactory to the Secretary:

(a) The structural strength of wing, tail and control surfaces, fuselage, engine mount, nacelles, fittings, control system and landing gear. (See CAR 04.2 and CAR 04.3.)

(b) Pilot compartment, cabin and control arrangements. (See CAR 04.4 and CAR 04.5.)

(c) Powerplant and powerplant installation. (See CAR 04.6.)
(d) Equipment and instruments. (See CAR 04.5.)
(e) Propellers. (See CAR 04.6.)
(f) Detail design. (See CAR 04.4.)
(g) Materials and workmanship. (See CAR 04.400.)
(h) Flying characteristics and qualities. (See CAR 04.7.)
(i) Safety features. (See CAR 04.4 and CAR 04.5.)

04.03. *Technical data required.*—When technical data are submitted as a basis for an airworthiness rating they shall include information which, in conjunction with suitable inspection and test procedure, will enable the Secretary to establish such rating.

04.030. *Submission to branch office.*—When data are submitted to a branch office of the Bureau, an extra copy of the three-view drawing, main assemblies and installations, drawing lists, applications and reports shall be included for the Washington office files.

04.031. *Data required for airworthiness certificate.*—The minimum data required as a basis for the issuance of an airworthiness certificate for a specific single airplane for which a type certificate is not sought or has not previously been issued, are as follows:

(a) A three-view drawing of the airplane, to a designated scale, specifying the external dimensions, manufacturer's designation, engine model designation, design weight, empty weight, wing and control surface areas, seating arrangement, fuel and oil capacity, baggage capacity (in pounds) and equipment supplied.

(b) Such additional technical data as are deemed necessary by the Secretary to show compliance with the requirements of CAR 04.02.

04.032. Data Required for Type Certificate (TC): As a basis for type certification, the following technical data shall be submitted.

04.0320 (TC). *Drawings.*—A set of drawings shall be submitted in blueprint form, or equivalent. Drawings shall be folded to a size approximately 9'' x 12'', and shall contain at least the following information:

(a) The manufacturer's designation of the original model to which each drawing applies.

(b) All dimensions essential to the reproduction of an identical airplane in respect to structural strength and dimensions.

(c) All dimensions essential for checking the structural analysis required in 04.0327.

(d) Specifications of all materials used in the primary structure (See CAR 04.131), including the guaranteed physical properties in the case of materials the strength properties of which are developed through manufacturing processes, and specifications of all bolts, nuts, rivets and similar standard parts essential to the strength of the structure.

(e) Details of the primary structure, seating arrangement, exists, control systems, powerplant installations, equipment installations and other factors affecting the air-worthiness of the airplane, except that adequate photographs may be substituted for drawings of the powerplant installation, including cooling and exhaust systems. Such photographs shall be made from marked negatives indicating the dimensions and materials of the piping and fittings. In any case diagrammatic layouts of the fuel and oil systems shall be submitted.

(f) Revision blocks stating the nature of the revision and the date it was made, and the serial number of the first airplane manufactured in accordance with the revision.

(g) A three-view drawing of the airplane, to a designated scale, specifying only the external dimensions of the airplane (including dimensions and areas of wing and control surfaces) and the airplane and engine model designations.

04.0321 (TC). *Drawing list.*—A drawing list shall be submitted in duplicate, listing in numerical order or by suitable classification the number, title and original date of each drawing submitted under CAR 04.032. The drawing list shall include references to all drawings originally submitted in connection with applications for airworthiness rating of other models and which apply to the model in question without change. The drawing list shall also indicate, by letter, the latest revision of each revised drawing.

04.0322 (TC). *Equipment lists.*—Lists specifying the equipment supplied with each airplane shall be submitted. The location, weight, and model designation of each item of equipment, including the additional weight necessary for installation shall be specified.

04.0323 (TC). *Preliminary weight and balance report.*—A report shall be submitted in which the range of center of gravity locations for which rating is sought is determined versus weight and with respect to suitable reference planes or lines.

04.0324 (TC). *Balance diagram.*—The report required in CAR 04.0323 shall include a diagram showing the location of the centers of gravity of the component parts of the airplane and its contents, and the location of a suitable reference chord for the wing system, and the location of the assumed center of pressure of the horizontal tail. The locations of the above items shall be indicated by reference to suitable horizontal and vertical planes.

04.0325 (TC). *Weight table.*—The report required in CAR 04.0323 shall include a table or list of the weights of all component parts of the airplane and its contents.

04.0326 (TC). *Structural report.*—A structural report shall be submitted in which the strength of the structure is determined with reference to the strength requirements hereinafter specified. The structural report shall include the computations of the required *limit* loads and shall demonstrate the ability of the structure to develop the required factors of safety with respect to these loads either by analytical methods satisfactory to the Secretary or by reference to authenticated test data, or by a combination of both. (See CAR 04.3.) The structural report shall also include all computations necessary to prove compliance with the miscellaneous requirements hereinafter specified.

04.0327 (TC). *Structural analysis.*—Computations submitted as part of the structural report shall include a table, or tables, including the minimum margins of safety computed for all structural members and shall bear the signature of the responsible engineer or engineers.

04.0328 (TC). *Test reports.*—Test reports submitted as a part of, or referred to in, the structural report shall bear the signature of the Secretary's representative who witnessed the tests, except in the case of minor tests, in which case the applicant's certification that the report accurately represents the complete results of the tests will be accepted.

04.04. *Procedure when airworthiness certificate only is sought* (see also CAR 01).—

04.040. *General.*—The applicant shall prove, to the satisfaction of the Secretary, compliance with all pertinent airworthiness requirements. (See CAR 04.02.) The proofs submitted by the applicant shall include such computations as are necessary to determine the exact application of the airworthiness requirements to the airplane in question.

04.041. *Structural inspection.*—An official representative of the Secretary will conduct such inspections of the structure and methods of fabrication as are deemed necessary by the Secretary prior to completion of the airplane and will witness structural tests in compliance with these regulations. (See CAR 04.3023.)

04.042. *Flight tests.*—The airplane shall be subjected to such flight tests as are deemed necessary by the Secretary to prove compliance with the flight and operation requirements specified in CAR 04.7.

04.05. *Procedure for type certificate.*—

04.050. *Examination of data.*—

04.0500. *Partial data.*—Arrangements may be made with the Bureau for examination of the required technical data in partial units prior to the receipt of a complete file provided that each such unit is complete in itself, and further provided that there is no unreasonable time interval between the receipt by the Bureau of the various units necessary to complete the file.

04.0501. *Discontinuance of examination.*—Examination of any technical data, including drawings, submitted in connection with an application for airworthiness rating, will be discontinued if errors, omissions, or lack of references are found which, in the opinion of the Secretary, render the data unsatisfactory as a basis for proving compliance with the airworthiness requirements. The examination will be continued upon correction of the data to the Secretary's satisfaction. Minor errors and omissions, the effects of which can be readily evaluated, will not constitute cause of discontinuing examination of technical data.

04.051. *Structural inspection.*—An official representative of the Secretary will conduct such inspections of the structure and methods of fabrication as are deemed necessary by the Secretary prior to completion of the airplane and will witness structural tests in compliance with these regulations. (See CAR 04.304.)

04.052. *Type inspection authorization.*—A type inspection will be authorized upon fulfillment of the following requirements:

(a) Completion of examination of the structural report and drawings and correction by the applicant of all errors and omissions which, in the opinion of the Secretary, must be corrected before authorization of the type inspection.

(b) Completion, and acceptance by the Bureau, of all structural tests required as part of the structural report or to prove compliance with the requirements herein specified.

(c) Submission of test reports conforming to the requirements of CAR 04.304 and approval of such reports by the Bureau.

04.053. *Type inspection procedure.*—The type inspection shall consist of a ground inspection and a flight test of an airplane built to conform with the technical data previously submitted and on which the authorization of the type inspection was based. The following sub-paragraphs shall be complied with in connection with the type inspection.

04.0530. *Affidavit of conformity.*—The manufacturer shall present to a designated inspector of the Bureau an affidavit of conformity (Form AC 04–1) in which his chief engineer or other responsible technical representative shall swear under oath that the airplane submitted for type inspection has been manufactured in accordance with the latest technical data submitted to and approved by the Secretary (including all revisions and additions required by the Secretary in connection with authorization of the type inspection) except for any deviations therefrom, which shall be listed and described.

04.0531. *Weight and balance report.*—The airplane shall be weighed and its balance determined in the presence of the inspector, and the manufacturer shall submit to such inspector a complete report covering the determination of the weights and center of gravity locations for which certification is desired.

04.0532. *Applicant's flight test report.*—Prior to, or at the time of, presentation of the airplane for flight tests, the applicant shall submit to the inspector a detailed report of flight tests of the airplane involved. This report shall be signed by the applicant's test pilot who shall certify that the airplane has been flown by him in all maneuvers required for proof of compliance with the flight requirements hereinafter specified and found to conform therewith, except that for very large airplanes this procedure may be modified as deemed necessary by the Secretary.

04.0533. *Ground inspection.*—Before conducting any flight tests, the inspector will complete the ground inspection to the extent that all items affecting the safety of flight have been found satisfactory.

04.0534. *Flight tests.*—The airplane shall be subjected to such flight tests as are necessary to prove compliance with the flight and operation requirements specified in CAR 04.7 and to supply the information required on Form AC 04–2.

04.0535. *Discontinuance of type inspection.*—If during any part of the ground inspection or flight test there is noted any unfavorable characteristic or defect which is considered sufficiently serious by the inspector to warrant discontinuing the type inspection until corrective measures have been taken by the applicant.

(a) the inspector will note each unsatisfactory item on Form AC 04–3 with sufficient detail so that it will be clear to all concerned;

(b) one copy of Form AC 04–3 will be transmitted to the manufacturer;

(c) the manufacturer shall advise the Bureau when the aircraft, incorporating the required changes, will be available for continuance of the type inspection, and

(d) the manufacturer shall furnish the Secretary with technical data descriptive of all structural changes except those of an obviously minor nature, and such changes shall be approved prior to resuming the type inspection.

04.054. *Certification of airplanes.*—The procedure specified in the following sub-paragraphs will be followed in certifying as to the airworthiness of an airplane.

04.0540. *Issuance of aircraft specification.*—Upon completion of all reports, tests and inspections required to prove compliance with the airworthiness requirements to the satisfaction of the Secretary and upon receipt of the certification of the inspector (or inspectors) who conducted the type inspection to the effect that the airplane inspected was found to be airworthy, together with properly executed inspection forms specified in the preceding paragraphs, an Aircraft Specification will be issued for the type and model of the airplane in question. The Aircraft Specification will certify as to the airworthiness of the type of airplane in question when manufactured and inspected in accordance with the provisions noted thereon.

04.0541. *Issuance of type certificates.*—A type certificate such as is described in CAR 01 will be issued to the applicant upon compliance with the requirements therein.

04.0542. *Authenticated data.*—As a part of the type certificate, the Secretary will furnish the applicant, upon issuance of such certificate, one set of drawing lists on which the seal of the Bureau is impressed. These lists shall show acceptance of the drawings as partial proof of the airworthiness of the type of airplane to which they apply.

04.055. *Confidential data.*—All technical data submitted by the applicant for the Bureau's file will be held confidential and will be used only in connection with the airworthiness rating of the airplane or airplanes to which such data apply; provided, however, that the Secretary may at his discretion make such use of the confidential data as is required in the interests of public safety. Access to confidential data will be provided to accredited representatives of the holder of, or applicant for, a pertinent type certificate. Confidential data will not be used for reference purposes in connection with the repair, alteration or remodeling of certificated airplanes by persons other than the holder of the pertinent type certificate without the written consent of such holder unless he is out of business or has given the Bureau blanket permission for such use.

04.06. *Changes, repair and alteration.*—

04.060. *Change, repair or alteration of certificated airplanes.*—Change, repair or alteration of a certificated airplane renders such airplane subject to re-rating as to airworthiness in accordance with CAR 18, but does not affect the type certificate on which the airworthiness certification may have been based.

04.061. *Changes affecting type certificate.*—The holder of a type certificate shall apply for approval of any specific change or revision of the approved drawings or specifications which, in the opinion of the Secretary, affect the airworthiness of the airplane and shall submit sufficient technical data in the form of strength calculations and strength tests, or both, to demonstrate continued compliance with the airworthiness requirements hereinafter specified. If, in the opinion of the Secretary, the changes are such as to affect

the performance or operating characteristics, appropriate tests may be required. Upon satisfactory proof that the revisions do not render the airplane type unairworthy the Aircraft Specification may be modified to include airplanes embodying the approved changes, and sealed copies of the revised drawing list pages will be returned to the applicant.

04.0610. *Drawing changes.*—When a revised drawing is submitted to the Bureau and airplanes previously constructed according to the original drawing are not to be changed, such revised drawing shall indicate the serial number of the first airplane to which the change applies. Corrected pages of the drawing lists shall be submitted in duplicate for each model to which the revision applies. Alternate installations shall be so designated and properly indicated on the drawing lists.

04.0611. *Minor changes.*—The suitability of a minor change will be judged on the basis of the airworthiness requirements which were in effect when the particular airplane model or type was originally certificated, unless the specific circumstances indicate the advisability of compliance with current requirements. Minor changes which obviously do not impair the structural strength or reliability of the airplane nor affect its flying characteristics may be approved by authorized Bureau inspectors without prior reference to the Washington Office. Shop drawings showing such changes shall be forwarded to the Bureau for record purposes.

04.0612. *Major changes.*—Major changes, such as the installation of an engine of a type other than that covered by the original type certificate, shall require the issuance of a new type certificate and may require compliance with current requirements at the discretion of the Secretary.

04.0613. *Changes by persons other than holder of type certificates.*—Changes such as described in CAR 04.061 when made by persons other than the holder of the type certificate are subject to the same procedure as that outlined in CAR 04.061 and pertinent sub-paragraphs, except that the written consent of the holder of the type certificate shall be obtained if it is desired to refer to technical data originally submitted to the Bureau in connection with application for type certificate. (See CAR 04.055.)

04.06130. If changes by persons other than the holder of the type certificate are to be made effective for all airplanes manufactured under the pertinent type certificate, the pertinent Aircraft Specification will be revised accordingly.

04.06131. If changes by persons other than the holder of the type certificate are to be incorporated only on airplanes owned or operated by the person or persons making the change, an amendment to the pertinent Aircraft Specification will be issued to cover the approved changes.

04.1. *Definitions.*—

04.100. *Weight, W.*—The total weight of the airplane and its contents.

04.101. *Design weight.*—The weight of the airplane assumed for purposes of showing compliance with the structural requirements hereinafter specified.

04.1010. *Minimum design weight.*—Weight empty with standard equipment, plus crew, plus fuel of .25 lb. per maximum (except take-off) horsepower, plus oil.

04.102. *Standard weight.*—The maximum weight for which the airplane is certificated as complying with all the airworthiness requirements for normal operations.

04.103. *Provisional weight.*—The maximum weight for which the airplane is certificated as complying with the airworthiness requirements as modified for scheduled air carriers in CAR 04.71.

04.104. *Design wing areas.*—The design wing area is the area bounded by the projection of the actual outline on the surface containing the wing chords, without deduction for the area blanketed by fuselage or nacelles. That part of the area which lies within the fuselage or nacelles is bounded by lateral lines connecting the intersections of the leading and trailing edges with the fuselage or nacelle, ignoring fairings or fillets.

04.105. *Design power, P.*—The total engine horsepower used in determining the maneuvering load factors and design level speed, $V_L$. (See CAR 04.111 and 04.211.)

04.106. *Design wing loading, W/S.*—The design weight (CAR 04.101) divided by the design wing area (CAR 04.104).

04.107. *Design power loading, W/P.*—The design weight (CAR 04.101) divided by the design power. (See CAR 04.105 and Figure 04–3.)

04.108. *Air density, $\rho$.*—The mass density of the air through which the airplane is moving, in terms of the weight of a unit volume of air divided by the acceleration of gravity. The symbol $\rho_0$ denotes the mass density of air at sea level under standard atmospheric conditions and has the value of 0.002378 slugs per cubic foot. (See CAR 04.130 for definition of standard atmosphere.)

04.109. *True airspeed, $V_t$.*—The velocity of the airplane, along its flight path, with respect to the body of air through which the airplane is moving.

04.110. *Indicated airspeed.*—$V$, the true airspeed multiplied by the term $\sqrt{\rho/\rho_0}$. (See CAR 04.108.)

04.111. *Design level speed, $V_L$.*—The indicated airspeed in level flight at design gross weight when the design power (CAR 04.105) is delivered by the engine or engines. In estimating $V_L$ for design purposes a suitable propeller efficiency shall be assumed. This value of $V_L$ will be used as a basis for speed limitations. (See CAR 04.7430.)

04.112. *Design gliding speed, $V_g$.*—The maximum indicated airspeed used in determining the flight loads. (See CAR 04.211.)

04.113. *Design stalling speed, $V_s$.*—The computed indicated airspeed in unaccelerated flight based on the maximum lift coefficient of the wing and the design gross weight. The effects of slipstreams and nacelles shall be neglected in computing $V_s$. When high-lift devices are in operation the corresponding stalling speed will be denoted by $V_{sf}$.

04.114. *Design flap speed, $V_f$.*—The indicated airspeed at which maximum operation of high-lift devices is assumed. (See CAR 04.211.)

04.115. *Maximum vertical speed, $V_m$.*—A fictitious value of indicated airspeed computed for unaccelerated flight in a vertical dive with zero propeller thrust.

04.116. *Design maneuvering speed, $V_p$.*—The indicated airspeed at which maximum operation of the control surfaces is assumed. (See CAR 04.211.)

04.117. *Design gust velocity, U.*—A specific gust velocity assumed to act normal to the flight path. (See CAR 04.2121.)

04.118. *Dynamic pressure, q.*—The Kinetic energy of a unit volume of air.

$q=\frac{1}{2}\rho V_t^2$ (in terms of true airspeed)
$=\frac{1}{2}\rho V_0^2$ (in terms of indicated airspeed)
$=V^2/391$ pounds per square foot, when $V$ is miles per hour indicated airspeed.

(See CAR 04.108 for definition of $\rho$.)

04.119. *Load factor or acceleration factor, n.*—The ratio of a load to the design weight. When the load in question represents the net external load acting on the airplane in a given direction, n represents the acceleration factor in that direction.

04.120. *Limit load.*—A load (or load factor, or pressure) which it is assumed or known may be safely experienced but will not be exceeded in operation.

04.121. *Factor of safety, j.*—A factor by which the *limit* loads are multiplied for various design purposes.

04.122. *Ultimate factor of safety, $j_u$.*—A specified factor of safety used in determining the maximum load which the airplane structure is required to support.

04.123. *Yield factor of safety, $j_y$.*—A specified factor of safety used in connection with the prevention of permanent deformations.

04.124. *Ultimate load.*—A *limit* load multiplied by the specified *ultimate* factor (or factors) of safety. See above definitions and CAR 04.200.

04.125. *Yield load.*—A *limit* load multiplied by the specified *yield* factor (or factors) of safety. (See above definitions and CAR 04.201.)

04.126. *Strength test.*—A static load test in which the *ultimate* loads are properly applied. (See CAR 04.200 and CAR 04.3021.)

04.127. *Proof test.*—A static load test in which the *yield* loads are properly applied for a period of at least one minute. (See CAR 04.201.)

04.128. *Balancing loads.*—Loads by which the airplane is placed in a state of equilibrium under the action of external forces resulting from specified loading conditions. The state of equilibrium thus obtained may be either real or fictitious. Balancing loads may represent air loads, inertia loads, or both. (See CAR 04.2210.)

04.129. *Aerodynamic coefficients, $C_L$, $C_M$, C. P., etc.*—The coefficients hereinafter specified are those of the "absolute" (nondimensional) system adopted as standard in the United States. The subscripts N and C used hereinafter refer respectively to directions normal to and parallel with the basic chord of the airfoil section. Other subscripts have the usual significance. When applied to an entire wing or surface, the coefficients represent average values and shall be properly correlated with local conditions (load distribution) as required in CAR 04.217.

04.130. *Standard atmosphere (standard air).*—Standard atmosphere refers to that variation of air conditions with altitude which has been adopted as standard in the United States. (See any aeronautics text book or handbook, or NACA Technical Report No. 218.)

04.131. *Primary structure.*—Those portions of the airplane which are essential to the distribution and transmission of the loads acting on the airplane in the specified loading conditions. Primary structure includes control systems, engine mounts, fittings, members transmitting local loads, auxiliary members used to support or strengthen other members carrying direct loads, coverings of wing and control surfaces, and all other structural components to which the above definition applies.

04.2. *Structural loading conditions.*—

04.20. *General structural requirements.*—

04.200. *Strength.*—The primary structure (See CAR 04.131) shall be capable of supporting the *ultimate* loads (See CAR 04.124) determined by the loading conditions and *ultimate* factors of safety hereinafter specified, the loads being properly distributed and applied.

04.201. *Deformations.*—The primary structure shall be capable of supporting without detrimental permanent deformations, for a period of at least one minute, the *yield* loads (See CAR 04.125) determined by the loading conditions and *yield* factors of safety hereinafter specified, the loads being properly distributed and applied. Where no *yield* factor of safety is specified a factor of 1.0 shall be assumed. In addition, temporary deformations which occur before the yield load is reached shall be of such a nature that their repeated occurrence will not weaken or damage the primary structure.

04.202. *Stiffness.*—The primary structure shall be capable of supporting the *limit* loads (See CAR 04.120) determined by the loading conditions hereinafter specified without deflecting beyond whatever limits may be hereinafter prescribed or which may be deemed necessary by the Secretary for the case in question.

04.203. *Proof of strength and rigidity.*—No general requirements, but see CAR 04.3 for specific requirements.

04.204. *Materials, fabrication, protection, etc.*—No general requirements, but see CAR 04.4 for specific requirements.

04.21. *Flight loads.*—

04.210. *General.*—The airworthiness rating of an airplane with respect to its strength under flight loads will be based on the airspeeds and accelerations (from maneuvering or gusts) which can safely be developed in combination. For certain classes of airplanes the acceleration factors and gust velocities are arbitrarily specified hereinafter and shall be used for those classes. The airspeeds which can safely be developed in combination with the specified acceleration factors and gusts shall be determined in accordance with the procedure hereinafter specified and shall serve as a basis for restricting the operation of the airplane in flight (See CAR 04.743).

04.211. *Airspeeds.*—(See CAR 04.109 to 04.116 for definitions.) The design airspeeds shall be determined as follows:

$V_L$ shall correspond to design power in accordance with CAR 04.11.

$V_g$ shall not be less than $V_L+K_g(V_m-V_L)$, except that it need not be greater than either $V_L+100$ miles per hour or 1.5 $V_L$, whichever is lower. $K_g$ is specified on Fig. 04–1. $V_m$ is defined in CAR 04.115.

*$V_f$ shall not be less than $2V_{sf}$.* $V_{sf}$ is defined in CAR 04.113.

$V_p$ shall not be less than $V_{sf}-K_P(V_L-V_{sf})$, except that it need not be greater than $V_L$. $K_P$ is specified on Fig. 04–2.

(See CAR 04.2220, 04.2223 and 04.2230 for exceptions for multi-engine airplanes.)

04.212. *Load factors.*—The flight load factors specified hereinafter shall represent *wing* load factors. The *net* load factor, or acceleration factor, shall be obtained by proper consideration of balancing loads acting on the airplane in the specific flight conditions.

04.2120. *Maneuvering load factors.*—The *limit* maneuvering load factors specified hereinafter (see Fig. 04–3) are derived largely from experience with conventional types of airplanes and shall be considered as minimum values unless it can be proved, to the satisfaction of the Secretary, that the airplane embodies features of design which make it impossible to develop such values in flight, in which case lower values may be used subject to the approval of the Secretary.

04.2121. *Gust load factors.*—The gust load factors shall be computed on the basis of a gust of the magnitude specified, acting normal to the flight path, and proper allowance shall be made for the effects of aspect ratio on the slope of the lift curve. The gust velocities specified shall be used only in conjunction with the gust formulae hereinafter specified. The basic gust load factor ($n$) need not exceed that corresponding to the maximum dynamic $C_L$ obtainable under sudden changes of angle of attack. The following formula for the load factor added in encountering a gust shall be used for wings (See CAR 04.22 for tail surfaces).

$\Delta n=\frac{KUVm}{575(W/S)}$, where

$\Delta n$=*limit* load factor increment.
$K$=gust reduction factor.
$=\frac{1}{2}\ (W/S)^{1/4}$, but need not exceed 1.0.
$U$=gust velocity, feet per second.
(Note that the "effective" sharp-edged gust equals $KU$)
$V$=indicated airspeed, miles per hour.
$W/S$=wing loading (CAR 04.106).
$m$=slope of lift curve, $C_L$ per radian, corrected for aspect ratio.

04.2122. *Factors of safety.*—The minimum factors of safety are specified for each loading condition. See also CAR 04.27 for multiplying factors of safety required in certain cases.

04.213. *Symmetrical flight conditions (flaps retracted).*—

04.2130. *General.*—The following flight conditions, together with Table 04–1, shall be considered as representing the minimum number of conditions required to cover a suitable range of symmetrical flight loadings.

04.2131. *Condition I (positive high angle of attack).*—The factors given in Table 04–1 and Fig. 04–3 for this condition shall be used. To provide for flight conditions critical for the front lift truss or its equivalent the aerodynamic characteristics $C_N$, C. P. (or $C_M$) and $Cc$ shall be determined as follows:

(a) $C_{N_1}=\frac{n_1(W/S)}{q_L}$ ($q_L$ is dynamic pressure corresponding to $V_L$; see CAR 04.111 and 04.118.)

(b) $Cc'$=value corresponding to $C_{N_1}$, or value equal to $-.20\ C_{N_1}$, whichever is greater negatively.

(c) $C.\ P.'$=most forward position of the center of pressure between $C_L=C_{N_I}$ and $C_L$ max.; when $C_{N_I}$ exceeds $C_L$ max., the *C. P.* curve shall be extended accordingly.

(d) For biplane combinations the *C. P.* of the upper wing shall be assumed to be 2.5 per cent of the chord forward of its nominal position.

(e) $C_M'$=moment coefficient necessary to give the required *C. P.'* in conjunction with $C_{N_I}$.

04.21310. *Condition $I_1$ (positive high angle of attack modified).*—The smaller of the two values of $C_c$ specified in CAR 04.2131 (b), and the most rearward *C. P.* position in the range specified in CAR 04.2131 (c) shall also be investigated when Condition I is critical for the rear spar (or its equivalent) or if any portion of the front spar (or its equivalent) is likely to be critical in tension. Only the wings and wing bracing need be investigated for this condition.

04.2132. *Condition II (negative high angle of attack).*—The factors given in Table 04–1 for this condition shall be used, with the following provisions:

(a) $C_{N_{II}}=\frac{n_{II}(W/S)}{q_L}$.

(b) $C_c$=actual value corresponding to $C_{N_{II}}$.

(c) When $C_c$ is positive or has a negative value smaller than 0.02 it may be assumed to be zero.

(d) $C_M$=actual value corresponding to $C_{N_{II}}$.

04.2133. *Condition III (positive low angle of attack).*—The factors given in Table 04–1 for this condition shall be used, with the following provisions:

(a) $C_{N_{III}}=\frac{n_{III}(W/S)}{q_o}$ ($q_o$ is dynamic pressure corresponding to $V$; see CAR 04.118 and 04.112).

(b) $C_c$=actual value corresponding to $C_{N_{III}}$.

(c) When $C_c$ is positive or has a negative value smaller than 0.02 it may be assumed to be zero.

(d) $C_M'=C_M-0.01$, where $C_M$ is the actual value corresponding to $C_{N_{III}}$.

04.21330. *Condition $III_1$ (positive low angle of attack, modified).*—If the moment coefficient of the airfoil section at zero lift has a positive value, or a negative value smaller than 0.05, the effects of displaced ailerons on the moment coefficient shall be accounted for in Condition III for that portion of the span incorporating ailerons. To cover this point it will be satisfactory to assume that the basic value of $C_M$ is equal to −0.05 for that portion of the span incorporating ailerons, unless it is actually greater negatively. Only the wings and wing bracing need be investigated for this condition.

04.2134. *Condition IV (negative low angle of attack).*—The factors given in Table 04–1 for this condition shall be used, with the following provisions:

(a) $C_{N_{IV}}=\frac{n_{IV}(W/S)}{q_o}$.

(b) $C_c$=actual value corresponding to $C_{N_{IV}}$.

(c) When $C_c$ is positive or has a negative value smaller than 0.02 it may be assumed to be zero.

(d) $C_M'=C_M-0.01$, where $C_M$ is the actual value corresponding to $C_{N_{IV}}$.

04.2135. *Condition V (inverted flight).*—The factors given in Table 04–1 for this condition shall be used, with the following provisions:

(a) $C_{N_V}=\frac{n_V(W/S)}{q_L}$.

(b) $C'_c=0$.

(c) $C.\ P.'=25\%$.

(d) Only the rear (or single) lift truss system of externally braced wing structures need be investigated for this condition.

04.2136. *Condition VI (gliding).*—The factors given in Table 04–1 shall be used for this condition, with the following provisions:

(a) $C_{N_{VI}}$=value corresponding to $C_c$ max. (positive).

(b) $C'_c=C_c$ max. (positive) +0.01.

(c) $C_M'=C_M-0.01$, where $C_M$ is the actual value corresponding to $C_{N_{VI}}$.

(d) The drag of nacelles and other items attached to the wings shall be conservatively estimated and properly included in the investigation of this condition.

(e) Only the wings and wing bracing need be investigated for this condition.

04.214. *Symmetrical flight conditions (flaps or auxiliary devices in operation).*—

04.2140. *General.*—When flaps or similar high-lift devices are installed on the wings, the design conditions shall be suitably modified to account for their use in flight. The modifications shall be based on the intended use of the flaps and the aerodynamic characteristics of the wing. The following conditions, together with Table 04–2, shall be considered as representing the minimum number of conditions required to cover a suitable range of symmetrical flight loadings in cases where the flaps are used only at relatively low airspeeds.

04.2141. *Condition VII (positive gust, flaps deflected).*—The factors given in Table 04–2 for this condition shall be used, with the following provisions:

(a) The most critical deflection of the flap shall be investigated.

(b) The magnitude and distribution of normal, chord and moment forces over the wing shall correspond to that which would be obtained in developing the specified *limit* gust load factor at the specified airspeed. The gust formula in CAR 04.2121 shall be used.

04.2142. *Condition VIII (negative gust, flaps deflected).*—The factors given in Table 04–2 for this condition shall be used, with the following provisions:

(a) The most critical deflection of the flap shall be investigated.

(b) The magnitude and distribution of normal, chord and moment forces over the wing shall correspond to that which would be obtained in encountering the specified *limit* gust load factor at the specified airspeed. The gust formula in CAR 04.2121 shall be used.

04.2143. *Condition IX (dive, flaps deflected).*—The factors given in Table 04–2 for this condition shall be used, with the following provisions:

(a) The most critical deflection of the flap shall be investigated.

(b) The load factor and the magnitude and distribution of normal, chord and moment forces over the wing shall correspond to the angle of attack at which the greatest rearward chord loads are produced on the wing structure.

(c) Only the wings and wing bracing need be investigated for this condition.

04.215. *Unsymmetrical flight conditions.*—

04.2150. *General.*—Pending the development of more rational methods, the following unsymmetrical flying conditions shall apply. In these conditions the angular inertia of the wings shall be assumed equal to zero, except that the effect of wing nacelles and landing gear may be considered.

04.2151. *Condition $I_u$.*—Condition I (CAR 04.2131) shall be modified by assuming 100 per cent of the air load to be acting on one side of the airplane and 70 per cent on the other. For airplanes over 10,000 pounds gross weight the latter factor may be increased linearly with gross weight up to 80 per cent at 25,000 pounds.

04.2152. *Condition $III_u$.*—Condition III (CAR 04.2133) shall be modified as described for Condition $I_u$ in CAR 04.2151, except that when Condition $III_1$ (CAR 04.21330) applies, the loading for the latter condition shall be substituted on the 100 per cent side.

04.2153. *Condition $V_u$.*—Condition V (CAR 04.2135) shall be modified as described for Condition $I_u$ in CAR 04.2151.

04.216. *Special flight conditions.*—

04.2160. *Gust at reduced weight.*—The requirements for gust conditions (excepting tail surface gust conditions) under any loading between minimum and maximum design weight shall be met by primary structure critically loaded thereby.

04.2161. *Lift-wire cut.*—For wings employing wire bracing in the lift truss, Conditions I and III shall be investigated, using load factors $n_I$ and $n_{II}$ of one half the values specified for these conditions and assuming that any lift wire is out of action. This requirement does not apply to parallel double lift wires, for which case see CAR 04.273.

04.2162. *Drag-wire-cut.*—Drag struts in double-truss systems shall be designed to withstand the loads developed when the drag wire of the upper system in one bay and the drag wire of the lower system in the adjacent bay are each carrying their *limit* loads from any flight condition, the remaining wires in these two bays being assumed to be out of action. The minimum *ultimate* factor of safety shall be 1.5.

04.2163. *Unsymmetrical propeller thrust.*—The structure shall incorporate an *ultimate* factor of safety of 1.5 against failure due to loads caused by maximum (except take-off) power applied on one side of the plane of symmetry only, when power on the other side is off and the airplane is in unaccelerated rectilinear flight.

04.2164. *Wing tanks empty.*—If fuel tanks are supported by the wing structure, such structure and its bracing shall also be investigated for Conditions I, II, III and IV with wing tanks empty. The design weight may be reduced by 0.9 pound per certified maximum (except take-off) horsepower.

04.217. *Wing load distribution.*—The *limit* air loads and inertia loads acting on the wing structure shall be distributed and applied in a manner closely approximating the actual distribution in flight.

04.22. *Control surface loads.*—

04.220. *General.*—In addition to the flight loads specified in CAR 04.21 the primary structure shall meet the requirements hereinafter specified to account for the loads acting on the control surfaces. The following loading conditions include the application of balancing loads (CAR 04.128) derived from the symmetrical flight conditions and also cover the possibility of loading the control surfaces and systems in operating the airplane and by encountering gusts. See also CAR 04.27 for multiplying factors of safety required in certain cases.

04.221. *Horizontal tail surfaces.*—

04.2210. *Balancing.*—The *limit* load acting on the horizontal tail surfaces shall not be less than the maximum balancing load obtained from Conditions I, II, III, IV, VII and VIII. The factors given in Table 04–3 shall be used, with the following provisions:

(a) P (in Fig. 04–4) =40% of net balancing load. (This requires the load on the fixed surface to be 140% of the net balancing load.) In any case P need not exceed that corresponding to a *limit* elevator control force of 150 pounds applied by the pilot.

04.2211. *Maneuvering (horizontal surfaces).*—The factors specified in Table 04–3 and Fig. 04–5 for this condition shall be used, together with the following provisions:

(a) The *limit* unit loading in either direction need not exceed that corresponding to a load on the elevator control equal to the maximum limit control force (Table 04–6) and shall not be less than that corresponding to the minimum *limit* control force (Table 04–6) except as modified by paragraph (b) following.

(b) In any case the average *limit* unit loading shall not be less than the minimum pressure specified in Table 04–3 for this condition.

04.2212. *Damping (horizontal surfaces).*—The total *limit* load acting down on the fixed surface (stabilizer) in the maneuvering condition (CAR 04.2211) shall be applied in accordance with the load distribution of Fig. 04–6, acting in either direction. The load acting on the movable surface in the maneuvering condition may be neglected in determining the damping loads.

04.2213. *Tab effects (horizontal surfaces).*—When a tab is installed on the horizontal movable tail surface so that it can be used by the pilot as a trimming device, the *limit* unit loading over the entire horizontal surfaces shall not be less than that corresponding to the application of the minimum *limit* control force (Table 04–6) together with maximum deflection of the tab in a direction assisting the control force. The factors specified in Table 04–3 for this condition shall be used.

04.222. *Vertical tail surfaces.*—

04.2220. *Maneuvering.*—The factors given in Table 04–4 and Fig. 04–5 for this condition shall be used, with the following provisions:

(a) If the propeller axes are not in the plane of symmetry, the design speed shall not be less than the maximum speed in level flight with any engine inoperative.

(b) The *limit* unit loading in either direction need not exceed that corresponding to the maximum *limit* control force (Table 04–6) except as modified by paragraph (c) following.

(c) In any case the average *limit* unit loading shall not be less than the minimum pressure specified in Table 04–4 for this condition.

04.2221. *Damping (vertical surfaces).*—The total *limit* load acting on the fixed surface (fin) in the maneuvering condition shall be applied in accordance with the load distribution of Fig. 04–6, acting in either direction. The load acting on the movable surface in the maneuvering condition may be neglected in determining the damping loads.

04.2222. *Gusts (vertical surfaces).*—The gust conditions specified in Table 04–4 shall be applied, using the following formulae and provisions:

(a) The gust shall be assumed to be sharp-edged and to act normal to the plane of symmetry in either direction.

(b) The average *limit* unit pressure, $w$, developed in striking the gust shall be determined from the following formula:

$w=UVm/575$, where
$w$ is in pounds per square foot,
$U$ is in feet per second,
$V$ is in miles per hour and
$m$=slope of lift curve, $C_L$ per radian, corrected for aspect ratio. The aspect ratio shall not be taken as less than 2.0 in any case.

(c) This condition applies only to that portion of the vertical surface which has a well-defined leading edge.

(d) The chord distribution extending over the fixed and movable surfaces shall simulate that for a symmetrical airfoil, except that the distribution in Fig. 04–6 may be used where applicable.

04.2223. *Tab effects (vertical surfaces).*—When a tab is installed on the vertical movable tail surface so that it can be used by the pilot as a trimming device the *limit* unit loading over the entire vertical tail surfaces shall not be less than that corresponding to the maximum deflection of the tab together with simultaneous application of the following control force in a direction assisting the tab action:

For airplanes with all propeller axes in the plane of symmetry, zero.

For airplanes with propeller axes not in the plane of symmetry, 200 pounds.

The factors specified in Table 04–4 for this condition shall be used, with the following exception:

(a) If the propeller axes are not in the plane of symmetry, the design speed $V_L$ specified in Table 04–4 may be reduced to the maximum speed in level flight with any engine inoperative.

04.2224. *Special cases (vertical surfaces).*—A special ruling shall be obtained from the Secretary when an automatic pilot is used on airplanes with propeller axes not in the plane of symmetry.

04.223. *Ailerons.*—

04.2230. *Maneuvering.*—The factors given in Table 04–5 and Fig. 04–7 for this condition shall be used, with the following provisions:

(a) If the propeller axes are not in the plane of symmetry, the design speed shall not be less than the maximum speed in level flight with any engine inoperative.

(b) The *limit* unit loading in either direction need not exceed that corresponding to the maximum control force (Table 04–6) resisted by only one aileron, except as modified by paragraph (c) following.

(c) In any case the average *limit* unit loading shall not be less than the minimum pressure specified in Table 04–5 for this condition.

04.2231. *Tab effects (ailerons).*—(Applies only to airplanes with propeller axes not in the plane of symmetry.) When a tab is installed on one or both ailerons so that it can be used by the pilot to assist in moving the ailerons, the *limit* unit loading over both ailerons shall be of sufficient magnitude and in such direction as to hold the ailerons in equilibrium with the tab or tabs deflected to the maximum position. The factors specified in Table 04–5 for this condition shall be used.

04.2232. *Flying conditions (ailerons).*—The ailerons and their control system shall be capable of meeting all requirements specified in the basic symmetrical flying conditions so far as the latter produce symmetrical loads on the ailerons.

04.224. *Wing flaps.*—Wing flaps shall be loaded in accordance with Conditions VII and VIII (CAR 04.2141 and 04.2142) and in addition shall be capable of developing an *ultimate* factor of safety of at least 1.5 with respect to any intermediate conditions which are more severe for any part of the flap or its operating mechanism.

04.225. *Tabs.*—The *limit* forces acting on control-surface tabs shall be determined from the most severe combination of airplane speed and tab normal force coefficient likely to be obtained for any usable loading condition of the airplane and at speeds up to the design gliding speeds, $V_g$. An *ultimate* factor of safety of at least 1.5 shall be maintained.

04.226. *Special devices.*—Special rulings shall be obtained from the Secretary in connection with the design and analysis of wing-slot structures, spoilers, unconventional ailerons, auxiliary airfoils and similar devices. Requests for special rulings shall be accompanied by suitable drawings or sketches of the structure in question, together with general information and an outline of the method by which it is proposed to determine the structural loading.

04.23. *Control system loads.*—

04.230. *General.*—All control systems shall be designed for *limit* loads 25 per cent greater than those corresponding to the *limit* loads specified for the control surfaces to which they are attached, assuming the movable surface to be in that position which produces the greatest load in the control system, except that the maximum and minimum control force limits in Table 04–6 shall apply as hereinafter specified. The factors of safety specified in Table 04–6 shall be used. See also CAR 04.27 for multiplying factors of safety required in certain cases. See also CAR 04.331 for operation requirements for control systems.

04.2300. The forces in the control wires or push rods operating the movable surfaces shall be computed and their effect on the rest of the structure shall be investigated and allowed for in the design of such structure.

04.231. *Elevator systems.*—In applying CAR 04.230 the control force specified in Table 04–6 and Fig. 04–8 shall be assumed to act in a fore-and-aft direction and shall be applied at the grip of a control stick, or shall be equally divided between two diametrically opposite points on the rim of a control wheel.

04.232. *Rudder systems.*—In applying CAR 04.230 the control force specified in Table 04–6 shall be assumed to act in a direction which will produce the greatest load in the control system and shall be applied at the point of contact of the pilot's foot.

04.233. *Aileron systems.*—In applying CAR 04.230 it shall be assumed that the ailerons are loaded in opposite directions. The control force specified in Table 04–6 and Fig. 04–9 shall be assumed to act in a lateral direction at the grip of a control stick, or shall be assumed to act as part of couple equal to the specified force multiplied by the diameter of a control wheel. The following assumptions shall be made:

(a) For nondifferential ailerons, 75 per cent of the stick force or couple shall be assumed to be resisted by a down aileron, the remainder by the other aileron; also, as a separate condition, 50 per cent shall be assumed to be resisted by an up aileron, the remainder by the other aileron.

(b) For differential ailerons, 75 percent of the stick force or couple shall be assumed to be resisted by each aileron in either the up or down position, or rational assumptions based on the geometry of the system shall be made.

04.234. *Flap and tab control systems.*—In applying CAR 04.230 suitable minimum manual forces shall be assumed to act on flap and tab control systems and other similar controls.

04.24. *Ground loads.*—

04.240. *General.*—The following conditions represent the minimum amount of investigation required for conventional (tail down type) landing gear. For unconventional types it may be necessary to investigate other landing attitudes, depending on the arrangement and design of the landing gear members. Consideration will be given to a reduction of the specified *limit* load factors when it can be proved that the shock absorbing system will positively limit the acceleration factor to a definite lower value in the drop test specified in CAR 04.2411. The minimum factors of safety are specified for each loading condition. See also CAR 04.27 for multiplying factors of safety required in certain cases.

04.241. *Level landing.*—The minimum *limit* load factor is specified in Fig. 04–10. The resultant of the ground reaction shall be assumed to be a force lying at the intersection of the plane of symmetry and a plane in which are located the axles and the center of gravity of the airplane less chassis. The propeller axis (or equivalent reference line) shall be assumed horizontal and the basic value of the vertical component of the resultant of the ground reaction shall be equal to the gross weight of the airplane minus chassis and wheels. The horizontal component shall be of the magnitude required to give the resultant force the specified direction except that it need not be greater than 25 per cent of the vertical component. The resultant of the ground reaction shall be assumed to be divided equally between wheels and to be applied at the axle at the center of the wheel. The shock-absorber unit and tires shall be assumed to be deflected to half their total travel, unless it is apparent that a more critical arrangement could exist. The minimum *ultimate* factor of safety shall be 1.5.

04.2410. If a sliding element instead of a rolling element is used for the landing gear, a horizontal component of one-half of the vertical component shall be used to represent the effect of ground friction, except that ski gear which is designed and used only for landing on snow and ice may be designed for the same horizontal component as wheel gear.

04.2411. *Energy absorption.*—The level landing condition specified in CAR 04.241 shall be assumed to be produced by a free drop, in inches, equal to 0.36 times the calculated stalling speed ($V_s$) in miles per hour, except that the height of free drop shall not be less than 18 inches for airplanes employing devices which increase the normal sinking speed, but need not exceed 18 inches when such devices are not employed. The height of free drop is measured from the bottom of the tire to the ground, with the landing gear extended to its extreme unloaded position. (See CAR 04.340 and 04.440.)

04.242. *Three-point landing.*—The minimum *limit* load factor is specified in Fig. 04–10. The value of the sum of the static ground reactions shall be the gross weight of the airplane less chassis. The total load shall be divided between the chassis and tail skid or wheel in inverse proportion to the distances, measured parallel to the ground line, from the center of gravity of the airplane less chassis to the points of contact with the ground. The load on the chassis shall be divided equally between wheels. Loads shall be assumed to be perpendicular to the ground line in the three-point landing attitude, with all shock absorbers and tires deflected to the same degree as in level landing. The tail wheel or skid installation shall also be investigated for this condition. The minimum *ultimate* factor of safety shall be 1.5.

04.2420. *Energy absorption.*—The three-point landing condition specified in CAR 04.242 shall be assumed to be produced by a free drop as specified under CAR 04.2411. This requires shock absorption by both main wheels and tail wheel (or skid). (See CAR 04.340 and 04.440.)

04.243. *Side load.*—The minimum *limit* load factor shall be 0.667. The weight of the airplane shall be assumed to act on one wheel in a direction perpendicular to the ground. In addition, a side component of equal magnitude shall be assumed to act inward and normal to the plane of symmetry at the point of contact of the wheel, and an aft component equal to 0.55 times the vertical component shall be assumed to act parallel to the ground at such point. The airplane shall be assumed to be in a three-point attitude with the shock absorbers deflected to their static position and the tire deflected to one-quarter the nominal diameter of its cross section. The minimum *ultimate* factor of safety shall be 1.5.

04.244. *One-wheel landing.*—An investigation of the fuselage structure is required for a one-wheel landing, in which only those loads obtained on one side of the fuselage in the level landing condition are applied. The resulting load factor is therefore one-half of the level landing load factor. (This condition is identical with the level landing condition insofar as the landing gear structure is concerned.) The minimum *ultimate* factor of safety shall be 1.5.

04.245. *Braked landing.*—The minimum *limit* load factor shall be 1.33. Airplanes equipped with brakes shall be investigated for the loads incurred when a landing is made with the wheels locked and the airplane is in an attitude such that the tail skid or wheel just clears the ground. The weight of the airplane less chassis shall be assumed to act on the wheels in a direction perpendicular to the ground line in this attitude. On addition, a component parallel to the ground line shall be assumed to act at the point of contact of the wheels and the ground, the magnitude of this component being equal to the weight of the airplane less chassis time a coefficient of friction of 0.55. The tire in all cases shall be assumed to have deflected not more than one-quarter the nominal diameter of its cross section, and the deflection of the shock absorbers shall be the same as in level landing. The minimum *ultimate* factor of safety shall be 1.5.

04.246. *Side loads on tail wheel or skid.*—Suitable assumptions shall be made to cover side loads acting on tail skids or tail wheels which are not free to swivel or which can be locked or steered by the pilot.

04.247. *Complete turn-over.*—The *ultimate* load factor for this condition shall be 4.5. The airplane shall be assumed to be inverted and the cabane structure (or its equivalent) shall be assumed to carry the entire load acting normal to the thrust line (or equivalent reference line). In cases where a wing is above the fuselage and braced by more than one cabane lift truss, at least one truss shall be designed for the entire load. The superstructure shall also be capable of resisting a total *ultimate* load of at least three-fourths the weight of the airplane, acting either forwardly or rearwardly parallel to the thrust line or wing chord and suitably divided between the uppermost points of the side trusses of the cabane or equivalent structure. Partial failure of the structure under these conditions is permissible provided that the specified *ultimate* loads can be resisted without endangering the occupants, assuming safety belts to be fastened. (See also CAR 04.460.)

04.25. *Water loads.*—

04.250. *General.*—The following requirements shall apply to the entire airplane, but have particular reference to hull structures, wings, nacelles, and float supporting structure. The requirements for certification of floats as individual items of equipment are specified in CAR 15. The minimum factors of safety are specified for each loading condition. See also CAR 04.27 for multiplying factors of safety required in certain cases. Detail design requirements for hulls and floats are specified in CAR 04.45.

04.251. *Landing with inclined reactions (float, seaplanes).*—The vertical component of the *limit* load factor shall be 4.20 except that it need not exceed a value given by the following formula:

$$n=3.0+0.133\ (W/S).$$

The propeller axis (or equivalent reference line) shall be assumed to be horizontal and the resultant water reaction to be acting in the plane of symmetry and passing through the center of gravity of the airplane less floats and float bracing but inclined so that its horizontal component is equal to one-quarter of its vertical component. The forces representing the weights of and in the airplane shall be assumed to act in a direction parallel to the water reaction. The weight of the floats and float bracing may be deducted from the gross weight of the airplane.

04.2510. For the design of float attachment members, including the members necessary to complete a rigid base truss through the fuselage, the minimum *ultimate* factor of safety shall be 1.85. For the remaining structural members the minimum *ultimate* factor of safety shall be 1.50.

04.252. *Landing with vertical reactions (float seaplanes).*—The *limit* load factor shall be 4.33, acting vertically, except that it need not exceed a value given by the following formula:

$$n=3.0+0.133\ (W/S).$$

The propeller axis (or equivalent reference line) shall be assumed to be horizontal, and the resultant water reaction to be vertical and passing through the center of gravity of the airplane less floats and float bracing. The weight of the floats and float bracing may be deducted from the gross weight of the airplane.

04.253. *Landing with side load (float seaplanes).*—The vertical component of the *limit* load factor shall be 4.0, to be applied to the gross weight of the airplane less floats and float bracing. The propeller axis (or equivalent reference line) shall be assumed to be horizontal and the resultant water reaction shall be assumed to be in the vertical plane which passes through the center of gravity of the airplane less floats and float bracing and is perpendicular to the propeller axis. The vertical load shall be applied through the keel or keels of the float or floats, and evenly divided between the floats when twin floats are used. A side load equal to one-fourth of the vertical load shall be applied along a line approximately half-way between the bottom of the keel and the level of the water line at rest. When built-in struts are used, check calculations shall be made for the built-in struts with the side load at the level of the water line at rest. When twin floats are used, the entire side load specified shall be applied to the float on the side from which the water reaction originates. The minimum *ultimate* factor of safety shall be 1.50.

04.254. *Step landing (boat seaplanes).*—The aircraft shall be in such an attitude that the propeller axis (or equivalent reference line) is horizontal and shall be assumed to be supported by a vertical buoyant force distributed over an area extending from the step forward to a point half-way between the step and the forward end of the normal load water line. Such area may be assumed to be a rectangle whose width is equal to the full projected width of the bottom at the step.

The load on such area shall be so distributed that its intensity is 50 per cent greater at the keel than at the chine and 50 per cent greater on the section at the step than on the forward section. The volume of the prismoidal loading curve so obtained, from which the intensities may be computed, shall equal the gross weight of the airplane times a *limit* load factor of 5.33. The minimum *ultimate* factor of safety shall be 1.5.

(a) For this condition and load factor:

$$nW=\frac{25abL}{16}, \text{ where}$$

$n$=*limit* load factor=5.33,
$a$=intensity of loading at the chine at the forward section,
$b$=the beam and
$L$=half the length of the load water line forward of the step.

The centroid of this loading may be assumed to be on the keel $8L/15$ from the forward edge of the load, and the resultant water reaction shall pass through this centroid and the center of gravity of the airplane.

(b) The forces representing the weights of and in the airplane shall act in a direction parallel to the water reaction.

04.255. *Two-wave landing (boat seaplane).*—The aircraft shall be assumed to be supported by vertically applied up loads at each end of the load water line, the magnitude of each load being such that the resultant load passes through the main step and equals the gross weight of the airplane. The *limit* shear loads and bending moments shall be computed by assuming the gross weight of the airplane to be concentrated at the step and omitting all panelpoint loads. The structure at the point of application of the external loads need not be investigated for local stresses in this condition. The minimum *ultimate* factor of safety shall be 1.50.

04.256. *Bottom loading (boat seaplane).*—The bottom plating, stringers, frames and adjoining structure shall be investigated for the *limit* unit loading determined by the following conditions, using a minimum *ultimate* factor of safety of 1.5:

(a) The *limit* unit loading for that portion of the hull bottom just forward of the main step shall be that determined from CAR 04.254.

(b) The area from the forward end of the normal load water line to a point half-way between the step and the forward end of the normal load water line shall be designed to support a *limit* load having the unit pressure found at the forward portion of the chine in CAR 04.254.

(c) The area extending from the step to the rear end of the normal load water line shall be designed to support a *limit* load having a unit pressure equal to 50 per cent of the average *limit* unit pressure found in CAR 04.254.

04.257. *Seaplane float loads.*—Each main float of a float seaplane shall carry the following loads when supported at the attachment fittings as installed on the airplane. The minimum *ultimate* factor of safety shall be 1.5.

(a) A *limit* load, acting upward, applied at the bow end of the float and of magnitude equal to one-half of that portion of the airplane gross weight normally supported by the particular float.

(b) The *limit* load specified in paragraph (a), above, acting upward at the stern.

(c) A *limit* load, acting upward, applied at the step and of magnitude equal to 1.33 times that portion of the airplane gross weight normally supported by the particular float.

04.2570. *Seaplane float bottom loads.*—Main seaplane float bottoms shall be designed to withstand the following loads. The minimum *ultimate* factor of safety shall be 1.5.

(a) A *limit* load of at least 5.33 pounds per square inch over that portion of the bottom lying between the first step and a section at 25 per cent of the distance from the step to the bow.

(b) A *limit* load of at least 2.67 pounds per square inch over that portion of the bottom lying between the section at 25 per cent of the distance from the step to the bow and a section at 75 per cent of the distance from the step to the bow.

(c) A *limit* load of at least 2.67 pounds per square inch over that portion of the bottom lying between the first and second steps. If only one step is used, this load shall extend over that portion of the bottom lying between the step and a section at 50 per cent of the distance from the step to the stern.

04.258. *Wing-tip float loads.*—Wing-tip floats and their attachment, including the wing structure, shall be analyzed for each of the following conditions, using a minimum *ultimate* factor of safety of 1.5:

(a) A *limit* load acting vertically up at the completely submerged center of buoyancy and equal to three times the completely submerged displacement.

(b) A *limit* load inclined upward at 45° to the rear and acting through the completely submerged center of buoyancy and equal to three times the completely submerged displacement.

(c) A *limit* load acting parallel to the water surface (laterally) applied at the center of area of the side view and equal to one and one-half times the completely submerged displacement.

04.2580. The primary wing structure shall incorporate sufficient extra strength to insure that failure of wing-tip float attachment members occurs before the wing structure is damaged.

04.259. *Miscellaneous water loads.*—

04.2590. *Seawing loads.*—Special rulings shall be obtained from the Secretary for the strength requirements for seawings.

04.26. *Special loading conditions.*—

04.260. *Engine torque.*—In the case of engines having five or more cylinders the stresses due to the torque load shall be multiplied by a *limit* load factor of 1.5. For 4, 3 and 2 cylinder engines the *limit* load factors shall be 2, 3 and 4 respectively. The torque acting on the airplane structure shall be computed for the take-off power, and the propeller speed corresponding thereto, for which the aircraft is certificated. (See CAR 04.744.) The engine mount and forward portion of the fuselage and nacelles shall be designed for this condition. The minimum *ultimate* factor of safety shall be 1.5, except that higher factors may be prescribed by the Secretary when it appears necessary to make special provision for conditions such as vibration, stress concentration and fatigue.

04.261. *High angle of attack and torque.*—The *limit* loads determined from CAR 04–260 shall be considered as acting simultaneously with 75 per cent of the *limit* loads determined from Condition I (CAR 04.2131). The engine mount, nacelles and forward portion of the fuselage (when a nose engine is installed) shall be designed for this condition. The minimum *ultimate* factor of safety shall be 1.5.

04.262. *Side load on engine mount.*—The *limit* load factor for this condition shall be equal to one-third of the limit load factor for Flight Condition I (CAR 04.2131) but shall in no case be less than 1.33. The engine mount and forward section of the fuselage and nacelles shall be analyzed for this condition, considering the limit load to be produced by inertia forces. The minimum *ultimate* factor of safety shall be 1.5.

04.263. *Up load on engine mount.*—For engine mounts the *limit* load in each member shall be arbitrarily assumed as 50 per cent of that in the level landing condition but of opposite sign. The minimum *ultimate* factor of safety shall be 1.5.

04.264. *Passenger loads.*—Passenger loads in the accelerated flight conditions shall be computed for a standard passenger weight of 170 pounds and a minimum *ultimate* factor of safety of 1.50 shall be used, except that seats and berths need not be designed for the reduced weight gust conditions specified in CAR 04.2160. This shall not exempt the primary structure from such gust conditions.

04.2640. Structures to which safety belts are attached shall be capable of withstanding an *ultimate* load of 1,000 pounds per person applied through the safety belt and directed upward and forward at an angle of 45 degrees with the floor line.

04.265. *Local loads.*—The primary structure shall be designed to withstand local loads caused by dead weights and control loads. Baggage compartments shall be designed to withstand loads corresponding to the maximum authorized capacity. The investigation of dead weight loads shall include a sufficient number of reduced weight gust conditions to insure that the most severe combinations have been investigated. See CAR 04.90 for standard weights.

04.266. *Rigging loads.*—Structures braced by wires (or tie-rods) shall be capable of developing an ultimate factor of safety of 1.5 with respect to the *limit* loads due to rigging the wires to 20 per cent of their rated strength (strength of wire, not terminal). When the structure is such that all wires cannot be simultaneously rigged to 20 per cent of their rated loads, a rigging condition shall be assumed in which the average of the rigging loads, expressed in per cent, equals 20. (See also CAR 04.274.) The above condition need not be superimposed on other loading conditions, but the Secretary may require additional investigation for residual rigging loads when such investigation appears necessary. (See also CAR 04.315.)

04.267. *Air loads on struts.*—External wing-brace struts which are at an angle of more than 45 degrees with the plane of symmetry and which have a cross-sectional fineness ratio of more than 3 shall be assumed to act as lifting airfoils and shall be designed to carry the resultant transverse loads in combination with the specified axial loads. In computing the *limit* loads the strut sections shall be assumed to have a normal force coefficient equal to 1.0 and the total air load shall be based on the exposed area of the strut. The chord components and vertical reactions of such air load and the lift contributed by the strut shall not be considered in the analysis of the wing.

04.27. *Multiplying factors of safety.*—

04.270. *General.*—In addition to the minimum factors of safety specified for each loading condition, the multiplying factors specified in Table 04–7 and the following paragraphs shall be incorporated in the structure. The total factor of safety required for any structural component or part equals the minimum factor of safety specified for the loading condition in question multiplied by the factors of safety hereinafter specified, except that certain multiplying factors may be included in others, as indicated in Table 04–7.

04.271. *Fittings.*—All fittings in the primary structure shall incorporate the multiplying factor of safety specified in Table 04–7. For this purpose fittings are defined as parts used to connect one primary member to another and shall include the bearing of those parts on the members thus connected. Continuous joints in metal plating and welded joints between primary structural members are not classified as fittings. (See also CAR 04.4030 and 04.4031.)

04.272. *Castings.*—All castings used in the primary structure shall incorporate a multiplying factor of safety not less than that specified in Table 04–7.

04.273. *Parallel double wires.*—When parallel double wires are used in wing lift trusses each wire shall incorporate a multiplying factor of safety not less than that specified in Table 04–7.

04.274. *Wires at small angles.*—Wire or tie-rod members of wing or tail surface external bracing shall incorporate a multiplying factor of safety computed as follows:

$K=L/2R$ (except that $K$ shall not be less than 1.0), where
$K$=the additional factor,
$R$=the reaction resisted by the wire in a direction normal to the wing or tail surface plane, and
$L$=the load required in the wire to balance the reaction $R$.

04.275. *Double drag trusses.*—Whenever double drag trussing is required by CAR 04.412, all drag wires shall incorporate a multiplying factor of safety varying linearly from 3.0, when the ratio of overhang to root chord of overhang is 2.0 or greater, to 1.20 when such ratio is 1.0 or less, assuming an equal division of drag load between the two systems.

04.276. *Torque tubes used as hinges.*—When steel torque tubes are employed in direct bearing against strap-type hinges they shall incorporate a multiplying factor of safety at the hinge point not less than that specified in Table 04–7. (See also CAR 04.422.)

04.277. *Control surface hinges and control system joints.*—Control surface hinges and control system joints subjected to angular motion, excepting ball or roller bearings and AN standard parts used in cable control systems, shall incorporate multiplying factors of safety not less than those specified in Table 04–7 with respect to the *ultimate* bearing strength of the softest material used as a bearing. For ball or roller bearings a *yield* factor of safety of 1.0 with respect to the manufacturer's non-Brinell rating is considered sufficient to provide an adequate *ultimate* factor of safety.

04.278. *Wire sizes.*—(See CAR 04.403, 04.4032 and 04.412.)

04.3. *Proof of structure.*—

04.30. *General.*—Proof of compliance with the loading requirements outlined in CAR 04.2 shall be made in a manner satisfactory to the Secretary and may consist of structural analyses, load test, flight tests, references to previously approved structures, or combinations of the above. Any condition which can be shown to be noncritical need not be further investigated.

04.300. *Proof of structural analysis*—Structural analyses will be accepted as complete proof of strength only in the case of structural arrangements for which experience has shown such analyses to be reliable. References shall be given for all methods of analysis, formulae, theories and material properties which are not generally accepted as standard. The acceptability of a structural analysis will depend to some extent on the excess strength incorporated in the structure.

04.3000. The structural analysis shall be based on guaranteed minimum mechanical properties of the materials specified on the drawings, except in cases where exact mechanical properties of the materials used are determined.

04.3001. The effects of welding, form factors, stress concentrations, discontinuities, cut-outs, instability, end fixity of columns and vibration shall be accounted for when such factors are present to such an extent as to influence the strength of the structure.

04.301. *Combined structural analysis and tests.*—In certain cases it will be satisfactory to combine structural analysis procedure with the results of load tests of portions of the structure not subject to accurate analysis. In such cases test results shall be reduced to correspond to the mechanical properties of the materials actually used in the airplane. When a unit other than the specific one tested is incorporated in the airplane presented for certification, test results shall be reduced to correspond to the minimum guaranteed mechanical properties of the materials specified on the drawings.

04.302. *Load tests.*—Proof of compliance with structural loading requirements by means of load tests only is acceptable provided that strength and proof tests (See CAR 04.126 and 04.127) are conducted to demonstrate compliance with CAR 04.200 and 04.201, respectively, and further provided that the following sub-paragraphs are complied with.

04.3020. The tests shall be supplemented by special tests or analyses to prove compliance with multiplying factor of safety requirements. (See CAR 04.27.)

04.3021. When a unit other than the specific one tested is incorporated in the airplane presented for certification, the results of *strength* tests shall be reduced to correspond to the minimum guaranteed mechanical properties of the ma-

terials specified on the drawings, unless test loads are carried at least 15 percent beyond the required values.

04.3022. The determination of test loads, the apparatus used and the methods of conducting the tests shall be satisfactory to the Secretary.

04.3023. The tests shall be conducted in the presence of a representative of the Bureau unless otherwise directed by the Secretary.

04.303. *Flight load tests.*—Proof of strength by means of flight load tests will not be accepted unless the necessity therefor is established and the test methods are proved suitable to the satisfaction of the Secretary.

04.304. *Load tests required.*—The following load tests are required in all cases and shall be made in the presence of a representative of the Bureau unless otherwise directed by the Secretary:

(a) Strength tests of wing ribs. (See CAR 04.313.)

(b) Pressure tests of fuel and oil tanks. (See CAR 04.623.)

(c) Proof tests of tail and control surfaces. (See CAR 04.32.)

(d) Proof and operating tests of control systems. (See CAR 04.33 and CAR 04.331.)

04.31. *Proof of wings.*—Proof of wings by structural analysis only shall be in accordance with CAR 04.300 except that the strength of stressed-skin wings shall be substantiated by load tests (CAR 04.302) or by combined structural analysis and tests (CAR 04.301).

04.310. *Redundancies.*—Wing cellules in which the division of loading between lift trusses and drag trusses is indeterminate shall be analyzed either by an acceptable method for indeterminate structures or by making assumptions which result in conservative design loads for all members.

04.311. *Beams.*—The following points shall be covered in the proof of strength of wing beams, in addition to any special types of possible failure peculiar to the structure.

04.3110. *Secondary bendings.*—When axial loads are present the required minimum *ultimate* factor of safety shall be introduced before the computation of the bending moments in order to insure that the required *ultimate* loads can be supported by the structure.

04.3111. *Lateral buckling.*—The ability of beams to resist lateral buckling shall be proved.

04.3112. *Webs.*—The strength of shear webs shall be proved.

04.3113. When axial load is present tests are required to determine the effective "EI" in the case of truss-type beams and beams having unconventional web construction.

04.3114. *Joint slippage in wood beams.*—When a joint in a wood beam is designed to transmit bending from one section of the beam to another or to the fuselage, the stresses in each part of the structure shall be calculated on the assumption that the joint is 100 per cent efficient (except in mid-bay for which see CAR 04.4110) and also under the assumption that the bending moment transmitted by the joint is 75 percent of that obtained under the assumption of perfect continuity. Each part of the structure shall be designed to carry the most severe loads determined from the above assumptions.

04.3115. *Bolt holes.*—In computing the area, moment of inertia, etc., of wood beams pierced by bolts, the diameter of the bolt hole shall be assumed to be one-sixteenth inch greater than the diameter of the bolt.

04.3116. In computing the ability of box beams to resist bending loads only that portion of the web with its grain parallel to the beam axis and one-half of that portion of the web with its grain at an angle of 45° to the beam shall be considered. The more conservative method of neglecting the web entirely may be employed.

04.312. *Drag trusses.*—Drag struts shall be assumed to have an end fixity coefficient of 1.0 except in cases of unusually rigid restraint, in which a coefficient of 1.5 may be used.

04.313. *Ribs.*—Structural analysis of ribs, or their equivalent, is not acceptable as a satisfactory means of demonstrating their strength. Tests to at least 125% of the required *ultimate* load, and covering the most severe loading conditions for the ribs, are required. The following points shall apply in proving the strength of ribs.

04.3130. The load shall be suitably distributed between upper and lower wing surfaces unless a more severe distribution is used.

04.3131. The effects of ailerons and high-lift devices shall be properly accounted for.

04.3132. Rib tests shall simulate conditions in the airplane with respect to torsional rigidity of spars, fixity conditions, lateral support and attachment to spars.

04.314. *Covering.*—Proof of strength of fabric covering is not required when standard grades of cloth and methods of attaching and doping are employed provided, however, that the Secretary may require special tests when it appears necessary to account for the effects of unusually high design airspeeds or slipstream velocities, or similar factors. When metal covering is employed its ability to perform its structural function shall be demonstrated by tests of typical panels or by other means acceptable to the Secretary. In particular, compliance with CAR 04.201 requires demonstration of the behavior of the covering under load in order to determine the effects of temporary deformations (wrinkles).

04.315. *Non-parallel wires.*—When two or more wires are attached to a common point on the wing, but are not parallel, proper allowance for redundancies and the effects of rigging shall be made.

04.32. *Proof of tail and control surfaces.*—Structural analyses of tail and control surfaces will be accepted as complete proof of compliance with *ultimate* load requirements only when the structure conforms with conventional types for which reliable analytical methods are available. Proof tests as defined in CAR 04.127 are required to prove compliance with *yield* load requirements.

04.320. Control surface tests shall include the horn or fitting to which the control system is attached.

04.321. In the analysis of control surfaces proper allowance shall be made for rigging loads in brace wires in cases where the counter wires do not go slack before the *ultimate* load is reached.

04.322. Analyses or individual load tests shall be conducted to demonstrate compliance with the multiplying factor of safety requirements outlined in CAR 04.27 for control surface hinges and brace wires.

04.33. *Proof of control systems.*—Structural analyses of control systems will be accepted as complete proof of compliance with *ultimate* load requirements only when the structure conforms with conventional types for which reliable analytical methods are available. Proof tests as defined in CAR 04.127 are required to prove compliance with *yield* load requirements.

04.330. In control system tests, the direction of test loads shall be such as to produce the most severe loading of the control system structure. The tests shall include all fittings, pulleys and brackets used to attach the control system to the primary structure.

04.331. *Operation test.*—An operation test shall be conducted by operating the controls from the pilot's compartment with the entire system so loaded as to correspond to the minimum *limit* control force specified for the design of the control system. (See Table 04–6.) In this test there shall be no jamming, excessive friction or excessive deflection.

04.332. Analyses or individual load tests shall be conducted to demonstrate compliance with the multiplying factor of safety requirements specified in CAR 04.27 for control system joints subjected to angular motion.

04.34. *Proof of landing gear.*—Structural analyses of landing gear will be accepted as complete proof of compliance with load requirements only when the structure conforms with conventional types for which reliable analytical methods are available. Analyses may be used to demonstrate compliance with the energy absorption requirements in certain cases. When such analyses are not applicable, dynamic tests shall be conducted to demonstrate compliance with energy absorption requirements.

04.340. *Energy absorption tests.*—When tests for energy absorption are required they shall be so conducted as to simulate the landing conditions for which energy absorption requirements are specified in CAR 04.440, and test data shall be obtained from which the maximum acceleration developed at the center of gravity of the airplane can be determined. When drop tests of wheels, tires and shock absorbers are conducted in a combination differing from that employed on the airplane, proper allowance and corrections shall be made for the errors thus introduced.

04.35. *Proof of hulls and floats.*—Structural analyses of hulls and auxiliary floats will be accepted as complete proof of compliance with load requirements only when the structure conforms with conventional types for which reliable analytical methods are available. The strength of the structure as a whole and its ability to distribute water loads from the bottom plating into the main structural members shall be demonstrated. See CAR 15 for the requirements for main floats.

04.36. *Proof of fuselages and engine mounts.*—Structural analyses of fuselages and engine mounts will be accepted as complete proof of compliance with load requirements only when the structure conforms with conventional types for which reliable analytical methods are available.

04.360. The end fixity coefficient used in determining critical column loads shall in no case exceed 2.0. A value of 1.0 shall be used for all members in the engine mount. In doubtful cases, tests are required to substantiate the degree of restraint assumed.

04.361. *Baggage compartments.*—The ability of baggage compartments to sustain the maximum authorized baggage loads under all required flight and landing conditions shall be demonstrated.

04.37. *Proof of fittings and parts.*—Proof of strength of all fittings and joints of the primary structure is required. Where applicable, structural analysis methods may be used. When such methods are inadequate, a load test is required. Compliance with the multiplying factor of safety requirements for fittings (CAR 04.27) shall be demonstrated.

04.370. Since the system of forces which designs a fitting does not necessarily include the forces which design the attaching members, all the forces acting in all the specified conditions shall be considered for every fitting. The strength of each part of a built-up fitting shall be investigated and proper allowance shall be made for the effects of eccentric loading when initially present or when introduced by deflection of the structure under load.

04.371. *Bolts.*—The allowable bearing load assumed for the threaded portion of a bolt shall not exceed 25 per cent of the rated shear strength of the bolt.

04.4. *Detail design and construction.*—

04.40. *General.*—The primary structure and all mechanisms essential to the safe operation of the airplane shall not incorporate design details which experience has shown to be unreliable or otherwise unsatisfactory. The suitability of all design details shall be established to the satisfaction of the Secretary. Certain design features which have been found to be essential to the airworthiness of an airplane are hereinafter specified and shall be observed.

04.400. *Materials and workmanship.*—The primary structure shall be made from materials which experience or conclusive tests have proved to be uniform in quality and strength and to be otherwise suitable for airplane construction. Workmanship shall be of sufficiently high grade as to insure proper continued functioning of all parts.

04.401. *Fabrication methods.*—The methods of fabrication employed in constructing the primary structure shall be such as to produce a uniformly sound structure which shall also be reliable with respect to maintenance of the original strength under reasonable service conditions.

04.4010. *Gluing.*—Gluing may be used except in cases where inferior joints might result or where proper protection from moisture cannot be shown.

04.4011. *Torch welding.*—Torch welding of primary structural parts may be used only for ferrous materials and for such other materials shown to be suitable therefor.

04.4012. *Electric welding.*—Electric arc, spot or seam welding may be used in the primary structure when specifically approved by the Secretary for the application involved. Requests for approval of the use of electric welding shall be accompanied by information as to the extent to which such welding is to be used, drawings of the parts involved, apparatus employed, general methods of control and inspection, and references to test data substantiating the strength and suitability of the welds obtained.

04.4013. *Brazing and soldering.*—The use of brazing and soldering in joining parts of the primary structure is prohibited except that brazing may be used in special cases when the suitability of the method and application can be definitely established to the satisfaction of the Secretary.

04.4014. *Protection.*—All members of the primary structure shall be suitably protected against deterioration or loss of strength in service due to corrosion, abrasion, vibration or other causes. This applies particularly to design details and small parts. In seaplanes special precautions shall be taken against corrosion from salt water, particularly where parts made from different metals are in close proximity. All exposed wood structural members shall be given at least two protective coatings of varnish or approved equivalent. Built-up box spars and similar structures shall be protected on the interior by at least one coat of varnish or approved equivalent and adequate provisions for drainage shall be made. Due care shall be taken to prevent coating of the gluing surfaces.

04.4015. *Inspection.*—Inspection openings of adequate size shall be provided for such vital parts of the aircraft as require periodic inspection.

04.402. *Joints, fittings and connecting parts.*—In each joint of the primary structure the design details shall be such as to minimize the possibility of loosening of the joint in service, progressive failure due to stress concentration, and damage caused by normal servicing and field operations. (See CAR 04.271 for multiplying factors of safety required.)

04.4020. *Bolts, pins and screws.*—All bolts and screws in the structure shall be of uniform material of high quality and of first-class workmanship. Machine screws shall not be used in the primary structure unless specifically approved for such use by the Secretary. The use of an approved locking device or method is required for all bolts, pins and screws.

04.4021. *Wood screws.*—The use of wood screws in the primary structure is prohibited except in special cases when the suitability of the particular application is proved to the satisfaction of the Secretary.

04.4022. *Eyebolts.*—Special eyebolts and similar special bolts shall have a fillet between the head and the shank of at least ¼ the diameter of the bolt when used in control surfaces or at other locations where they might be subjected to bending or vibration.

04.4023. *Castings.*—Castings used in the primary structure shall incorporate the multiplying factor of safety specified in CAR 04.272 and shall be of such material and design as to insure the maximum degree of reliability and freedom from defects. The Secretary reserves the right to prohibit the use of castings where such use is deemed to be unairworthy.

04.403. *Tie-rods and wires.*—The minimum size of tie-rod which may be used in primary structure is No. 6–40. The corresponding minimum allowable size of single-strand hard wire is No. 13 (0.072-inch diameter).

04.4030. *Wire terminals.*—The assumed terminal efficiency of single-strand hard wire shall not be greater than 85 per cent.

04.4031. *Wire anchorages.*—A fitting attached to a wire or cable up to and including the 3,400-pound size shall have at least the rated strength of the wire or cable, and the multiplying factor of safety for fittings (CAR 04.271) is not required in such cases. In the case of fittings to which several tie-rods or wires are attached, this requirement applies separately to each portion of the fitting to which a tie-rod or wire is attached, but does not require simultaneous application of rated wire loads. The end con-

nections of brace wires shall be such as to minimize restraint against bending or vibration.

04.4032. *Counter wire sizes.*—(See also CAR 04.274 and 04.275.) In a wire-braced structure the wire sizes shall be such that any wire can be rigged to at least 10 per cent of its rated strength without causing any other wire to be loaded to more than 20 per cent of its rated strength. As used here "rated strength" refers to the wire proper, not the terminal.

04.404. *General flutter prevention measures.*—The Secretary reserves the right to require special provisions against flutter in any case when such provisions appear to him to be necessary.

04.4040. *Vibration tests.*—Experimental determination of the natural frequency of vibration of certain components of the airplane is required in cases when there are indications of dangerously low frequencies or of coincidence of the natural frequencies of two or more separate structural components.

04.41. *Detail design of wings.*—

04.410. *External bracing.*—When streamline wires are used for external lift bracing they shall be double unless the design complies with the lift-wire-cut condition specified in CAR 04.2161. (See also CAR 04.273.)

04.4100. *Wire-braced monoplanes.*—If monoplane wings are externally braced by wires only, the right and left sides of the bracing shall be independent of each other so that an unsymmetrical load from one side will not be carried through the opposite wires before being counteracted, unless the design complies with the following conditions:

(a) The minimum true angle between any external brace wire and a spar is 14°.

(b) The counter (landing) wires are designed to remain in tension at least up to the *limit* load.

(c) The landing and flying wires are double.

04.4101. Multiple-strand cable shall not be used in lift trusses.

04.4102. *Jury struts.*—Clamps shall not be used for the attachment of jury struts.

04.411. *Wing beams.*—Provisions shall be made to reinforce wing beams against torsional failure, especially at the point of attachment of lift struts, brace wires and aileron hinge brackets.

04.4110. *Wing beam joints.*—Joints in metal beams (except pinned joints) and joints in mid-bays of wood beams shall maintain 100 per cent efficiency of the beam with respect to bending, shear and torsion.

04.412. *Drag truss.*—Fabric-covered wing structures having a cantilever length or overhang such that the ratio of span of overhang to chord at root of overhang is greater than 1.75 shall have a double system of internal drag trussing spaced as far apart as possible, or other means of providing equivalent torsional stiffness. In the former case counter wires shall be of the same size as the drag wires. (See also CAR 04.275.)

04.4120. Multiple-strand cable shall not be used in drag trusses unless such use is substantiated to the satisfaction of the Secretary.

04.413. *Aileron and flap attachments.*—Aileron and flap attachment ribs or brackets shall be rigidly constructed and firmly attached to the main wing structure in order to reduce wing flutter tendencies.

04.414. *Internally-braced biplanes.*—Internally-braced biplanes shall be provided with N or I struts to equalize deflections, and the effect of such struts shall be considered in the stress analysis.

04.415. *Fabric covering.*—Fabric covering shall comply with the requirements of CAR 04.400 and shall be attached in a manner which will develop the necessary strength, with due consideration for slip-stream effects. (See CAR 04.314.)

04.416. *Metal-covered wings.*—The detail design of such wings shall incorporate suitable provision against buckling or wrinkling of metal covering as specified in CAR 04.201 and 04.314.

04.417. *Lift truss system.*—All structural members in the wing lift truss system which transmit direct loads from the landing gear shall be overstrength with respect to landing loads, so as to reduce the probability of damaging the wing in severe landings. This will require that, for any given landing condition, the minimum margin of safety in the lift truss structure shall be greater than the minimum margin of safety in the landing gear structure for the same condition.

04.42. *Detail design of tail and control surfaces.*—

04.420. *Installation.*—Movable tail surfaces shall be so installed that there is no interference between the surfaces or their bracing when any one is held in its extreme position and any other is operated through its full angular movement.

04.421. *Stops.*—When an adjustable stabilizer is used, stops shall be provided at the stabilizer to limit its movement, in the event of failure of the adjusting mechanism, to a range equal to the maximum required to balance the airplane. (See also CAR 40.4261.)

04.422. *Hinges.*—Hinges of the strap type bearing directly on torque tubes are permissible only in the case of steel torque tubes which have a multiplying factor of safety as specified in CAR 04.276. In other cases sleeves of suitable material shall be provided for bearing surfaces.

04.4220. Clevis pins may be used as hinge pins provided that they are made of material conforming with, or the equivalent of, S. A. E. Specification 2330.

04.423. *Elevators.*—When separate elevators are used they shall be rigidly interconnected.

04.424. *Ailerons.*—Ailerons attached to internally-braced wings, to wings braced by wires only or to wings which in the opinion of the Secretary are susceptible to flutter, shall be statically balanced about their hinge lines when in the neutral position. A special ruling shall be obtained from the Secretary when such balance is obtained by means of a single balance weight for each aileron, or when the aileron control system is irreversible.

04.425. *Wing flaps.*—Flaps shall be so installed as not to induce flutter or appreciable buffeting.

04.426. *Tabs.*—Control surface trailing-edge tabs shall be statically balanced about their hinge lines unless and irreversible non-flexible tab control system is used. The installation shall be such as to prevent development of any free motion of the tab.

04.4260. When trailing-edge tabs are used to assist in moving the main surface (balancing tabs), care shall be taken in proportioning areas and relative movements so that the main surface is not aerodynamically overbalanced at any time.

04.4261. Elevator trailing-edge tab systems shall be equipped with stops which limit the travel of the tab to the angular values provided for in the structural report. The range of tab movement shall be sufficient to result in a speed of not more than 90 miles per hour in a glide with power off, under the loading condition of most forward center of gravity certified.

04.427. *Tail surface balancing.*—In the case of airplanes having a high speed in level flight greater than 150 miles per hour, the dynamic balance coefficient of the rudder and of each separate elevator as computed about the point of intersection of the hinge line with the center line of the fuselage shall be not more than 0.08. This coefficient is non-dimensional and consists of a fraction whose numerator is the resultant weight product of inertia of the control surface and whose denominator is equal to the weight multiplied by the aerodynamic area of the control surface. The resultant product of inertia is obtained from the algebraic sum of the products of inertia in the four quadrants, considering the products of inertia in the first and third quadrants as positive and those in the second and fourth quadrants as negative. If the rudder is completely mass-balanced the requirements for elevators may be modified upon application to the Secretary.

04.43. *Detail design of control systems.*—

04.430. *Installation.*—Proper precautions shall be taken with respect to control systems to eliminate the possibility

of jamming, interference from cargo, passengers or loose objects, and chafing or slapping of cables against parts of the airplane. All pulleys shall be provided with satisfactory guards. A control column or stick located between a pilot and a passenger shall not be used unless a throw-over type of wheel control is incorporated.

04.431. *Stops.*—All control systems shall be provided with stops which positively limit the range of motion of the control surfaces. Stops shall be capable of withstanding the loads corresponding to the design conditions for the control system.

04.432. *Joints.*—Bolts with castellated nuts safetied with cotter pins or with an approved type of self-locking nut shall be used throughout the control system, except that the use of clevis pins in standard cable ends, thimbles and shackles is satisfactory for light airplanes as defined in CAR 04.01.

04.433. *Welds.*—Welds shall not be employed in control systems to carry tension without reinforcement from rivets or bolts.

04.434. *Flap controls.*—The flap operating mechanism shall be such as to prevent sudden, inadvertent or automatic opening of the flap at speeds above the design speed for the extended flap conditions. The time required to fully extend or retract flaps shall not be less than 15 seconds, unless it can be demonstrated to the satisfaction of the Secretary that the operation of the flaps in a lesser time does not result in unsatisfactory flight characteristics. Means shall be provided to retain flaps in their fully retracted position and to indicate such position to the pilot.

04.435. *Tab controls.*—Tab controls shall be irreversible and non-flexible, unless the tab is statically balanced about its hinge line. Proper precautions shall be taken against the possibility of inadvertent or abrupt tab operation and operation in the wrong direction.

04.4350. When adjustable elevator tabs are used for the purpose of trimming the airplane, a tab position indicator shall be installed and means shall be provided for indicating to the pilot a range of adjustment suitable for safe take-off and the directions of motion of the control for nose-up and nose-down motions of the airplane.

04.436. *Spring devices.*—The use of springs in the control system either as a return mechanism or as an auxiliary mechanism for assisting the pilot (bungee device) is prohibited except under the following conditions:

(a) The airplane shall be satisfactorily maneuverable and controllable and free from flutter under all conditions with and without the use of spring device.

(b) In all cases the spring mechanism shall be of a type and design satisfactory to the Secretary.

(c) Rubber cord shall not be used for this purpose.

04.437. *Single-cable controls.*—Single-cable controls are prohibited except in special cases in which their use can be proved to be satisfactory.

04.438. *Control system locks.*—When a device is provided for locking the control surfaces in position while the aircraft is on the ground or water, the following provisions shall apply:

(a) The locking device shall be so installed that it can be completely released from all controls with ease and rapidity by a person sitting in either pilot's seat.

(b) For landplanes the device shall be so installed that, until released to provide full manipulation of all controls, it presents a definite obstruction to taxiing the aircraft or starting a take-off. This shall be accomplished by locking the throttle control or by some equally effective measure. For seaplanes the device may, if desired, be so installed as to permit maneuvering on the water with the controls locked, but in any event the means of locking shall definitely prevent the seaplane from being taken into the air.

04.44. *Detail design of landing gear.*—

04.440. *Shock absorption.*—All landing gear (including tail gear installations) shall be provided with shock-absorbing systems which will permit the airplane to be landed under the conditions specified in CAR 04.2411 and CAR 04.2420 without exceeding the ultimate load used in the analysis of any landing gear member. (See CAR 04.340 for proof of absorption capacity.) If the design of the shock-absorbing system is such that the above method of specifying the required energy absorption capacity appears to give irrational results, an alternate method will be considered upon presentation of pertinent data.

04.441. *Shock-absorbing systems.*—The shock-absorbing systems employed shall incorporate suitable means for absorbing the shocks developed in taxiing or running over rough ground.

04.442. *Wheels.*—Main landing gear wheels shall be of a type or model certificated by the Secretary in accordance with the provisions of CAR 15 and shall not be subjected to static loads in excess of those for which they are certificated. Tail wheels may be of any type or model and are not certificated. Nose wheels are subject to special rulings to be made by the Secretary.

04.4420. For the purpose of these regulations main landing gear wheels are considered as those nearest the airplane center of gravity with respect to fore-and-aft location.

04.4421. For the purpose of these regulations a tail wheel is considered as one which supports the tail of a conventional airplane in the three-point landing attitude. A nose wheel is considered to be a wheel supporting the nose of the airplane when the two main wheels are located behind the center of gravity.

04.443. *Tires.*—A landing gear wheel may be equipped with any make or type of tire, provided that the tire is a proper fit on the rim of the wheel and provided that the tire manufacturer's recommended load rating is not exceeded.

04.4430. When specially constructed tires are used to support an airplane, the wheels shall be plainly and conspicuously marked to that effect. Such markings shall include the make, size, number of plies and identification marking of the proper tire.

04.444. *Retracting mechanism.*—When retractable landing wheels are used, visual means shall be provided for indicating to the pilot, at all times, the position of the wheels. Separate indicators for each side are required when each side is separately operated unless a single indicator is obviously satisfactory. In addition, an aural or other equally effective indicator shall be provided and shall function continuously after the throttle is closed until the gear is down and locked.

04.4440. A positive lock shall be provided for the wheels in the extended position, unless a rugged irreversible mechanism is used.

04.4441. Manual operation of retractable landing gears shall be provided for.

04.45. *Hulls and floats.*—(See also CAR 04.46.)

04.450. *Buoyancy (main seaplane floats).*—Main seaplane floats shall have a buoyancy in excess of that required to support the gross weight of the airplane in fresh water as follows:

(a) 80 per cent in the case of single floats,

(b) 90 per cent in the case of double floats.

04.4500. Main seaplane floats for use on aircraft of 2500 pounds or more maximum authorized weight shall contain at least five water-tight compartments of approximately equal volume. Main seaplane floats for use on aircraft of less than 2500 pounds maximum authorized weight shall contain at least four such compartments.

04.451. *Buoyancy (boat seaplanes.)*—The hulls of boat seaplanes and amphibians shall be divided into water-tight compartments in accordance with the following requirements:

(a) In aircraft of 5,000 pounds maximum authorized weight or more the compartments shall be so arranged that, with any two adjacent compartments flooded, the hull and auxiliary floats (and tires, if used) will retain sufficient buoyancy to support the gross weights of the aircraft in fresh water.

and 04.314.

with respect to control systems to eliminate the possibility

(b) In aircraft of 1,500 to 5,000 pounds maximum authorized weight the compartments shall be so arranged that, with any one compartment flooded, the hull and auxiliary floats (and tires, if used) will retain sufficient buoyancy to support the maximum authorized weight of the aircraft in fresh water.

(c) In aircraft of less than 1,500 pounds maximum authorized weight water-tight subdivision of the hull is not required.

(d) Bulkheads may have water-tight doors for the purpose of communication between compartments.

04.452. *Water stability.*—Auxiliary floats shall be so arranged that when completely submerged in fresh water, they will provide a righting moment which is at least 1.5 times the upsetting moment caused by the aircraft being tilted. A greater degree of stability may be required in the case of large flying boats, depending on the height of the center of gravity above the water level, the area and location of wings and tail surfaces, and other considerations.

04.453. *Float design.*—In designing the bow portion of floats and hulls suitable provision shall be made for the effects of striking floating objects.

04.46. *Fuselage and cabins.*—

04.460. *Provision for turn-over.*—The fuselage and cabins shall be designed to protect the passengers and crew in the event of a complete turn-over and adequate provision shall be made to permit egress of passengers and crew in such event. This requirement may be suitably modified when the possibility of a complete turn-over in landing is remote. (See also CAR 04.247 for loading requirements.

04.461. *Doors.*—Closed cabins on all aircraft carrying passengers shall be provided with at least one adequate and easily accessible external door.

04.4610. No passenger door shall be located in the plane of rotation of a propeller, nor within 5° thereof as measured from the propeller hub.

04.4611. The passenger door on landplanes certificated for airline service shall be located on the left-hand side of the cabin.

04.462. *Exits.*—Closed cabins on aircraft carrying more than 5 passengers shall be provided with emergency exits, in addition to the one external door required by CAR 04.461, consisting of movable windows or panels or of additional external doors which provide a clear and unobstructed opening, the minimum dimensions of which shall be 19 inches by 26 inches if elliptical or rectangular, or 26 inches in diameter if circular. The location and the method of operation of emergency exits shall be approved by the Secretary. If the pilot is in a compartment separate from the cabin, passage through such compartment shall not be considered as an emergency exit for the passengers. The number of emergency exits required is as follows:

(a) Aircraft with a total seating capacity of more than 5 persons, but not in excess of 15, shall be provided with at least one emergency exit or one suitable door in addition to the main door specified in CAR 04.461. This emergency exit, or second door, shall be on the opposite side of the cabin from the main door. If desired, an additional emergency exit may be provided in the top of the cabin, but such an installation shall not obviate the necessity for an exit on each side.

(b) Aircraft with a seating capacity of more than 15 persons shall be provided with an additional emergency exit or door either in the top or side of the cabin for every additional 7 persons or fraction thereof above 15, except that not more than 4 exits, including doors, will be required if the arrangement and dimensions are suitable for the purpose intended.

04.463. *Pilot's compartment.*—The pilot's compartment shall be so constructed as to afford suitable ventilation and adequate vision to the pilot under normal flying conditions. In cabin aircraft the windows shall be so arranged that they may be readily cleaned or easily opened in flight to provide forward vision for the pilot. The ventilation requirements of CAR 04.467 shall also apply to the pilot's compartment.

04.4630. The pilot and the primary control units, excluding cables and control rods, shall be so located with respect to the propellers that no portion of the pilot or controls lies in the region between the plane of rotation of any propeller and the surface generated by a line passing through the center of the propeller hub and making an angle of 5° forward or aft of the plane of rotation of the propeller.

04.4631. A metal identification plate shall be permanently affixed in a visible location in the pilot's compartment of each airplane. This plate shall contain the manufacturer's name, the date of manufacture, the manufacturer's serial number and the model designation. The manufacturer shall specify the fuel capacity of each fuel tank on the manufacturer's identification plate, or on or adjacent to the fuel shut-off valves in the pilot's compartment.

04.4632. There shall be placed, in full view of the pilot, such placards as are required in CAR 04.74 (operation limitations) and in CAR 04.723 (emergency ceiling).

04.4633. The windows and windshields of the pilot's compartment in airplanes certificated for airline service shall be so arranged as to provide satisfactory forward vision and protection under all conditions and, to accomplish this, particular attention shall be paid to the following detail requirements:

(a) The windshield shall be constructed of high grade glass at least ⅜ inch thick and having at least 5 liminations held together with a strong binder, except that a substitute therefor is permissible provided that it has equivalent strength and satisfactory optical properties. The structure supporting the windshield shall be of equivalent strength.

(b) Windshields shall be so installed that they can be easily opened in flight and shall be so arranged that the air stream and snow or rain are deflected across the opening, or to provide equivalent results.

(c) The pilot's compartment shall be so constructed and arranged as to prevent glare or reflections which would interfere with the vision of either pilot, particularly while flying at night. The aircraft shall be flown by a Bureau representative during hours of darkness to determine compliance with this provision.

04.4634. The pilot's compartment in airplanes certificated for airline service shall be so constructed as to prevent any leakage into it when the airplane is flying in rain or snow.

04.4635. Two seats shall be installed side-by-side in the pilot's compartment of airplanes certificated for airline service from either of which the airplane shall be fully and readily controllable. If any difference exists as to convenience of the instruments and controls necessary for safe flight such difference should favor the left-hand seat. The left-hand seat shall be known as the first pilot's seat and the right-hand one as the second pilot's seat.

04.4636. The navigation instruments for use by the pilot in airplanes certificated for airline service shall be so installed as to be easily visible to him with the minimum practicable deviation from his normal position and line of vision when he is looking out and forward along the flight path and they shall also be visible to the second pilot.

04.4637. All airplanes certificated for airline service shall be provided with a door or an adequate openable window between the pilot's compartment and the passengers' cabin, which shall be so arranged as to permit direct oral communication between either pilot and the passengers. When a door is provided it shall be equipped with a locking means which shall prevent passengers from opening such door while in flight.

04.464. *Passenger chairs.*—Seats or chairs for passengers shall be securely fastened in place in both open and closed airplanes, whether or not the safety belt load is transmitted through the seat. (See CAR 15 and CAR 04.2640 for safety belt requirements.)

04.465. *Baggage compartments.*—Each baggage and mail compartment shall bear a placard stating the maximum allowable weight of contents, as determined by the structural strength of the compartment (CAR 04.265) and by flight test (CAR 04.742). Suitable means shall be provided to prevent the contents of mail and baggage compartments from shifting.

04.466. *Reinforcement near propellers.*—Surfaces near propeller tips shall be suitably stiffened against vibration and the effects of ice thrown from the propeller. (See CAR 04.611 for clearance requirements.)

04.467. *Passenger compartments.*—A suitable ventilation system shall be provided which will preclude the presence of fuel fumes and dangerous traces of carbon monoxide in each passenger compartment.

04.5. *Equipment.*—

04.50. *General.*—The equipment required shall be dependent upon the type of operation for which certification is to be made. The requirements specified herein (CAR 04.5) shall be the basic equipment requirements and such additional equipment as may be specified in other sections of the Civil Air Regulations for specific special cases shall be supplemental hereto unless otherwise specified.

04.500. Each item of equipment specified in the Civil Air Regulations shall be of a type and design satisfactory to the Secretary, shall be properly installed and shall function to the satisfaction of the Secretary. Items of equipment for which certification is required shall have been certificated in accordance with the provisions of CAR 15 or previous regulations.

04.501. An approved life preserver or flotation device is one approved by the Secretary for such usage on sea-going vessels.

04.502. Fire extinguishing apparatus approved by the Underwriters Laboratories is considered to be of an approved type.

04.503. Approved radio equipment is such as has been approved by the Secretary as complying with the current issue of "Specifications for the Approval of Airline Aircraft Radio Equipment".

04.51. *Non-Airline carrier (NAC) airplanes.*—Airplanes which are certificated as non-airline carriers, shall have at least the following equipment:

04.510. *NAC landplanes — Visual-Contact Day Flying (Within 100 Miles of a Fixed Base).*—

(a) One airspeed indicator. (See CAR 04.5800 for installation requirements.)

(b) One altimeter.

(c) A tachometer for each engine.

(d) An oil-pressure gauge when an oil-pressure system is employed.

(e) A water thermometer for each water-cooled engine.

(f) An oil thermometer for each air-cooled engine.

(g) A manifold-pressure gauge, or equivalent, for each altitude engine. (See CAR 13.)

(h) A fuel quantity gauge. (See CAR 04.624 for requirements.)

(i) Certificated safety belts for all passengers and members of the crew. (See CAR 15 for belt requirements and CAR 04.5810 for installation requirements.)

(j) A portable fire extinguisher in cabin airplanes, which extinguisher shall be of an approved type which shall have a minimum capacity, if carbon tetrachloride, of one quart or, if carbon dioxide, of two pounds or, if other, of equivalent effectiveness; except that any extinguisher of not less than half the above capacity may be used in an airplane equipped with an engine whose maximum rating is 40 horsepower or less. (See CAR 04.5811 for installation requirements.)

(k) Landing gear position indicator for retractable main landing gear. (See CAR 04.444 for requirements.)

(l) A device for measuring or indicating the amount of oil in the tanks. (See CAR 04.633 for requirements.)

(m) A first aid kit, in airplanes arranged for carrying passengers.

(n) A log-book for the airplane and one for each engine. (See CAR 01 for requirements.)

(o) Rigging information for airplanes with wire-braced wings, either in the form of a sketch or listed data, which shall include sufficient information to permit proper rigging.

04.511. *NAC landplanes—Visual-contact day flying (unlimited distance).*—Airplanes of this category shall have the equipment specified in CAR 04.510 and, in addition, there shall be installed:

(a) A magnetic compass. (See CAR 04.5803 for installation requirements.)

04.512. *NAC landplanes.—Visual-contact night flying.*—Airplanes of this category shall have the equipment specified in CAR 04.511 and, in addition, there shall be installed:

(a) A set of certified standard forward position lights in combination with a certificated tail light. (See CAR 15 for light requirements and CAR 04.5827 for installation requirements.)

(b) Two electric landing lights, if the aircraft is operated for hire. (See CAR 04.5825 for installation requirements.)

(c) Certificated landing flares, if the aircraft is operated for hire, as follows (See CAR 15 for flare requirements and CAR 04.5813 for installation requirements):

Airplanes of 3500 pounds maximum authorized weight or less—5 Class 3 flares or 3 Class 2 flares.

Airplanes of between 3500 pounds and 5000 pounds maximum authorized weight—4 Class 2 flares.

Airplanes of 5000 pounds maximum authorized weight or more—2 Class 1 flares or 3 Class 2 flares and one Class 1 flare.

If desired, airplanes of less than 5000 pounds maximum authorized weight may carry the flare equipment specified for heavier airplanes.

(d) A storage battery suitable as a source of energy supply for the lights installed. (See CAR 04.5821 for installation requirements.)

(e) Radio equipment, if the aircraft is operated for hire, as follows: A radio beacon and weather broadcast receiver operating within the frequency range of 200 to 400 kilocycles. Under normal atmospheric conditions this receiver must be capable of receiving with a range of 100 miles intelligence emanated from a radio range or weather broadcast station the equivalent of an SBRA installation.

(f) A set of spare fuses. (See CAR 04.5822 for installation requirements.)

04.513. *NAC landplanes — instrument day flying.*—Airplanes of this category shall have the equipment specified in CAR 04.511 and, in addition, there shall be installed:

(a) *Radio equipment.*—Same as CAR 04.512 (e), whether the aircraft is operated for hire or not, and, in addition, a radio transmitter operated on 3105 kilocycles with a power output sufficient to establish communication at a distance of at least 100 miles under normal atmospheric conditions. Additional frequencies may be employed subject to approval of the Federal Communications Commission.

(b) A gyroscopic rate-of-turn indicator.

(c) A bank indicator. (Instruments (b) and (c) may be combined in one instrument if desired or may be omitted if a gyroscopic artificial horizon instrument is installed.)

(d) A sensitive altimeter which shall be adjustable for changes in barometric pressure and compensated for changes in temperature.

(e) A clock with a sweep-second hand.

(f) A storage battery suitable as a source of energy supply for the radio equipment installed. (See CAR 04.5821 for installation requirements.)

(g) A generator.

(h) A set of spare fuses. (See CAR 04.5822 for installation requirements.)

04.514 *NAC landplanes—Instrument night flying.*—Airplanes of this category shall have the equipment specified in CAR 04.512 and CAR 04.513 combined. The storage battery shall be suitable as a source of energy supply for both the radio equipment and the lights.

04.515. *NAC seaplanes and amphibians.*—The equipment requirements for seaplanes and amphibians shall be the same as specified for landplanes (CAR 04.510 through 04.514) except that seaplanes and amphibians shall not be certificated for operation over water out of sight of land unless they have at least the equipment specified in CAR 04.511, and except that all certificated seaplanes and amphibians shall also have an approved life preserver or flotation device for each person for which there is a seat, and except that all seaplanes and amphibians certificated for night operation shall also have a white anchor light. (See CAR 04.5824 for installation requirements.)

04.52. *Airline carriers—goods (ACG).*—(To be supplied.)

04.53. *Airline carriers—passengers (ACP).*—Airplanes certificated for use as airline passenger carriers shall have installed at least the following equipment:

04.530. *ACP landplanes—visual-contact day flying.*—The same as specified in CAR 04.511 and, in addition, the following:

(a) An electrically heated pitot tube, or equivalent, for the air speed indicator.

(b) One additional portable fire extinguisher of the type specified in CAR 04.510 (j). (See CAR 04.5811 for installation requirements.)

(c) Fixed fire extinguishing apparatus of an approved type for each engine compartment.

(d) Safety belt sign or signal. (See CAR 04.5812 for installation requirements.)

(e) Radio equipment as follows: An *approved* two-way radio system consisting of a transmitter and receiver capable of operating on the frequency or frequencies specified by the Federal Communications Commission and independent of any facility provided by the Federal Government. In addition an *approved* beacon and weather broadcast receiver is required. The question of power and/or range of this equipment will be determined by the Secretary upon application for a Letter of Authority to operate a scheduled service.

(f) A set of spare fuses. (See CAR 04.5822 for installation requirements.)

04.531. *ACP landplanes—visual-contact night flying.*—The same as specified in CAR 04.530 and, in addition, the following:

(a) A set of certificated airline forward position lights or, alternatively, a combination consisting of a set of certificated standard forward position lights and a set of certificated auxiliary position lights. In any case a certificated tail light shall also be installed. (See CAR 15 for light requirements and CAR 04.5827 for installation requirements.)

(b) A storage battery of sufficient capacity for all lights installed. (See CAR 04.5821 for installation requirements and CAR 04.5823.)

(c) Two electric landing lights. (See CAR 04.5825 for installation requirements.)

(d) Certificated landing flares as follows: 2 Class 1 flares or 3 Class 2 flares and 1 Class 1 flare. (See CAR 15 for flare requirements and CAR 04.5813 for installation requirements.)

(e) Instrument lights. (See CAR 04.5826 for installation requirements.)

(f) Cabin lights in all passenger cabins and compartments.

(g) A generator. (See CAR 04.5823 for requirements.)

(h) Radio equipment same as CAR 04.530 (e).

04.532. *ACP landplanes—instrument day flying.*—The same as specified in CAR 04.530 except 04.510 (b) and, in addition, the following:

(a) A gyroscopic rate-of-turn indicator combined with a bank indicator.

(b) A gyroscopic instrument showing bank and pitch.

(c) A gyroscopic compass.

(d) A rate-of-climb indicator.

(e) Two sensitive-type altimeters, both of which shall be adjustable for changes in barometric pressure and compensated for changes in temperature.

(f) A free air thermometer of the distance type with an indicating dial in the cockpit.

(g) A clock with a sweep-second hand.

(h) A vacuum gauge, installed in the lines leading to instruments (a), (b) and (c).

(i) Radio equipment as follows: Same as CAR 04.530 (e) and, in addition, an *approved* auxiliary beacon and weather broadcast receiver capable of receiving radio range signals and emergency broadcast. Such receiver system is normally operated from the main source of electrical supply of the aircraft but in the event of failure of the normal power source may be switched to operate from an independent power supply. This system shall include an independent power supply capable of operating such auxiliary receiver continuously for a period of at least four hours. It is also required that this emergency receiver operate from an independent antenna. Two sets of head-phones shall be required in the aircraft at all times. Effective January 1, 1938, there shall also be installed in such aircraft an *approved radio direction finder*, covering at least the frequency range of 200 to 400 kilocycles. The design of the radio direction finder shall be such as to permit its regular operation in the taking of line bearings on any station to which the direction finder may be tuned without altering the course of the aircraft. The radio direction finder shall also be provided with means to eliminate, insofar as possible, consistent with the advancement of the art, that type of interference commonly known as rain, snow, sleet or dust static. The radio direction finder shall provide means for audible reception of radio range and weather broadcast messages. This radio direction finder may be installed in lieu of the emergency receiver described herein provided that an independent power source equal to that described for the emergency receiver is employed on either the beacon receiver required under CAR 40.235 or on this radio direction finder. Effective November 1, 1937, there shall be installed on such aircraft an *approved radio antenna system*, which has for its purpose the collection of radio range signals, weather broadcast and emergency messages transmitted within the frequency range of 200 to 400 kcs. The design of this antenna system shall be such as to eliminate insofar as possible, consistent with the advancement of the art, that type of interference commonly known as rain, snow, sleet or dust static. This antenna system shall be so designed that it will operate efficiently when used in conjunction with a receiver installed aboard such aircraft which has for its primary purpose the reception of radio range signals, weather broadcast and emergency messages.

(j) A deicing signal to indicate icing conditions in the carburetor if the deicing device specified in CAR 04.6291 requires the manipulation of controls.

(k) A storage battery suitable as a source of energy supply for the radio equipment installed. (See CAR 04.5821 for installation requirements.)

(l) *A generator.*—(See CAR 04.5823 for installation requirements.)

04.533. *ACP landplanes—Instrument night flying.*—The same as specified in CAR 04.531 and CAR 04.532 combined. The storage battery, in this case, shall be of sufficient capacity for all radio equipment and all lights installed.

04.534. *ACP seaplanes and amphibians.*—The same as specified for landplanes (CAR 04.530 through CAR 04.533) and including the life preservers specified in CAR 04.515, except that when certificated for night operation, they shall also have installed the anchor light specified in CAR 04.515.

04.54. (Unassigned.)
04.55. (Unassigned.)
04.56. (Unassigned.)
04.57. (Unassigned.)

04.58. *Installation requirements.*—The following regulations apply to the installation of specific items of equipment and are additional to the regulations of CAR 04.50.

04.580. *Instruments.*—The following regulations shall apply to the installation of instruments when such instruments are required by these regulations.

04.5800. *Air speed indicator.*—This instrument shall be so installed as to indicate true air speed at sea level with the maximum practicable accuracy but in no event shall the instrument error be more than plus or minus 5 miles per hour at approximately 0.9 $V_L$. (See CAR 04.111.)

04.5801. *Powerplant instruments and controls.*—(See CAR 04.650 and 04.651.)

04.5802. *Fuel quantity gauge.*—(See CAR 04.624.)

04.5803. *Magnetic compass.*—This instrument shall be properly damped and compensated and shall be located where it is least affected by electrical disturbances and magnetic influences.

04.5804. *Navigation instruments.*—Navigation instruments for use by the pilot shall be so installed as to be easily visible to him with the minimum practicable deviation from his normal position and line of vision when he is looking out and forward along the flight path and they shall also be visible to the second pilot.

04.5805. *Gyroscopic instruments.*—All gyroscopic instruments shall derive their energy from engine-driven pumps or from auxiliary power units. Each source of energy supply and its attendant complete installation shall comply with the instrument manufacturer's recommendations for satisfactory instrument operation. On multi-engine aircraft each instrument shall have two separate sources of energy, either one of which shall be capable of carrying the required load. Engine-driven pumps, when used, shall be on separate engines. The installation shall be such that failure of one source of energy or breakage of one line will not interfere with proper functioning of the instruments by means of the other source.

04.581. *Safety equipment installation.*—

04.5810. *Safety belts.*—Safety belts shall be so attached that no part of the attachment will fail at a load lower than that specified in CAR 04.2640.

04.5811. *Fire extinguishers.*—The portable fire extinguisher specified in CAR 04.510 shall be so installed as to be accessible to the passengers. The two portable fire extinguishers specified in CAR 04.530 shall be so installed that one is readily available to the crew and the other is near the main external cabin door where it shall be readily available to passengers and ground personnel.

04.5812. *Safety belt signal.*—The signal or sign specified in CAR 04.530 shall be suitable for indicating to the passengers, at appropriate times, that the seat belts should be fastened. It shall be located in a conspicuous place and so arranged that it can be conveniently operated from the seat of either pilot.

04.5813. *Landing flares.*—Landing flares shall be releasable from the pilot's compartment. Structural provision shall be made for the recoil loads.

04.5814. *Deicers.*—Positive means shall be provided for the deflation of all wing boots.

04.582. *Electrical equipment installation.*—

04.5820. *General.*—Electrical equipment shall be installed in accordance with accepted practice and suitably protected from fuel, oil, water and other detrimental substances. Adequate clearance shall be provided between wiring carrying appreciable current and fuel and oil tanks, fuel and oil lines, carburetors, exhaust piping and moving parts.

04.5821. *Battery.*—Batteries shall be easily accessible and adequately isolated from fuel, oil and ignition systems. Adjacent parts of the aircraft structure shall be protected with a suitable acid-proof paint if the battery contains acid or other corrosive substance and is not completely enclosed. If the battery is completely enclosed, suitable ventilation shall be provided. All batteries shall be so installed that spilled liquid will be suitably drained or absorbed without coming in contact with the airplane structure.

04.5822. *Fuses.*—Fuses shall be so located that they can readily be replaced in flight. They shall break the current in a generating system at a sufficiently small current flow to adequately protect the lights, radio equipment and other parts of the circuit.

04.5823. *Generator.*—When a generator is specified it shall have sufficient capacity to carry the entire running load. Such generator shall be engine-driven unless an approved equivalent system is provided. Auxiliary power units will be approved in lieu of batteries and engine-driven generators, provided that they are at least two in number and that the supply system is capable of carrying the entire running load with any one unit out of action.

04.58230. *Running load.*—The running load shall be defined as the electric consumption of all lights, radio equipment and other electrical devices except those which are designed only for occasional intermittent use. Examples of devices regarded as intermittent are radio broadcasting equipment, landing lights and electrically operated landing gears and wing flaps. Radio beacon signal receivers and all other lights are considered a part of the constant load.

04.5824. *Anchor lights.*—The anchor light specified for seaplanes and amphibians shall be so mounted and installed that, when the airplane is moored or drifting on the water, it can show a white light visible for at least two miles in all directions.

04.5825. *Landing lights.*—Electric landing lights shall be so installed that at least one shall be not less than 10 feet to the right or left of the first pilot's seat and beyond the swept disk of the outermost propeller. Individual switches for each light shall be provided in the pilot's compartment.

04.5826. *Instrument lights.*—Instrument lights shall be so installed as to provide sufficient illumination to make all flight instruments easily readable and shall be equipped with rheostat control for dimming unless it can be shown that a non-dimming light is satisfactory.

04.5827. *Position lights.*—Position lights shall be so installed as to provide the light intensity and ranges of visibility prescribed in CAR 15 for tail lights and for standard forward position lights, as the case may be. Forward position lights, including auxiliary lights, shall be spaced laterally as far apart as practicable.

04.5828. *Master switch.*—Electrical installations shall incorporate a master switch easily accessible to a member of the crew.

04.583. *Radio equipment installation.*—To be amplified.

04.589. *Miscellaneous equipment installation.*—

04.5890. *Seats.*—Seats or chairs, even though adjustable, in open or closed airplanes, shall be securely fastened in place whether or not the safety belt load is transmitted through the seat.

04.5891. *Accessories.*—Engine-driven accessories on multi-engine aircraft shall be distributed among two or more engines.

04.6. *Powerplant installation.*—

04.60. *Engines.*—Engines shall be of a type and design which has been certificated as airworthy in accordance with the requirements of CAR 13 or shall have been approved as airworthy in accordance with previous regulations, except that engines for use in light airplanes defined in CAR 04.01 need not be certificated or approved but shall have power ratings assigned by the Secretary in accordance with the provisions of CAR 13 or previous regulations.

04.61. *Propellers.*—Propellers shall be of a type and design which has been certificated as airworthy in accordance with the requirements of CAR 14, or shall have been approved as airworthy in accordance with previous regulations, except that wood propellers of a conventional type for use in light airplanes defined in CAR 04.01 need not be certificated. In certain cases maximum engine bore limitations are also assigned to propellers. Propellers may be used on any engine provided that the certified power ratings, speed ratings and bore of the engine are not in excess of the limitations of the propeller as certificated, and fur-

ther provided that the vibration characteristics of the combination are satisfactory to the Secretary.

04.610. *Controllable pitch.*—The control mechanism shall be designed and equipped with a positive stop which shall limit the minimum pitch so that the take-off crankshaft speed for which the aircraft is certificated is not exceeded during take-off with take-off power unless it is necessary to so locate the stop that a higher crankshaft speed may be used in an emergency. The means provided for controlling the pitch shall be so arranged as to minimize the attention required from a pilot to prevent the engines from exceeding their crankshaft speed limitations under any flight condition.

04.611. *Propeller clearance.*—Propellers shall have a minimum ground clearance of 9 inches when the airplane is in a horizontal position with the landing gear deflected as it would be under the maximum authorized weight of the airplane. Propellers on seaplanes shall clear the water by at least 18 inches when the seaplane is at rest under the maximum authorized load conditions. A clearance of at least 1 inch shall be provided between the tips of propellers and any part of the structure.

04.62. *Fuel systems.*—

04.620. *Capacity and feed.*—The fuel capacity shall be at least 0.15 gallon per maximum (except take-off) horsepower for which the airplane is certificated. Air-pressure fuel systems shall not be used. Only straight gravity feed or mechanical pumping of fuel is permitted. The system shall be so arranged that the entire fuel supply may be utilized in the steepest climb and at the best gliding angle and so that the feed ports will not be uncovered during normal maneuvers involving moderate rolling or side slipping. The system shall also feed fuel promptly after one tank has run dry and another tank is turned on. If a mechanical pump is used, an emergency hand pump of equal capacity shall be installed and available for immediate use in case of a pump failure during take-off. Hand pumps of suitable capacity may also be used for pumping fuel from an auxiliary tank to a main fuel tank.

04.621. *Tank installation.*—No fuel tank shall be placed closer to an engine than the remote side of a fire-wall. At least one-half inch clear air space shall be allowed between the tank and fire-wall. Spaces adjacent to the surfaces of the tank shall be ventilated so that fumes cannot accumulate or reach the crew or passengers in case of leakage. If two or more tanks have their outlets interconnected they shall be considered as one tank and the air space in the tanks shall also be interconnected to prevent differences in pressure at the air vents of each tank of sufficient magnitude to cause fuel flow between tanks. Mechanical pump systems shall not feed from more than one tank at a time except by special ruling from the Secretary.

04.622. *Tank Construction.*—Each fuel tank shall be provided with either a sump and drain located at the point which is lowest when the airplane is in a normal position on the ground or outlets at the bottom of the tank provided with large mesh finger strainers. If a sump is provided, the main fuel supply shall not be drawn from the bottom of this sump. If no sump is provided the system drain shall be controllable from the pilot's compartment and shall act as a tank drain. Each tank shall be suitably vented from the top portion of the air space. Such air vents shall be so arranged as to minimize the possibility of stoppage by dirt or ice formation. When large fuel tanks are used, the size of the vent tubes should be proportioned so as to permit rapid changes in internal air pressure to occur and thereby prevent collapse of the tanks in a steep glide or dive. Tanks of 10 gallons or more capacity shall be provided with internal baffles unless suitable external support is provided to resist surging.

04.623. *Tank strength.*—Fuel tanks shall be capable of withstanding an internal test pressure of 3½ pounds per square inch without failure or leakage. Fuel tanks of large capacity which have a maximum fuel depth greater than 2 feet shall be investigated for the pressure developed during the maximum *limit* acceleration with full tanks. Tanks shall be so designed, and the rivets or welds so located, as to resist vibration failures or leakage.

04.624. *Gauge.*—A satisfactory gauge shall be so installed on all airplanes as to readily indicate to a pilot or flight mechanic the quantity of fuel in each tank while in flight: When two or more tanks are closely interconnected and vented, and it is impossible to feed from each one separately, only one fuel-level gauge need be installed. If a glass gauge is used, it shall be suitably protected against breakage.

04.625. *Lines and fittings.*—All fuel lines and fittings shall be of sufficient size so that under the pressure of normal operation the flow is not less than double the normal flow required for take-off engine power. A test for proof of compliance with this requirement shall be made. All fuel lines shall be so supported as to prevent excessive vibration and should be located so no structural loads can be applied. Bends of small radius and vertical humps in the lines shall be avoided. Copper fuel lines which have been bent shall be annealed before installation. Parts of the fuel system attached to the engine and to the primary structure of the airplane shall be flexibly connected thereto. Flexible hose connections and fuel lines shall have metal liners or the equivalent. Fittings shall be of a type satisfactory to the Secretary.

04.626. *Strainers.*—One or more strainers of adequate size and design, incorporating a suitable sediment trap and drain, shall be provided in the fuel line between the tank and the carburetor and shall be installed in an accessible position.

04.627. *Valves.*—One or more positive and quick-acting valves that will shut off all fuel to each engine shall be within easy reach of the first pilot and the second pilot or of the flight mechanic. In the case of airplanes employing more than one source of fuel supply, suitable provision shall be made for independent feeding from each source.

04.6270. *Dump valves.*—When fuel tanks are equipped with dump valves, the operating mechanism for such valves shall be within convenient reach of the first pilot and the second pilot, or of the flight mechanic. Dump valves shall be so installed as to provide for safe and rapid discharge of fuel.

04.628. *Drains.*—One or more accessible drains shall be provided at the lowest point on the fuel system to completely drain all parts of each system when the airplane is in its normal position on level ground. Such drains shall discharge clear of all parts of the airplane and shall be equipped with suitable safety locks to prevent accidental opening.

04.629. *Miscellaneous fuel system requirements.*—

04.6290. *Filler openings.*—All filler openings in the fuel system shall be plainly marked with the capacity and the word "fuel." Provision shall be made to prevent any overflow from entering the wing or fuselage.

04.6291. An adequate means shall be provided for preventing the formation of ice in the engine carburetors (See also 04.532 (j).)

04.63. *Lubrication systems.*—

04.630. *General.*—Each engine shall have an independent oil supply. The oil capacity of the system shall be at least 1 gallon for every 16 gallons of fuel for single-engine aircraft and 1 to 20 for multi-engine aircraft but shall not be less than the minimum specified by the engine manufacturer for safe operation of the engine. A special ruling concerning capacity will be made by the Secretary when oil may be transferred between engines in flight or when a suitable reserve is provided. The suitability of the lubrication system shall be demonstrated in flight tests in which engine temperature measurements are obtained. The system shall provide the engine with an ample quantity of oil at a temperature suitable for satisfactory engine operation.

04.631. *Tank installation.*—Oil tanks shall be suitably vented and shall be provided with an expansion space which cannot be inadvertently filled with oil. Such expansion space shall be at least 10 per cent of the total tank volume, except that it shall in no case be less than one-half gallon.

04.632. *Tank strength.*—Oil tanks shall be capable of withstanding an internal test pressure of 5 pounds per square inch without failure or leakage. Tanks shall be so designed and the rivets or welds so located as to resist vibration failures and leakage.

04.633. *Gauge.*—A suitable means shall be provided to determine the amount of oil in the system during the filling operation.

04.634. *Piping.*—Oil piping shall have an inside diameter not less than the inside diameter of the engine inlet or outlet and shall have no splices between connections. Connections in the oil system shall be of a type satisfactory to the Secretary.

04.635. *Drains.*—One or more accessible drains shall be provided at the lowest point on the lubricating systems to drain completely all parts of each system when the airplane is in its normal position on level ground. Such drains shall discharge clear of all parts of the airplane and shall be equipped with suitable safety locks to prevent accidental opening.

04.636. *Oil temperature.*—A suitable means shall be provided for measuring the oil temperature at the engine inlet.

04.637. *Filler openings.*—All filler openings in the oil system shall be plainly marked with the capacity and the word "oil".

04.64. *Cooling systems.*—

04.640. *General.*—The cooling system shall be of sufficient capacity to maintain engine temperatures within safe operating limits under all conditions of flight during a period at least equal to that established by the fuel capacity of the aircraft, assuming normal engine power and speeds. Compliance with this requirement shall be demonstrated in flight tests in which engine temperature measurements are obtained under critical flight conditions including flight with one or more engines inoperative.

04.641. *Radiators.*—Radiators shall be so mounted as to reduce vibration and eliminate strains causing distortion.

04.642. *Piping.*—Piping and connections shall conform to accepted standards and shall not transmit vibration to the radiator or the structure of the aircraft.

04.643. *Drains.*—One or more accessible drains shall be provided at the lowest points on the cooling system to drain completely all parts of such system when the airplane is in its normal position on level ground. Such drains shall discharge clear of all parts of the airplane and shall be equipped with suitable safety locks to prevent accidental opening.

04.644. *Filler openings.*—All filler openings in the cooling system shall be plainly marked with the capacity of the system and the name of the proper cooling liquid.

04.65. *Powerplant instruments, controls and accessories.*—

04.650. *Instruments.*—The engine instruments required are specified in CAR 04.5. The installation requirements for navigation instruments in CAR 04.5804 shall apply to tachometers and manifold pressure gauges. All other instruments shall be visible in flight to the pilot and co-pilot or to the flight mechanic. If the manifold pressure gauges and tachometers are not visible to the flight mechanic, he shall be provided with a duplicate set of these instruments.

04.651. *Controls.*—All powerplant controls, including those of the fuel system, shall be plainly marked to show their function and method of operation.

04.6510. *Throttle controls.*—Throttle controls shall be easily accessible to both pilots and shall be so arranged as to afford a positive and immediately responsive means of controlling all engines separately or simultaneously. Flexible throttle control systems shall be of a certificated type. A forward movement shall open the throttle.

04.6511. *Ignition switches.*—Ignition switches shall be easily accessible to both pilots. A positive means for quickly shutting off all ignition of multi-engine aircraft, by grouping of switches or otherwise, shall be provided.

04.6512. *Propeller pitch controls.*—Separate pitch controls shall be provided for each propeller.

04.652. *Accessories (airline carriers).*—(See CAR 04.5891.)

04.66. *Manifolding, cowling and firewall.*—

04.660. *General.*—All manifolds, cowling and firewalls shall be so designed and installed as to reduce to a minimum the possibility of fire either during flight or following an accident and shall therefore comply with accepted practice in all details of installation not hereinafter specified.

04.661. *Manifolds.*—Exhaust manifolds shall be constructed of suitable materials, shall provide for expansion, and, shall be arranged and cooled so that local hot points do not form. Gases shall be discharged clear of the cowling, airplane structure and fuel system parts of drains. They shall not blow back on the carburetor air intake or the pilot or passengers, nor cause a glare ahead of the pilot at night. No exhaust manifolding shall be located immediately adjacent to or under the carburetor or fuel system parts liable to leakage.

04.662. *Air intakes.*—Carburetor air intakes shall be suitably drained and shall open completely outside the cowling unless the emergence of back-fire flames is positively prevented. The drain shall not discharge fuel in the path of possible exhaust flames.

04.663. *Engine cowling.*—All cowling around the powerplant and on the engine side of the firewall shall be made of metal and shall be so arranged that any accumulations of dirt, waste or fuel may be observed without complete removal of the cowling. It shall fit tightly to the firewall, but openings may be provided if the airplane surface within 15 inches thereof is protected with metal or other suitable fireproofing material. The cowling shall be completely and suitably drained in all attitudes of flight and on the ground, with separate drains provided for the parts of the fuel system liable to leakage. All such drains shall be so located as to prevent fuel or oil from dripping onto the exhaust manifold or any parts of the aircraft and from permeating any material of a cellular nature.

04.664. *Firewall.*—A firewall shall be provided unless the engine is mounted in an isolated nacelle with no fuel tanks. Such fire bulkhead shall be constructed in either of the following approved manners:

(a) A single sheet of terne-plate not less than 0.028'' thick.

(b) A single sheet of stainless steel not less than 0.015'' thick.

(c) Two sheets of aluminum or aluminum alloy not less than 0.02'' thick fastened together and having between them an asbestos paper or asbestos fabric sheet at least 1/8'' thick.

04.6640. The firewall shall completely isolate the engine compartment and shall have all necessary openings fitted with close-fitting grommets or bushings. Adjacent inflammable structural members shall be protected by asbestos or an equivalent insulating material and provision shall be made for preventing fuel and oil from permeating it.

04.665. *Heating systems.*—Heating systems involving the passage of cabin air over or in close proximity to engine exhaust manifolds shall not be used unless adequate precautions are incorporated in the design to prevent the introduction of carbon monoxide into the cabin or pilot's compartment. They shall be constructed of suitable materials, be adequately cooled and be susceptible to ready disassembly for inspection.

04.67. (Unassigned.)

04.68. (Unassigned.)

04.69. *Miscellaneous powerplant requirements.*—

04.690. *Materials.*—Fuel, oil and cooling systems shall be made of materials which, including their normal or inherent impurities, will not react chemically with any fuels, oils or liquids that are likely to be placed in them.

04.7. *Performance.*—

04.70. *Performance requirements.*—All airplanes shall comply with the following performance requirements, in standard atmosphere, at all weights up to and including the *standard* weight (CAR 04.102), and under all loading conditions within the center of gravity range certified (CAR

04.742). There shall be no flight characteristics which, in the opinion of the Secretary, render the airplane unairworthy.

04.700. *Landing speeds.*—The landing speed with power off, in standard calm air at sea level, shall not exceed a value determined as follows:

(a) Airplanes certificated for passenger carrying:

65 miles per hour for airplanes of 20,000 pounds *standard* weight or less,

70 miles per hour for airplanes of 30,000 pounds *standard* weight or more, and a linear variation with *standard* weight shall apply for airplanes between 20,000 and 30,000 pounds.

(b) Airplanes which are certificated for the carriage of goods only:

The above landing speed values may be increased 5 miles per hour.

04.701. *Take-off.*—

04.7010. Landplanes shall take-off within 1,000 feet in standard calm air at sea level.

04.7011. Seaplanes shall take-off from the water at sea level in 45 seconds or less with a wind velocity not exceeding 10 miles per hour and under moderately smooth water conditions.

04.702. *Climb.*—

04.7020. Landplanes shall climb, in feet the first minute after leaving the ground, at least 8 times the calculated stalling speed in miles per hour, but not less than 300 feet.

04.7021. Seaplanes shall climb, in feet the first minute after leaving the water, at least 6 times the calculated stalling speed in miles per hour, but not less than 250 feet.

04.703. *Controllability and maneuverability.*—All airplanes shall be controllable and maneuverable under all power conditions and at all flying speeds between minimum flying speed and the maximum certified speed. All airplanes shall have adequate control in a landing at minimum landing speed with power off. Airplanes equipped with conventional gear shall comply with the foregoing requirement in a three-point landing.

04.704. *Balance.*—As used in these regulations the term "balanced" refers to steady flight in calm air without exertion of control force by the pilot or automatic pilot. Lateral and directional balance is required at cruising speed, which for this purpose shall be taken as 90 per cent of the high speed in level flight. Longitudinal balance is required under the following flight conditions:

(a) *Power on.*—In level flight, at all speeds between cruising speed and a speed 20 per cent in excess of stalling speed. In a climb, at maximum (except take-off) horsepower and a speed 20 per cent in excess of stalling speed.

(b) Power off: In a glide, at a speed not in excess of 140 per cent of the maximum permissible landing speed or the placard speed with flaps extended, whichever is lower, under the forward center of gravity position approved with maximum authorized load and under the most forward center of gravity position approved, regardless of weight.

04.705. *Stability.*—Under all power conditions all airplanes shall be longitudinally, laterally and directionally stable. An airplane will be considered to be longitudinally stable if, in stability tests, the amplitude of the oscillations decreases.

04.706. *Spinning.*—All airplanes shall be able to recover from a 6-turn spin in no more than 1½ additional turns with controls neutral, with power off and with the stabilizer or other trimming device set for balance at cruising speed in level flight with the particular load. During the spin the control surfaces shall exert no back pressure on the control column.

04.7060. *Abnormal spins.*—When a spin is obtained by movements of the controls which the inspector considers to be abnormal and unjustifiably severe for operating maneuvers, the use of elevator and rudder will be permitted for recovery after 6 turns. An airplane of this type will be acceptable insofar as spin characteristics are concerned provided recovery can be made in not more than 2 additional turns with ailerons in neutral, and further provided that a normal spin either conforms with the normal requirements or is impossible to perform.

04.7061. An airplane of more than 4,000 pounds *standard* weight will not be subjected to the spin test unless the flight characteristics of the particular airplane are, in the opinion of the Secretary, such as to indicate the advisability of a spin test.

04.707. *Flutter and vibration.*—Wings, tail surfaces, control surfaces and primary structural parts shall be free from flutter or objectionable vibration in all normal attitudes or conditions of flight at all speeds between the minimum flying speed and the maximum certified speed.

04.708. *Ground and water characteristics.*—Landplanes shall be maneuverable on the ground and shall be free from dangerous ground looping tendencies and objectionable taxiing characteristics. The seaworthiness and handling characteristics of seaplanes and amphibians shall be demonstrated by tests deemed appropriate by the Secretary. (See CAR 04.452 for water stability requirements.)

04.71. *Modified performance requirements for airline carriers.*—For multi-engine airline aircraft operating in accordance with the requirements of CAR 61 the weight may be increased beyond the values corresponding to the landing speed specified in CAR 04.700 and the take-off requirements of CAR 04.701, subject to the following conditions.

04.710. The increased weight shall be known as the *provisional* weight. (Car 04.103.) The *standard* weight (CAR 04.102) shall be the maximum permissible weight for all operations other than those in accordance with the requirements of CAR 61. The *provisional* weight shall be the maximum permissible weight for any operation.

04.711. Compliance with all the airworthiness requirements except landing speed and take-off is required at the *provisional* weight, except that the *provisional* weight may exceed the *design* weight on which the structural loads for the landing conditions are based by an amount not greater than 15 per cent, provided that the airplane is shown to be capable of safely withstanding the ground or water shock loads incident to taking-off at the *provisional* weight.

04.712. The aircraft shall be provided with suitable means for the rapid and safe discharge of a quantity of fuel sufficient to reduce its weight from the *provisional* weight to the *standard* weight.

04.713. In no case shall the *provisional* weight exceed a value corresponding to a landing speed of 5 miles per hour in excess of that specified in CAR 04.700.

04.714. Aircraft engaged in operations in accordance with the requirements of CAR 61 shall be certificated for the weight at which they comply with the take-off and other performance provisions of those regulations for the particular operation involved provided that such certified weight shall not exceed the *provisional* weight. It may, however, be less than the *provisional* or *standard* weights, dependent upon the ground or water factilities and the nature of the route flown.

04.72. *Performance tests.*—

04.720. *General.*—Compliance with the foregoing performance requirements shall be demonstrated by means of suitable tests of the type airplane. Additional tests for airline carriers are specified in CAR 04.73. Computations are not acceptable as proof of compliance with the requirements, but shall be used for correcting flight test data to standard atmospheric conditions and may be used to estimate the effects of minor changes. The methods of performance calculation and correction employed shall be subject to the approval of the Secretary.

04.7200. The applicant shall provide a person holding an appropriate commercial pilot certificate to make the flight tests, but a designated Bureau inspector may pilot the airplane during such parts of the tests as he may deem advisable.

04.7201. In the event that the applicant's test pilot is unable or unwilling to conduct any of the required flight tests, the tests shall be discontinued until the applicant furnishes a competent pilot.

04.7202. Parachutes shall be worn by members of the crew during the flight tests.

04.7203. The applicant shall submit to the Bureau inspector a report covering all computations and tests required in connection with calibration of flight instruments and correction of test results to standard atmospheric conditions. The inspector will conduct any flight tests which appear to him to be necessary in order to check the calibration and correction report or to determine the airworthiness of the airplane.

04.721. *Loading conditions.*—The loading conditions used in performance tests shall be such as to cover the range of loads and center of gravity positions for which the airplane is to be certificated.

04.7210. *Use of ballast.*—Ballast may be used to enable airplanes to comply with the flight test requirements as to longitudinal stability, balance and landing in accordance with the following provisions:

04.72100 (a). Ballast shall not be used for this purpose in airplanes having a gross weight of less than 5000 pounds nor in airplanes with a total seating capacity of less than 7 persons.

04.72101 (b). The place or places for carrying ballast shall be properly designed and installed and plainly marked.

04.72102 (c). The loading schedule which will accompany each certificate issued for an airplane requiring special loading of this type shall be conspicuously posted in either the pilot's compartment or in or adjacent to the ballast compartments and strict compliance therewith will be required of the airplane operator.

04.7211. *Fuel to be carried.*—When low fuel adversely affects balance or stability, the airplane shall be so tested as to simulate the condition existing when the amount of fuel on board does not exceed one gallon for every 12 maximum (except take-off) horsepower of the engine or engines installed thereon. When the engine is limited to a lower power, the later shall be used in computing low fuel.

04.722. *Maximum airspeed.*—The flight tests shall include steady flight at the maximum certified airspeed. Such tests shall in no case involve indicated airspeeds in excess of 90 per cent of the design gliding speed ($V_g$) for which compliance with the structural loading requirements (CAR 04.21) has been proved. When $V_g$ is greater than 1.33 $V_L$ (CAR 04.111) the flight tests need not be conducted beyond an indicated airspeed equal to 1.2 $V_L$, provided that the operation limits are correspondingly fixed (see CAR 04.743). The maximum indicated airspeed to be certified for operation of high-lift devices shall also be suitably demonstrated in flight. Recovery from glides or dives at the maximum certified airspeed shall be made in a gentle manner.

04.723. *Emergency ceiling (multi-engine airplanes only).*—Multi-engine airplanes, except airline carriers as provided for in CAR 04.73, shall be flight tested to determine the altitude at which level rectilinear flight may be maintained with any one engine inoperative, the remaining engine or engines operating at the maximum (except take-off) power. In this test the *standard* weight shall be carried.

04.724. *Airspeed indicator calibration.*—In accordance with CAR 04.5800, the airspeed indicator of the type airplane shall be calibrated in flight. The method of calibration used shall be subject to the approval of the Secretary.

04.725. *Check of fuel system.*—The operation of the fuel system shall be checked in flight to determine its effectiveness under low fuel conditions and after changing from one supply tank to another. (See CAR 04.620.) For such tests low fuel is defined as approximately 15 minutes supply at the maximum (except take-off) power certified.

04.73. *Additional performance tests for airline carriers.*—The performance characteristics of airplane certificated as airline carriers shall be determined in accordance with the following requirements, which are additional to those specified under CAR 04.72. From the results obtained in the following tests, the applicant shall submit complete computations and tabulated or charted data which shall show the take-off and landing characteristics (including angles of climb and glide) for various load conditions up to a standard altitude of 8,000 feet, and, with one engine shut off or throttled, rates of descent as related to airspeed between the usable ceiling (see CAR 04.732 (a)) and an altitude of 4,000 feet higher.

04.730. *Take-off.*—With all engines functioning normally the following characteristics shall be obtained in relatively calm air (wind velocity not to exceed approximately 5 miles per hour) at each of two altitudes differing by at least 3,000 feet:

(a) The best angle[1] of steady climb and the corresponding flight path speed with light load[2] and at the maximum authorized weight, with the engines operating at authorized maximum (except take-off) power, and with the landing gear, if retractable, fully retracted.

(b) The horizontal distances required for acceleration from a standing start to the speeds determined under the foregoing sub-paragraph (a) with light load and at the maximum authorized weight, with the landing gear in the extended position.

(c) The horizontal distance required for acceleration from a standing start to the speeds determined under item (a) of CAR 04.731 with light load and at maximum authorized weight, with the landing gear in the extended position.

04.731. *Climb.*—The following characteristics shall be determined at each of two altitudes differing by at least 3,000 feet with the ignition switch of one engine shut off and the remaining engine or engines operating at the authorized take-off power and with the landing gear fully extended, the propeller of the shut-off engine being set for take-off:

(a) The speed of best angle of steady climb with one engine shut off with light load and at the maximum authorized weight.

(b) The best angle of steady climb with conditions as in (a) above.

04.732. *Flight with inoperative engine.*—The following characteristics shall be determined with the ignition switch of one engine shut off or with one engine throttled, whichever results in a lower ceiling, and with the remaining engine or engines operating at the maximum (except take-off) power.

(a) The usable ceiling which, for this purpose, shall be defined as the altitude at which the best rate of climb is 50 feet per minute, with light load and at the maximum authorized weight.

(b) The speed in level flight, at the usable ceiling at maximum authorized weight.

(c) Rates of descent as related to airspeed, from an altitude 4,000 feet above the usable ceiling determined in (a) above, with light load and at maximum authorized weight.

04.733. *Approach and landing.*—The following characteristics shall be determined in relatively calm air (wind velocity not to exceed approximately 5 miles per hour) at each of two altitudes differing by at least 3,000 feet. The engines shall be fully throttled, the propellers (if controllable) in low pitch, and the wing flaps or similar devices used to the maximum extent.

(a) The normal gliding angle for landing approach at maximum authorized weight at a speed at least 10 miles per hour above the minimum landing speed. (The airspeed at which this is made shall be noted.)

[1] Best angle of climb is defined as the angle corresponding to the maximum attainable ratio of vertical speed to flight path speed.

[2] Wherever light load is referred to in this section it shall be interpreted as representing the lightest weight at which the aircraft can safely be flown, i. e., the empty aircraft plus crew, ballast if necessary, and the amount of fuel and oil necessary for the tests.

(b) The length of ground run required to come to a full stop after landing from the test for condition (a) above, using brakes.

04.734. *Proving tests.*—See CAR 40 for special tests required for airline carriers which are to be certificated for passenger carrying.

04.74. *Operation limitations.*—

04.740. *Weight.*—Airplanes may be certificated at a maximum authorized weight which is not sufficient to permit carrying simultaneously the full fuel and full pay load, provided that such weight shall be sufficient to provide a gasoline load of at least 0.15 gallon per certified maximum (except take-off) horsepower, with all seats occupied and with sufficient oil for this amount of fuel.

04.741. *Provisional weight (airline carriers).*—(See CAR 04.71.)

04.742. *Center of gravity limitations.*—The maximum variation in the location of the center of gravity for which the airplane is certificated to be airworthy shall be established. Means shall be provided, when necessary in the opinion of the Secretary, by which the operator is suitably informed of the permissible loading conditions which result in a center of gravity within the certified range.

04.743. *Air speed limitations.*—The maximum certified airspeed shall be limited to a value at least 10 per cent less than the maximum indicated air speed attained in official flight tests. (See CAR 04.722.) The effects of auxiliary devices shall be similarly accounted for when their operation lowers the safe operating speeds. Means shall be provided by which the pilot is suitably informed of the necessary speed limitations.

04.7430. When the design power (CAR 04.105) used in determining structural loading conditions is less than the maximum (except take-off) power for which the engine is certified, the cruising speed shall be limited to a value at least 10 per cent less than the $V_I$ (CAR 04.111) corresponding to the design power used.

04.744. *Powerplant limitations.*—The operations for which engines and propellers are certificated shall be limited to conform with the requirements of CAR 04.260 and to prevent damage to the engines during take-off or flight. Means shall be provided to effect such limitations or to inform the operating personnel thereof.

04.8. (Unassigned.)

04.9. *Miscellaneous requirements.*—

04.90. *Standard weights.*—In computing weights the following standard values shall be used:

Gasoline, 6 lbs. per gallon.
Lubricating Oil, 7.5 lbs. per gallon.
Crew and Passengers, 170 lbs. per person.
Parachutes, 20 lbs. each.

04.91. *Leveling means.*—Adequate means shall be provided for easily determining when the aircraft is in a level position.

CHAPTER 13. AIRCRAFT ENGINE AIRWORTHINESS

13.0. *General.*—

13.00. *Provision for rating.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of aircraft as to their airworthiness, the requirements hereinafter set forth shall be used as a minimum basis for establishing such rating for aircraft engines for use in certificated aircraft.

13.01. *Scope.*—

13.010. *Airworthiness requisites.*—To show eligibility of an engine for certification the engine shall meet the requirements herein as to design, construction and testing. The manufacturer shall comply with the requirements by the submission of technical data and by conducting tests with suitable test equipment. The applicable requirements are set forth in CAR 13.1 through 13.5.

13.011. *Type certificate.*—The general requirements for the issuances of a type certificate are set forth in CAR 01. The procedure relative to type certification of engine is set forth in CAR 13.6.

13.012. *Production certificate.*—The requirements for the issuance of a production certificate are set forth in CAR 01.

13.013. *Deviations.*—When an engine embodies a feature of design or construction which deviates from the practice in conventional internal-combustion types, application shall be made to the Secretary for special rulings covering the feature in question.

13.02. *Light aircraft engines.*—An uncertificated engine for certificated light aircraft (See CAR 04.01 (b)) will be assigned a power rating as to maximum power and speed upon compliance with CAR 13.50.

13.03. *Testing facilities.*—A manufacturer submitting an engine for certification or power rating shall conduct all of the tests and supply or arrange for the testing facilities necessary to show compliance with the requirements contained herein.

13.04. *Military engines.*—An engine of a type which has passed the regular endurance tests of and is approved by the United States Army Air Corps or the Bureau of Aeronautics, Navy Department, may be certificated in accordance with CAR 13.51.

13.05. *Engine operation limits.*—A certificated engine or a power-rated engine shall not be operated at a manifold pressure, crankshaft speed or horsepower greater than assigned thereto by the Secretary.

13.06. *Engine identification plate.*—A plate shall be permanently attached to the engine in such location as to be readily accessible when the engine is installed in aircraft and shall contain the following information: manufacturer's name; name, model designation and serial number of the engine; certified manifold pressure, crankshaft speed and power limits; and minimum octane number of the fuel.

13.07. *Previously approved engines.*—These regulations supersede the requirements for approval of engines set forth in previous regulations. However, engines rated as suitable for use in approved aircraft in accordance with previous requirements may be used in certificated aircraft at the discretion of the Secretary.

13.1. *Design requirements.*

13.10. An engine of more than 100 horsepower shall be equipped with a dual ignition system having at least two spark plugs per cylinder.

13.11. An engine and its accessories shall be so designed and constructed as to reduce to a minimum the chances of failure to function in the air and of fire during flight or in the event of a crash.

13.12. Provision shall be made for the installation of a means for preventing the formation of ice in the carburetor.

13.13. An engine shall operate smoothly with no undue vibration at speeds which may be used for continuous operation.

13.14. The fuel system of an engine shall be of such design that it will continue to supply a satisfactory mixture when tilted to the various angles encountered in normal flight maneuvers.

13.2. *Commercial sea level engine.*—

13.20. *Data required.*—In the case of an engine of a type which has not been previously approved by the Army or Navy, and for which the manufacturer desires the certifica-

tion of the Secretary, the following information shall be submitted:

13.200. (a). Application for type certificate on Form AC 13–1 which will be furnished for the purpose by the Secretary.

13.201. (b). A test report, satisfactory to the Secretary, including a log and an affidavit, describing in full detail the manufacturer's block test of an engine of the type for which certification is desired. The test shall be of at least 100 hours duration, of which 50 hours shall be at full throttle at an average speed within plus or minus 3 per cent of the proposed rated speed and 50 hours at 75 per cent of the proposed rated power at propeller load speed. The submission of this test report will not be deemed necessary by the Secretary for modified engines of a type previously tested which do not incorporate changes in the general arrangement, number of cylinders or displacement, or an appreciable increase in power or speed.

13.202 (c). Data suitably describing the status of the engine to be used for the endurance test prescribed in CAR 13.23. The manufacturer may use any engine of the type for which certification is desired, regardless of its previous history, provided all defects which became apparent in the 100-hour manufacturer's test have been explained or corrected to the satisfaction of the Secretary. Such data shall include the permissible maximum and normal cylinder head temperatures determined by the manufacturer for the engine.

13.203 (c). A complete set of drawings descriptive of the engine, which drawings shall be numbered and dated, and shall include change letters for each revision. Drawings of small standard commercial parts need not be submitted, but all other drawings applying to the engine, including those of the assembly and installation, shall be included. The materials shall be specified on the drawings by reference to specification numbers of the Army, Navy, S. A. E., or other such recognized standard whenever possible. If the manufacturer refers to his own specification numbers, details of such specifications shall be furnished the Secretary. All drawings shall be folded to a size approximately 9 by 12 inches, with title showing. In order to eliminate a possible source of controversy, the Secretary will not accept drawings which can be altered after approval. Blueprints, photostats or the equivalent are acceptable. If certain of the drawings required for a particular engine are identical with drawings previously submitted and approved in connection with a prior type of engine made by the same manufacturer, such drawings need not be again submitted.

13.204 (e). A complete parts list in duplicate, showing the drawing number, change letter, if any, and name of each component part of the engine. The drawing numbers shall be listed in numerical order.

13.205 (f). A detailed report, supported by affidavit, of a 10-hour flight test of the engine. This test shall include a climb at full throttle to 15,000 feet or to the service ceiling of the airplane. The report shall completely describe the test and the results thereof and shall include dates, the names of persons involved and particulars of the airplane. The engine used for this test may be the same engine as submitted for the endurance test or may be another engine of the same type.

13.21. *Procedure for submitting data and conducting tests.*—Upon receipt of satisfactory data in accordance with CAR 13.200 through 13.202, the Bureau of Air Commerce will authorize an inspector to examine the manufacturer's testing facilities. If the facilities conform to CAR 13.22, the inspector will witness the official tests and tear-down inspection outlined in CAR 13.23 through 13.27. Certification of the engine is then contingent upon the submission by the manufacturer of a satisfactory report signed by the inspector in accordance with CAR 13.4, and the data described in CAR 13.203 through 13.205.

13.22. *Testing equipment.*—Equipment satisfactory to the Secretary shall be provided by the manufacturer and shall include personnel necessary to conduct the tests outlined in CAR 13.23, 13.24 and 13.25. The following equipment represents a minimum for this purpose:

(a) Electric cradle dynamometer (may be used in conjunction with a water brake absorbing up to 80 per cent of the total horsepower) or torque stand (requires air straightening grid when used for calibration runs). A fixed stand may be used for the endurance test outlined in CAR 13.23.

(b) Propellers suitable for maintaining the speeds and power outputs required.

(c) Tachometer or other accurate means of indicating crankshaft speed. (Counter and stop watch required for frequent checks.)

(d) Manometer for measuring manifold pressure.

(e) Means for measuring engine air intake pressure and temperature.

(f) Oil pressure gauge.

(g) Suitable thermometers to measure oil inlet and outlet temperatures.

(h) Manometer to measure bubble pressure or air speed indicator to measure air velocity over the cylinder head of an air-cooled engine. (Shall be measured at a position approximately half-way between the cylinders and in line with the valve heads when practical.)

(i) Thermocouples for all cylinder heads and barrels of an air-cooled engine. (Shall be located at rear spark plug gasket and near rear cylinder hold-down nut on thrust side.)

(j) Suitable thermometers to measure liquid inlet and outlet temperatures in the case of liquid-cooled engines.

(k) Apparatus for measuring fuel consumption by weight or volume.

(l) Apparatus for measuring oil consumption by weight.

(m) Barometer.

(n) Dry and wet bulb thermometers.

13.23. *Endurance test.*—A 50-hour full throttle endurance test of the engine described in accordance with CAR 13.202 shall be run in periods of at least 5 hours each on consecutive working days except that interruptions to such schedule are permissible if explained to the satisfaction of the Secretary. The test shall be witnessed by an authorized Bureau inspector.

13.230. The engine shall be run at a speed approximately equal to the proposed rated speed and with the manufacturer's recommended setting of the ignition timing, mixture control and intake heat control. The grade of fuel used during the test will be the lowest approved for use in the engine when certificated. Excessive adjustment to the engine or dependence upon excessive fuel or oil consumption for proper cooling during the test will be considered cause for denial of certification by the Secretary.

13.231. Not more than three forced stops caused by the engine shall be allowed during the endurance test. A run of 5 hours shall be added to the test for each forced stop made. Failure of accessories shall not necessarily be considered a forced stop. If the power in a dynamometer run drops as much as 10 per cent, due allowance being made for atmospheric conditions, this shall constitute a forced stop. If a propeller is used to absorb the power during the endurance test, variations in speed of plus or minus 3 per cent are permissible. A variation in speed in excess of this amount due to atmospheric conditions will not be considered a forced stop but the propeller shall be changed to correct for the conditions. Excessive water, fuel or oil leaks developing at the engine shall constitute forced stops. In all cases the Secretary shall be the judge as to what constitutes a forced stop. An engine failure of a type which could cause an immediate forced landing in flight or require the replacement of a major part of the engine shall terminate the test.

13.232. Complete readings of the performance of the engine shall be recorded at least every half-hour throughout the endurance test. The following readings are essential:

(a) Crankshaft speed in revolutions per minute.

(b) Manometer pressure.

(c) Temperatures of the two hottest cylinder heads and barrels if air-cooled, or of the inlet and outlet liquid if liquid-cooled.

(d) Fuel consumption.

(e) Oil consumption.

(f) Oil inlet and outlet temperatures.

(g) Oil pressure.

(h) Air velocity or pressure difference over the cylinder heads if air-cooled.

(i) Barometric pressure.

(j) Temperature (dry and wet bulb).

(k) Engine air inlet temperature and pressure.

13.24. *Take-off rating.*—If a take-off rating in excess of the endurance test rating is desired, the engine shall be run 10 hours at the take-off power and crankshaft speed. This test may be run as the last 10 hours of the 50-hour endurance test required by CAR 13.23 or as a separate test. The take-off output may be maintained continuously for 5-hour periods or may be maintained for 5 minutes and the engine idled for 5 minutes, consecutively, in which case the duration of the take-off testing shall total 20 hours. Take-off ratings of more than 10 per cent in power or in speed in excess of the endurance test output will require additional tests and a special ruling by the Secretary.

13.25. *Calibration test.*—A full throttle power versus speed calibration of the engine shall be made before or after the endurance test outlined in CAR 13.23 and shall be witnessed by an authorized Bureau inspector.

13.250. Full throttle runs shall be made at crankshaft speed intervals of approximately 100 revolutions per minute from 75 to 110 per cent of the proposed rated speed by varying the load. Each speed shall be maintained for at least 2 minutes, or until operating conditions have stabilized, before a reading is taken.

13.251. The engine shall be operated during the calibration test at the manufacturer's recommended setting of the ignition timing, mixture control and intake heat control. The power rating assigned to the engine by the Secretary will correspond to the corrected horsepower obtained during the calibration test at a crankshaft speed within 25 revolutions per minute of the average speed maintained during the endurance test. This corrected horespower shall be the observed horsepower corrected to standard conditions for the pressure, temperature and humidity existing in the air intake of the carburetor just ahead of the venturi. Standard conditions are a barometric pressure of 29.92 inches of mercury, an air temperature of 60° F., and a water vapor pressure of 0.39 inch of mercury. It is recommended that a suitable correction, satisfactory to the Secretary, be further applied to the horsepower when the calibration test is conducted with cooling air of a temperature and velocity which differ materially from 60° F. and the velocity normally to be encountered in flight, respectively.

13.252. Essential readings for each run during the calibration test shall be the same as listed in CAR 13.232 except that torque, observed horespower and corrected horsepower shall be recorded and the oil consumption need not be.

13.26. *Operation test.*—At the conclusion of the endurance or the calibration test the engine shall be operated in the presence of the Bureau inspector at various speeds throughout its operating range to demonstrate the idling, acceleration and running characteristics, which shall be satisfactory to the Secretary.

13.27. *Tear-down inspection.*—After completion of the endurance and calibration tests a complete tear-down and detailed inspection of engine parts shall be made, particular attention being paid to excessive wear or signs of failure. The Bureau inspector will check the conformity of the engine parts with the set of drawings to be submitted by the manufacturer. As a result of the inspection the Secretary may require, prior to certification, such revisions and additional tests as appear necessary to establish the airworthiness of the engine, or he may deny certification notwithstanding the completion of the tests described in CAR 13.23 and 13.24.

13.28. *Geared engines.*—Complete tests as outlined herein are required for the certification of geared engines. Unless the horsepower loss due to reduction gears is appreciable, a geared engine may, at the option of the engine manufacturer, retain the same power rating as a previously approved identical engine with direct drive.

13.3. *Commercial altitude engines.*—

13.30. *Tests.*—An engine which is not designed for full throttle continuous operation at sea level shall be tested and rated as an altitude engine. The requirements for certification of such an engine are identical with those outlined in CAR 13.2 with the following exceptions.

13.300. The manufacturer's test outlined in CAR 13.2 may be conducted at proposed rated power instead of at full throttle.

13.301. The flight test shall be in accordance with CAR 13.205 (f) except that the engine need not be operated at full throttle below the rated altitude.

13.302. The endurance test shall be conducted at a power and speed of at least that at which the manufacturer desires the engine to be rated. In lieu thereof, when the engine is highly supercharged, the test may be conducted at at least the manifold pressure and rated speed which the engine will develop at the proposed rated altitude. In such a case an engine identical except for the supercharged drive shall also be tested at the power and speed at which the manufacturer desires the engine to be rated. When the engine is highly supercharged and is endurance tested at less than rated power, it will be limited for take-off operation to the power developed during this endurance test unless a take-off test in accordance with CAR 13.24 is made to establish the airworthiness of the engine for take-off at higher power.

13.303. The calibration test shall consist of the following:

(a) A full throttle calibration at sea level in accordance with CAR 13.25 except that outputs above the proposed rated power need not be maintained 2 minutes before a reading is taken. This calibration may be omitted if the engine is highly supercharged.

(b) Constant speed runs made by varying the load and the throttle to determine curves of horsepower versus manifold pressure. Curves shall be obtained at crankshaft speed intervals of 100 revolutions per minute from 100 revolutions per minute in excess of the proposed rated speed down to the manufacturer's recommended cruising speed of the engine. For each speed, such curves shall extend from approximately 75 per cent of the average manifold pressure of the engine during the endurance test to 110 per cent of such manifold pressure.

13.31. *Altitude rating.*—The rated altitude shall be that altitude at which the engine develops the rated power and speed at full throttle under standard altitude conditions with the grade of fuel used during the endurance test. When equipment is available, calibration tests simulating altitude conditions shall be made to determine the rated altitude and the characteristics of the engine between the rated altitude and sea level. In lieu of such testing the Secretary will accept such empirical methods of determining the altitude performance of the engine as are substantiated by simulated altitude tests of similar engines or by extensive flight tests. The manufacturer shall in each case submit for the consideration of the Secretary all references, test data and curves upon which the manufacturer's estimate of the altitude performance is based.

13.32. *Limitations applied to altitude engines.*—The manufacturer shall submit to the Secretary suitable curves descriptive of the performance of the engine for take-off, climb, cruising, and high speed at all altitudes between sea level and the rated altitude. It is recommended that these curves be plotted on a single sheet with horsepower versus crankshaft speed or manifold pressure at sea level, and with horsepower versus altitude above sea level. Full speed lines shall be indicated. The manufacturer shall also indicate on these curves the limitations desired. The Secretary will issue limiting instructions for the operation of the engine, a copy of

which the manufacturer shall supply with each engine delivered for use in certificated aircraft. CAR 04 outlines the operating limitations applied to altitude engines.

13.4. *Test report.*—The manufacturer of an engine which is tested in accordance with CAR 13.2 or 13.3 shall prepare a suitable report describing the test equipment, testing and tear-down inspection. The report shall be completely descriptive of the test and shall include all essential details. The report shall be signed and sworn to by the responsible representative of the engine manufacturer and shall include the following information:

13.40 (a). A description and photographs of the testing equipment. (This description need not be included if a previously submitted report adequately describes the equipment used, in which case reference shall be made to such report.)

13.41 (b). A chronological description of the endurance testing, covering the events of each period of running. All irregularities, failures and forced stops shall be fully discussed. A table or chart showing all readings recorded during the test shall be included.

13.42 (c). A description of the calibration testing, and a table of all readings and corrections. The results shall be plotted as curves of brake-mean-effective pressure, corrected horsepower, manifold pressure, cylinder head or cooling liquid temperatures and fuel consumption versus crankshaft speed.

13.43 (d). A description of the condition of the engine parts as determined from the complete tear-down and detailed inspection of the engine after testing. Photographs of all failures or excessively worn parts shall be included.

13.44 (e). Photographs of the engine (front, side, and two three-quarter rear views).

13.5. *Special engines.*—

13.50. *Power-rated engines for light aircraft.*—In the case of engines which are to be installed in light aircraft as defined in CAR 04, and for which the manufacturer desires the Secretary to assign a maximum power and speed rating only, the data submitted shall include the following:

(a) An application for power rating, submitted on the same form as is furnished by the Secretary to applicants for a type certificate. When used for this purpose the form shall be altered by the applicant by crossing out the words "Type Certificate" in the heading and substituting the words "Power Rating".

(b) One set of general assembly drawings sufficiently well-dimensioned to show the general specifications of the engine.

(c) A complete report of a power rating test which shall consist of a 5-hour run on a test stand with the throttle wide open, and at the speed at which a rating is desired. If the corrected horsepower cannot be determined satisfactorily from this test, a calibration test may be made after the 5-hour run. The report shall include a detailed log of the 5-hour test and a description of the test stand and instruments used. Details of the equipment and of the calculations used to determine the corrected horsepower shall also be included.

13.51. *Military engines.*—In the case of an engine of a type which has previously been approved by the Army or Navy and for which the manufacturer desires certification by the Secretary, the following data shall be submitted:

(a) An application as described in CAR 13.200.

(b) A copy of the official Army or Navy endurance test report which was the basis for the military approval, signed by the Army or Navy representative who witnessed the test. It is not necessary for the manufacturer to submit this report when such report has previously been forwarded to the Secretary through official channels. When the report is being prepared by the military agency the Secretary, to expedite approval, may in the interim accept a copy of the official letter of approval of the engine, which letter shall include the military rating and calibration curves.

(c) Drawings as described in CAR 13.203.

(d) A parts list as described in CAR 13.204.

(e) A report of a flight test as described in CAR 13.205, or a statement from the Army or Navy to the effect that such flight tests have been satisfactorily conducted in the Army or Navy service.

13.52. *Modified engines.*—When a manufacturer desires certification by the Secretary of an engine which embodies a modification of a certified engine of the same manufacturer, data shall be submitted and tests conducted as follows:

13.520 (a). If the manufacturer desires to increase the rated power or rated speed, or if the modification is of such extent (in the opinion of the Secretary) as to require endurance testing, the modified engine shall be considered a new design which will be eligible for certification upon compliance with CAR 13.2, 13.3 or 13.51, whichever may apply.

13.521 (b). If no increase in rated power or rated speed is involved and the modified engine embodies only a minor modification of the certificated engine, and if technical data are submitted to the Secretary which demonstrate conclusively that the airworthiness of the modified engine is at least equal to that of the certificated engine, data shall be submitted in accordance with CAR 13.200, 13.203 and 13.204, and a report of calibration testing shall be submitted in accordance with CAR 13.25, 13.303, 13.31 or 13.42, whichever may apply.

13.6. *Procedure relative to type certification.*—

13.60. *General.*—The procedure and general requirements for the issuance of a type certificate shall be as prescribed in CAR 01.

13.61. *Sealed drawing list.*—When a type certificate is granted, a drawing list representative of the certificated engine is impressed with the seal of the Bureau of Air Commerce and is returned to the manufacturer. Bureau inspectors may call for, and must have access to, the sealed drawing list and the pertinent drawings when making an inspection at the manufacturer's plant to determine whether the engines as built conform to the approved data.

13.62. *Major changes.*—Any major change from the approved drawings must be approved in advance by the Secretary. A change shall be considered major within the meaning of these regulations if it adversely affects the reliability or increases the power output of the engine. In all doubtful cases the decision of the Secretary will establish the category within which a specific change shall be included.

13.620. Information accompanying a request for approval of a major change to a certificated engine shall include sufficient technical data and reports of tests (when necessary) to demonstrate to the satisfaction of the Secretary that the changed engine is airworthy. Reports shall be signed and sworn to by the responsible representative of the manufacturer. When it is deemed necessary by the Secretary, an endurance test witnessed by an authorized Bureau inspector will be required to substantiate the airworthiness of specific changes, and particularly when a change is such as to increase materially the power output of the engine.

13.63. *Minor changes.*—On January 1 and July 1 of each year the holder of an engine type certificate shall submit, for approval and file, drawings pertaining to all the minor changes made to the engine during the preceding 6-month period.

13.7. *Engine parts.*—Only structural engine parts which are approved by the Secretary may be used to modify, maintain or repair certificated engines. Replacement parts will be approved provided the airworthiness of the replacement part is proven to the satisfaction of the Secretary at least equal to that of the original part by technical data or tests, or both; or provided an engine of the specific type has been equipped with the part and has satisfactorily completed an endurance test as prescribed in CAR 13.23; or provided the manufacturer submits an official Army or Navy report approving the part for the engine. Drawings of the part shall be submitted and the factory of the manufacturer shall be inspected for its suitability to produce the part. If the part supplied constitutes a major modification of the engine when installed, the engine shall be considered a new design and as such will be eligible for certification only on compliance with all of the regulations pertaining thereto.

13.8. *Engine accessories.*—An engine will be tested and certificated as a complete powerplant including all engine accessories that are attached to the engine and are essential for its proper operation in the air. Cowling, exhaust manifolding and mufflers need not be included, as these items are subject to inspection and approval in each type installation on certificated aircraft. Propellers, propeller hubs and propeller blades are also subject to separate certification under the requirements outlined in CAR 14.

13.80. *Tests.*—At the time of the endurance tests the Secretary will require such additional tests as may be necessary to determine the airworthiness of the engine with the attached accessories. It is recommended that the manufacturer install on the engine, at the time of the test, the accessories with which he may desire the engine to be certificated. Engines may be certificated with other accessories provided the airworthiness of the engine with such other accessories is demonstrated by sufficient technical data, including certified reports of tests when necessary. Additional endurance tests of the engine as described in CAR 13.3 or 13.4 may be necessary if the accessory change constitutes a major modification of the engine.

13.81. *Certification.*—Engine accessories as described in CAR 13.8 are not eligible for separate certification.

CHAPTER 14. AIRCRAFT PROPELLER AIRWORTHINESS

14.0. *General.*—

14.00. *Provision for rating.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of aircraft as to their airworthiness, the requirements hereinafter set forth shall be used as a minimum basis for establishing such rating for aircraft propellers for use on certificated aircraft.

14.01. *Scope.*—

14.010. *Airworthiness requisites.*—To show eligibility of a propeller for certification the propeller shall meet the requirements herein as to design, construction and testing. The manufacturer shall comply with the requirements by the submission of technical data and by conducting tests with suitable test equipment. The applicable requirements are set forth in CAR 14.1 through 14.4.

14.011. *Type certificates.*—The general requirements for the issuance of a type certificate are set forth in CAR 01. The procedure relative to type certification of propellers is set forth in CAR 14.5.

14.012. *Production certificate.*—The requirements for the issuance of a production certificate are set forth in CAR 01.

14.013. *Deviations.*—When a propeller embodies a feature of design or construction which deviates from the practice in conventional screw propeller types, application shall be made to the Secretary for special rulings covering the feature in question.

14.02. *Hubs and blades.*—Interchangeable propeller hubs and blades are certificated as separate units and the word "propeller" as herein used applies, where applicable, to a propeller hub and to a blade as well as to a complete propeller.

14.03. *Testing facilities.*—A manufacturer submitting a propeller for certification shall conduct all of the tests and supply or arrange for the testing facilities necessary to show compliance with the requirements contained herein. When, in the opinion of the Secretary, adequate and satisfactory methods of testing other than those outlined herein are available, propellers tested by such methods may be eligible for certification.

14.04. *Military propellers.*—A propeller of a type which has passed the regular endurance tests of and is approved by the United States Army Air Corps or the Bureau of Aeronautics, Navy Department, may be certificated in accordance with CAR 14.3.

14.05. *Propeller operation limits.*—A certificated propeller shall not be operated at a power or propeller shaft speed, or in conjunction with an engine bore, greater than the limits assigned thereto by the Secretary. The Secretary may specify short time operation in excess of these limits for take-off purposes except that neither the power nor the speed limits will be raised by more than 10 per cent without further testing.

14.06. *Propeller identification data.*—A certificated propeller, propeller blade or propeller hub shall have the following information conspicuously displayed upon it: manufacturer's name; name, model designation and serial number of the propeller; and maximum power and maximum speed for which certification has been granted. The identification data shall be permanently attached by means of a plate, stamping, engraving, etching or other such method upon a noncritical surface of the propeller blade or hub. When such data are not visible when the propeller is assembled or installed on an aircraft they shall also be painted or printed on the propeller blade or hub.

14.07. *Previously approved propellers.*—These regulations supersede the requirements for approval of propellers set forth in previous regulations. However, propellers rated as suitable for use in approved aircraft in accordance with previous requirements may be used in certificated aircraft at the discretion of the Secretary.

14.1. *Design requirements.*—

14.10. Propellers shall be so designed as to operate without excessive vibration or flutter and shall be constructed of materials which are suitable for service conditions.

14.11. The surface of a propeller blade shall be smooth and the blade shall be faired with respect to the thickness and the moments of inertia about the major and minor axes, with no abrupt curvature changes or irregularities along the blade. Critical surfaces of a metal propeller hub shall be machined smooth without tool marks and any change in cross section shall be faired with as large a fillet as possible.

14.12. It is recommended that a propeller be so designed that the weakest portion of the propeller blade or hub may be inspected without disassembly and that excessive wear or a partial failure will precede a serious type of failure.

14.13. To facilitate inspection wood propellers shall be so finished that the grain of the wood is visible.

14.2. *Commercial propellers.*—

14.20. *Data required.*—In the case of a propeller of a type which has not been previously approved by the Army or Navy, and for which the manufacturer desires the certification of the Secretary, the following information shall be submitted:

14.200 (a). Application for type certificate on Form AC 14–1 which will be furnished for the purpose by the Secretary.

14.201 (b). A complete set of drawings descriptive of the propeller, which drawings shall be numbered and dated and shall include change letters for each revision. All details of the propeller shall be shown, including the profile and plan form of the blade, the size of blade cross sections at frequent stations, the hub design and the materials of construction. The material shall be specified on the drawings

by reference to specification numbers of the Army, Navy, S. A. E. or other recognized standard whenever possible. If the manufacturer refers to his own specification numbers, details of such specifications shall be furnished the Secretary. All drawings shall be folded to a size of approximately 9 by 12 inches, with the title showing. In order to eliminate a possible source of controversy, the Secretary will not accept drawings which may be altered after approval. Blue prints, photostats or the equivalent are acceptable. If certain of the drawings required for a particular propeller are identical with drawings previously submitted and approved in connection with a prior type of propeller made by the same manufacturer, such drawings need not be again submitted.

14.202 (c). A complete parts list in duplicate, showing the drawing number, change letter and name of each component part of the propeller. The drawing numbers shall be listed in numerical order. When only one or two drawings are submitted for compliance with CAR 14.201, it is permissible for the manufacturer to submit these drawings in duplicate in which case a parts list is not required.

14.203 (d). A complete log, supported by an affidavit, describing the manufacturer's tests of the propeller in accordance with CAR 14.21. The log shall include a detailed record of the test with dates; names of persons involved; name and model number of engine, or name, model number and Department of Commerce identification mark of airplane; and hours of testing with corresponding engine speeds. The report shall also include the results of a detailed inspection of the propeller after the test in accordance with CAR 14.23.

14.204 (e). A stress analysis when required by CAR 14.210 or when, in the judgment of the Secretary, the design is sufficiently unconventional to require it.

14.21. *Tests required for propellers other than fixed pitch wood propellers.*—A propeller of such type shall be subjected to a 50-hour endurance block test on an internal-combustion engine rigidly mounted and of the same characteristics as the engine or engines in conjunction with which the propeller will be certificated for use, or on another engine acceptable to the Secretary. The test may be run without a stop or in periods of 5 hours or more each. The cylinder bore of the engine used for the test will determine the maximum bore of the engine with which identical propellers of this type will be certificated for use. The test shall be run at the proposed rated speed of the propeller with the propeller so adjusted as to absorb its proposed rated power. If the engine is not run at full throttle, and horsepower measurements are not possible during the test, manifold pressure readings shall be taken at frequent intervals. A suitable calibration curve shall be used to determine the power absorbed by the propeller during the test. The power rating assigned to the propeller by the Secretary may correspond to the corrected horsepower developed by the engine if the engine used for the test is of the type on which the propeller is to be certificated for use. In the case of a controllable or automatic pitch propeller, the pitch-changing mechanism shall be operated throughout the usable power range at least once for each hour of the test or the equivalent. The engine may be throttled to prevent overspeeding when changing pitch. After such 50 hours of testing, a controllable or automatic pitch propeller shall also be operated at as close to rated power and speed as possible for periods of 5 minutes each at various pitch settings, i. e., at 1 degree intervals throughout the operating range when the design so permits. All variations in running characteristics of the propeller shall be recorded.

14.210. A propeller of the above type which, in the opinion of the Secretary, is sufficiently similar to a previously certificated propeller of the same manufacturer may be subjected to a 50-hour flight test in lieu of the test outlined in CAR 14.21 provided that its airworthiness is demonstrated to the satisfaction of the Secretary by a comparative stress analysis submitted by the manufacturer. The stress analysis shall compare the pertinent aerodynamic, centrifugal, vibration and torque impulse load differences between the respective propellers by a mathematical comparison, when possible, and by suitable curves plotted with the radius of the propeller as abscissa. Curves descriptive of the fairing of the propellers shall also be included when applicable. Such 50-hour flight test shall be conducted on an engine of equal or greater power and speed than that in conjunction with which the rating is requested. At least 5 hours of the test shall be run at the proposed rated speed of the propeller.

14.211. It is recommended that metal propellers of this type also be tested by suitable methods to determine their natural frequencies within all ranges of major vibrations which are produced by the operation of the engines in conjunction with which such propellers are to be certificated for use. Such frequencies should be determined at all blade angles within the desired operating pitch range of propellers. Data covering these tests should be submitted to the Secretary in the form of curves and tables. The type of frequency should be described and the nodes located for each frequency.

14.22. *Tests required for fixed pitch wood propellers.*—A propeller of such type shall be subjected to a 10-hour endurance block test on an internal-combustion engine, or to a 50-hour flight test. In the case of a block test the entire test shall be run at the proposed rated speed of the propeller. In the case of a flight test at least 5 hours shall be run at the proposed rated speed of the propeller. Such flight test shall be conducted with an engine of equal or greater power and speed than that in conjunction with which the propeller is to be certificated for use.

14.23. *Inspection of a tested propeller.*—As prescribed in CAR 14.203, the log of the flight or block test shall include the results of a detailed inspection of the propeller after the test. Photographs of any failures or suspected failures shall be included. A propeller which fails during the testing is not eligible for certification unless the failure is of a nature such that the strength of the propeller is not impaired and a minor modification to the propeller will preclude the probability of future failures of the same type. Aluminum-alloy propellers shall be etched at all critical portions and then examined for minute cracks with a magnifying glass. Steel propellers shall be subjected to both a magnetic and visual inspection for signs of failure.

14.230. A failure of a metal propeller is defined as actual breakage, cracking or permanent set of any part of any blade, hub, bolt, lock nut, spline or keyway; slipping of a blade in its clamping socket; seizing or pitting of any bearing; or jamming of an automatic or controllable pitch mechanism. A wood propeller will be deemed to have failed if the tipping pulls or cracks, if a glue joint opens, or if there is any local failure or crushing around the hub or a bolt. Similar considerations will apply to propellers of any patented composition or of other than conventional wood or metal construction.

14.3. *Military propellers.*—In the case of a propeller of a type which has previously been approved by the Army or Navy and for which the manufacturer desires certification by the Secretary, the following data shall be submitted:

(a) An application as described in CAR 14.200.

(b) A copy of the official Army or Navy endurance test report which was the basis for the military approval, signed by the Army or Navy representative who witnessed the test. It is not necessary for the manufacturer to submit this report when such report has been previously forwarded to the Secretary through official channels. When the report is being prepared by the military agency the Secretary, to expedite approval, may in the interim accept a copy of the official letter of approval of the propeller which letter shall include the military rating, the length of test, and the output and model designation of the test engine.

(c) Drawings as described in CAR 14.201.

14.4. *Modified propellers.*—When a manufacturer desires the certification by the Secretary of a propeller which embodies only minor modifications of a certificated propeller of the same manufacturer, data shall be submitted as follows:

(a) An application as described in CAR 14.200.

(b) Drawings as described in CAR 14.201.

(c) Technical data which demonstrate conclusively that the airworthiness of the modified propeller is at least equal to that of the certificated propeller.

14.5. *Procedure relative to type certification.*—

14.50. *General.*—The procedure and general requirements for the issuance of a type certificate shall be as prescribed in CAR 01.

14.51. *Sealed drawing list.*—When a type certificate is granted, a drawing list representative of the certificated propeller is impressed with the seal of the Bureau of Air Commerce and is returned to the manufacturer. Sealed copies of the drawings may be used for this purpose in lieu of a drawing list. Bureau inspectors may call for, and must have access to, the sealed drawing list or drawings together with any other pertinent drawings when making an inspection of the manufacturer's plant to determine whether the propellers as built conform to the approved data.

14.52. *Major changes.*—Any major change from the approved drawings must be approved in advance by the Secretary. A change will be deemed major within the meaning of these regulations if it adversely affects the reliability or airworthiness of the propeller. In general, a change will be deemed major when it decreases the airworthiness of a part the failure of which might prevent the aircraft from continuing flight. In all doubtful cases the decision of the Secretary shall establish the category within which a specific change will be included.

14.520. Information accompanying a request for approval of a change to a certificated propeller shall include technical data, including (when necessary) stress analyses and reports of tests sufficient to demonstrate to the satisfaction of the Secretary that the changed propeller is airworthy. The report shall be signed and sworn to by the responsible representative of the manufacturer. If the change is to a different blade shank size, engine shaft size, blade airfoil or propeller material, application shall be made for a new type certificate.

14.53. *Minor changes.*—On January 1 and July 1 of each year the holder of a propeller type certificate shall submit, for approval and file, drawings pertaining to all the minor changes made to the propeller during the preceding 6-month period.

14.54. *Reductions in diameter.*—A type certificate may provide for reduction in diameter from that of the propeller tested, provided that no increase in rating is involved. The diameter of a propeller blade may be reduced by cutting off the tip of the blade and fairing the immediate vicinity or by telescoping the outer sections of the blade. The drawings submitted shall show the details of each blade smaller in radius by 6-inch steps, which details may be shown superimposed on a drawing of the original blade.

15.80. Equipment Items Adapted to Only One Aircraft Model.
15.81. Equipment Items Adapted to Any Aircraft Model by Means of Detail Design Changes.

CHAPTER 15. AIRCRAFT EQUIPMENT AIRWORTHINESS

15.0. *General.*—

15.00. *Provision for rating.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of aircraft and parachutes as to their airworthiness, the requirements hereinafter set forth shall be used as a minimum basis for establishing such rating of aircraft equipment for use in certificated aircraft.

15.01. *Scope of regulations.*—

15.010. These regulations shall apply to all important items of equipment which are manufactured as complete units and purchased by aircraft manufacturers and operators for use on certificated aircraft, except engines and propellers which are treated separately in CAR 13 and CAR 14 respectively.

15.011. For the purpose of these regulations an item of equipment shall be considered important if, by malfunctioning, it can endanger the safety of the aircraft, or the cargo or passengers in the aircraft, or persons or property beneath the aircraft.

15.012. Because the development of aircraft specialties is constantly increasing in scope and variety, there undoubtedly will be developed, from time to time, important items of equipment for which specific provision is not made in these regulations. In such cases the general procedure for certification will be in accordance with these regulations and the manufacturer of the item in question shall apply to the Secretary for special rulings particularly applicable to it.

15.013. The general requirements for the issuance of a type certificate are set forth in CAR 01. The procedure relative to type certification is set forth in CAR 15.05.

15.014. The requirements for the issuance of a production certificate are set forth in CAR 01.

15.02. *Classification of items of equipment.*—

15.020. In view of the diversity of items of equipment and the variety of their uses, such items are herein grouped in two major classifications dependent upon the certification procedure applicable to the particular item.

15.0200. The certification procedure to be followed is similar for all items and differs only in detail in accordance with the classification within which a particular item lies.

15.0201. The specific installations in certificated aircraft of certificated items of equipment, irrespective of the classification herein used, are subject in all cases to approval by the Secretary.

15.021. It is desirable to certify a series of similar models of an item of equipment under one certification in order to eliminate as much clerical and identification work as possible. This may be done for some types of wheels, position lights and other items, a series of which are similar in construction and differ only in size and relatively unimportant structural details. This procedure may be applied to any item to which the manufacturer can show the procedure applicable.

15.022. Items of equipment are classified as follows:

(a) Items of such design that they may be installed and used in any type or model of certificated aircraft, and for which type and production certificates, as defined in CAR 01, may be issued to manufacturers.

(b) Items of such design that they are adapted to only one type or model of certificated aircraft, or of such a nature that their design necessarily varies to suit each type or model of certificated aircraft in which they may be used. Type and production certificates will not be issued for such items. They will be specially approved as integral parts of the aircraft in which they are installed.

15.023. Under CAR 15.022 (a) are included items such as the following:

Landing gear wheels.
Seaplane floats, excluding wing-tip floats.
Skis, including pedestals.
Position lights.
Landing flares.
Safety belts.
Parachutes.
Certain types of special flight and engine control units.
Control wheels.
Certain types of tail wheel knuckles.
Certain types of self-locking bolts and nuts, and parts of that general character.

15.024. Under CAR 15.022 (b) are included items such as the following:

Automatic pilots.
De-icing equipment.
Landing gear shock absorber units.
Autogiro rotor hubs.
Wing ribs.
Fuel and oil tanks.
Engine cowls, wheel streamlines, propeller hub spinners and other special cowling.
Wing-tip floats.
Structures attaching seaplane floats to aircraft.
Special structures attaching skis to aircraft.
Heating and ventilating systems.

15.03. *Factors affecting certification or special approval.*—

15.030. All items of equipment falling within the meaning of these regulations irrespective of their classification shall:

(a) satisfactorily fulfill the purpose for which they are intended,

(b) be free from undue hazard, both in themselves and in their method of operation,

(c) be constructed of suitable and dependable materials, and

(d) be manufactured and installed in accordance with the Civil Air Regulations so far as those regulations pertain to the particular item.

15.031. Certain of the above-mentioned factors may be demonstrated by drawings and analyses, others by drawings and tests, and others by visual inspection.

15.04. *Identification data.*—

15.040. Each type or model of an item of equipment for which certification is requested shall be assigned a model name or model number by the manufacturer such that it may be distinguished from all other types or models of items of equipment.

15.041. Each unit of a certificated or specially approved type or model of equipment item shall be plainly and suitably marked to indicate that it has been certificated or specially approved. The applicable one of the following two methods shall be used to indicate this:

15.0410. (a) If a type certificate has been issued to the manufacturer for the particular item, each unit shall bear the number of this type certificate.

15.0411. (b) If a type certificate has not been issued to the manufacturer for the particular item, each unit shall bear the words "Bureau of Air Commerce Approved" or an abbreviation thereof.

15.042. Each unit of a certificated or specially approved type or model of equipment item shall bear the following identification data:

(a) Manufacturer's name.
(b) Model number or model name.
(c) The serial number or date of manufacture of the particular unit.
(d) Bureau of Air Commerce Type Certificate (or A. C. T. C.) No. ------, or Bureau of Air Commerce Approved (or A. C. A.).
(e) Such additional information as is specifically provided for in the following regulations.

15.043. The data prescribed in CAR 15.042 shall be displayed in a conspicuous place on the unit and in such a manner that it may not be easily erased, disfigured or obscured. Any other information may be added by the manufacturer at his discretion.

15.05. *Procedure relative to certification or special approval.*—

15.050. A request for certification or approval of a type or model, or when possible, of a series of similar models of an item of equipment, shall be supported by the data hereinafter specified.

15.0500. A complete set of drawings descriptive of the item. Drawings of small standard commercial parts need not be submitted, but all other drawings applying to the item, including assembly drawings and, when necessary, installation drawings, shall be submitted. The drawings shall contain all dimensions and material specifications of the item. Material shall be specified by reference to a specification number of the Army, Navy, S. A. E., or other such recognized standard whenever possible. If reference is made to material specifications which are not recognized standards, complete details of such specifications shall be submitted. Revision blocks on drawings shall designate the revision by letter and shall state the nature of the revision, the date and, when serial numbers are used, the serial number of the first unit manufactured in accordance with the revision. Title blocks on drawings shall contain the date of the original issue of the drawing and the drawing number. All drawings shall be folded to a size approximately 9 by 12 inches with the title block showing. In order to eliminate a possible source of controversy, the Secretary will not accept drawings which may be altered after approval. Blueprints, photostats or their equivalent are satisfactory. These shall not contain pencil or ink notations. If certain of the drawings required for a particular model are identical with drawings previously submitted and approved in connection with a prior model made by the same manufacturer, such identical drawings need not again be submitted.

15.0501. A list, in duplicate, of all drawings applicable to the item. Such list shall include all drawings previously submitted and approved in connection with prior models made by the same manufacturer, which also apply to the model in question without change. The list shall be arranged in numerical order and shall designate each drawing by number, title, original date of issue, latest revision letter and the model designation of the item for which the drawing was previously and originally submitted if for other than the model in question. Manufacturers' parts lists, if containing the information specified herein, are acceptable as drawing lists.

15.0502. Such additional data as are hereinafter prescribed for specific cases.

15.0503. The list specified in CAR 05.0501 need not be submitted if the item for which certification is requested is described by only one or two drawings. In such a case, however, the drawings specified in CAR 15.0500 shall be submitted in duplicate.

15.051. If the item falls within the classification covered by CAR 15.022 (a), the data submitted shall include a properly executed formal application for type certificate in accordance with CAR 01.

15.052. If the item falls within the classification covered by CAR 15.022 (b), complete information as to the make and model or makes and models of aircraft in which the item is to be installed shall be furnished. If specific aircraft are involved, the information to be furnished shall include also the serial numbers and aircraft certificate numbers of the aircraft in question.

15.053. Items of equipment which comply with the regulations herein prescribed to the satisfaction of the Secretary may be certificated or approved, as the case may be, for use in certificated aircraft.

15.054. If application for a type certificate has been made, certification is also contingent upon compliance with CAR 01 to the satisfaction of the Secretary.

15.055. Certification is subject to the provisions and restrictions stated on the type certificate and on the specification for the item issued as part of the type certificate, and approval is subject to the provisions and restrictions stated on the specification issued for the aircraft in which the item is installed.

15.056. All manufactured units of a certificated or approved item of equipment shall be in exact accordance with the approved drawings and specifications.

15.057. Changes or modifications to a certificated or approved item of equipment shall be approved by the Secretary in advance.

15.058. A request for approval of a change or modification to a certificated or approved item of equipment shall be supported by revised or new drawings showing the changes; revised drawing list pages, in duplicate, showing the revised or new drawings; and technical data, including reports of any necessary tests, sufficient to demonstrate to the satisfaction of the Secretary that the changed or modified item is airworthy.

15.06. *Previously approved items of equipment.*—These regulations supersede the requirements for approval of items of equipment set forth in previous regulations. However, items of equipment rated as suitable for use in approved aircraft in accordance with previous requirements may be used in certificated aircraft at the discretion of the Secretary.

15.1. *Landing gear equipment.*—

15.10. *Landing gear wheels.*—

15.100. Main landing gear wheels will be certificated for a maximum static load which will be determined from the strength of the wheel. Tail wheels will not be certificated.

15.1000. For the purpose of these regulations main landing gear wheels are considered as those nearest the airplane center of gravity with respect to fore-and-aft location.

15.1001. For the purpose of these regulations a tail wheel is considered as one which supports the tail of a conventional airplane in the three-point landing attitude.

15.101. For wheels other than main landing or tail wheels, application shall be made to the Secretary for special rulings particularly applicable to the cases in question.

15.102. The strength of a main landing gear wheel shall be substantiated by the following two static tests:

(a) Radial load test. (See CAR 15.1020.)
(b) Side load test. (See CAR 15.1021.)

15.1020. The required radial test load is equal to

$$(P)\times(n)\times(1.5)\times(1.25)$$

where $P$ is the maximum static load for which approval is requested, $n$ is

$$2.80+\frac{9000}{2P+4000}$$

and is the applied landing load factor for the corresponding airplane, 1.5 is the factor of safety, and 1.25 is a strength test material factor.

15.1021. The required side test load is equal to

(0.35) × (the radial test load).

15.1022. The radial and side loads shall be applied separately and the wheel shall be equipped with the correct size tire inflated to the proper pressure for the load for which certification is requested.

15.1023. The radial load shall be applied to the wheel in the plane of the tire and may be distributed over a portion of the tire by allowing the tire to bear in a box of firm earth or sand.

15.1024. The side load shall be applied to the tire at its maximum cross-sectional width and may be distributed over an arc of not more than 60°. The wheel shall be restrained only by the axle.

15.1025. When it is impossible to apply sufficient side load to the tire due to its inability to stay on the rim of the wheel, the side load shall be applied directly to the rim of the wheel. In this case, the required test load shall be increased over that specified in CAR 15.1021 in the ratio of the distance from the center of the wheel to the point of maximum cross-sectional width of the tire, to the distance from the center of the wheel to the point where the load actually is applied, thus obtaining a bending moment at the center of the wheel of the same value as would have been obtained had the load been applied at the maximum cross-sectional width of the tire.

15.103. A main landing gear wheel shall support the required loads before failure.

15.104. When a brake is incorporated in a main landing gear wheel, the brake mechanism and its operation shall be satisfactory to the Secretary and the brake shall be free from any undue tendency to lock or jam.

15.105. The rim contour of a main landing gear wheel shall conform to the Tire and Rim Association's standards or recommendations unless the wheel is to be used in conjunction with a specially constructed tire.

15.106. A landing gear wheel may be equipped with any make or type of tire, provided that the tire is a proper fit on the rim of the wheel and provided that the tire manufacturer's load rating, which he uses and recommends as a basis for his guarantee, is not exceeded.

15.107. Each unit of a certificated model of main landing gear wheel shall bear the following additional identification data as prescribed in CAR 15.042 (e):

The maximum static load for which certificated.

15.108. A request for certification of a type or model or series of models of main landing gear wheels shall be supported by the following additional data as prescribed in CAR 15.0502:

15.1080. A report of the static tests prescribed in CAR 15.102. The report shall contain complete details of the tests, including records of wheel deflections and photographs of the test setups. If the side load is applied in accordance with CAR 15.1025, the report shall show clearly that the procedure prescribed in CAR 15.1024 was impossible. The report shall be signed by the person making the tests, and shall be supported by affidavit unless the tests were witnessed by a Bureau inspector, in which case such inspector also will sign the report as a witness.

15.11. *Seaplane floats.*—

15.110. Main seaplane floats will be certificated for a maximum gross weight of airplane which will be determined in accordance with the applicable requirements prescribed in CAR 04.

15.1100. Certification of a float does not include certification of the structure attaching it to the aircraft. Such structure is classified in accordance with CAR 15.022 (b).

15.1101. The installation of floats on aircraft shall be in accordance with the provisions of CAR 04.

15.111. Each unit of a certificated model of main seaplane float shall bear the following additional identification data as prescribed in CAR 15.042 (e):

(a) The maximum gross weight of aircraft for which certificated.
(b) The number of floats per aircraft.

15.112. A request for certification of a type or model or series of models of main seaplane floats shall be supported by the following additional data as prescribed in CAR 15.0502:

15.1120. The technical data required to prove compliance with the applicable structural and detail design requirements prescribed in CAR 04.

15.12. *Skis.*—

15.120. Skis, including ski pedestals, will be certificated for a maximum static load which will be determined from the strength of the ski.

15.1200. Certification of a ski and its pedestal does not include certification of any special structure attaching it to the aircraft. Such structure is classified in accordance with CAR 15.022 (b).

15.1201. The installation of skis on aircraft shall be in accordance with the provisions of CAR 04.

15.121. The strength of a ski, including the pedestal, shall be substantiated by a stress analysis or by static tests.

15.122. A ski, including the pedestal, shall be designed to carry the following loads without failure when supported at the pedestal bearing sleeve:

15.1220. A load upward, distributed uniformly along the ski bottom and symmetrically with respect to the pedestal bearing sleeve in the fore-and-aft direction, the front end of the ski carrying no load if it is at a greater distance from the bearing sleeve than the rear end. The required load is equal to

$$(P)\times(n)\times(1.5)$$

where $P$ is the maximum static load for which approval is requested, $n$ is

$$2.80+\frac{9000}{2P+4000}$$

and is the applied landing load factor for the corresponding airplane, and 1.5 is the factor of safety. If the strength is substantiated by static test, the required test load is equal to

$$(P)\times(n)\times(1.5)\times(1.25)$$

where 1.25 is a strength test material factor.

15.1221. A load upward, applied to the ski bottom at a point directly under the pedestal bearing sleeve. The required load, or required test load, is equal to the load, or test load, specified in CAR 15.1220.

15.1222. A side load distributed uniformly along the edge of the ski bottom and symmetrically with respect to the pedestal bearing sleeve in the fore-and-aft direction, the front end of the ski carrying no load if it is at a greater distance from the bearing sleeve than the rear end. The required load, or required test load, is equal to 35 per cent of the load, or test load, specified in CAR 15.1220. When the height of the aircraft axle from the ground with the ski installed is greater than that with the interchangeable wheel installed, such side load shall be reduced by the ratio of the height of the axle from the ground with the interchangeable wheel installed, to the height of the axle from the ground with the ski installed.

15.1223. A side load applied to the edge of the ski bottom at a point near the front end of the ski. The required load, or required test load, is that necessary to produce a bending moment on the aircraft axle in a horizontal plane of the same magnitude as the bending moment in the vertical plane produced by the load, or test load, specified in CAR 15.1222.

15.123. Each unit of a certificated model ski shall bear the following additional identification data as prescribed in CAR 15.042 (e):

15.1230. The maximum static load for which certificated.

15.124. A request for certification of a type or model or series of models of skis shall be supported by the following additional data as prescribed in CAR 15.0502:

15.1240 (a). A stress analysis of the ski and pedestal showing compliance with CAR 15.122, if the strength of the ski and pedestal has been substantiated by a stress analysis. Such analysis shall be signed by the responsible engineer.

15.1241 (b). A report of the static tests showing compliance with CAR 15.122, if the strength of the ski and pedestal has been substantiated by static tests. The report shall contain complete load computations, complete details of the tests, and photographs of the test setups. The report shall be signed by the person making the tests and shall be supported by affidavit unless the tests were witnessed by a Bureau inspector, in which case such inspector also will sign the report as a witness.

15.2. *Navigation equipment.*—

15.20. *Position lights.*—

15.200. Position lights prescribed in CAR 04, in order to be certificated, shall be so constructed and capable of being so mounted as to comply with the regulations hereinafter prescribed.

15.2000. The installation of position lights in aircraft shall be in accordance with the applicable provisions of CAR 04 to CAR 08 inclusive, and the light manufacturer's mounting instructions.

15.201. As the forward (right and left wing) lights are complementary they will be certificated as a unit. The rear (tail) light will be certificated as a separate unit.

15.202. Forward lights are classified as follows:

(a) Standard forward position lights.
(b) Airline forward position lights.
(c) Auxiliary position lights.

15.203. *Angular limits.*—Position lights shall be so designed as to show unbroken light within the limits hereinafter specified.

15.2030. Each standard and airline forward light shall show an unbroken light between two vertical planes whose dihedral angle is 110 degrees, measured to the left from dead ahead for the left light and correspondingly to the right from dead ahead for the right light. In all directions outside of these limits an additional tolerance of not more than 10 degrees will be permitted within which the cut-off from the required intensity to the permissible stray-light intensity, specified in CAR 15.2040 and CAR 15.2041, shall be effected.

15.2031. Each auxiliary light shall show an unbroken light between the vertical plane through the longitudinal axis forward and a conical surface generated by a line making an angle of 20 degrees with the longitudinal axis forward, measured to the left from dead ahead for the left light and correspondingly to the right from dead ahead for the right light. Outside of these limits the cut-off shall be effected within the limits, including tolerance angle, prescribed for the standard and airline forward position lights.

15.2032. The rear light shall show to the rear an unbroken light between two vertical planes whose dihedral angle is 140 degrees, of which 70 degrees lies on either side of dead aft. In all directions outside of these limits an additional tolerance of not more than 10 degrees will be permitted within which the cut-off from the required intensity to the permissible stray-light intensity, specified in CAR 15.2043, shall be effected.

15.204. Light Intensity—Position lights shall be so designed as to provide the light intensities hereinafter specified when equipped with the lamps prescribed by the manufacturer operated at the candlepower or current rating publicly established by the lamp manufacturer.

15.2040. Each standard forward light shall have an intensity of not less than 8 candlepower in all directions within 30 degrees of the longitudinal axis forward, subject to the limits specified in CAR 15.2030. Each light shall have an intensity of not less than 4 candlepower in all directions between 30 degrees and 90 degrees of the longitudinal axis forward, subject to the limits specified in CAR 15.2030. Each light shall have an intensity of not less than 3 candlepower in all other directions within the limits specified in CAR 15.2030. No light shall have a stray-light intensity of more than 1 candlepower in any direction outside of the specified limits, except within the permissible tolerances specified in CAR 15.2030.

15.2041. Each airline forward light shall have an intensity of not less than 35 candlepower in all directions within 20 degrees of the longitudinal axis forward, subject to the limits specified in CAR 15.2030. Each light shall have an intensity of not less than 8 candlepower in all directions between 20 degrees and 30 degrees of the longitudinal axis forward, subject to the limits specified in CAR 15.2030. Each light shall have an intensity of not less than 4 candlepower in all directions between 30 degrees and 90 degrees of the longitudinal axis forward, subject to the limits specified in CAR 15.2030. Each light shall have an intensity of not less than 3 candlepower in all other directions within the limits specified in CAR 15.2030. No light shall have a stray-light intensity of more than 1 candlepower in any direction outside of the specified limits except within the permissible tolerances specified in CAR 15.2030.

15.2042. Each auxiliary light shall have an intensity of not less than 35 candlepower in all directions within 20 degrees of the longitudinal axis forward, subject to the limits specified in CAR 15.2031. No light shall have a stray-light intensity of more than 1 candlepower in any direction outside of the specified limits, except within the permissible tolerances specified in CAR 15.2031.

15.2043. The rear light shall have an intensity of not less than 8 candlepower in all directions within 70 degrees of the longitudinal axis aft, subject to the limits specified in CAR 15.2032. The light shall have an intensity of not less than 4 candlepower in all other directions within the limits specified in CAR 15.2032. The light shall not have a stray-light intensity of more than 1 candlepower in any direction outside of the specified limits, except within the permissible tolerances specified in CAR 15.2032.

15.205. *Color.*—All left wing lights shall be aviation red, all right wing lights shall be aviation green, and all rear lights shall be aviation white. These colors are defined in CAR 31.

15.206. *Light covers.*—The light bulbs shall be protected by a cover which shall be of noncombustible material and so constructed that it will not change color, or cloud, or suffer any considerable loss of transmission in use. The coloring of colored portions shall be completely diffused through the material.

15.207. A request for certification of a type or model or series of models of forward position lights or rear position lights shall be supported by the following additional data as prescribed in CAR 15.0502:

15.2070. A copy of the instructions for the mounting of the lights in aircraft, furnished by the manufacturer to purchasers of the lights.

15.208. A request for certification and its supporting data shall be accompanied by a complete set of lights described in the data. These lights will be tested at the Department of Commerce laboratory for compliance with CAR 15.203 to CAR 15.206 inclusive.

15.21. *Landing flares.*—

15.210. Landing flares prescribed in CAR 04, in order to be certificated, shall be so constructed and capable of being so mounted as to comply with the regulations hereinafter prescribed.

15.2100. The installation of landing flares in aircraft shall be in accordance with the provisions of CAR 04 to CAR 08 inclusive, and the flare manufacturer's mounting instructions.

15.211. Landing flares will be certificated with respect to their light duration and light intensity. They are grouped in three classifications as follows:

(a) Class 1 flares.
(b) Class 2 flares.
(c) Class 3 flares.

15.212. Class 1 flares shall have a light duration of at least 3 minutes, a light intensity of at least 200,000 candlepower and a rate of descent not greater than 550 feet per minute.

15.213. Class 2 flares shall have a light duration of at least 1½ minutes, a light intensity of at least 110,000 candlepower and a rate of descent not greater than 550 feet per minute.

15.214. Class 3 flares shall have a light duration of at least 1 minute, a light intensity of at least 70,000 candlepower and a rate of descent not greater than 550 feet per minute.

15.215. Each unit of a certificated model landing flare shall bear the following additional identification data as prescribed in CAR 15.042 (e):

15.2150. The class for which certificated.

15.216. A request and supporting data for certification of a type or model or series of models of a landing flare shall be accompanied by 2 flares of each model described in the data. These flares will be tested at the Department of Commerce laboratory for compliance with the light duration and intensity requirements specified in CAR 15.212, CAR 15.213 or CAR 15.214, as the case may be.

15.217. Upon satisfactory completion of the examination of the technical data submitted to the Department of Commerce and satisfactory completion of the tests of the flares submitted to the Deparment of Commerce, 5 flares of each model described in the data, an airplane arranged for the complete installation of flares of each model, and operating personnel shall be made available for functional tests of the flares. These tests may be made at any location desired by the manufacturer.

15.2170. In the event that there is one failure out of the 5 flares subjected to functional tests, 5 additional flares shall be subjected to functional tests.

15.2171. Failure of two or more flares out of 10 dropped shall be sufficient grounds for denial of certification by the Secretary. Certification will be made only if all 5 original flares function satisfactorily or, in the event of one failure in the original 5, if the second 5 function satisfactorily.

15.3. *Safety equipment.*—

15.30. *Safety belts.*—

15.300. Safety belts will be certificated for general aircraft use or for glider use dependent upon the strength of the belt.

15.3000. Certification of a safety belt does not include certification of its anchorages to the aircraft.

15.3001. The installation of safety belts in certificated aircraft shall be in accordance with the pertinent provisions of CAR 04.

15.301. Safety belts shall be so designed as to be easily adjustable. Each belt shall be equipped with a quick-release mechanism so designed that it cannot be released inadvertently. The width of a certificated safety belt shall be at least 2 inches.

15.302. The strength of a safety belt shall be determined by static test.

15.303. Safety belts for general aircraft use will be certificated for one person or two adjacent persons dependent upon the strength of the belt.

15.3030. A safety belt for one person shall be capable of withstanding a load of 1,000 pounds applied in the same manner as a person's weight would be applied in a crash. The quick-release mechanism shall be capable of withstanding this load without undue distortion, so that when the load is relieved to 400 pounds, the mechanism shall be capable of being operated by hand.

15.3031. A safety belt for two persons shall be capable of withstanding a load of 2,000 pounds applied in the same manner as the weight of two persons would be applied in a crash. The quick-release mechanism shall be capable of withstanding this load without undue distortion, and when the load is relieved to 800 pounds, the mechanism shall be capable of being operated by hand.

15.304. Safety belts for glider use only will be certificated as such.

15.3040. A safety belt for glider use shall be capable of withstanding a load of 850 pounds applied in the same manner as a person's weight would be applied in a crash. The quick-release mechanism shall be capable of withstanding this load without undue distortion, and when the load is relieved to 400 pounds, the mechanism shall be capable of being operated by hand.

15.305. Each unit of a certificated model safety belt shall bear the following additional identification data as prescribed in CAR 15.042 (e):

15.3050. Whether for one person, two persons, and/or for glider use only.

15.306. A request for certification of a type or model or series of models of safety belts shall be supported by the following additional data as prescribed in CAR 15.0502:

A report of the static tests showing compliance with CAR 15.3030, CAR 15.3031 or CAR 15.3040, as the case may be. The report shall contain complete details of the tests, including the hand operation of the quick-release mechanism under relieved load, and shall contain photographs of the test setup. The report shall be signed by the person making the tests and shall be supported by affidavit unless the tests

were witnessed by a Bureau inspector, in which case such inspector also will sign the report as a witness.

15.31. *Parachutes.*—

15.310. Parachutes prescribed by CAR 60, in order to be certificated, shall be so constructed as to comply with the following regulations.

15.3100. All materials used shall be equivalent to or better than those specified by the United States Army or Navy for parachutes, or shall be proved satisfactory to the Secretary by technical data and practical tests.

15.3101. The follow through between parachute and rider shall be so engineered that all parts or fittings carrying a shock load are stronger than the combined strength of the suspension lines to which they are attached.

15.3102. All metal parts shall be designed to carry their full rated load without yielding.

15.3103. The fabric used in the canopy construction shall be free from gums, starches and other foreign material. It shall also be free from avoidable imperfections in manufacture and from defects or blemishes affecting its strength or durability and shall have been finished without application of excessive heat. The surface of the fabric shall be smooth.

15.3104. Suspension lines shall be continuous, without splices, from connector link to connector link and shall contain no knots between these points.

15.3105. Before securing the suspension lines to the skirt, each line shall be put under 40 pounds tension and marked to show the point of attachment. The fabric shall be pulled out but not stretched.

15.3106. The machine sewing shall be made with a shuttle or plain stitch. All zigzag sewing shall be done on a 2-stitch zigzag sewing machine.

15.3107. The rip cord, including joints between the handle and the release, shall be designed to withstand a load of 300 pounds.

15.3108. The harness shall be so constructed that the rider can release himself and drop clear in case of a water landing, but a quick-attachable or quick-releasing devise between the harness and the parachute is not mandatory.

15.3109. Each parachute outfit shall be provided with a suitable place for keeping a record card containing spaces for recording dates of repacking, repairs, by whom made and space for the manufacturer's recommendations as to repacking.

15.311. Deviations from CAR 15.3104, CAR 15.3105 and CAR 15.3106 shall be such as are acceptable to the United States Army or Navy, or shall be proved satisfactory to the Secretary by technical data and practical tests.

15.312. A request for certification of a type or model or series of models of parachutes shall be supported by the following additional data as prescribed in CAR 15.0502:

15.3120 (a). Data showing compliance with CAR 15.3100 to CAR 15.3109 inclusive. These data may be references to drawings submitted if the drawings clearly show compliance with these regulations.

15.3121 (b). Data substantiating any deviations in accordance with CAR 15.311.

15.3122 (c). A detailed list of the material and strength specifications of all component parts of the parachutes described in the drawings. The list shall also specify the manufacturing practices employed in the assembly operations and shall satisfy the Secretary that all parts are properly pull-tested before assembly.

15.313. Upon satisfactory completion of the examination of the technical data submitted to the Department of Commerce, parachutes of each model described in the data together with an airplane and operating personnel shall be made available for the following tests of the parachutes. These tests may be made at any location desired by the manufacturer.

15.3130. *Functional test (normal pack).*—12 drops from an airplane with a 170 pound dummy man, from an altitude of not more than 500 feet. The indicated air speed of the airplane at the time of release shall be 100 miles per hour. No twists shall purposely be packed in the suspension lines. The parachute must be fully open within 3 seconds from time of release.

15.3131. *Functional test (twisted lines).*—5 drops from an airplane with a 170 pound dummy man, from an altitude of not more than 500 feet. The indicated air speed of the airplane at the time of release shall be 100 miles per hour. 3 twists shall purposely be packed in the suspension lines near the skirt. The parachute must be fully open within 4 seconds from time of release.

15.3132. *Strength test.*—3 drops with the same parachute from an airplane with a 600 pound lead weight, from an altitude of not more than 500 feet. The indicated air speed of the airplane at the time of release shall be 100 miles per hour. No twists shall purposely be packed in the suspension lines. The weight shall be attached to the harness. No external shock absorbers or material which may act as such shall be permitted. The parachute shall show no failure of any material.

15.3133. *Live drop test.*—2 live drops from an airplane with a 170 pound man, from an altitude of 2,000 feet on a comparatively still day. An additional certificated auxiliary parachute shall be carried. The rider must suffer no discomfort from opening shock and must be able to disengage himself from the harness after landing.

15.3134. *Rate of descent test.*—One drop from an airplane with a 170 pound dummy man, from an altitude of 2,500 feet. The rate of descent shall not exceed 21 feet per second. The descent shall be timed from the time of full opening to the time of ground impact. The distance descended shall be assumed at 2,250 feet and the rate of descent shall be this distance divided by the time in seconds.

15.3135. 100 per cent performance shall be required in the tests specified in CAR 15.3130 through CAR 15.3134 except in the case of an auxiliary parachute. (See CAR 15.315.)

15.314. The tests specified in CAR 15.313 will not be required for parachutes previously approved by the United States Army Air Corps or by the Bureau of Aeronautics, Navy Department. In lieu of these tests, there shall be included in the supporting data submitted with a request for certification of such a parachute the following data:

15.3140 (a). A copy of the official report describing the drop tests and static tests which formed the basis of the Army or Navy approval, signed by the Army or Navy representatives who witnessed the tests.

15.3141 (b). A statement by an authorized representative of the Army or Navy to the effect that the parachute is approved and accepted by the Army or Navy as the case may be.

15.315. A parachute to be certificated for use as an auxiliary parachute in combination with a certificated parachute, need not comply with the rate of descent specified in CAR 15.3134 but shall have a rate of descent not exceeding 25 feet per second and shall comply with all of the other regulations herein prescribed.

15.3150. The technical data submitted in connection with an auxiliary parachute and the tests made to obtain its certification shall satisfactorily account for the combination of parachutes and not the auxiliary parachute alone.

15.3151. Each unit of a certificated model auxiliary parachute shall bear the following additional identification data as prescribed in CAR 15.042 (e): "Auxiliary Only."

15.4. *Control and structural units.*—

15.40. *General.*—

15.400. Certain types of special control units and structural units, such as those listed in CAR 15.023, so designed that they can be used in any type or model of aircraft without change or with only minor changes which in no way affect the operation or strength of the units, will be certificated provided that they comply with the regulations applicable to them prescribed in CAR 04 to CAR 08 inclusive.

15.4000. The installation of such special units in aircraft shall be in accordance with the pertinent provisions of CAR 04 through CAR 08 inclusive and the instructions of the manufacturers of the units.

15.401. Before requesting certification of a type or model or series of models of a special control unit or structural unit, the manufacturer shall apply to the Secretary for a ruling as to the additional data to be submitted in accordance with CAR 15.0502 to show compliance with the regulations applicable to the unit in question prescribed in CAR 04 through CAR 08. This application shall be accompanied by a description of the unit and a drawing, or drawings, sufficient to enable the Secretary to make a ruling particularly applicable to the unit in question.

15.5.

15.6.

15.7.

15.8. *Equipment items adapted to specific aircraft models.*—

15.80. *Equipment items adapted to only one aircraft model.*—

15.800. Certain items of equipment, such as those listed in CAR 15.024, so designed that they can be used only in one aircraft model will be specially approved as integral parts of the aircraft in which they are installed provided that they comply with the regulations applicable to them prescribed in CAR 04 through CAR 08.

15.801. A request for approval of such an item of equipment shall be supported by the following additional data as prescribed in CAR 15.0502:

15.8010. (a) Data showing compliance with the regulations applicable to the item in question prescribed in CAR 04 to CAR 08 inclusive.

15.8011. (b). In lieu of the data specified in CAR 15.801 (a), data in accordance with a special ruling made by the Secretary and obtained by the procedure prescribed in CAR 15.401.

15.802. The request for approval of such an item of equipment together with its supporting data shall be included with the approval request and supporting data for the aircraft model in which the item is installed.

15.81. *Equipment items adapted to any aircraft model by means of detail design changes.*—

15.810. Certain items of equipment, such as those listed in CAR 15.024, of such a nature that by means of detail design changes they can be used in any aircraft model, will be specially approved as integral parts of the aircraft in which they are installed provided that they comply with the regulations applicable to them prescribed in CAR 04 through CAR 08.

15.811. If the manufacturer so desires, such an item of equipment may be considered as a series of items, each so designed that it can be used only in one aircraft model. Approval in such a case will be handled as prescribed in CAR 15.80.

15.812. If the procedure prescribed in CAR 15.811 is too cumbersome to suit a particular item, the item will be considered in two parts as follows:

(a) The unchanged basic structure.
(b) The variable structure.

15.813. If the basic structure is deemed satisfactory by the Secretary, only the variable structure need be considered in connection with the certification of each aircraft model in which the item is installed.

15.814. A request for examination of the basic structure of such an item of equipment shall be supported by the following additional data as prescribed in CAR 15.0502:

15.8140 (a). Data showing compliance with the regulations applicable to the item in question prescribed in CAR 04 through CAR 08.

15.8141 (b). In lieu of the data specified in CAR 15.814 (a), data in accordance with a special ruling made by the Secretary and obtained by the procedure prescribed in CAR 15.401.

15.815. A request for approval of a complete item of equipment in this classification shall be supported by the following data:

15.8150 (a). Complete references to the data pertaining to the basic structure previously deemed satisfactory by the Secretary.

15.8151 (b). Data as prescribed in CAR 15.814 (a) or CAR 15.814 (b), but pertaining only to the variable structure.

15.8152 (c). Any additional data which may have been prescribed by the Secretary at the time of his examination of the basic structure.

18. REPAIR AND ALTERATION OF AIRCRAFT

18.0 Provision for Re-Rating
18.1 Types of Repair
18.2 Types of Alteration
18.3 Types of Repair Agency
18.4 Rules Governing Repair Agencies
18.5 Procedure Governing Repairs
18.6 Procedure Governing Alterations
18.7 Technique and Practices

CHAPTER 18. REPAIR AND ALTERATION OF AIRCRAFT

18.0. *Provision for re-rating.*—Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the re-rating of aircraft as to their airworthiness, a certificated aircraft, or component thereof, which has been altered or repaired may be re-rated as to airworthiness in accordance with such of the following provisions as may be applicable.

18.1. *Types of repair.*—An aircraft will be deemed to have been repaired when

18.10. (a). any non-structural member (such as a fairing, cowling or turtleback; 5 per cent or less of the surface of a fabric covered wing or control surface; not more than two adjacent wing or control surface ribs; and the trailing edge of a wing or control surface) has been repaired, or when a complete structural component (such as a wing panel; a landing gear; a wheel; a landing gear, wing or control surface strut; and a control surface) has been replaced by one purchased from the original manufacturer, in which cases the repair will be designated as a minor repair, or when

18.11 (b). any structural member (such as a spar; a wing or control surface leading edge or tip strip; a control surface rib; three or more adjacent wing ribs; a wing or cabane strut wire; a wing compression member; a fitting; a landing gear or tail surface strut or wire; a fuselage longeron, cross tube, diagonal or bulkhead; any portion of the wooden or metal cover of a stressed-skin wing, control surface, fuselage or landing gear; and any bracket supporting a seat, baggage compartment, fixed equipment or control system part) has been repaired or replaced, in which case the repair will be designated as a major repair, or when

18.12 (c). the engine has been overhauled, or when

18.13 (d). the propeller has been repaired, or when

18.14 (e). an instrument has been repaired.

18.2. *Types of alteration.*—An aircraft will be deemed to have been altered when

18.20 (a). the aircraft structure has been changed, except in a manner which incorporates the use of a member or a portion of a member of greater strength than the original member in accordance with Bureau of Air Commerce Manual (ACM 18), or when

18.21 (b). any change has been made in the engine, propeller, equipment or arrangement of equipment, which change may affect the balance, stability, local strength of supporting structures, or any other aspect of the airworthiness of the aircraft, or when

18.22 (c). the engine has been altered, or when

18.23 (d). the propeller has been altered.

18.3. *Types of repair agency.*—Agencies which alter or repair an aircraft in accordance with the classifications set forth in CAR 18.1 and CAR 18.2 will be classified as follows:

18.30. *Manufacturer.*—means the manufacturer holding a type certificate for the construction of the aircraft, engine or propeller which is being altered, repaired or overhauled; or the manufacturer of the instrument being repaired.

18.31. *Certificated repair station.*—means a repair station engaged in altering, repairing or overhauling an aircraft, engine, propeller or instrument in accordance with the classification for which it has been approved as provided for in CAR 52.

18.310. An airplane manufacturer, upon application, shall be eligible for a certificate of competency to operate a repair station in the classification covering the same type of structure as employed in the aircraft for which he holds a type certificate.

18.311. A manufacturer holding a type certificate for an engine, upon application, shall be eligible for a certificate of competency to operate a repair station certificated for engine overhaul.

18.312. A propeller manufacturer, upon application, shall be eligible for a certificate of competency to operate a repair station in the classification covering the same type of propeller as that for which he holds a type certificate.

18.32. *Other agency.*—means a certificated airplane or engine mechanic, i. e., one holding a certificate of competency as provided for in CAR 23, not employed by a manufacturer as defined in CAR 18.30 or by a repair station as defined in 18.31.

18.4. *Rules governing repair agencies.*—Repair agencies as designated in CAR 18.30, 18.31, and 18.32 shall be governed by the following rules:

18.40. The alteration or repair of a structural component of a certificated aircraft shall be made by the manufacturer of the aircraft or made by, or continuously supervised by, a certificated airplane mechanic only.

18.41. The alteration or overhaul of a certificated engine shall be made by the manufacturer of the engine or made by, or continuously supervised by, a certificated airplane or engine mechanic only.

18.42. The alteration, overhaul or repair of a certificated propeller shall be made by the manufacturer of the propeller or made by, or continuously supervised by, a certificated airplane or engine mechanic only.

18.43. An agency as defined in CAR 18.32 shall not engage in the alteration of a certificated engine, or in the alteration, overhaul or repair of a certificated propeller, or in the repair or overhaul of an instrument with which a certificated airline aircraft is equipped.

18.44. Any agency engaged in the overhaul or repair of a certificated engine shall use only structural engine parts which are deemed satisfactory by the Secretary.

18.45. When an engine part or a propeller part is rejected in accordance with these regulations, a copy of the notice of rejection shall be forwarded to the Bureau of Air Commerce.

18.46. When an entry as to any alteration or repair is made in a log-book as required by these regulations, such entry shall include the signature, and title or mechanic certificate number, of the person making such entry.

18.5. *Procedure governing repairs.*—

18.50. *Major repairs.*—Any repair agency engaged in the major repair of a certificated aircraft shall execute Repair and Alteration Form AC 18–1 in duplicate.

18.500. The repair agency shall accurately list the location and the nature of the repair on the blank pages of the form. It shall incorporate in the form such technical data as are necessary to substantiate the airworthiness of the repair, either by reference to the figures and tables in ACM 18, or by the incorporation of computations and well dimensioned detail sketches, or by both. When such data are too extensive, they shall be appended to the original copy of the form and reference thereto shall be made in both copies of the form.

18.501. The repair agency shall request a designated inspector of the Bureau to examine the form, the data and the repair.

18.502. The original parts removed from an aircraft in making a major repair or replacement shall be retained for comparison by such inspector.

18.503. The repair or replacement will be approved when comparison with the retained part indicates conformity with the original, but such inspector may, at his discretion, require that he be furnished a drawing from the original manufacturer of the part or parts in question, or that the agency make a drawing of the part or parts in question and have the drawing approved, in writing, by the manufacturer.

18.504. An invoice is not acceptable as proof of conformity of a purchased replacement with approved specifications therefor, except when such invoice is issued by the original manufacturer.

18.505. Such inspector may require that he be furnished with a sample or samples of the material or materials used in making a major repair or replacement. When it is not possible to compare the materials by a visual inspection the results of material specification tests of the original and replacement samples shall be supplied.

18.506. Such inspector shall determine whether or not the workmanship and materials are in accordance with the regulations and accepted practice.

18.507. Provided such inspector deems the repair airworthy, he will issue a temporary airworthiness certificate.

18.508. The owner shall incorporate the duplicate copy of Form AC 18–1 in the aircraft log-book.

18.51. *Minor repair.*—A repair agency engaged in the minor repair of a certificated aircraft shall make a detailed entry descriptive thereof in the aircraft log-book. If replacement of a component purchased from the original manufacturer is involved, the entry shall so state.

18.52. *Engine overhaul.*—A repair agency engaged in the overhaul of a certificated engine shall make a detailed entry descriptive thereof in the engine log-book.

18.53. *Propeller repair or overhaul.*—Only agencies as defined in CAR 18.30 and 18.31 may repair or overhaul a certificated propeller.

18.530. When a propeller has been repaired, the agency shall execute one copy of Repair and Alteration Form AC 18–1 and deliver it to the owner who shall incorporate it in the aircraft log-book.

18.54. *Instrument repair.*—Any agency as defined in CAR 18.30, 18.31 or 18.32 may repair an instrument with which a certificated aircraft is equipped, except that an agency as defined in CAR 18.32 shall not repair an instrument with which a certificated airline aircraft is equipped.

18.540. When an instrument with which a certificated airline aircraft is equipped has been repaired, the agency or owner shall make an entry thereof in the aircraft log-book and the owner shall be responsible for the making of such entry.

18.6. *Procedure governing alterations.*—

18.60. *Aircraft alteration.*—A repair agency engaged in the alteration of a certificated aircraft shall execute Repair and Alteration Form AC 18–1 in duplicate.

18.600. The repair agency shall accurately list the location and the nature of the alteration on the blank pages of the form. It shall incorporate in the form such drawings, well-dimensioned detail sketches, stress analyses and balance computations as are necessary to substantiate the airworthiness of the alteration. When such data are too extensive, they shall be appended to the original copy of the form and reference thereto shall be made in both copies of the form.

18.601. The repair agency shall request a designated inspector of the Bureau to examine the form, the data and the alteration.

18.602. Such inspector may, at his discretion, deem the alteration airworthy or request the agency to submit the original copy of the form together with the data to the Bureau.

18.603. If such inspector deems the alteration airworthy, he will issue a temporary airworthiness certificate and deliver the duplicate copy of the form to the agency or the owner for incorporation in the appropriate log-book.

18.604. If such inspector requests the agency to refer the decision to the Bureau, the alteration will be examined and either

18.6040 (a). deemed airworthy, in which case the form and the data will be transmitted to the supervising inspector of the district involved, together with an authorization to proceed with such inspection as may be considered necessary, or

18.6041 (b). deemed unairworthy, in which case the agency will be so notified.

18.605. If the inspection provided for in CAR 18.6040 is satisfactory, such inspector will proceed as provided in CAR 18.603.

18.61. *Engine alteration.*—Only agencies as defined in CAR 18.30 and 18.31 may engage in the alteration of a certificated engine.

18.610. A repair agency engaged in the alteration of a certificated engine shall execute Repair and Alteration Form AC 18–1 in duplicate.

18.611. The repair agency shall accurately list the nature of the alteration on the blank pages of the form. It shall incorporate in the form such drawings, well-dimensioned detail sketches, stress analyses and test reports as are necessary to substantiate the airworthiness of the alteration. When such data are too extensive, they shall be appended to the original copy of the form and reference thereto shall be made in both copies of the form.

18.612. The repair agency shall submit the original copy of the form together with the data to the Bureau for examination.

18.613. Upon examination of the form and data, the Bureau may approve the alteration and so notify the agency, in which case the agency shall deliver the duplicate executed copy of the form to the owner who shall incorporate it in the engine log-book; or it may deem an inspection necessary, in which case it will transmit the form and the data to the supervising inspector of the district involved, together with authorization to proceed with such inspection as may be deemed necessary.

18.614. If the inspection provided for in CAR 18.613 is satisfactory, the agency will deliver the duplicate executed copy of the form to the owner who shall incorporate it in the engine log-book.

18.62. *Propeller alteration.*—The provisions in CAR 18.61 through 18.614 for the alteration of a certificated engine are applicable likewise in the case of alteration of a certificated propeller, except that the duplicate executed copy of the form shall be incorporated in the aircraft log-book by the owner.

18.7. *Technique and practices.*—

18.700. *Materials.*—The use of materials of inferior quality or of those which experience has shown to lack uniformity of quality or strength shall be regarded as sufficient cause for withholding approval of alterations and repairs to certificated aircraft.

18.7000. The important physical properties of the materials used shall be definitely specified in the form or accompanying data, either by reference to an accepted standard such as Army, Navy, or S. A. E. specifications or by reference to reliable test results.

18.7001. Only the highest quality of casein or animal glue shall be used in making alterations or repairs to wood parts in certificated aircraft.

18.701. *Aluminum alloy structures.*—

18.7010. All aluminum alloy rivets used by repair agencies shall be properly heat-treated, driven within proper time limits, and of proper materials to insure suitable rivet strength, except in approved special cases in secondary parts where the rivets do not transmit stress, in which cases no heat treatment is necessary, and except in cases when the repair agency has drawings of the manufacturer which show that unheat-treated rivets are satisfactory. Special care shall be taken in the heat treatment of rivets to insure that individual rivets are actually rapidly quenched in the quenching medium.

18.7011. Bolts, screws and rivets employed in joints of dissimilar metals and of wood to aluminum alloy members, in addition to being properly heat-treated, shall be specially coated with paint just prior to assembly. (This is particularly important in the case where an aluminum bolt or screw passes through or into wood, or where bolts or rivets pass through tubing.) In structures made entirely from Alclad materials, bare bolts may be used.

18.7012. The following practices are hereby prohibited:

18.70120 (a). Quenching of 17S or 24S alloys in hot water or air after heat treatment.

18.70121 (b). Insufficiently rapid transfer of 17S or 24S alloys from the heat treatment medium to the quench tank. (An elapsed time of 10 or 15 seconds will, in many cases, result in noticeably impaired corrosion resistance.)

18.70122 (c). Painting after assembly, without prior protective treatment, of non-Alclad structures which are to be subjected to severe corrosive conditions. Whenever possible, parts which are not made from Alclad materials shall be anodized and shop primed prior to assembly.

18.70123 (d). Intimate contact of dissimilar metals or of wood with aluminum alloys.

18.70124 (e). Use of wood which is not thoroughly moisture-proofed for assembly into aluminum alloy structures.

18.70125 (f). Re-heating at temperatures above that of boiling water of 17S or 24S alloys after heat treatment, and the baking of primers at temperatures above that of boiling water.

18.70126 (g). The use of annealed 17S or 24S alloys in parts subject to severe corrosive conditions.

18.70127 (h). The use of hygroscopic materials improperly moisture-proofed in attempting to affect water-tightness of joints and seams.

18.70128 (i). The use of paint removers which contain strong caustic compounds, and of thin paint removers which may have a tendency to run into joints, rather than of those which have a jelly-like consistency.

18.70129 (j). The leaving of any trace of welding flux immediately after welding. (This is most readily prevented by washing in a warm 5% solution of sulphuric acid, rinsing in clear warm water, scrubbing accessible welds with a stiff-bristled brush, and giving a final rinse in clear warm water.)

18.7013. Gasoline tanks with inaccessible interior welds shall be immersed in a tank containing warm 5% sulphuric acid, agitated while rinsing in clear warm water, and then dried.

18.702. *Heat treatment.*—Before replacing damaged members with replacements not purchased from the original manufacturer of the aircraft, the repair agency shall in all cases determine that the material and heat treatment of the damaged members and of the replacements are identical.

18.703. *Wires and cables.*—

18.7030. Wires or cables shall be replaced if injured or distorted.

18.7031. All control cables 3/32" and above shall be spliced and not soldered, using standard Army and Navy tuck splices of at least 5 full tucks, or a Roebling roll of at least 7 full turns.

18.7032. Neither wires nor cables shall be subjected to heat.

18.7033. The substitution of cable for hard or streamline wires is prohibited.

18.704. *Fabric covering.*—All fabric used for recovering an aircraft structure shall be high grade airplane fabric of at least as good quality as that used originally in the aircraft. The dope and tape used shall be of as good quality as that used on the original aircraft, and the first two coats of dope shall be clear and shall be brushed on. The total number of coats of dope shall not be less than necessary to result in a taut finished job. Both surfaces of fabric covering on wings and control surfaces shall be securely fastened to the ribs by rib-stitching cord or any other method approved by the manufacturer. The spacing of these fasteners shall not exceed that recommended by the manufacturer. When rib-stitching cord is used, the cord shall be linen, or equivalent in strength to that used by the manufacturer. When stitching fabric to the ribs, reinforcing tape shall be used on the top of the fabric and over the ribs on both surfaces. This stitching shall be covered with pinked-edge tape, doped to the fabric.

18.705. *Metal wing ribs and spars.*—Repairs to metal ribs and spars shall preferably be made at the factory of origin or by a repair station which is certificated for this type of work. If this is not feasible, the repair agency shall obtain

a recommendation from the original manufacturer and comply with it as to the methods which should be used in making the particular repair.

18.706. *Riveted or bolted truss type metal fuselages.*—The provisions of CAR 18.705 apply to this type of structure.

18.707. *Wood or metal covered (stressed-skin) wings.*—

18.7070. Repairs to damaged stressed-skin or monocoque types of wing structure shall be made at the factory of origin or by a certificated repair station recommended in writing by the manufacturer for this type of work. Such station shall make such repairs in accordance with specific recommendations from the manufacturer.

18.7071. Small holes which in the discretion of a Bureau inspector do not seriously impair the strength of the structure may be repaired by, or the repair may be supervised by, any certificated airplane mechanic, provided the specific recommendations of the manufacturer governing such types of repair are followed. Small holes may be patched by attaching a cover over the hole.

18.7072. In any case, repairs to damaged skin, if very extensive, shall be made by replacing an entire panel from one structural member to the next. Where holes are large, the seam shall be made to lie along a bulkhead or along a structural member.

18.708. *Wood or metal monocoque fuselages.*—The provisions of CAR 18.707 apply to this type of structure.

18.709. *Fittings.*—

18.7090. Damaged fittings shall be replaced by factory parts or by parts made by a repair station certificated for fitting repair work.

18.7091. Worn fittings which were designed without bushings shall not be reamed to oversize but shall be replaced, unless a stress analysis or a test is made to show that the reamed fitting complies with strength requirements. Holes shall not be filled with welding rod and reamed.

18.7092. Torn, kinked or cracked fittings shall be replaced.

18.710. *Wood wing ribs.*—

18.7100. Acceptable methods of repairing a damaged rib are shown in Figures 16 and 17 of ACM 18. Cap strips shall be replaced entirely or repaired at the spars or at a joint in the rib.

18.7101. Damaged web members shall be replaced.

18.7102. Complete ribs shall be made from a manufacturer's approved drawing or from a drawing made by the repair agency and certified by the manufacturer as correct, except that the original rib may be used as a pattern for making the new rib if it is not too seriously damaged to permit comparison. The drawing, if used, shall be retained by the repair agency for use by the Bureau inspector in making the inspection.

18.711. *Wood wing spars.*—

18.7110. Wood spars may be spliced at any point except at a wing fitting, which shall not overlap any part of the splice.

18.7111. Acceptable methods of splicing the various types of spars are shown in Figures 9 through 13 of ACM 18.

18.7112. No scarf shall be made with a slope steeper than 10 to 1, and all joints shall be made with the highest quality of casein or animal glue.

18.7113. When casein glue is used on soft woods, a pressure of 100 to 150 pounds per square inch shall be applied to the joint during the gluing process. In gluing hard woods a pressure of 200 to 250 pounds per square inch shall be applied.

18.7114. In cases of elongated bolt holes in a spar, a new section of spar shall be spliced in or the spar replaced entirely.

18.7115. Except at a fitting, cracked spars (except box spars) in which the cracks are longitudinal and the wood is not splintered may be repaired by gluing, to both sides of the spar, strips of spruce or plywood of sufficient thickness to develop the longitudinal shear strength of the spar, such strips to extend well beyond the termination of the cracks. When this is done a total thickness of spruce equal to the thickness of the spar web or a total thickness of plywood equal to one-half the spar web thickness shall be used as shown in Figure 15 of ACM 18.

18.712. *Welded steel tube fuselages.*—Damaged members in steel tube fuselages may be repaired by the methods shown in Figures 1 through 8 of ACM 18, if it is possible to have a stub of the length indicated in the figures.

18.7120. If the member is damaged at the joint so that it is not possible to have such a stub, the member shall be replaced entirely in the case of web members, and in the case of longerons the splice shall be made in an adjacent bay.

18.7121. When it is necessary to remove a member at a joint or cluster, it shall be carefully and completely removed from the cluster without disturbing the surrounding members to which it is attached.

18.7122. A replacement tube shall be at least equal in strength to the original.

18.7123. Where a rosette weld is necessary the hole shall be made in the outside tube only and be of sufficient size to insure fusion with the inner tube.

18.713. *Engine mounts.*—The provisions of CAR 18.712 shall apply to tubular mount members.

18.714. *Landing gears.*—

18.7140. If damaged landing gear struts are made of streamlined tubing they shall not be repaired, but shall be replaced.

18.7141. If damaged landing gear struts are made of round tubing they may be repaired by using splices similar to those shown in Figures 1 through 8 of ACM 18.

18.7142. Damaged axles shall be replaced entirely.

18.7143. The straightening of landing gear struts and the filling of kinks with weld material are prohibited.

18.715. *Wing brace struts.*—Damaged wing brace struts shall not be repaired but shall be replaced entirely.

18.716. *Wing trailing and leading edges and tip strips.*—Repairs to wing trailing and leading edges and tip strips shall be made by properly attached and reinforced splices.

18.717. *Wood compression ribs.*—Wood compression ribs shall not be repaired but shall be replaced entirely.

18.718. *Control surfaces.*—Repair methods on control surfaces will depend upon the type of construction and the extent of damage. Procedure shall be in accordance with such portions of these regulations as are applicable.

18.719. *Hollow steel propellers.*—Damaged hollow steel propeller blades shall not be repaired except by the manufacturer. Welding is not permissible on such blades even for very minor repairs except by the manufacturer, due to the special process employed and the heat treatment required. A blade developing a crack of any nature in service shall be returned to the manufacturer for inspection.

18.7190. Minor injuries to the leading and trailing edges only of hollow steel blades may be smoothed by hand stoning provided the injury is not deep.

18.720. *Aluminum alloy propellers.*—Damaged aluminum alloy propeller blades and steel propeller hubs shall be repaired only by the manufacturer or by repair agencies certificated for this type of work. Such repair agencies shall be governed by the following considerations.

18.7200. A damaged metal propeller is one which has been bent, dented or cracked in such a manner as to render it unsafe for flight.

18.7201. Damaged blades with model numbers which are on the manufacturer's list of blades that cannot be repaired shall be rejected.

18.7202. The extent of a bend in the face alignment of blades shall be carefully checked by means of a protractor similar to the one illustrated in Figure 18 of ACM 18. Only bends not exceeding 20 degrees at .15 inch blade thickness to 0 degrees at 1.1 inches blade thickness may be cold straightened. Blades with bends in excess of this amount require heat treatment and shall be returned to the manufacturer or his authorized agent for repair.

18.7203. Blades which are bent in edge alignment shall not be repaired by anyone except the manufacturer or his authorized agent.

18.7204. Damaged blades shall be etched in a 20% caustic soda solution and cleaned in a 20% nitric acid solution, or in a cleaning solution which will produce equivalent results,

care being taken not to etch the shank portion. Scratches and suspected cracks shall be given a local etch and examined with a magnifying glass. The shank fillets and the front half of the under surface of the blades from 6 to 10 inches from the tip are the most critical portions. Adjustable pitch blades shall also be etched locally on the clamping portion of the shank at points ¼ inch in from the hub edge in line with the leading and trailing edges, and examined with a magnifying glass for circumferential cracks. *Any crack is cause for rejection.*

18.7205. Nicks and dents on the leading edge and face of blades shall be blended into the blade contour with smooth curves by the use of a riffle file and crocus cloth. After removal of a nick or dent, the surface shall be etched and examined with a magnifying glass, to insure that the nick or dent is entirely removed and that a crack has not started. The surface shall then be polished locally. Blades requiring removal of more material than the following permissible reduction in width and thickness from the drawing dimensions, shall be rejected:

Inner ⅔, 2½%.
Outer ⅓, 5%.
Outer 12", 10%.
Outer 6", May be modified as required.

18.7206. Hubs shall be minutely inspected for cracks by the wet or dry magnetic dust method. Particular attention shall be paid to the inside in the region of the shear shoulders. (Cracks usually start in line with the leading and trailing edges of the blade.) *Any crack is cause for rejection.*

18.7207. Hubs and clamp rings shall be cleaned by stripping off the plating in accordance with the manufacturer's recommended practice. They shall be dimensionally inspected for conformity to the drawing. Particular care shall be taken to check the 90 degree relation between shaft bore and blade socket centerline and track of the blade sockets, as these are the dimensions which are most likely to be affected by accidents. *Any hub which is sprung shall be rejected.*

18.7208. Splines and cone seats shall be carefully inspected for signs of wear. Splines shall be checked with a single key no-go gauge made to plus .002 of the base drawing dimensions for spline land width. If the gauge enters more than 20% of the spline area, the hub shall be rejected.

18.7209. Hubs and clamp rings shall be cadmium plated after they pass inspection. This plating shall be done in accordance with the manufacturer's recommended practice.

18.72010. Clevis pins, bolts and nuts shall be replaced if they show any indication of wear or distortion.

18.72011. The propeller shall be assembled as recommended by the manufacturer, and checked for track and balance. All blades must track within plus or minus $\frac{1}{16}$ inch.

18.72012. Horizontal unbalance may be corrected by adding lead not to exceed ¼ ounce to the concentric hole in the light blade or by removing lead not to exceed ¼ ounce from the heavy blade. An eccentric hole not over three-eighths inch (⅜") in diameter for any size blade end shall be drilled and filled with lead to procure vertical balance. The outer edge of such hole shall not be closer than ¼" to the nearest external surface of the blade. Only one such hole per blade will be permitted. The holes may equal the following dimensions, but in no instance shall they be made larger:

| Size no. of shank | Maximum concentric hole diameter | Maximum concentric hole depth | Maximum eccentric ¾" hole depth |
|---|---|---|---|
| 00 | $\frac{7}{16}$ | $2\frac{1}{2}$ | $2\frac{1}{4}$ |
| 0-V2 | $\frac{19}{32}$ | $3\frac{3}{16}$ | 3 |
| ½ | $\frac{5}{8}$ | $3\frac{3}{16}$ | $3\frac{1}{2}$ |
| 1 | $\frac{3}{4}$ | $4\frac{1}{8}$ | 4 |
| $1\frac{1}{2}$ | $\frac{13}{16}$ | $4\frac{7}{8}$ | $4\frac{1}{2}$ |
| 2 | $\frac{7}{8}$ | $5\frac{1}{2}$ | 5 |
| 3 | $\frac{31}{32}$ | $6\frac{1}{8}$ | 6 |

After securing final horizontal and vertical balance, the holes shall be corked to prevent the lead from falling out. If balance cannot be secured within the allowable limits given above, a reinspection is required because this is more than the maximum amount of unbalance that could occur if all parts were within specified tolerances.

18.72013. Vertical unbalance may be corrected when clamping rings are on the centerline by moving the two rings equally off center in the same direction by an amount which shall not exceed ¼ inch. When the clamp rings are in the 45 degree position due to engine or cowling interference, vertical unbalance may be corrected by moving one ring only towards the front centerline for a distance which shall not exceed ½". If this will not secure perfect balance, a reinspection is required. An arrow shall be stamped on the hub shell and on the clamp ring showing the final location of the ring.

18.721. *Wooden propellers.*—

18.7210. Wooden propellers shall be inspected for such defects as cracks, bruises, scars, warp, oversize holes in the hub, evidence of glue failure and separated laminations, sections broken off and defects in the finish. The tipping shall be inspected for such defects as looseness or slipping, separation of soldered joints, loose screws, loose rivets, breaks, cracks, eroded sections and corrosion.

18.7211. A wooden propeller damaged to the following extent shall be scrapped:

18.72110 (a). A crack or deep cut across the grain of the wood.

18.72111 (b). A comparatively long, wide or deep cut parallel to the grain of the wood.

18.72112 (c). A separated lamination.

18.72113 (d). An excessive number of screws or rivet holes.

18.72114 (e). An oversize hub or bolt hole.

18.72115 (f). An appreciable warp.

18.72116 (g). An appreciable portion of wood missing.

18.7212. Small cracks parallel to the grain of the wood shall be filled with hot glue thoroughly worked into all portions of the cracks. dried and then sanded smooth and flush with the surface of the propeller. This also applies to small cuts.

18.7213. Appreciable dents or scars which have rough surfaces or shapes that will hold a filler and will not induce failure, shall be filled with a mixture of casein glue and clean, fine sawdust thoroughly worked and packed into the defect, dried and then sanded smooth and flush with the surface of the propeller. In any case, all loose splinters shall be removed.

18.7214. The finish, where necessary, shall be renewed in accordance with the recommendations of the manufacturer.

18.7215. Tipping shall be replaced when it cannot be properly repaired. Cracks in the narrow necks of metal between pairs of lobes of the tipping are to be expected and are not defects. All other cracks are defects that shall be repaired, or eliminated by new tipping.

18.7216. For balancing, wood propellers shall be mounted on a hardened mandrel on a knife edge balancing stand in a room free from air currents. Each blade shall in turn be placed in a vertical position with the blade extending downward. The propeller shall then remain in either a vertical or horizontal position without showing any tendency to rotate in either direction. If the propeller does not balance, balance may be obtained in the following manner.

18.72160. Horizontal unbalance may be corrected by the application of clear varnish or solder to the light blade. The light blade may be coated with a high grade of clear primer allowing for a finishing coat of clear varnish. After allowing each coat to dry 48 hours, the balance shall be checked. Then, as may be necessary, either the required amount of varnish shall be removed by carefully sandpapering or an additional coat applied, allowing for the finishing coat of varnish which shall be a thin coat of high grade clear spar varnish. The balance shall be rechecked and sandpaper or additional varnish applied as may be required to effect final balancing. Only clear finish is permitted.

18.72161. When it is necessary to remove the finish at the cambered side of the tipping for inspection or repairs, bal-

ance may be effected by applying putty to the tip of the light blade after all grease, oil and other such substances have been removed and the surface has dried. The solder to be removed or applied shall be of the approximate weight of the putty. If balancing solder is already present on the wide section of tipping on the back of the heavy blade, the required amount shall be removed by careful filing or scraping. If there is no balancing solder, all of the wide section of tipping on the back of the light blade shall be thoroughly cleaned. All of the cleaned tipping shall be thoroughly tinned with ordinary solder and a soldering iron. A perfect bond must be made at all points between the tipping and the solder. To prevent burning of the wood under the tipping, more heat than is necessary to flow the solder shall not be applied. The required amount of solder shall be distributed over the entire tinned area. The balance shall be checked and, as may be necessary, solder may be removed or added until final balance is accomplished. The necessary coats of primer and spar varnish shall be allowed for.

18.72162. Vertical unbalance may be corrected by applying putty to the light side of the wood hub at a point on the circumference approximately 90 degrees from the longitudinal center line of the blades. The putty shall be weighed and a brass plate weighing slightly more than the putty shall be cut out. The thickness of the plate will be from $\frac{1}{8}$ to $\frac{1}{8}$ inch depending on the final area, which must be sufficient for the required number of flat head attaching screws. The plate shall be formed to fit the shape of the light side of the wood hub, and drilled and countersunk for the required number of screws. The plate shall then be attached and all of the screws tightened. After the plate is finally attached to the propeller, the screws shall be secured to the plate by soldering the screw heads. The balance shall be checked and all edges of the plate bevelled to reduce its weight until balance is accomplished.

18.722. *Engines.*—

18.7220. Repairs to, or overhaul of, certificated engines shall not be attempted by any but certificated engine mechanics or by employees of a manufacturer.

18.7221. In making repairs to (or overhauling) a certificated engine the mechanic shall be governed by the recommendations set forth in the respective instruction books published by the manufacturer, except when such recommendations conflict with Civil Air Regulations.

18.7222. Only structural parts approved by the Secretary shall be used in making replacements in certificated engines, and the repair agency shall furnish the owner an affidavit showing that the parts used are approved. This affidavit shall be pasted in and shall become a part of the engine log-book.

18.7223. Welding shall not be done on any structural part of a certificated engine except in special cases when it is proved conclusively to the Secretary that the repaired part is as airworthy as originally.

18.7224. Crankshafts shall be carefully inspected for alignment. If bent beyond the manufacturer's permissible limits, a crankshaft shall not be repaired, but shall be rejected.

18.723. *Instruments.*—Instruments with which certificated airline aircraft are equipped, and which are damaged to such an extent that extensive repairs are necessary, shall be repaired or replaced by the manufacturer or a certificated repair station.

## DEPARTMENT OF THE INTERIOR.

### National Bituminous Coal Commission.

[Order No. 46]

AN ORDER REQUIRING ALL DISTRICT BOARDS IN MINIMUM PRICE AREAS NUMBER ONE AND NUMBER TWO TO CONVENE IN THE CITY OF WASHINGTON, D. C.

Pursuant to Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

1. That each District Board in Minimum Price Areas Number 1 and Number 2 shall convene in the Hearing Room of the Commission at the Carlton Hotel, Washington, D. C., on the 27th day of September, 1937, at ten o'clock A. M.

2. That all members of such District Boards are ordered and directed to be in attendance at such meetings, and the Secretaries of such District Boards are hereby directed and required to give notice of such meetings in conformity with the by-laws of their respective District Boards.

3. That at the meetings provided for and required by this order, each District Board shall give consideration to and take action on such matters as in the judgment of the Commission are necessary to give full effect to Orders No. 38, No. 39 and No. 43 of the Commission, and shall perform such other duties and give consideration to and take action on such other matters as may be assigned and referred by the Commission to the District Boards in conformity with the provisions of said Act.

The Secretary of the Commission shall forthwith telegraph this order and at the same time mail copies thereof to the Secretaries of all District Boards in Minimum Price Areas Number 1 and Number 2.

By order of the Commission.

Dated this 22nd day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary.*

[F. R. Doc. 37-2822; Filed, September 23, 1937; 11:21 a. m.]

## DEPARTMENT OF THE INTERIOR.

### General Land Office.

INSTRUCTIONS UNDER ACT TO ADD CERTAIN LANDS TO THE COLUMBIA NATIONAL FOREST, WASHINGTON

SEPTEMBER 15, 1937.

*Register, Spokane, Washington.*

SIR: The act of August 12, 1937, (Public No. 257, H. R. 3866, 75th Congress) entitled "An Act To add certain lands to the Columbia National Forest in the State of Washington" reads as follows:

That, subject to any valid existing claim or entry, all lands of the United States within the areas hereinafter described be, and the same are hereby, added to and made parts of the Columbia National Forest, in the State of Washington, to be hereinafter administered under the laws and regulations relating to the national forests; and the provisions of the Act approved March 20, 1922 (U. S. C., title 16, secs. 486, 487), as amended, are hereby extended and made applicable to all other lands within the said described area.

Sections 1 to 3, inclusive, and 11 and 12, township 2 north, range 4 east; sections 1 to 3, inclusive, 6 to 8, inclusive, and 10 to 36, inclusive, township 3 north, range 4 east; sections 1 to 28, inclusive, 34 to 36, inclusive, township 4 north, range 4 east; all of township 5 north, range 4 east; sections 1, 2, 11 to 15, inclusive, 22 to 27, inclusive, and 33 to 36, inclusive, township 6 north, range 4 east; sections 4 to 9, inclusive, 16 to 21, inclusive, 28 to 33, inclusive, township 6 north, range 5 east, all in the State of Washington, Willamette meridian.

The publicly owned lands within the area are added to the national forest on the date of the act, subject to then existing claims or entries.

The privately owned lands within the area are made subject to the provisions of the act of March 20, 1922 (42 Stat. 465), as amended, so that if offered in exchange for national forest land or timber in the State of Washington and title thereto accepted, they will become part of the national forest. You will be governed in your action on applications for exchange involving any of these privately owned lands by the general instructions contained in Circular 863, approved March 20, 1925 (51 L. D. 69).

You will make the proper notations of the act upon the records of your office and promptly report such notation.

Very respectfully,

FRED W. JOHNSON, *Commissioner.*

Approved, September 15, 1937.

T. A. WALTERS,
*First Assistant Secretary.*

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

PROCLAMATION BY SECRETARY OF AGRICULTURE CONCERNING BASE PERIOD TO BE USED IN CONNECTION WITH EXECUTION OF MARKETING AGREEMENT AND ISSUANCE OF ORDER REGULATING HANDLING OF MILK IN LA PORTE COUNTY, INDIANA, MARKETING AREA

By virtue of the authority vested in the Secretary of Agriculture by the terms and provisions of Public No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, the Secretary of Agriculture hereby finds and proclaims that, in connection with the execution of a marketing agreement and the issuance of an order regulating the handling of milk in the La Porte County, Indiana, Marketing Area, the purchasing power of such milk during the base period August 1909 to July 1914 cannot be satisfactorily determined from available statistics in the Department of Agriculture, but that the purchasing power of such milk can be satisfactorily determined from available statistics in the Department of Agriculture for the period August 1919 to July 1929; and the period August 1919 to July 1929 is hereby found and proclaimed to be the base period to be used in connection with ascertaining the purchasing power of milk handled in the La Porte County, Indiana, Marketing Area, for the purpose of the execution of a marketing agreement and the issuance of an order regulating the handling of said milk in that area.

In witness whereof, the Secretary of Agriculture has executed this proclamation in duplicate and has hereunto set his hand and caused the official seal of the Department of Agriculture to be affixed in the city of Washington, District of Columbia, this 24th day of Sept. 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

## SECURITIES AND EXCHANGE COMMISSION.

SECURITIES EXCHANGE ACT OF 1934

AMENDMENT OF RULE AN21

The Securities and Exchange Commission, deeming it necessary and appropriate in the public interest and for the protection of investors so to do, pursuant to authority conferred upon it by the Securities Exchange Act of 1934, as amended, particularly Sections 3 (a) (12), 10 (b) and 23 (a) thereof, hereby amends paragraph (a) of Rule AN21 by deleting the words "four hundred and ninety-eighth" and inserting in lieu thereof the words "five hundred and ninetieth."

Paragraph (a), as amended, reads as follows:

(a) Evidences of indebtedness (1) which have been issued by any foreign state that is presently governed by an interim government which is holding office temporarily and which is to continue to hold such office only until the assumption thereof by a regular government which has been elected and (ii) as to which temporary exemption from the operation of Section 12 (a) shall expire pursuant to the terms of Rule AN7 on May 15, 1936, and as to which registration shall not be effective on that date, shall be exempt from the operation of said Section 12 (a) to and including the five hundred and ninetieth day following the assumption of office by such elected regular government.

The foregoing action shall be effective immediately upon publication.

By the Commission.

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 23rd day of September, 1937.

[File No. 7-202]

IN THE MATTER OF E. W. BLISS COMPANY (DELAWARE) COMMON STOCK (VOTING), PAR VALUE $1

ORDER GRANTING APPLICATION UNDER SECTION 12 (F) OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED, AND RULE JF2 (B)

Continuance of unlisted trading privileges on the New York Curb Exchange in E. W. Bliss Company (Delaware), Common Stock (non-voting), without par value, having been permitted by action of this Commission on September 28, 1934; and

Said Exchange, pursuant to paragraph (b) of Rule JF2, having applied to this Commission setting forth that there are being effected changes in said security other than those specified in paragraph (a) of said Rule and asking the Commission to determine that said security after said changes is substantially equivalent to the said security heretofore admitted to unlisted trading privileges; and

The Commission having considered the matter;

*It is ordered*, That the determination sought by said application be and the same is hereby made.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary*.

IN THE MATTER OF UNITED MILK CRATE CORPORATION $2 CUMULATIVE PARTICIPATING AND CONVERTIBLE CLASS A STOCK

ORDER SETTING HEARING ON APPLICATION TO STRIKE FROM LISTING AND REGISTRATION

The Cincinnati Stock Exchange, pursuant to Section 12 (d) of the Securities Exchange Act of 1934, as amended, and Rule JD2 promulgated thereunder, having made application to the Commission to strike from listing and registration the $2 Cumulative Participating and Convertible Class A stock of United Milk Crate Corporation; and

The Commission deeming it necessary for the protection of investors that a hearing be held in this matter at which all interested persons be given the opportunity to be heard;

*It is ordered*, That the matter be set down for hearing at 10 o'clock a. m. on October 15, 1937, in Room 209, Securities and Exchange Commission Building, 1778 Pennsylvania Avenue, N. W., Washington, D. C., and continue thereafter at such times and places as the Commission or its officer herein designated shall determine, and that general notice thereof be given; and

*It is further ordered*, That Charles S. Lobingier, an officer of the Commission, be and he hereby is designated to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

By the Commission.

[File No. 2-1808]

IN THE MATTER OF OKLAHOMA-TEXAS TRUST

STOP ORDER

This matter coming on to be heard by the Commission on the registration statement of registrant, Oklahoma-Texas Trust, of Tulsa, Oklahoma, after confirmed telegraphic notice by the Commission to said registrant that it appears that said registration statement includes untrue statements of material facts and omits to state material facts required to be stated therein and omits to state material facts necessary to make the statements therein not misleading, and upon evidence received upon the allegations made in the notice of hearing duly served by the Commission on said registrant, and the Commission having duly considered the matter, and finding that said registration statement includes untrue statements of material facts and omits to state material facts required to be stated therein and material facts necessary to make the statements therein not misleading, all as more fully set forth in the Commission's Findings of Fact and Opinion this day issued, and the Commission being now fully advised in the premises,

*It is ordered*, Pursuant to Section 8 (d) of the Securities Act of 1933, as amended, that the effectiveness of the registration statement filed by Oklahoma-Texas Trust, of Tulsa, Oklahoma, be and the same hereby is suspended.

By direction of the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary*.

## DEPARTMENT OF THE INTERIOR.

### National Bituminous Coal Commission.

[Order No. 47]

AN ORDER PROVIDING FOR A HEARING TO DETERMINE THE NATURE AND EXTENT OF INTRASTATE COMMERCE IN BITUMINOUS COAL IN THE STATE OF TENNESSEE AND THE EFFECT OF SUCH COMMERCE UPON INTERSTATE COMMERCE IN SUCH COAL, TO BE HELD AT KNOXVILLE, TENNESSEE, ON OCTOBER 13, 1937, BEFORE AN EXAMINER, AND NOTICE THEREOF

Pursuant to act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission, upon being advised by certain producers, producers' organizations, and other interested parties in a public hearing held at the Commission's Hearing Room at Washington, D. C., on the 12th day of July 1937, that substantially all transactions in bituminous coal in intrastate commerce within the State of Tennessee directly affect interstate commerce in such coal and will cause undue and unreasonable advantage, preference or prejudice as between such commerce in Tennessee on the one hand and interstate commerce in such coal on the other hand as such interstate commerce is provided to be regulated by the Bituminous Coal Act of 1937, and that a hearing to determine the effect of intrastate transactions in bituminous coal upon interstate transactions in bituminous coal in the State of Tennessee would be desirable, and upon investigation hereby orders:

1. That on October 13, 1937, commencing at the hour of ten (10) o'clock A. M., at the Hearing Room of the Commission in the Farragut Hotel, Knoxville, Tennessee, a public hearing will be held to determine the nature and extent of intrastate commerce in bituminous coal in the State of Tennessee, and the effect of such commerce upon interstate commerce in such coal and to determine what, if any, undue or unreasonable advantage, preference or prejudice, will exist between localities in Tennessee in such commerce on the one hand and interstate commerce as regulated by the Bituminous Coal Act of 1937 on the other hand and what, if any, undue, unreasonable or unjust discriminations

against interstate commerce in coal have occurred or will occur under the administration of Section 4 of said Act to the end that the Commission may, after hearing, take such action as is necessary to give effect to the Bituminous Coal Code and to the provisions of Section 4–A of said Act.

2. That said hearing will be conducted by an Examiner designated by the Commission.

3. That interested parties may appear and present evidence at such hearing.

4. That any producer believing that particular transactions in intrastate commerce in bituminous coal are not subject to the provisions of the first paragraph of Section 4–A will, subsequent to the final order of the Commission in the proceeding herein noticed, be afforded full opportunity to file an application for exemption as provided in said section, upon which application a hearing will thereafter be held by the Commission upon proper notice given.

5. That failure of any producer to appear and present evidence at the hearing herein noticed to be held in Knoxville, Tennessee, on October 13, 1937, will not prejudice the case of any producer to be heard upon such application.

6. That this order and notice shall not be construed as making any person receiving a copy thereof a party to this proceeding within the provision of Section 6 (b) of the Acts.

7. That the Secretary of the Commission shall forthwith mail a copy of this notice to the Consumers' Counsel, to each known producer of bituminous coal in the State of Tennessee and the secretaries of all of the district boards, and shall cause to be published at the expense of the Commission copy of this order and notice for three (3) days in newspapers of general circulation in the counties of Tennessee in which bituminous coal is produced.

By order of the Commission.

Dated this 22nd day of September, 1937.

[SEAL] EUGENE J. EARLEY,
*Acting Secretary.*

[Order No. 48]

AN ORDER PROVIDING FOR A HEARING TO DETERMINE THE NATURE AND EXTENT OF INTRASTATE COMMERCE IN BITUMINOUS COAL IN THE STATE OF NORTH CAROLINA AND THE EFFECT OF SUCH COMMERCE UPON INTERSTATE COMMERCE IN SUCH COAL, TO BE HELD AT RALEIGH, NORTH CAROLINA, ON OCTOBER 13, 1937, BEFORE AN EXAMINER, AND NOTICE THEREOF

Pursuant to act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission, upon being advised by certain producers, producers' organizations, and other interested parties in a public hearing held at the Commission's Hearing Room at Washington, D. C., on the 12th day of July, 1937, that substantially all transactions in bituminous coal in intrastate commerce within the State of North Carolina directly affect interstate commerce in such coal and will cause undue and unreasonable advantage, preference or prejudice as between such commerce in North Carolina on the one hand and interstate commerce in such coal on the other hand as such interstate commerce is provided to be regulated by the Bituminous Coal Act of 1937, and that a hearing to determine the effect of intrastate transactions in bituminous coal upon interstate transactions in bituminous coal in the State of North Carolina would be desirable, and upon investigation hereby orders:

1. That on October 13, 1937, commencing at the hour of ten (10) o'clock A. M., at the Hearing Room of the Commission in the Hotel Sir Walter, Raleigh, North Carolina, a public hearing will be held to determine the nature and extent of intrastate commerce in bituminous coal in the State of North Carolina and the effect of such commerce upon interstate commerce in such coal and to determine what, if any, undue or unreasonable advantage, preference or prejudice, will exist between localities in North Carolina in such commerce on the one hand and interstate commerce as regulated by the Bituminous Coal Act of 1937 on the other hand and what, if any, undue, unreasonable or unjust discriminations against interstate commerce in coal have occurred or will occur under the administration of Section 4 of said Act to the end that the Commission may, after hearing, take such action as is necessary to give effect to the Bituminous Coal Code and to the provisions of Section 4–A of said Act.

2. That said hearing will be conducted by an Examiner designated by the Commission.

3. That interested parties may appear and present evidence at such hearing.

4. That any producer believing that particular transactions in intrastate commerce in bituminous coal are not subject to the provisions of the first paragraph of Section 4–A will, subsequent to the final order of the Commission in the proceeding herein noticed, be afforded full opportunity to file an application for exemption as provided in said section, upon which application a hearing will thereafter be held by the Commission upon proper notice given.

5. That failure of any producer to appear and present evidence at the hearing herein noticed to be held in Raleigh, North Carolina, on October 13, 1937, will not prejudice the case of any producer to be heard upon such application.

6. That this order and notice shall not be construed as making any person receiving a copy thereof a party to this proceeding within the provision of Section 6 (b) of the Act.

7. That the Secretary of the Commission shall forthwith mail a copy of this notice to the Consumers' Council, to each known producer of bituminous coal in the State of North Carolina, and to the secretaries of all of the district boards, and shall cause to be published at the expense of the Commission copy of this order and notice for three (3) days in newspapers of general circulation in the counties of North Carolina in which bituminous coal is produced.

By order of the Commission.

Dated this 22nd day of September, 1937.

[Order No. 49]

AN ORDER PROVIDING FOR A HEARING TO DETERMINE THE NATURE AND EXTENT OF INTRASTATE COMMERCE IN BITUMINOUS COAL IN THE STATE OF WEST VIRGINIA AND THE EFFECT OF SUCH COMMERCE UPON INTERSTATE COMMERCE IN SUCH COAL, TO BE HELD AT WHITE SULPHUR SPRINGS, WEST VIRGINIA, ON OCTOBER 19, 1937, BEFORE AN EXAMINER, AND NOTICE THEREOF

Pursuant to act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission, upon being advised by certain producers, producers' organizations, and other interested parties in a public hearing held at the Commission's Hearing Room at Washington, D. C., on the 12th day of July, 1937, that substantially all transactions in bituminous coal in intrastate commerce within the State of West Virginia directly affect interstate commerce in such coal and will cause undue and unreasonable advantage, preference or prejudice as between such commerce in West Virginia on the one hand and interstate commerce in such coal on the other hand as such interstate commerce is provided to be regulated by the Bituminous Coal Act of 1937, and that a hearing to determine the effect of intrastate transactions in bituminous coal upon interstate transactions in bituminous coal in the State of West Virginia would be desirable, and upon investigation hereby orders:

1. That on October 19, 1937, commencing at the hour of ten (10) o'clock A. M., at the Hearing Room of the Commission in the Green Briar Hotel, White Sulphur Springs, West Virginia, a public hearing will be held to determine the nature and extent of intrastate commerce in bituminous coal in the State of West Virginia, and the effect of such commerce upon interstate commerce in such coal and to determine what, if any, undue or unreasonable advantage, preference or prejudice, will exist between localities in West Virginia in such commerce on the one hand and interstate commerce as regulated by the Bituminous Coal Act of 1937 on the other hand and what, if any, undue, unreasonable or unjust discriminations against interstate commerce in coal have occurred or will occur under the administration of Section 4 of said Act to the end that the Commission may, after hearing, take such action as is necessary to give effect to the Bituminous Coal Code and to the provisions of Section 4–A of the said Act.

2. That said hearing will be conducted by an Examiner designated by the Commission.

3. That interested parties may appear and present evidence at such hearing.

4. That any producer believing that particular transactions in intrastate commerce in bituminous coal are not subject to the provisions of the first paragraph of Section 4–A will, subsequent to the final order of the Commission in the proceeding herein noticed, be afforded full opportunity to file an application for exemption as provided in said section, upon which application a hearing will thereafter be held by the Commission upon proper notice given.

5. That failure of any producer to appear and present evidence at the hearing herein noticed to be held in White Sulphur Springs, West Virginia, on October 19, 1937, will not prejudice the case of any producer to be heard upon such application.

6. That this order and notice shall not be construed as making any person receiving a copy thereof a party to this proceeding within the provisions of Section 6 (b) of the Act.

7. That the Secretary of the Commission shall forthwith mail a copy of this notice to the Consumers' Counsel, to each known producer of bituminous coal in the State of West Virginia, and to the secretaries of all of the district boards; and shall cause to be published at the expense of the Commission copy of this order and notice for three (3) days in newspapers of general circulation in the counties of West Virginia in which bituminous coal is produced.

By order of the Commission.

Dated this 22nd day of September, 1937.

[Order No. 50]

AN ORDER PROVIDING FOR A HEARING TO DETERMINE THE NATURE AND EXTENT OF INTRASTATE COMMERCE IN BITUMINOUS COAL IN THE STATE OF VIRGINIA AND THE EFFECT OF SUCH COMMERCE UPON INTERSTATE COMMERCE IN SUCH COAL, TO BE HELD AT NORTON, VIRGINIA, ON OCTOBER 26, 1937, BEFORE AN EXAMINER, AND NOTICE THEREOF

Pursuant to act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission, upon being advised by certain producers, producers' organizations, and other interested parties in a public hearing held at the Commission's Hearing Room at Washington, D. C., on the 12th day of July, 1937, that substantially all transactions in bituminous coal in intrastate commerce within the State of Virginia directly affect interstate commerce in such coal and will cause undue and unreasonable advantage, preference or prejudice as between such commerce in Virginia on the one hand and interstate commerce in such coal on the other hand as such interstate commerce is provided to be regulated by the Bituminous Coal Act of 1937, and that a hearing to determine the effect of intrastate transactions in bituminous coal upon interstate transactions in bituminous coal in the State of Virginia would be desirable, and upon investigation hereby orders:

1. That on October 26, 1937, commencing at the hour of ten (10) o'clock A. M., at the Hearing Room of the Commission in the United States Bureau of Mines Building, Norton, Virginia, a public hearing will be held to determine the nature and extent of intrastate commerce in bituminous coal in the State of Virginia, and the effect of such commerce upon interstate commerce in such coal and to determine what, if any, undue or unreasonable advantage, preference or prejudice, will exist between localities in Virginia in such commerce on the one hand and interstate commerce as regulated by the Bituminous Coal Act of 1937 on the other hand and what, if any, undue, unreasonable or unjust discriminations against interstate commerce in coal have occurred or will occur under the administration of Section 4 of said Act to the end that the Commission may, after hearing, take such action as is necessary to give effect to the Bituminous Coal Code and to the provisions of Section 4–A of said Act.

2. That said hearing will be conducted by an Examiner designated by the Commission.

3. That interested parties may appear and present evidence at such hearing.

4. That any producer believing that particular transactions in intrastate commerce in bituminous coal are not subject to the provisions of the first paragraph of Section 4–A will, subsequent to the final order of the Commission in the proceeding herein noticed, be afforded full opportunity to file an application for exemption as provided in said section, upon which application a hearing will thereafter be held by the Commission upon proper notice given.

5. That failure of any producer to appear and present evidence at the hearing herein noticed to be held in Norton, Virginia, on October 26, 1937, will not prejudice the case of any producer to be heard upon such application.

6. That this order and notice shall not be construed as making any person receiving a copy thereof a party to this proceeding within the provision of Section 6 (b) of the Act.

7. That the Secretary of the Commission shall forthwith mail a copy of this notice to the Consumers' Counsel, to each known producer of bituminous coal in the State of Virginia, and to the secretaries of all of the district boards, and shall cause to be published at the expense of the Commission copy of this order and notice for three (3) days in newspapers of general circulation in the counties of Virginia in which bituminous coal is produced.

[Order No. 51]

AN ORDER PROVIDING FOR A HEARING TO DETERMINE THE NATURE AND EXTENT OF INTRASTATE COMMERCE IN BITUMINOUS COAL IN THE STATE OF MICHIGAN AND THE EFFECT OF SUCH COMMERCE UPON INTERSTATE COMMERCE IN SUCH COAL, TO BE HELD AT SAGINAW, MICHIGAN, ON OCTOBER 26, 1937, BEFORE AN EXAMINER, AND NOTICE THEREOF

Pursuant to act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission, upon being advised by certain producers, producers' organizations, and other interested parties in a public hearing held at the Commission's Hearing Room at Washington, D. C., on the 12th day of July, 1937, that substantially all transactions in bituminous coal in intrastate commerce within the State of Michigan directly affect interstate

commerce in such coal and will cause undue and unreasonable advantage, preference or prejudice as between such commerce in Michigan on the one hand and interstate commerce in such coal on the other hand as such interstate commerce is provided to be regulated by the Bituminous Coal Act of 1937, and that a hearing to determine the effect of intrastate transactions in bituminous coal in the State of Michigan would be desirable, and upon investigation hereby orders:

1. That on October 26, 1937, commencing at the hour of ten (10) o'clock A. M., at the Hearing Room of the Commission in the Board of Commerce Building, Saginaw, Michigan, a public hearing will be held to determine the nature and extent of intrastate commerce in bituminous coal in the State of Michigan, and the effect of such commerce upon interstate commerce in such coal and to determine what, if any, undue or unreasonable advantage, preference or prejudice, will exist between localities in Michigan in such commerce on the one hand and interstate commerce as regulated by the Bituminous Coal Act of 1937 on the other hand and what, if any, undue, unreasonable or unjust discriminations against interstate commerce in coal have occurred or will occur under the administration of Section 4 of said Act to the end that the Commission may, after hearing, take such action as is necessary to give effect to the Bituminous Coal Code and to the provisions of Section 4–A of said Act.

2. That said hearing will be conducted by an Examiner designated by the Commission.

3. That interested parties may appear and present evidence at such hearing.

4. That any producer believing that particular transactions in intrastate commerce in bituminous coal are not subject to the provisions of the first paragraph of Section 4–A will, subsequent to the final order of the Commission in the proceeding herein noticed, be afforded full opportunity to file an application for exemption as provided in said section, upon which application a hearing will thereafter be held by the Commission upon proper notice given.

5. That failure of any producer to appear and present evidence at the hearing herein noticed to be held in Saginaw, Michigan, on October 26, 1937, will not prejudice the case of any producer to be heard upon such application.

6. That this order and notice shall not be construed as making any person receiving a copy thereof a party to this proceeding within the provision of Section 6 (b) of the Act.

7. That the Secretary of the Commission shall forthwith mail a copy of this notice to the Consumers' Counsel, to each known producer of bituminous coal in the State of Michigan, and to the secretaries of all of the district boards, and shall cause to be published at the expense of the Commission copy of this order and notice for three (3) days in newspapers of general circulation in the counties of Michigan in which bituminous coal is produced.

[Order No. 52]

AN ORDER PROVIDING FOR A HEARING TO DETERMINE THE NATURE AND EXTENT OF INTRASTATE COMMERCE IN BITUMINOUS COAL IN THE STATE OF ALABAMA AND THE EFFECT OF SUCH COMMERCE UPON INTERSTATE COMMERCE IN SUCH COAL, TO BE HELD AT BIRMINGHAM, ALABAMA, ON NOVEMBER 9, 1937, BEFORE AN EXAMINER, AND NOTICE THEREOF

Pursuant to act of Congress entitled "An Act to regulate interstate comerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission, upon being advised by certain producers, producers' organizations, and other interested parties in a public hearing held at the Commission's Hearing Room at Washington, D. C., on the 12th day of July, 1937, that substantially all transactions in bituminous coal in intrastate commerce within the State of Alabama directly affect interstate commerce in such coal and will cause undue and unreasonable advantage, preference or prejudice as between such commerce in Alabama on the one hand and interstate commerce in such coal on the other hand as such interstate commerce is provided to be regulated by the Bituminous Coal Act of 1937, and that a hearing to determine the effect of intrastate transactions in bituminous coal upon interstate transactions in bituminous coal in the State of Alabama would be desirable, and upon investigation hereby orders:

1. That on November 9, 1937, commencing at the hour of ten (10) o'clock A. M., at the Hearing Room of the Commission in the New Federal Post Office and Court House, Birmingham, Alabama, a public hearing will be held to determine the nature and extent of intrastate commerce in bituminous coal in the State of Alabama, and the effect of such commerce upon interstate commerce in such coal and to determine what, if any, undue or unreasonable advantage, preference or prejudice, will exist between localities in Alabama in such commerce on the one hand and interstate commerce as regulated by the Bituminous Coal Act of 1937 on the other hand and what, if any, undue, unreasonable or unjust discriminations against interstate commerce in coal have occurred or will occur under the administration of Section 4 of said Act to the end that the Commission may, after hearing, take such action as is necessary to give effect to the Bituminous Coal Code and to the provisions of Section 4–A of said Act.

2. That said hearing will be conducted by an Examiner designated by the Commission.

3. That interested parties may appear and present evidence at such hearing.

4. That any producer believing that particular transactions in intrastate commerce in bituminous coal are not subject to the provisions of the first paragraph of Section 4–A will, subsequent to the final order of the Commission in the proceeding herein noticed, be afforded full opportunity to file an application for exemption as provided in said section, upon which application a hearing will thereafter be held by the Commission upon proper notice given.

5. That failure of any producer to appear and present evidence at the hearing herein noticed to be held in Birmingham, Alabama, on November 9, 1937, will not prejudice the case of any producer to be heard upon such application.

6. That this order and notice shall not be construed as making any person receiving a copy thereof a party to this proceeding within the provision of Section 6 (b) of the Act.

7. That the Secretary of the Commission shall forthwith mail a copy of this notice to the Consumers' Counsel, to each known producer of bituminous coal in the State of Alabama, and to the secretaries of all of the district boards, and shall cause to be published at the expense of the Commission copy of this order and notice for three (3) days in newspapers of general circulation in the counties of Alabama in which bituminous coal is produced.

By order of the Commission.

Dated this 22nd day of September, 1937.

[Order No. 53]

AN ORDER PROVIDING FOR A PUBLIC HEARING FOR THE PURPOSE OF RECEIVING EVIDENCE TO ENABLE THE COMMISSION TO DETERMINE WHETHER OR NOT CERTAIN COALS IN THE STATE OF ARKANSAS ARE SUBJECT TO THE PROVISIONS OF THE BITUMINOUS COAL ACT OF 1937, AND FOR THE FURTHER PURPOSE OF HEARING APPLICATIONS FOR EXEMPTION AS PROVIDED FOR BY ORDER NO. 28.

Whereas the Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, provides (Section 17 (b)) that "The term 'bituminous coal' includes all bituminous, semi-bituminous, and subbituminous coal and shall exclude lignite, which is defined as a lignitic coal having calorific value in British thermal units of less than seven thousand six hundred per pound and having a natural moisture content in place in mine of 30 per centum or more."; and

Whereas the Commission deems it necessary to conduct a public hearing in the State of Arkansas for the purpose of receiving evidence to enable the Commission to determine whether or not certain coals in the State of Arkansas are subject to the provisions of the Bituminous Coal Act of 1937 and, further, to hear and determine at the same time all Arkansas applications for exemption filed pursuant to Order No. 28.

Now, therefore, in order to determine whether the coal in said state or any part thereof does not come within the definition of "bituminous coal" as set forth in Section 17 (b) of the Act, and in order to hear applications filed pursuant to Order No. 28 of the Commission, the Commission hereby orders and directs:

1. That a public hearing shall be held at the Hotel Goldman in the City of Fort Smith, Arkansas, on the 4th day of October, 1937, commencing at the hour of 10 o'clock A. M., for the purpose of receiving evidence to enable the Commission to determine whether or not any part of the coal produced in the State of Arkansas does not come within the purview of Section 17 (b) of the Act.

2. That the public hearing so provided by this order, at the time and place designated, include the hearing of the application for exemption filed by the Sunshine Anthracite Coal Company, Clarksville, Arkansas, pursuant to the Commission's Order No. 28, and, in addition, any other applications for exemption filed from the State of Arkansas pursuant to Order No. 28.

3. That any producer of coal, whether bituminous, semi-bituminous, subbituminous, anthracite or lignite, or the Consumers' Counsel, or code members, and all other interested parties may appear at said hearing and submit evidence.

4. Notice of said hearing shall be given under direction of the Secretary of the Commission by mailing a copy of this order to the Consumers' Counsel, to the Commissioner of Internal Revenue, to the Secretaries of the respective District Boards, and by publication of a notice upon two consecutive days in a newspaper of general circulation in the State of Arkansas. The notice published in said newspaper shall contain the date and place of the hearing and a concise statement of the purpose thereof.

By order of the Commission.

Dated this 24th day of September, 1937.

[SEAL] EUGENE J. EARLEY,
*Acting Secretary.*

[Docket No. 2–FD]

BEFORE THE NATIONAL BITUMINOUS COAL COMMISSION IN THE MATTER OF THE APPLICATION OF: ALABAMA COALS, INCORPORATED

ORDER

The above cause came on for hearing on the application of Alabama Coals, Incorporated, for an order provisionally approving it as a marketing agency, as provided for in Section 12, Part II, of the Bituminous Coal Act of 1937.

It appears from the record the application is in due form and complies with Order Number 6 of the Commission, and it appears from evidence offered at a hearing on the application all producer members are on substantially equal terms and have accepted the code as required by law; that applicant is not engaged in the sale of coal but aids the work of agents of the producer members in sales work and renders other valuable service, in aid of its members in particular, and the coal industry in general, and appears to be a marketing agency as distinguished from sales agencies or other merchandising organizations; that it does not exercise such control in markets as to restrict the supply of coal in interstate commerce or prevent the public from receiving coal at fair and reasonable prices, and no evidence or complaint was offered to indicate that the applicant was in any way operating or in a position to operate against the public interest; that it appears to have complied with all requirements of the law and indicates its intention and desire to continue to comply with the law and the orders of the Commission; it appears that temporary approval as a marketing agency can and should be granted the applicant pending further hearing and investigation of its purpose and organization, and until marketing rules and regulations, maximum discounts and minimum or maximum prices are promulgated or established by order of this Commission.

Wherefore, it is ordered by the Commission that the application of Alabama Coals, Incorporated, for provisional approval as a marketing agency be granted pending further hearings and orders of the Commission herein and that Alabama Coals, Incorporated be and the same is hereby considered to be a marketing agency, and approved as such within the purview of Section 12 Part II of the Bituminous Coal Act of 1937 upon the following conditions:

1. That applicant and all its members will continue to comply with the National Bituminous Coal Act of 1937 and all orders of this Commission.

2. That this approval shall terminate upon the further order of the Commission or within fifteen days after the order of the Commission approving marketing rules and regulations, maximum discounts or minimum prices, unless, by order of the Commission said approval is renewed.

It is further ordered that this cause be continued for future hearings upon reasonable notice to the applicant or upon such orders as the Commission may hereafter issue.

By order of the Commission.

Dated this 22nd day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary.*

[Docket No. 3–FD]

BEFORE THE NATIONAL BITUMINOUS COAL COMMISSION IN THE MATTER OF THE APPLICATION OF: APPALACHIAN COALS, INCORPORATED

ORDER

The above cause came on for hearing on the application of Appalachian Coals, Incorporated, for an order provisionally approving it as a marketing agency, as provided for in Section 12, Part II, of the Bituminous Coal Act of 1937.

It appears from the record the application is in due form and complies with Order Number 6 of the Commission, and it appears from evidence offered at a hearing on the application all producer members are on substantially equal terms and have accepted the code as required by law; that applicant is not engaged in the sale of coal but aids the work of agents of the producer members in sales work and renders other valuable service, in aid of its members in particular, and the coal industry in general, and appears to be a marketing agency as distinguished from sales agencies or other merchandising organizations; that it does not exercise such control in markets as to restrict the supply of coal in interstate commerce or prevent the public from receiving coal at fair and reasonable prices, and no evidence or complaint was offered to indicate that the applicant was in any way operating or in a position to operate against the public interest; that it appears to have complied with all requirements of the law and indicates its intention and desire to continue to comply with the law and the orders of the Commission; it appears that temporary approval as a marketing agency can and should be granted the applicant pending further hearing and investigation of its purpose and

organization, and until marketing rules and regulations, maximum discounts and minimum or maximum prices are promulgated or established by order of this Commission.

Wherefore, it is ordered by the Commission that the application of Appalachian Coals, Incorporated, for provisional approval as a marketing agency be granted pending further hearings and orders of the Commission herein and that Appalachian Coals, Incorporated, be and the same is hereby considered to be a marketing agency, and approved as such within the purview of Section 12, Part II, of the Bituminous Coal Act of 1937 upon the following conditions:

1. That applicant and all its members will continue to comply with the National Bituminous Coal Act of 1937 and all orders of this Commission.

2. That this approval shall terminate upon the further order of the Commission or within fifteen days after the order of the Commission approving marketing rules and regulations, maximum discounts or minimum prices, unless, by order of the Commission said approval is renewed.

It is further ordered that this cause be continued for future hearings upon reasonable notice to the applicant or upon such orders as the Commission may hereafter issue.

By order of the Commission.

Dated this 22nd day of September, 1937.

[Docket No. 4-FD]

BEFORE THE NATIONAL BITUMINOUS COAL COMMISSION IN THE MATTER OF THE APPLICATION OF: SMOKELESS COAL CORPORATION

ORDER

The above cause came on for hearing on the application of Smokeless Coal Corporation, for an order provisionally approving it as a marketing agency, as provided for in Section 12, Part II, of the Bituminous Coal Act of 1937.

It appears from the record the application is in due form and complies with Order Number 6 of the Commission, and it appears from evidence offered at a hearing on the application all producer members are on substantially equal terms and have accepted the code as required by law; that applicant is not engaged in the sale of coal but aids the work of agents of the producer members in sales work and renders other valuable service, in aid of its members in particular, and the coal industry in general, and appears to be a marketing agency as distinguished from sales agencies or other merchandising organizations; that it does not exercise such control in markets as to restrict the supply of coal in interstate commerce or prevent the public from receiving coal at fair and reasonable prices, and no evidence or complaint was offered to indicate that the applicant was in any way operating or in a position to operate against the public interest; that it appears to have complied with all requirements of the law and indicates its intention and desire to continue to comply with the law and the orders of the Commission; it appears that temporary approval as a marketing agency can and should be granted the applicant pending further hearing and investigation of its purpose and organization, and until marketing rules and regulations, maximum discounts and minimum or maximum prices are promulgated or established by order of this Commission.

Wherefore, it is ordered by the Commission that the application of Smokeless Coal Corporation, for provisional approval as a marketing agency be granted pending further hearings and orders of the Commission herein and that Smokeless Coal Corporation be and the same is hereby considered to be a marketing agency, and approved as such within the purview of Section 12 Part II of the Bituminous Coal Act of 1937 upon the following conditions:

1. That applicant and all its members will continue to comply with the National Bituminous Coal Act of 1937 and all orders of this Commission.

2. That this approval shall terminate upon the further order of the Commission or within fifteen days after the order of the Commission approving marketing rules and regulations, maximum discounts or minimum prices, unless, by order of the Commission said approval is renewed.

It is further ordered that this cause be continued for future hearings upon reasonable notice to the applicant or upon such orders as the Commission may hereafter issue:

By order of the Commission.

Dated this 22nd day of September, 1937.

[Docket No. 6-FD]

BEFORE THE NATIONAL BITUMINOUS COAL COMMISSION IN THE MATTER OF THE APPLICATION OF: RALEIGH SMOKELESS FUEL COMPANY FOR PROVISIONAL APPROVAL AS MARKETING AGENCY

ORDER

Pursuant to Order No. 6 of the Commission, Raleigh Smokeless Fuel Company filed its application for provisional approval as a marketing agency with the Commission at Washington, D. C., on the 16th day of July, 1937.

Pursuant to Order No. 21 of the Commission, a public hearing, of which due notice was given, was held before a Division of the Commission on the 29th day of July, 1937, at ten o'clock A. M., in the hearing room of the Commission at Washington, D. C. The hearing was attended by representatives of the Applicant and of the office of Consumers' Counsel and by other interested persons.

The Commission finds:

That Raleigh Smokeless Fuel Company is not a marketing agency within the meaning of Section 12 of the Bituminous Coal Act of 1937.

Upon the basis of such finding and pursuant to Section 12 of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders as follows:

That the application of Raleigh Smokeless Fuel Company for provisional approval as a marketing agency is hereby dismissed without prejudice.

By order of the Commission.

Dated this 22nd day of September, 1937.

[SEAL] EUGENE J. EARLEY, *Acting Secretary.*

[Docket No. 8-FD]

BEFORE THE NATIONAL BITUMINOUS COAL COMMISSION IN THE MATTER OF THE APPLICATION OF: PEALE, PEACOCK & KERR, INC. FOR PROVISIONAL APPROVAL AS MARKETING AGENCY

ORDER

Pursuant to Order No. 6 of the Commission, Peale, Peacock & Kerr, Inc., filed its application for provisional approval as a marketing agency with the Commission at Washington, D. C., on the 16th day of July, 1937.

Pursuant to Order No. 22 of the Commission, a public hearing, of which due notice was given, was held before a Division of the Commission on the 12th day of August, 1937, at ten o'clock A. M., in the hearing room of the Commission at Washington, D. C. The hearing was attended by representatives of the Applicant and of the Office of Consumers' Counsel and by other interested persons.

The Commission finds:

That Peale, Peacock & Kerr, Inc., is not a marketing agency within the meaning of Section 12 of the Bituminous Coal Act of 1937.

Upon the basis of such finding and pursuant to Section 12 of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders as follows:

That the application of Peale, Peacock & Kerr, Inc., for provisional approval as a marketing agency is hereby dismissed without prejudice.

By order of the Commission.

Dated this 22nd day of September, 1937.

[Docket No. 9-FD]

BEFORE THE NATIONAL BITUMINOUS COAL COMMISSION IN THE MATTER OF THE APPLICATION OF: ROCHESTER & PITTSBURGH COAL COMPANY FOR PROVISIONAL APPROVAL AS MARKETING AGENCY

ORDER

Pursuant to Order No. 6 of the Commission, Rochester & Pittsburgh Coal Company filed its application for provisional approval as a marketing agency with the Commission at Washington, D. C., on the 16th day of July, 1937.

Pursuant to Order No. 23 of the Commission, a public hearing, of which due notice was given, was held before a Division of the Commission on the 12th day of August, 1937, at ten o'clock A. M., in the hearing room of the Commission at Washington, D. C. The hearing was attended by representatives of the Applicant and of the office of Consumers' Counsel and by other interested persons.

The Commission finds:

That Rochester & Pittsburgh Coal Company is not a marketing agency within the meaning of Section 12 of the Bituminous Coal Act of 1937.

Upon the basis of such finding and pursuant to Section 12 of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders as follows:

That the application of Rochester & Pittsburgh Coal Company for provisional approval as a marketing agency is hereby dismissed without prejudice.

By order of the Commission.

Dated this 22nd day of September, 1937.

[Docket No. 10-FD]

BEFORE THE NATIONAL BITUMINOUS COAL COMMISSION IN THE MATTER OF THE APPLICATION OF: MINTER FUEL COMPANY FOR PROVISIONAL APPROVAL AS MARKETING AGENCY

ORDER

Pursuant to Order No. 6 of the Commission, Minister Fuel Company filed its application for provisional approval as a marketing agency with the Commission at Washington, D. C., on the 16th day of July, 1937.

Pursuant to Order No. 24 of the Commission, a public hearing, of which due notice was given, was held before a Division of the Commission on the 29th day of July, 1937, at ten o'clock A. M., in the hearing room of the Commission at Washington, D. C. The hearing was attended by representatives of the Applicant and of the office of Consumers' Counsel and by other interested persons.

The Commission finds:

That Minter Fuel Company is not a marketing agency within the meaning of Section 12 of the Bituminous Coal Act of 1937.

Upon the basis of such finding and pursuant to Section 12 of the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders as follows:

That the application of Minter Fuel Company for provisional approval as a marketing agency is hereby dismissed without prejudice.

By order of the Commission.

Dated this 22nd day of September, 1937.

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

ORDER OF SECRETARY OF AGRICULTURE ISSUED PURSUANT TO PUBLIC ACT NO. 10, 73D CONGRESS, AS AMENDED AND AS REENACTED AND AMENDED BY THE AGRICULTURAL MARKETING AGREEMENT ACT OF 1937, AMENDING ORDER REGULATING HANDLING IN INTERSTATE AND FOREIGN COMMERCE, AND SUCH HANDLING AS DIRECTLY BURDENS, OBSTRUCTS OR AFFECTS INTERSTATE OR FOREIGN COMMERCE, OF WALNUTS GROWN IN CALIFORNIA, OREGON AND WASHINGTON

Whereas, the Secretary of Agriculture of the United States, hereinafter referred to as the "Secretary", issued an order regulating the handling of walnuts grown in California, Oregon and Washington, effective October 15, 1935, which order was amended on September 23, 1936, effective September 27, 1936 (the said order, as amended, is hereinafter referred to as the "order"); and

Whereas, at the request of the Control Board established under the order, a hearing was held on August 23, 1937, at Berkeley, California, upon proposed amendments to the order, due notice of such hearing having been given interested parties in accordance with Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, hereinafter referred to as the "act", and the applicable regulations issued thereunder, at which time and place all interested parties were given an opportunity to be heard concerning the proposed amendments to the order; and

Whereas, the Secretary finds upon the basis of the evidence introduced at the said hearing and the record thereof:

1. That the supply of merchantable walnuts available during the crop year 1937-1938 for handling in the channels of interstate and foreign commerce, or so as directly to burden, obstruct or affect such commerce in walnuts, will exceed the consumptive demand of such walnuts during the said period;

2. That a surplus exists in such available supply of walnuts, and that such surplus amounts to at least thirty-five percent (35%) of such available supply;

3. That the salable percentage of merchantable walnuts should be sixty-five percent (65%) and the surplus percentage should be thirty-five percent (35%),

4. That the fixing of such percentages and the methods provided in the order, as hereby amended, for the disposition of such surplus and for equalizing the burden of such surplus elimination, will tend to establish prices to the growers of such walnuts at a level that will give such walnuts a purchasing power with respect to articles that growers thereof buy, equivalent to the purchasing power of such walnuts in the base period, as defined in the order;

5. That the order, as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act with respect to walnuts grown in California, Oregon and Washington by establishing and maintaining such marketing conditions as will reestablish prices to growers thereof at a level that will give such walnuts a purchasing power with respect to articles that such growers buy, equivalent to the purchasing power of such walnuts in the aforesaid base period, at the same time protecting the interest of the consumer by (a) approaching the level of prices which it is declared in the act to be the

policy of Congress to establish by a gradual correction of the current level of prices at as rapid a rate as the Secretary deems to be in the public interest and feasible in view of the current consumptive demand in the domestic and foreign markets, and by (b) authorizing no action which has for its purpose the maintenance of prices to growers above the level which it is declared in the act to be the policy of Congress to establish; and

Whereas, the Secretary finds:

1. That the order, as hereby amended, regulates the handling of such walnuts in the same manner as, and is made applicable only to persons in the respective classes of industrial and commercial activities specified in a marketing agreement, upon which hearings were held in September 1935, as amended, in certain respects, upon which amendments a hearing was held on September 8, 1936;

2. That handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping the said commodity or products thereof) of not less than fifty percent (50%) of the volume of the said commodity covered by the order, as hereby amended, which is produced within the production area defined in the said order, have signed a marketing agreement and an amendment to the same, which marketing agreement, as amended, regulates the handling of said commodity in the same manner as the order, as hereby amended;

3. That the agreement amending the said marketing agreement has been executed by more than three packers, signatory to the said marketing agreement, who during the preceding crop year handled not less than sixty-seven percent (67%) of the merchantable walnuts packed during such crop year, and has been approved by the Secretary;

4. That the issuance of this amendment to the order is favored by producers who, during the period from September 1, 1936, to August 31, 1937, (which the Secretary hereby determines to be a representative period) have produced for market within the production area specified in the said marketing agreement, as amended, and the order, as hereby amended, at least two-thirds (⅔) of the volume of such commodity produced for market within such production area;

Now, therefore, the Secretary, acting under the authority vested in him under the act, hereby amends the said order, as amended, regulating the handling of walnuts, grown in California, Oregon and Washington, and orders that the handling of such commodity in the current of interstate or foreign commerce, or so as directly to burden, obstruct or affect interstate or foreign commerce in such commodity, from and after the effective date herein specified, shall be in conformity to, and in compliance with, the terms and conditions of the said order, as hereby amended, said amendments being as follows:

1. Delete from the order section 2 of article III and substitute therefor the following:

"SEC. 2. *Salable percentage and surplus percentage.*—On the basis of the carryover, estimated consumptive demand, and estimated production of merchantable walnuts, the salable percentage for the crop year September 1, 1935 to August 31, 1936, shall be seventy (70) per cent and the salable percentage for the crop year September 1, 1936, to August 31, 1937, shall be seventy-five (75) per cent, and the salable percentage for the crop year September 1, 1937, to August 31, 1938, shall be sixty-five (65) per cent. The Secretary may, at any time on request of the Control Board (or if the Control Board shall fail so to request, then after reasonable notice and hearing by the Secretary on request of two or more packers who have handled during the preceding crop year at least ten (10) per cent of the total tonnage handled by all packers during such crop year), and after a finding of fact that the merchantable walnuts available for sale will not be sufficient to supply the consumptive demand, increase the said salable percentage to conform with such new relation as may be found to exist between consumptive demand and available supply; *Provided, however*, That an increase of the salable percentage shall not be made after January 15, of any crop year unless the quantity of walnuts held unsold by the Control Board is sufficient to permit full delivery to packers as required by Section 2 of Article V hereof. Thirty (30) per cent, being the difference between the salable percentage for the crop year ending August 31, 1936, and one hundred (100) per cent shall be the 'surplus percentage' for said crop year and twenty-five (25) per cent, being the difference between the salable percentage for the crop year ending August 31, 1937, and one hundred (100) per cent, shall be the 'surplus percentage' for said crop year, and thirty-five (35) per cent, being the difference between the salable percentage for the crop year ending August 31, 1938, and one hundred (100) per cent, shall be the 'surplus percentage' for said crop year. The merchantable walnuts handled by any packer, in accordance with the provisions hereof, shall be deemed to be that packer's quota fixed by the Secretary, within the meaning of paragraph 5, Section 8a of the Act."

2. Delete from the order section 10 of article III, and substitute therefor the following:

"SEC. 10. *Disposition of cash received in lieu of surplus walnuts.*—Any money received by the Control Board pursuant to Sections 5 and 9 hereof (including any such money payment of which has been deferred pursuant to Section 11 hereof) shall be used by said Control Board to purchase from packers, as provided in this section, merchantable walnuts held by them and not then required to be delivered to the Control Board; *Provided, however*, That the packers from whom such purchases are made shall deliver to the Control Board the surplus referable to the walnuts purchased. At any time before January 15 of a crop year any packer having made cash payment in lieu of delivering surplus walnuts of any pack and quality pursuant to the provisions of Sections 9 and 11 hereof may offer to sell to the Control Board an equal weight of merchantable walnuts of any pack and quality having a credit value per pound equal to or higher than the credit value of the walnuts represented by such cash payment. The Control Board shall thereupon purchase the walnuts so offered in a quantity not to exceed the total quantity of the walnuts represented by such cash payment. For all walnuts so purchased the Board shall pay the credit value of the walnuts represented by such cash payment. In the event any of the walnuts so purchased have a higher credit value than the walnuts represented by such cash payment, the excess shall be credited to the packer. Any of the money referred to in the first sentence of this section remaining in the possession of the Control Board on or after January 15 of a crop year shall be used to purchase, at their credit values, from packers who have met their surplus obligation, any merchantable walnuts then held by them which are not then required to be delivered to the Control Board and which such packers shall desire so to sell. If such funds then remaining are insufficient to purchase all such walnuts, the Control Board shall offer to purchase such walnuts by apportioning such remaining funds ratably among such packers in proportion to the quantity of their respective unsold holdings of merchantable walnuts at date of offer, which such packers offer to sell, provided that any packer may offer all or any part of his unsold holdings. In the event the salable percentage should be increased after the purchase by the Control Board of walnuts from packers as herein provided and there should not remain in the possession of said Control Board cash deposits in a sum sufficient to make refunds in accordance with Article V, the packers by whom such walnuts were sold to the Control Board shall be required to refund the purchase price thereof ratably in proportion to the amounts of their respective sales to the extent necessary to refund to the Control Board a total amount sufficient to enable the Control Board to make the refunds required by Article V and the Control Board shall redeliver to such packers the walnuts purchased by such refunded amounts, or other walnuts of equivalent credit value. All purchases of walnuts by the Control Board pursuant to the terms of this section shall be subject to the conditions of refund as above provided. Any such cash deposits that may remain at the close of the crop year over and above those used for completed purchases as herein provided shall become part of the holdings of the Control Board in the same manner and for the same purposes as the proceeds of surplus walnuts disposed of by said Control Board."

3. Add the following paragraph to section 1 of article VIII of the order:

"Subsequent to the crop year ending August 31, 1937, every packer shall pay to the Control Board, upon demand, such packer's pro rata share as is approved by the Secretary, of such expenses as the Secretary may find will necessarily be incurred by the Control Board, during any period specified by the Secretary, for the maintenance and functioning of the Control Board as set forth herein. Each packer's share of such expenses shall be that proportion thereof which the total credit value of his surplus obligation arising from the handling of merchantable walnuts and from the sale of merchantable walnuts to the Control Board (including any surplus walnuts delivered to the Board or cash paid in lieu thereof in respect of walnuts to be handled) during any crop year is of the total credit value of the surplus obligations of all the packers arising from the handling and sale to the Board of merchantable walnuts (including any surplus walnuts delivered to the Board or cash paid in lieu thereof in respect of walnuts to be handled) during the same crop year, and such pro rata share is hereby approved by the Secretary. The initial assessment upon each packer shall be one (1) per cent of the total credit value of each packer's surplus obligation for each crop year, and said initial assessment shall be adjusted from time to time by the Control Board, with the approval of the Secretary, in order to provide funds sufficient in amount to cover any later finding by the Secretary of estimated expenses or the actual expenses which the Secretary finds were necessarily incurred for the maintenance and functioning of the Control Board during any crop year."

4. Delete from Exhibit A attached to the order the paragraph under "Oregon and Washington Packs" setting forth pack specifications for standard or medium Franquettes, and substitute therefor the following:

"*Standard or medium franquettes.*—Walnuts of the Franquette variety (subject to a 10% tolerance for dissimilar varieties) and of the same size specifications as given above for Standard or Medium Soft Shells."

5. In Exhibit B attached to the order add the following paragraph as an introductory paragraph immediately preceding the heading "California Quality Grades":

"The quality grade of any lot of walnuts shall be the highest quality grade to which such lot is eligible under the following specifications."

6. In Exhibit B attached to the order delete the description of "First Quality Grade Walnuts" and "Second Quality Grade Walnuts" under the heading "California Quality Grades", and substitute therefor the following:

"*First quality grade walnuts* shall contain not less than 90 per cent (by count) of kernels practically free from defects. At least 55 per cent of said minimum percentage of sound kernels shall be light in color in accordance with the official color chart issued by the Walnut Control Board.

"*Second quality grade walnuts* shall contain not less than 86 per cent (by count) of kernels practically free from serious defects. At least 35 per cent of said minimum percentage of sound kernels shall be light in color in accordance with the official color chart issued by the Walnut Control Board."

7. In Exhibit B attached to the order delete the description of "First Quality Grade Walnuts" and "Second Quality Grade Walnuts" under the heading "Oregon-Washington Quality Grades", and substitute therefor the following:

"*First quality grade walnuts* shall contain not less than 90 per cent (by count) of kernels practically free from defects. At least 55 per cent of said minimum percentage of sound kernels shall be light in color in accordance with the official color chart issued by the Walnut Control Board.

"*Second quality grade walnuts* shall not contain more than 10 per cent (by count) of moldy, rancid, blank, black, or half shriveled or insect damaged kernels all combined, and not more than an additional 20 per cent (by count) of kernels which are from one-quarter to one-half shriveled. Second quality grade walnuts shall also contain not less than 30 per cent (by count) of kernels which, in addition to being wholly sound, are light in color in accordance with the official color chart issued by the Walnut Control Board."

Nothing contained in the order, as hereby amended, shall be construed as requiring packers, under section 5 of article III of the order, to account to the Control Board for surplus walnuts in respect to such handling of walnuts as is so wholly intrastate in character as not directly to burden, obstruct or affect interstate or foreign commerce in walnuts.

Nothing contained in the order, as hereby amended, shall be deemed to affect, waive or terminate any right, duty, obligation or liability which has arisen or which may hereafter arise in connection with, by virtue of, or pursuant to any provision of the said order, or affect or impair any right or remedy of the Secretary in connection therewith, except as herein indicated, expressly or by necessary implication.

In witness whereof, H. A. Wallace, Secretary of Agriculture, does hereby execute in duplicate, under the official seal of the Department of Agriculture, and issue these amendments to the said order in the City of Washington, District of Columbia, on the 23rd day of September 1937, and declares these amendments to be effective on and after 12:01 a. m., Pacific standard time, September 29th, 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

WAGE RATES, PRODUCTION, ETC., OF 1937 CROP OF SUGARCANE

NOTICE OF HEARING AND DESIGNATION OF PRESIDING OFFICER

Pursuant to the authority contained in Sections 301 (b) and (d) and 511 of the Sugar Act of 1937, (Public No. 414, 75th Congress),

Notice is hereby given that a public hearing will be held at Baton Rouge, Louisiana, in the Agricultural Auditorium, Louisiana State University and A. & M. College, on October 4, 1937, at 9:30 a. m.

The purpose of such hearing is to receive evidence likely to be of assistance to the Secretary of Agriculture, in determining, (1) pursuant to the provisions of section 301 (b) of the said act, fair and reasonable wage rates for persons employed in the production, cultivation or harvesting of the 1937 crop of sugarcane on farms with respect to which applications for payments under the said act are made; and, (2) pursuant to the provisions of section 301 (d) of the said act, fair and reasonable prices for sugarcane to be paid by processors who, as producers, apply for payments under the said act.

William T. Ham and Joshua Bernhardt are hereby designated as presiding officers to conduct either jointly or severally the foregoing hearing.

Done at Washington, D. C., this 25th day of September, 1937. Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

[Administration Order 219 (Supplement 4)]

LOANS TO OCCUPANTS OF RURAL RESETTLEMENT TYPE PROJECTS FOR OPERATING CAPITAL

RELEASES OF CHATTEL MORTGAGES

1. In order to provide the policy and procedure to be followed in executing releases or partial releases of mort-

gages and similar liens taken in connection with operating goods loans, AO 219 is hereby supplemented to include the following addition as paragraph 8c:

8c. *Releases.*—

I. The policy and procedure as set forth in AO 161 will be followed in executing releases of mortgages or similar liens taken in connection with operating goods loans. The functions indicated in AO 161 to be performed by representatives of the regional RR division will be performed in case of operating goods loans by the appropriate representatives of the regional RP division.

2. Recipients will mark AO 219 to insure reference to this Supplement at the point mentioned above.

[SEAL] WILL W. ALEXANDER, *Administrator.*

Approved, September 15, 1937.

H. A. WALLACE,
*Secretary of Agriculture.*

## FEDERAL COMMUNICATIONS COMMISSION.

MODIFICATION OF RULE 229

The Commission, at a general session held on September 22, 1937, modified Rule 229 to read in part as follows:

"5085 kc. fixed"

[SEAL] T. J. SLOWIE, *Secretary.*

[F. R. Doc. 37-2844; Filed, September 25, 1937; 9:50 a. m.]

MODIFICATION OF RULE 229

The Commission, at a general session held on September 22, 1937, approved the insertion of the following clause as a footnote to Rule 229[2] so as to make these frequencies available for assignment by the Broadcast Division on a temporary basis:

| | | | |
|---|---|---|---|
| 9540<br>9550<br>9560 | 9550[1] | 11720<br>11730<br>11740 | 11730[1] |
| 15120<br>15130<br>15140 | 15130[1] | 21500—21500[1] | |

[1] Available for non-government assignments to International Broadcast Stations on a temporary basis and subject to cancellation at the discretion of the Commission without advance notice or hearing.

[SEAL] T. J. SLOWIE, *Secretary.*

[F. R. Doc. 37-2845; Filed, September 25, 1937; 9:51 a. m.]

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 24th day of September, A. D., 1937.

Commissioners: William A. Ayres, Chairman; Garland S. Ferguson, Jr.; Charles H. March, Ewin L. Davis, Robert E. Freer.

[File No. 21-322]

IN THE MATTER OF PROPOSED TRADE PRACTICE CONFERENCE RULES FOR THE RAYON INDUSTRY

NOTICE OF OPPORTUNITY TO PRESENT VIEWS, SUGGESTIONS OR OBJECTIONS

This matter now being before the Federal Trade Commission under its Trade Practice Conference procedure, in pursuance of the Act of Congress approved September 26, 1914 (38 Stat. 717);

Opportunity is hereby extended by the Federal Trade Commission to any and all persons affected by or having an interest in the proposed trade practice rules for the Rayon Industry to present to the Commission their views upon the same, including suggestions or objections, if any. For this purpose they may, upon application to the Commission, obtain copies of the proposed rules. Communications of such views should be made to the Commission not later than October 8, 1937. Opportunity for oral hearing will be afforded at 10 a. m., October 8, 1937, in the main hearing room, Federal Trade Commission Building, 815 Connecticut Avenue, N.W., Washington, D. C., to such persons as may desire to appear, and who shall have made prior written or telegraphic request to be heard orally. After giving due consideration to such views, suggestions or objections as may be received concerning the proposed rules, the Commission will proceed to their final consideration.

By the Commission,

[SEAL] OTIS B. JOHNSON, *Secretary.*

## INTERSTATE COMMERCE COMMISSION.

INSTALLATION AND MAINTENANCE OF CERTAIN APPLIANCES; SAFETY OF EMPLOYEES AND TRAVELERS ON RAILROADS

SEPTEMBER 24, 1937.

*To All Common Carriers by Railroad Subject to the Interstate Commerce Act:*

Attention of all common carriers by railroad subject to the Interstate Commerce Act is directed to certain provisions of Public No. 378, 75th Congress, First Session, an Act to require certain common carriers by railroad to install and maintain certain appliances, methods and systems intended to promote the safety of employees and travelers on railroads, and for other purposes, approved August 26, 1937, as follows:

(1) That block signal systems, interlocking, automatic train stop, train control and cab-signal devices in use on the date of the enactment of this amendatory provision, or such systems or devices hereinafter installed may not be discontinued or materially modified by carriers without the approval of the Commission.

(2) Each carrier by railroad shall file with the Commission its rules, standards, and instructions for the installation, inspection, maintenance, and repair of the systems, devices, and appliances covered by this section within six months after the enactment of this amendatory provision.

(3) In case of accident resulting from failure of any such system, device, or appliance to indicate or function as intended, and resulting in injury to person or property which is reportable under the rules of the Commission, a statement forthwith must be made in writing of the fact of such accident by the carrier owning or maintaining such system, device, or appliance to the Commission.

It will be noted that the provisions stated above in paragraphs (1) and (2) are not restricted to automatic block signal systems but apply equally to all such systems, whether manual or automatic.

The rules, standards, and instructions for the installation, inspection, maintenance, and repair of the systems, devices, and appliances covered by paragraph (2) above when filed with the Commission, and correspondence in connection therewith, should be addressed to W. J. Patterson, Director, Bureau of Safety, Interstate Commerce Commission, Washington, D. C. The time limit for filing these rules, standards and instructions expires February 26, 1938.

The provisions of law stated in paragraph (3) above do not abrogate or supersede orders heretofore issued by the Commission requiring telegraphic reports and monthly reports concerning railroad accidents.

IN THE MATTER OF SOUTHWESTERN DEVELOPMENT COMPANY

NOTICE OF AND ORDER FOR HEARING

An application and declaration having been duly filed with this Commission, by Southwestern Development Company, a registered holding company pursuant to Sections 10 and 7, respectively, of the Public Utility Holding Company Act of 1935, for the acquisition of South Plains Pipe Line Company First Mortgage and Collateral Trust Fifteen-Year 6% Sinking Fund Gold Bonds due January 1, 1945, in the aggregate principal amount of $3,292,000 of which $3,142,000 is to be acquired from Consolidated Oil Corporation, owner and holder of 51% of outstanding capital stock of applicant, and of which $150,000 is to be acquired from the Amarillo Oil Company, a wholly-owned subsidiary of the applicant; and for the issuance and sale, to finance such acquisition, of a note in the principal amount of $3,292,000 to the Guaranty Trust Company of New York;

*It is ordered* That a consolidated hearing on such matter be held on October 14, 1937, at ten o'clock in the forenoon of that day at Room 1103, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be

admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before October 9, 1937.

*It is further ordered* That Robert P. Reeder, an officer of the Commission, be and he hereby is designated to preside at such hearing and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

IN THE MATTER OF GARDNER ELECTRIC LIGHT COMPANY

[Public Utility Act of 1935]

ORDER PERMITTING A DECLARATION REGARDING THE ISSUANCE OF UNSECURED NOTES TO BECOME EFFECTIVE. PURSUANT TO SECTION 7

Gardner Electric Light Company, a subsidiary of a registered holding company, having duly filed a declaration with this Commission pursuant to Section 7 of the Public Utility Holding Company Act of 1935, regarding the issuance and sale of its promissory notes in the total amount of $300,000, with interest payable in advance at the rate of 2½% per annum;

A hearing on such declaration having been held after appropriate notice; the record in this matter having been examined; and the Commission having made and filed its findings herein;

*It is ordered,* That such declaration be and become effective forthwith, on the condition, however, that the issuance and sale of the aforesaid unsecured promissory notes shall be effected in substantial compliance with the terms and conditions set forth in, and for the purposes represented by said declaration.

IN THE MATTER OF AMERICAN ZINC LEAD & SMELTING COMPANY, $6 CUMULATIVE PREFERRED STOCK, $25 PAR VALUE

ORDER SETTING HEARING ON APPLICATION TO STRIKE FROM LISTING AND REGISTRATION

The New York Stock Exchange, pursuant to Section 12 (d) of the Securities Exchange Act of 1934, as amended, and Rule JD2 promulgated thereunder, having made application to the Commission to strike from listing and registration the $6 Cumulative Preferred Stock, $25 Par Value, of the American Zinc Lead & Smelting Company; and

The Commission deeming it necessary for the protection of investors that a hearing be held in this matter at which all interested persons be given the opportunity to be heard;

*It is ordered,* That the matter be set down for hearing at 11 o'clock A. M. on October 15, 1937, in Room 209, Securities and Exchange Commission Building, 1778 Pennsylvania Avenue NW., Washington, D. C., and continue thereafter at such times and places as the Commission or its officer herein designated shall determine, and that general notice thereof be given; and

*It is further ordered,* That Charles S. Lobingier, an officer of the Commission, be and he hereby is designated to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

[General Order No. 14]

APPLICATIONS UNDER SECTIONS 803, 804, 805 (A) AND (D), AND 605 (B) OF THE MERCHANT MARINE ACT OF 1936

The attached form of instructions for the preparation of applications under Sections 803, 804, 805 (a) and (d), and 605 (b) of the Merchant Marine Act of 1936 is hereby approved. All applicants for operating-differential subsidies who intend to file such applications are required to comply therewith.

By order of the United States Maritime Commission.

[SEAL] W. C. PEET, JR., *Secretary.*

SEPTEMBER 24, 1937.

---

[Form VI-B]

APPLICATIONS UNDER SECTIONS 803, 804, 805 (A) AND (D), AND 605 (B) OF THE MERCHANT MARINE ACT, 1936

All applications filed pursuant to Sections 803, 804, 805 (a) and (d), and 605 (b) of the Merchant Marine Act of 1936 should comply with the following requirements:

1. *Applications under section 803 of the act.*—

(a) Where the Applicant requests permission to perform or supply stevedoring, ship-repair, ship-chandler, towboat, or kindred services to its own subsidized vessels, the application should contain an exact description of the type and nature of the services to be performed. The Applicant should also state fully the reason why it desires to perform or supply such services instead of purchasing them from outside interests, and should set forth the estimated economies and other benefits expected to result therefrom as demonstrated by past experience.

(b) Where the Applicant requests the approval of the Commission to an arrangement whereby a wholly owned subsidiary will perform or supply the services referred to in Subsection (a) above, the Applicant should state (a) the name of the subsidiary; (b) the state of incorporation; (c) whether any person, firm, or corporation other than the Applicant owns any pecuniary interest, either legal or equitable, directly or indirectly, in the subsidiary company or has any interest in its earnings, and the nature of such interest. The Applicant should also state fully and completely the reasons why such services should be performed by a subsidiary corporation instead of by the Applicant itself, and should indicate the estimated economies and other benefits expected to result therefrom as demonstrated by past experience.

(c) Applications for approval by the Commission of a contract for the use by the Applicant of terminal facilities of a holding company, affiliate company, or associate company, should give the name of the other contracting party and its relationship with the Applicant, including the extent of any stock interest. The Applicant should incorporate, by reference, the material contained in Item 19 of Form VI-A, and should explain why this arrangement is considered necessary. Applicants are advised that the Commission will not give other than tentative approval to any contract for terminal facilities unless the contract specifically provides that the amount to be paid thereunder by the Applicant shall not exceed a fair and reasonable charge for such facilities as determined by the Commission, whose determination in that connection shall be final and conclusive.

2. *Applications under section 804 of the act.*—

(a) The fact that a person conducts as an independent contractor any customary agency business of a vessel on behalf of the Applicant does not of itself cause such person to be an "agent" of the Applicant as that term is used in the phrase "any officer, director, agent or executive thereof" in Section 804 of the Act and in Article 24 of the Subsidy Agreement.

(b) The fact that the Contractor or any of its officers or employees holds an interest in or obligations of another corporation does not of itself cause such corporation to be a "subsidiary, affiliate, or associate" of the Contractor, as such terms are used in Section 804 of the Act and in Article 24 of the Subsidy Agreement, if such interest or obligations do not constitute a substantial part of the business and assets of the Contractor or result in the Contractor or such officers or employees having power, whether or not exercised, to control or direct the policies of such corporation.

(c) No application for waiver of the provisions of Section 804 of the Act need be filed under the circumstances described in the preceding sub-paragraph (a) or (b). If such application is filed by the Contractor on behalf of itself or any other person, firm or corporation proposing to engage in operations which would otherwise be unlawful under said Section 804, such application shall set forth—

(1) Names of parties to the specified agreement or arrangement, identifying each as to affiliations and functions;

(2) Terms and nature of such specified agreement or arrangement, including duration of such relationship, and identification of foreign-flag service and vessels engaged therein. If based upon contract, a copy of such contract shall be annexed to the application;

(3) Operating statements, balance sheets and surplus accounts of the Applicant or the contracting party affiliated with the Applicant, and the foreign party to such arrangement, if available, for each of the past three fiscal years, reflecting and identifying, in so far as practicable, the past operating results and balance sheets significance of the specified arrangement;

If any of such financial statements is not available, an explanation of such unavailibity shall be made and the Applicant shall furnish such other information as to such matters as it may be able to obtain;

(4) An exact description of the manner in which the person on behalf of whom the application is made proposes to own, charter, act as agent or broker for, or operate any foreign-flag vessel which competes with any American-flag service;

(5) An identification of the American-flag services with which such foreign-flag operations will compete; and

(6) Briefly, any special circumstances because of which the Applicant contends that the Commission should waive the provisions of said Section 804.

3. *Applications under section 805 (a) of the act.*—Applications to engage in coastwise or intercoastal trade under Section 805 (a) should describe fully the proposed coastwise or intercoastal service, including the names of the vessels, the frequency of service, and the names of all competing lines. The Applicant should state whether it, or any holding company, subsidiary, affiliate, or associate company, or predecessor interest thereof, was in bona fide operation as a common carrier by water in such domestic, intercoastal, or coastwise trade in 1935 over the route or routes or in the trade or trades for which the application is made and has so operated since that time or has engaged in furnishing seasonal service only, was in bona fide operation in 1935 during the season ordinarily covered by its operation. If the Applicant or the other companies above described were not in bona fide operation in 1935, as aforesaid, the Applicant should furnish proof sufficient to justify a finding that the public interest and convenience will be served by such proposed operation.

4. *Applications under section 805 (d) of the act.*—Applications under this section will not be granted except in extreme cases involving compelling circumstances. All applications should set forth the names of the proposed managing or operating agents; if a corporation, the state of incorporation, the names of all the officers and directors, and the principal shareholders. A copy of the proposed contract covering the services and a statement of the profits or losses to the agent or operator from such services during the preceding three years, should also be submitted. The Commission will not approve of any managing agency contract which does not provide that the amount of compensation therein shall be fair and reasonable as determined by the Commission, and that the Commission's determination shall be final. Each application should contain proof sufficient to demonstrate that the proposed arrangement is in the best interests of the Applicant and the Commission.

5. *Applications under section 605 (b) of the act.*—Applications under Section 605 (b) for the payment of subsidy on vessels more than 20 years of age should summarize and incorporate, by reference, all of the data concerning such vessels which is contained in Form VI-A. The application should also demonstrate why it is in the public interest that such vessels be subsidized. The Commission will not grant a subsidy for operation of vessels over 20 years of age, except in connection with a replacement program which will involve the replacement of such vessels within a reasonable time. Therefore, all applications under this section should set forth the plans of the Applicant in regard to the replacement of the over-age vessels, together with any other circumstances sufficient to justify a finding that a subsidy in such cases is "in the public interest" as required by the statute.

6. *General.*—

(a) The above applications should be filed together with the Form VI-A application for an operating-differential subsidy, if practicable, but in no event later than October 20, 1937. Separate applications should be filed under the individual sections of the Act. Fifteen copies, including three originals, should be furnished to the Commission.

(b) The applications should refer to and incorporate all the provisions of Form VI-A which are pertinent thereto. They should be in affidavit form and should be verified by one of the officers of the Applicant.

IN THE MATTER OF THE INVESTIGATION REGARDING THE OPERATING COSTS OF FOREIGN-FLAG VESSELS

ORDER

*It appearing,* That full and complete information as to the costs of operating foreign-flag vessels operating from ports of the United States is necessary to the proper administration of the Merchant Marine Act, 1936;

*It appearing further,* That ---------- is an owner and operator of, or an agent for, foreign-flag vessels;

*It is ordered,* In pursuance of the powers conferred by section 21 of the Shipping Act, 1916, that ---------- be, and it is hereby, notified and required to file with the Secretary of the Commission, at his office in the Commerce

Building, Washington, D. C., on or before October 8, 1937.

A full and complete memorandum, with respect to all foreign-flag vessels owned, chartered, or operated by ---------- as an agent or manager or in any other capacity, covering the following points:

1. *General.*—

(*a*) The lines or routes upon which it operates and the names of the vessels employed upon each in the foreign commerce of the United States, its Territories or possessions.

(*b*) A statement indicating the number of voyages of each ship upon each line or route terminating between January 1, 1937 and August 31, 1937, and the number of days covered thereby.

2. *Concerning wages—For each vessel.*—

(*a*) the present manning and wage scale,

(*b*) ratio of average overtime payments to basic wage and

(*c*) other allowances.

3. *Concerning subsistence costs—For each vessel and line or route.*—

(*a*) Subsistence costs per man per day of (1) officers and crew and (2) passengers and others upon voyages terminating between January 1, 1937, and August 31, 1937.

(*b*) The total cost of subsistence upon which such averages are based and the percentage of total cost represented by purchases in the United States.

4. *Concerning stores and supplies—For each vessel and line or route.*—

(*a*) A statement indicating the costs of (1) stores and (2) equipment upon voyages terminating between January 1, 1937, and August 31, 1937, with expenditures under each classification segregated to indicate the countries in which made and the ratio of the purchases in each country to the total. If the actual expenditures for any of such voyages are not known they should be estimated.

(*b*) The costs, in ports other than those of the United States, of representative items under each of the above classifications and, in each case, the countries in which customarily purchased—stating the cost in each country if purchased in more than one. Items of like nature (such, for example, as bedding, blocks, canvas, chemicals, cleaning gear, galley equipment, lubricants, mess gear, nautical instruments, packing, paints, pipe and pipe fittings, radio and other electrical supplies and fittings, spares—engine and other, tools, etc.) should be grouped under appropriate titles and adequately described. Items unimportant as to consumption and cost need not be reported and the schedules may be submitted in the most convenient form.

5. *Concerning repairs—For each vessel and line or route.*—

(*a*) A statement indicating the costs of repairs upon voyages terminating between January 1, 1937, and August 31, 1937, with expenditures segregated to indicate the countries in which made and the ratio of the expenditures in each country to the total. If the actual expenditures for any of such voyages are not known they should be estimated.

(*b*) The specifications and itemized costs of such repairs made in ports other than those of the United States.

6. *Concerning insurance—For each vessel, as at August 31, 1937, a statement indicating.*—

(1) the amount and kinds of insurance carried; (2) where placed; (3) net premium rates for each form and (4) the nature and estimated annual cost of self-assumed risks.

7. *Concerning foreign governmental aid.*—Describe the nature of any such aid received or expected to be received during 1937 in connection with the operation of any of the vessels, lines or routes and state, in each case, the purpose for which the said aid is or will be extended and the name of the grantor.

*It is further ordered*, That the aforesaid memorandum required to be filed, shall be subscribed by an officer who shall specify his title, and who shall, under oath, verify the accuracy and completeness thereof.

*It is further ordered*, That a copy of this order be served upon the said ----------.

Adopted by the Commission on September 23, 1937.

[SEAL] W. C. PEET, JR., *Secretary.*

## VETERANS' ADMINISTRATION.

### REVISION OF REGULATIONS

#### GOVERNMENT EMPLOYEES RIGHT TO PENSION

R-2558. For the purposes of Public No. 2, 73d Congress (Act of March 20, 1933), no person holding an office or position, appointive or elective, under the United States government or the municipal government of the District of Columbia, or under any corporation, the majority of the stock of which is owned by the United States, shall be paid a pension so long as he continues to draw a salary from such employment, except (1) those persons so employed whose pension is protected by the provisions of the act; however, the rate of pension as to this class shall not exceed $6.00 per month; (2) those unmarried persons whose salary or compensation for service as such employee is in an amount not in excess of $1000 per annum computed monthly, or any married person or any person with minor children whose salary or compensation for service as such employee is in an amount not in excess of $2,500 per annum computed monthly; and (3) widows of veterans: *Provided*, That effective on and after August 25, 1937, no award of death compensation or pension shall be subject to reduction or discontinuance under this paragraph (Public No. 357, 75th Congress (Act of August 25, 1937)) (August 25, 1937).

## TREASURY DEPARTMENT.

### Bureau of Internal Revenue.

[T. D. 4763]

### STAMP TAX ON PASSAGE TICKETS

#### EXEMPTION OF PASSAGE TICKETS BETWEEN THE CONTINENTAL UNITED STATES AND PUERTO RICO

[Regulations 71, amended]

*To Collectors of Internal Revenue and Others Concerned:*

The Act approved August 28, 1937 (Public No. 400, 75th Congress), entitled "An Act to amend the Revenue Act of 1926, as amended, to exempt persons traveling between Puerto Rico and the continental United States from the payment of a stamp tax on steamship tickets", provides, as follows:

"That subdivision 5 of schedule A of title VIII of the Revenue Act of 1926, as amended by section 442 (a) of the Revenue Act of May 29, 1928, be, and hereby is, amended by striking out the word 'or' before the word 'Cuba' and by adding the words 'or Puerto Rico' after the word 'Cuba'."

In conformity with the provisions of the Act above quoted, articles 55, 58 and 60 of Regulations 71, approved July 16, 1932, are amended to read as follows:

ART. 55. *Passage tickets to Philippine Islands.*—Passage tickets to Philippine Islands are taxable.

ART. 58. *Passage tickets to ports not in the United States, Canada, Mexico, Cuba, or Puerto Rico.*—(*a*) Passage tickets from any foreign port or domestic port sold or issued in the United States costing more than $10, whose port of destination is not within the United States, Canada, Mexico, Cuba, or Puerto Rico, are subject to tax.

(*b*) Such passage tickets sold or issued in the United States to a port in Newfoundland are subject to tax.

ART. 60. *Passage tickets to ports in the United States, Canada, Mexico, Cuba, or Puerto Rico.*—Passage tickets sold or issued in the United States for passage to ports of destination in the United States, Canada, Mexico, Cuba, or Puerto Rico are not subject to tax unless sold or issued in the United States as a round trip or through ticket for a port not within the United States, Canada, Mexico, Cuba, or Puerto Rico.

This Treasury Decision is issued under the authority contained in section 1101 of the Revenue Act of 1926.

[SEAL] GUY T. HELVERING,
*Commissioner of Internal Revenue.*

Approved, September 25, 1937.

### RECORDS AND TRANSCRIPTS OF WHOLESALE LIQUOR DEALERS INCLUDING RECTIFIERS, DISTILLERS, PROPRIETORS OF INTERNAL REVENUE BONDED WAREHOUSES, TAXPAID BOTTLING HOUSES, AND TAXPAID PREMISES, AND IMPORTERS

*To District Supervisors and Others Concerned:*

Pursuant to the authority conferred by Section 3318, R. S., as amended by Section 411, Liquor Tax Administration Act (U. S. C., 1934 ed., Supp. II, title 26, secs. 1208 and 1209), Section 62 of the Act of August 27, 1894, as amended by Section 412, Liquor Tax Administration Act (U. S. C., 1934 ed., Supp. II, title 26, sec. 1210) and Section 3317, R. S., (U. S. C., 1934 ed., title 26, sec. 1206), the following regulations are prescribed, effective October 1, 1937.

1. Every wholesale liquor dealer, with the following exceptions, shall keep Record 52, "Wholesale Liquor Dealer's Record", and render monthly transcripts, Forms 52A and 52B, "Wholesale Liquor Dealer's Monthly Report", and Form 338, "Wholesale Liquor Dealer's Monthly Report (Summary of Forms 52A and 52B)":

#### (A) REGISTERED DISTILLERIES AND INTERNAL REVENUE BONDED WAREHOUSES

2. Every proprietor of a registered distillery and of an internal revenue bonded warehouse shall keep a daily record and render monthly reports on Form 52C, "Monthly Record and Report of Registered Distillery and Internal Revenue Bonded Warehouse", of all bulk distilled spirits shipped from the distillery, and all bulk and bottled-in-bond distilled spirits removed from the warehouse.

3. Where the distillery and the internal revenue bonded warehouse are located on the same premises, only one record on Form 52C will be required. Such record may be kept at the distillery or at the internal revenue bonded warehouse.

4. Removals of distilled spirits from the cistern room for deposit in the internal revenue bonded warehouse on the same premises, need not be reported on Form 52C. However, removals of distilled spirits from the cistern room for deposit in an internal revenue bonded warehouse *not* located on the distillery premises shall be reported by the proprietor of the distillery on Form 52C.

#### (B) TAXPAID BOTTLING HOUSES

5. Every proprietor of a taxpaid bottling house shall keep a daily record and render a monthly report on Form 52D, "Monthly Record and Report of Taxpaid Bottling House Operations", of all distilled spirits received, bottled, and disposed of at his bottling house.

#### (C) TAXPAID PREMISES AT WHICH DISTILLED SPIRITS OR ALCOHOL ARE SOLD IN BULK

6. Every proprietor of a registered distillery, a fruit distillery, an internal revenue bonded warehouse, or an industrial alcohol bonded warehouse, who maintains taxpaid premises at which taxpaid distilled spirits or alcohol are received, stored, and sold *in bulk*, and every wholesale liquor dealer who deals in alcohol *in bulk for industrial purposes*, shall keep Form 52E, "Monthly Record and Report of Importer or Proprietor of Taxpaid Premises", of all spirits, both bulk and bottled, received and disposed of at his taxpaid premises: Provided, That, if such proprietor or wholesale liquor dealer so desires, he may keep Form 52E for bulk spirits only and Record 52 for bottled spirits only.

#### (D) IMPORTERS

7. Every importer who imports and sells distilled spirits *in bulk*, shall keep at the place of business covered by his wholesale liquor dealer special tax stamp, Form 52E, "Monthly Record and Report of Importer or Proprietor of Taxpaid Premises", of all distilled spirits, both bulk and bottled, imported and disposed of by him: Provided, That, if the importer so desires, he may keep Form 52E for bulk spirits only and Record 52 for bottled spirits only. The receipt of imported distilled spirits, both bulk and bottled, shall be entered on Form 52E as of the time of making the customs entry. The disposition of such distilled spirits shall be entered on Form 52E as of the time of their sale or their taxpayment and withdrawal from customs custody.

8. Every importer who maintains wholesale liquor dealer premises where bottled distilled spirits are received and stored, shall keep Record 52 of all bottled distilled spirits received and disposed of thereat (including bottled spirits transferred from customs custody).

#### (E) RECTIFIERS

9. Every rectifier shall report on Form 45, "Rectifier's Monthly Record and Report", all bulk distilled spirits, wines, and other liquors received by him, whether for rectification or for bottling without rectification.

10. The rectifier shall report on such Form 45 all bulk products removed from his rectifying plant, and all bottled products removed from his rectifying plant and from his contiguous wholesale liquor dealer room where such room is maintained and is used exclusively for products bottled at his rectifying plant.

11. Every rectifier who maintains non-contiguous wholesale liquor dealer premises shall report all bottled products (rectified and unrectified) removed from his rectifying plant, on Form 45, kept at such plant. He shall keep Record 52 at such non-contiguous wholesale liquor dealer premises of all bottled products (rectified and unrectified) received and disposed of thereat, including products transferred from his non-contiguous rectifying plant and products received from other persons.

12. Every rectifier who maintains a contiguous wholesale liquor dealer room, which is not used exclusively for products bottled at his rectifying plant, shall report all bottled products (rectified and unrectified) removed from his rectifying plant, on Form 45, kept at such plant. He shall keep Record 52, "Wholesale Liquor Dealer's Record", at such contiguous wholesale liquor dealer room of all bottled products (rectified and unrectified) received and disposed of thereat, including those products transferred from his contiguous rectifying plant.

#### (F) FRUIT DISTILLERIES

13. Every proprietor of a fruit distillery shall keep a daily record and render monthly reports on Form 15, "Monthly Return of Fruit Distiller", of all distilled spirits removed from the distillery. Pending the revision of Form 15, the name and address of the consignee of distilled spirits with-

drawn tax paid will be entered in the name and address columns under "Withdrawn for Fortification of Wine."

RECTIFIER'S DAILY RECORD OF BOTTLING

14. Where the contents of a tank are not completely bottled at the close of business for the day, the rectifier shall enter on the copy of Form 237 attached to the bottling tank, the total distilled spirits, wines and other liquors bottled that day from such tank, giving all the information required by the form. Form 237 shall be kept on the tank until the entire contents are bottled. Upon completion of the bottling, Form 237 shall be removed from the bottling tank and the original and all copies of Form 237 completed and disposed of in accordance with instructions on the form. The same procedure shall be followed for reporting on Form 230 the daily bottling of spirits bottled without rectification.

TIME OF MAKING ENTRIES

15. Daily entries shall be made on Record 52, Forms 52C, 52D, 52E, and 45, as indicated by the headings of the various columns, and in accordance with instructions printed thereon, not later than the close of business of the day on which the transactions occur: Provided, That, where the wholesale liquor dealer, the proprietor of the taxpaid bottling house, the importer or the proprietor of taxpaid premises where distilled spirits are sold in bulk, or the rectifier, keeps a separate record, such as invoices, of the removals of distilled spirits, showing the removal data required to be entered on Record 52, Form 52D, Form 52E, or Form 45, respectively, daily entries of the removal of goods from his premises may be made on the respective record not later than the close of business of the following business day, provided such separate record is approved by the District Supervisor. Such provision is not applicable to daily entries on Form 52C, "Monthly Record and Report of Registered Distillery and Internal Revenue Bonded Warehouse."

SEPARATE RECORD OF SERIAL NUMBERS OF CASES

16. Serial numbers of cases of distilled spirits disposed of need not be entered on Record 52, "Wholesale Liquor Dealer's Record", Form 52D, "Monthly Record and Report of Taxpaid Bottling House Operations", Form 52E, "Monthly Record and Report of Importer or Proprietor of Taxpaid Premises", or Form 45, "Rectifier's Monthly Record and Report", provided the respective proprietor keeps in his place of business a separate record, approved by the District Supervisor, showing such serial numbers, with necessary identifying data, including the date of removal and the name and address of the consignee. Such separate record may be kept in book form (including loose-leaf books) or may consist of commercial papers, such as invoices or bills. Such books, invoices, and bills shall be preserved for a period of four years and in such a manner that the required information may be ascertained readily therefrom, and, during such period, shall be available during business hours for inspection and the taking of abstracts therefrom by revenue officers. Entries shall be made on such separate approved record not later than the close of business of the day on which the transactions occur. The dealer, whose separate record has been approved by the District Supervisor, shall note in the column for reporting serial numbers that, "Serial numbers shown on commercial records per authority, dated _____."

ENTRY OF MISCELLANEOUS ITEMS

17. Wholesale liquor dealers may enter on Record 52, "Wholesale Liquor Dealer's Record", as one item the total quantity of different kinds of spirits *made up from broken cases* sold to the same person on the same day, provided such total quantity is not in excess of ten gallons. The entry of such items shall be stated as "Miscellaneous" or "Misc." and shall show the date, the name and address of the person to whom sold, and the quantity. The total quantity of such miscellaneous spirits so disposed of during the month shall be reported in the monthly summary, Form 338, as "Miscellaneous": Provided, the wholesale liquor dealer determines by actual inventory the quantity of each kind of spirits remaining on hand at the end of the month.

PLACE WHERE RECORD 52 SHALL BE KEPT BY WHOLESALE LIQUOR DEALERS

18. Except as otherwise provided herein, the wholesale liquor dealer shall keep Record 52, "Wholesale Liquor Dealer's Record", at the place of business covered by his wholesale liquor dealer special tax stamp, if the spirits are received and sent out from such premises.

19. If the place of business covered by the wholesale liquor dealer special tax stamp is not the same premises where the spirits are received and sent out, the wholesale liquor dealer shall keep his Record 52 at the latter place and render transcripts from such place on Forms 52A and 52B: Provided, That, if approved by the District Supervisor, a wholesale liquor dealer who so desires may keep his Record 52 at the place of business covered by the special tax stamp and render transcripts on Forms 52A and 52B from such place. If, however, the place of business covered by the special tax stamp is not in the same supervisory district as the place where the spirits are received and sent out, Record 52 must be kept at the latter place and transcripts on Forms 52A and 52B rendered to the District Supervisor of that district.

WHERE WHOLESALE LIQUOR DEALER ALSO MAINTAINS A RETAIL LIQUOR DEALER DEPARTMENT

20. Where a wholesale liquor dealer maintains a separate retail liquor dealer department on the same premises, he shall keep Record 52, "Wholesale Liquor Dealer's Record", at his wholesale liquor dealer department, of all spirits received and disposed of thereat. Distilled spirits transferred from the wholesale department to the retail department shall be reported on Record 52, Part 2, as "Transferred to retail liquor dealer department." Sales of five wine gallons or more of distilled spirits to the same person at the same time, filled wholly or partly from the retail liquor dealer department, shall be entered on Record 52, Part 2, and the quantity taken from the retail department shall be entered on Record 52, Part 1, as "Transferred from retail liquor dealer department."

21. Where the wholesale liquor dealer sells at both wholesale and retail and does not maintain a separate retail department, all distilled spirits received and disposed of shall be entered on Record 52.

MONTHLY REPORTS

22. A full and complete transcript of the required records shall be rendered on the respective monthly reports, Forms 52A, 52B, 52C, 52D, and 52E, and Form 45, and forwarded to the District Supervisor, Alcohol Tax Unit, on or before the tenth day of the succeeding month. Record 52, and records kept on Forms 52C, 52D, 52E, and 45 shall be preserved for a period of four years and during such period shall be available during business hours for inspection and the taking of abstracts therefrom by the Commissioner or any internal revenue officer.

USE OF PREVIOUS ISSUES OF RECORDS AND FORMS

23. The revised Record 52, Forms 52A, 52B, 52C, 338, and 45, and the new Forms 52D and 52E are effective October 1, 1937. However, commercial printers of Record 52, Forms 52A, 52B, 52C, 338 and 45, will be given until January 1, 1938, to dispose of stocks of present issues. Users of Record 52, Forms 52A, 52B, 52C, 338 and 45 will be given until March 1, 1938, to use stocks of the present issues. District Supervisors will not accept Forms 52A, 52B, 52C, 338 or 45 on other than the revised forms (October, 1937) covering transactions beginning with the month of March, 1938.

FORMS TO BE PROVIDED BY USERS AT OWN EXPENSE

24. Record 52, Forms 52A, 52B, 52C, 52D, 52E, 338 and 45 will be provided by users at their own expense, but must be in the form prescribed by the Commissioner: Provided, That, with the approval of the Commissioner, they may be modified to adapt their use to tabulating or other mechanical equipment; Provided, further, That where the form is printed in book form, including loose-leaf books, the instructions may be printed on the cover or the fly leaf of the book instead of on the individual form.

REGULATIONS REVOKED

25. Treasury Decisions 2571, 4475, 4525, 4654, and 4655; the first two sentences of Paragraph 41 of Treasury Decision 4650; Paragraph 136 of Treasury Decision 4651; and Paragraph 193 of Regulations 15, are hereby revoked.

26. The provisions of Treasury Decision 4679; Article 53 of Regulations 3; Paragraph 9, Page 35 of Regulations 8; Paragraphs 189, 191, and 194 of Regulations 15; and all pertinent provisions of Regulations 7, "Concerning the Tax on Distilled Spirits" (1914 edition), relative to Forms 45, 52, 52A, 52B, 52C, and 338, are hereby revoked in so far as they are inconsistent herewith.

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

### 1937 COTTON PRICE ADJUSTMENT PAYMENT PLAN

#### DEFINITION OF DATE OF SALE [1]

For the purposes of the 1937 Cotton Price Adjustment Payment Plan the date of sale shall be deemed to be the date on which the person by or for whom the cotton which is sold was produced and harvested entered into the agreement to sell such cotton whether or not delivery thereof is simultaneously made and whether or not title thereto simultaneously passes. At the time application for payment under said plan is made it must be shown that the cotton covered by each Cotton Sale Certificate or sales receipt submitted in support of such application is cotton which was sold for money or something of value prior to July 1, 1938, by the person by or for whom it was produced and harvested, that title thereto has vested in the purchaser, and that delivery thereof has been made pursuant to such sale. Cotton paid as standing rent or as an installment on the purchase price of a farm shall be deemed to have been sold by the producer thereof so paying it and the date of sale thereof shall be the date on which it was delivered in such payment prior to July 1, 1938.

Done at Washington, D. C., this 28th day of Sept., 1937. Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

[F. R. Doc. 37-2895; Filed, September 28, 1937; 12:35 p. m.]

[1] Pursuant to the item entitled "Price Adjustment Payment to Cotton Producers" in the Third Deficiency Appropriation Act, fiscal year 1937, approved August 25, 1937, Public No. 354, 75th Congress.

Issued September 28, 1937.

[Puerto Rico Sugar Order No. 7]

### ALLOTMENT OF THE QUOTA FOR PUERTO RICO

By virtue of the authority vested in the Secretary of Agriculture by The Sugar Act of 1937, approved September 1, 1937, I, H. A. Wallace, Secretary of Agriculture, in order to carry out the powers vested in me by the said act, do hereby make, issue, publish and give public notice of this order, which shall have the force and effect of law and shall continue in force and effect until amended or superseded by orders or regulations hereafter made by the Secretary of Agriculture.

I

Whereas, General Sugar Quota Regulations, Series 4, No. 2, as amended by Supplement 3, establishes for Puerto Rico, for the calendar year 1937, a quota of 883,303 short tons of sugar, raw value, and

Whereas, I hereby find that the total surplus stocks of Puerto Rican sugar in excess of the aforesaid quota and the estimated requirements for local consumption in Puerto Rico for the calendar year 1937 amount to approximately 153,000 tons of sugar, raw value, and

Whereas, I hereby find that the allotment of the sugar quota established for Puerto Rico for consumption in continental United States for the calendar year 1937 is necessary in order to prevent disorderly marketing of sugar from such area.

II

Now, therefore, upon the basis of the foregoing findings and pursuant to the foregoing authority, it is hereby ordered:

1. That the aforesaid quota of 883,303 short tons of sugar, raw value, shall be allotted to the following processors in the amounts which appear opposite their respective names:

| Name of processor | Allotment from processing | Allotment from surplus stocks | Marketing allotment |
|---|---|---|---|
| (1) Aguirre | 95,413 | 12,000 | 107,413 |
| (2) Canabalache | 34,637 | 2,763 | 37,400 |
| (3) Canovanas | 29,817 | 2,934 | 32,751 |
| (4) Carmen | 13,902 | 1,203 | 15,105 |
| (5) Coloso | 31,635 | 2,545 | 34,200 |
| (6) Constancia-Toa | 19,704 | 1,276 | 20,980 |
| (7) El Ejemplo | 11,734 | 1,125 | 12,859 |
| (8) Eureka | 11,272 | 733 | 12,005 |
| (9) Fajardo | 58,112 | 5,927 | 64,039 |
| (10) Guanica | 90,844 | 9,967 | 100,811 |
| (11) Guanmani | 10,954 | 989 | 11,923 |
| (12) Herminia | 1,778 | 115 | 1,893 |
| (13) Igualdad | 11,955 | 1,063 | 13,018 |
| (14) Juanita | 15,562 | 1,008 | 16,570 |
| (15) Lafayette | 28,394 | 2,667 | 31,061 |
| (16) Plazuela-Los Canos | 34,773 | 2,315 | 37,088 |
| (17) Monserrate | 11,012 | 1,033 | 12,045 |
| (18) Pellejas | 1,353 | 88 | 1,441 |
| (19) Plata | 9,902 | 641 | 10,543 |
| (20) Playa Grande | 7,312 | 619 | 7,931 |
| (21) Rochelaise | 8,230 | 844 | 9,074 |
| (22) Roig | 26,361 | 2,436 | 28,797 |
| (23) Rufina | 26,360 | 3,267 | 29,627 |
| (24) San Vicente | 29,364 | 2,440 | 31,804 |
| (25) Santa Barbara | 2,521 | 265 | 2,786 |
| (26) Soller | 5,008 | 324 | 5,332 |
| (27) Vannina | 13,195 | 854 | 14,049 |
| (28) Victoria | 15,875 | 1,213 | 17,088 |
| (29) Eastern Sugar Associates | 81,343 | 9,857 | 91,200 |
| (30) San Francisco | 5,612 | 509 | 6,121 |
| (31) Caribe | 6,309 | 409 | 6,718 |
| (32) Constancia-Ponce | 8,033 | 768 | 8,801 |
| (33) Mercedita | 31,988 | 2,681 | 34,669 |
| (34) Boca Chica | 14,287 | 1,874 | 16,161 |
| Total | 804,581 | 78,722 | 883,303 |

2. That the above-named processors are hereby prohibited from bringing into the continental United States, for consumption during the calendar year 1937, any sugar from Puerto Rico in excess of the marketing allotments set forth in paragraph 1 hereof.

3. That the allotments fixed herein shall not be assigned or transferred without the approval of the Secretary or his duly appointed agent.

4. That where surplus stocks of sugar have been processed from growers' surplus sugarcane and settlement with growers has been made in terms of sugar, such growers' surplus sugar shall share in the allotment herein made to the processor on a pro rata basis.

In testimony whereof, H. A. Wallace, Secretary of Agriculture, has hereunto set his hand and caused the official seal of the Department of Agriculture to be affixed in the City of Washington, District of Columbia, this 28th day of Sept., 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

### 1937 AGRICULTURAL CONSERVATION PROGRAM—NORTH CENTRAL REGION

#### SUPPLEMENT NO. 4

Pursuant to the authority vested in the Secretary of Agriculture under Section 8 of the Soil Conservation and Domestic Allotment Act, North Central Region Bulletin No. 101, as Amended, is hereby amended as follows:

1. Part II, Section 9 (a) is amended by adding at the end thereof the following:

The county rates of payment per acre for diversion from the general soil-depleting base for the respective counties in Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, Ohio, South Dakota, and Wisconsin shall be as follows:

*Illinois*

County—Rate of General Diversion Payment Per Acre

Bureau, $9.51; Carroll, $9.20; Henry, $9.20; Jo Daviess, $8.69; Lee, $8.88; Mercer, $9.13; Ogle, $8.57; Putnam, $9.45; Rock Island, $8.82; Stephenson, $8.63; Whiteside, $9.26; Winnebago, $7.87.

Boone, $8.06; Cook, $8.25; DeKalb, $9.32; DuPage, $8.38; Grundy, $8.00; Kane, $9.20; Kendall, $8.19; Lake, $8.25; LaSalle, $8.76; McHenry, $8.63; Will, $7.50.

Adams, $7.87; Brown, $8.06; Fulton, $8.63; Hancock, $8.06; Henderson, $8.88; Knox, $9.07; McDonough, $8.69; Schuyler, $8.06; Warren, $9.20.

Bond, $5.48; Calhoun, $8.44; Cass, $8.38; Christian, $7.87; Greene, $8.19; Jersey, $7.43; Macoupin, $7.18; Madison, $6.87; Montgomery, $6.43; Morgan, $8.76; Pike, $7.87; Sangamon, $8.38; Scott, $8.69.

DeWitt, $8.00; Logan, $8.57; McLean, $8.50; Macon, $8.69; Marshall, $8.19; Mason, $7.24; Menard, $8.25; Peoria, $8.32; Stark, $8.50; Tazewell, $8.63; Woodford, $9.32.

Champaign, $8.57; Ford, $7.87; Iroquois, $7.62; Kankakee, $7.43; Livingston, $8.13; Piatt, $8.76; Vermilion, $7.50.

Clark, $6.43; Clay, $5.29; Coles, $7.62; Crawford, $6.55; Cumberland, $5.98; Douglas, $8.13; Edgar, $8.25; Effingham, $5.23; Fayette, $5.61; Jasper, $5.23; Lawrence, $6.17; Marion, $5.04; Moultrie, $8.00; Richland, $5.17; Shelby, $6.99.

Alexander, $6.30; Clinton, $5.98; Jackson, $6.61; Johnson, $5.67; Monroe, $7.12; Perry, $4.91; Pulaski, $6.68; Randolph, $6.24; St. Clair, $6.49; Union, $6.80; Washington, $5.17; Williamson, $5.61.

Edwards, $5.98; Franklin, $5.04; Gallatin, $6.49; Hamilton, $5.48; Hardin, $5.48; Jefferson, $4.98; Massac, $6.11; Pope, $5.48; Saline, $6.05; Wabash, $6.93; Wayne, $5.42; White, $6.24.

*Indiana*

County—Rate of General Diversion Payment Per Acre

Benton, $7.31; Jasper, $6.68; Lake, $7.12; La Porte, $6.80; Newton, $7.43; Porter, $6.74; Pulaski, $6.74; Starke, $6.05; White, $7.43.

Carroll, $8.38; Cass, $8.06; Elkhart, $7.08; Fulton, $7.12; Kosciusko, $8.06; Marshall, $7.56; Miami, $8.69; St. Joseph, $6.72; Wabash, $8.44.

Adams, $7.75; Allen, $8.19; DeKalb, $7.38; Huntington, $8.00; Lagrange, $7.02; Noble, $8.13; Steuben, $7.56; Wells, $7.81; Whitley, $7.69.

Clay, $6.06; Fountain, $6.99; Montgomery, $8.00; Owen, $5.70; Parke, $6.93; Putnam, $6.80; Tippecanoe, $7.50; Vermillion, $6.68; Vigo, $6.43; Warren, $6.99.

Bartholomew, $7.18; Boone, $7.69; Clinton, $8.69; Decatur, $8.19; Grant, $8.76; Hamilton, $8.57; Hancock, $7.75; Hendricks, $7.69; Howard, $9.01; Johnson, $8.63; Madison, $8.57; Marion, $8.00; Morgan, $7.62; Rush, $8.76; Shelby, $7.69; Tipton, $9.45.

Blackford, $7.12; Delaware, $8.44; Fayette, $9.01; Henry, $8.38; Jay, $7.18; Randolph, $8.13; Union, $9.51; Wayne, $8.44.

Daviess, $6.18; Dubois, $5.76; Gibson, $6.99; Greene, $6.30; Knox, $6.93; Martin, $6.18; Pike, $5.64; Posey, $6.30; Spencer, $5.46; Sullivan, $6.68; Vanderburgh, $6.60; Warrick, $5.88.

Brown, $5.76; Crawford, $5.04; Floyd, $6.00; Harrison, $5.58; Jackson, $6.24; Lawrence, $6.36; Monroe, $6.06; Orange, $5.70; Perry, $5.40; Washington, $5.88.

Clark, $5.88; Dearborn, $6.30; Franklin, $7.69; Jefferson, $5.94; Jennings, $5.76; Ohio, $6.48; Ripley, $5.94; Scott, $5.64; Switzerland, $6.42.

*Iowa*

County—Rate of General Diversion Payment Per Acre

Buena Vista, $8.88; Cherokee, $8.57; Clay, $8.25; Dickinson, $7.94; Emmet, $8.13; Lyon, $7.50; O'Brien, $8.69; Osceola, $8.13; Palo Alto, $8.06; Plymouth, $7.50; Pocahontas, $8.50; Sioux, $8.00.

Butler, $7.62; Cerro Gordo, $7.94; Floyd, $7.62; Franklin, $8.57; Hancock, $8.25; Humboldt, $9.13; Kossuth, $8.63; Mitchell, $7.81; Winnebago, $8.32; Worth, $7.81; Wright, $8.88.

Allamakee, $8.38; Black Hawk, $8.76; Bremer, $8.38; Buchanan, $7.62; Chickasaw, $7.43; Clayton, $8.95; Delaware, $8.25; Dubuque, $8.38; Fayette, $8.00; Howard, $7.12; Winneshiek, $8.57.

Audubon, $8.50; Calhoun, $8.95; Carroll, $8.69; Crawford, $8.19; Greene, $8.88; Guthrie, $8.50; Harrison, $8.06; Ida, $8.25; Monona, $8.25; Sac, $9.01; Shelby, $8.69; Woodbury, $7.75.

ORDER PERMITTING HUNTING ON THE UPPER MISSISSIPPI RIVER WILD LIFE AND FISH REFUGE

Pursuant to Section (a) of regulation 1-A of the Regulations for the Administration of the Upper Mississippi River Wild Life and Fish Refuge, public hunting of waterfowl (except Ross's Goose, wood duck, bufflehead duck, ruddy duck, canvas-back duck, red head duck and swans), and of coot and Wilson's snipe or jacksnipe is hereby permitted within said refuge during the period of October 9 to November 7, 1937, both dates inclusive, in the States of Iowa, Minnesota, and Wisconsin, and November 1 to November 30, 1937, both dates inclusive, in the State of Illinois, except on the area specifically scheduled below, but only in conformity with the Migratory Bird Treaty Act Regulations, the Migratory Bird Hunting Stamp Act, the regulations governing said refuge, and laws of the respective States not inconsistent therewith.

MINNESOTA

*Houston County*

*Area Number 1.*—All of the lands and waters lying in Township 104 N., Range 4 W., 5th P. M., described as follows: Those parts of the E½SW¼ and W½SE¼ of Section 14 lying southerly and westerly of Pine Creek; SE¼SW¼E½NW¼, N½NE¼, SW¼NE¼, Lots 1, 2, 3 and 4 in Sec. 23; Lots 1, 2, 3, 4 and 5 in Sec. 24; Lots 1, 2, and 5 and NW¼NW¼, Sec. 25; N½NE¼ and NE¼NW¼, Sec. 26, all of the lands and waters of Lot 1, Sec. 30, Township 104 N., Range 3 W., 5th P. M.; and all of the lands and waters enclosed by the meandered boundaries of what is known as Target Lake situated in parts of said Sections 23 and 24, and all of the lands and waters enclosed by the meandered boundaries of that portion of what is known as Broken Arrow Slough situated northerly of a straight line drawn between the points of intersection of said slough by the north lines of Lots 2 and 4 of Sec. 25, Township 104 N., Range 4 W., excepting from Lot 2, Sec. 24, Township 104 N., Range 4 W. a rectangular parcel of land surrounding the Edward Hoffman cottage, more particularly described by metes and bounds as follows:

*Beginning* at Corner 1, a point on the shore of the Mississippi River 75 feet south of the northeast corner of said Lot 2; thence west 29 feet, smoke house falls 5 feet south 150 feet, Corner 2, a 1" x 24" galvanized iron pipe; thence south parallel with the shore line 514 feet, Corner 3; a 1" x 24" galvanized iron pipe; thence east 150 feet, Corner 4, on the shore of the Mississippi River; thence north with the shore line 514 feet to the place of *beginning*.

*Area number 2.*—All of the lands and waters lying in Township 103 N., Ranges 3 and 4 W., 5th P. M. described as follows: The NE¼, NW¼SE¼, SW¼, N½NW¼, SE¼NW¼, and Lots 1 and 2 in Sec. 1; NE¼NW¼, W½NW¼, and Lots 2, 3, 4, and 5, that portion of Lot 6 east of the C. M. St. P. & P. R. R., and Lots 7 and 8, all in Sec. 12; Lots 1, 2, 3, 4, and 5, that portion of Lot 6 lying easterly of the easterly right of way line of the C. M. St. P. & P. R. R., NW¼SW¼ and SW¼NW¼ in Sec. 13; and all of the lands and waters enclosed by the meandered boundaries of what is known as Lawrence Lake situated in parts of said Sections 12 and 13, all in Township 103 N., Range 4 W., and Fractional Sec. 6, Township 103 N., Range 3 W.

*Vernon County*

*Area number 3.*—All of the lands and waters lying in Township 14 N., Range 7 W, 4th P. M. described as follows: Lots 5, 6, 7, 8 and 9 in Sec. 7; W½SW¼ and Lots 7, 8, 9 and 10 in Sec. 17; SE¼, W½NE¼, SE¼NE¼, and Lots 1, 2, 3, 4 and 5 in Sec. 18; NE¼, Lots 2, 3 and 4 in Sec. 19; NW¼, W½SW¼, Lots 2, 3, 4 and 5, Sec. 20, excepting however from said Lots 2 and 3 a tract of land described as follows: *Beginning* at Corner 1, a 7" x 7" x 36" Maple Post above ground, scribed US Cor. 1 placed in the north line of said Lot 2 and 17.71 chains east of the northwest corner thereof, thence East with the north line of said Lot 2, 7.69 chains to Corner 2, a 6" x 6" x 36" Maple Post above ground, scribed HD Cor. 2, thence South across small slough to high bank and with said high bank 26.00 chains to Corner 3, a 4" x 4" x 36" Maple Post above ground, scribed HD Cor. 2 placed on west bank of Crosby Slough just below junction with said small slough, thence West 7.69 chains to Corner 4, an 8" x 8" x 36" Maple Post above ground, scribed US Cor. 4, thence North parallel with east line 26.00 chains to Corner 1, the Place of *beginning;* and Lot 7 in Sec. 29.

*Wabasha County*

*Area number 4.*—All of the lands and waters lying and being in Township 109 N., Range 9 W., 5th P. M., described as follows: That part of the SE¼ Section 19 which is northeasterly of the right of way of the Chicago, Milwaukee, St. Paul and Pacific Railway; NE¼ and S½ Section 20; all fractional Sections 21, 22 and 27; all Section 28; those parts of Section 29, NE¼NE¼ Section 30, NE¼ Section 32, N½ Section 33, and N½ Section 34 which lie northeasterly of the C. M. St. P. and P. R. R.

*Crawford County*

*Area no. 5.*—All of the lands and waters lying in Township 10 N., Ranges 6 and 7 W., 4th P. M., which are enclosed by the following definite boundaries: Starting at the point in fractional Section 14, Township 10 N., Range 7 W., where Lafayette Slough enters the Mississippi River, thence southeasterly along the Mississippi River where it forms the southwesterly boundaries of Fractional Sections 14, 13 and 24, Township 10 N., Range 7 W., and the southerly boundaries of Lot 4 and a portion of Lot 3, both in fractional Section 19, Township 10 N., Range 6 W., to the junction of Capoli

Slough with the Mississippi River, thence along Capoli Slough where it forms the southeasterly and easterly boundaries of Lots 3 and 2, Sec. 19, Township 10 N., Range 6 W., and the easterly boundary of Lot 9, Sec. 18, Township 10 N., Range 6 W., to the junction of said Capoli Slough with Winneshiek Slough, thence northerly along Winneshiek Slough where it forms the easterly boundary of Lot 6, Sec. 18, Township 10 N., Range 6 W., to the junction of said Winneshiek Slough with Gordon Slough, thence along Gordon Slough in westerly, northwesterly, northerly and northwesterly directions, successively, through Sections 18 and 7, Township 10 N., Range 6 W., and Sections 12, 1 and 2 in Township 10 N., Range 7 W., to the point in Sec. 2, Township 10 N., Range 7 W., where said Gordon Slough forms a junction with Winneshiek Slough, thence westerly across Winneshiek Slough to its junction with Mink Cut, thence along Mink Cut in southwesterly and westerly directions to a point in Sec. 11, Township 10 N., Range 7 W., where said Mink Cut forms a junction with Swift Slough, thence along Swift Slough in southerly and southwesterly directions to its junction with Lafayette Slough, thence southward along Lafayette Slough to the place of *beginning*.

*Area number 6.*—All of the lands and waters lying in Township 10 N., Range 6 W., 4th P. M. which are enclosed by the following definite boundaries: Starting at the point where the south line of Sec. 33 intersects the east bank of the Mississippi River, thence east along the south lines of Secs. 33 and 34 and Lot 5, Sec. 35, to the point where the south line of said Lot 5 intersects the west bank of Winneshiek Slough, thence along Winneshiek Slough in a northwesterly direction through Secs. 35, 34, 27, 22 and 21 to the junction of Winneshiek Slough with Milton Slough, thence along Milton Slough in westerly, northwesterly, westerly, southwesterly and westerly directions, successively, where said slough intersects parts of Secs. 21, 16, 17 and 20, to the point where the west line of Sec. 20 intersects the south bank of Milton Slough, thence south along the west line of Sec. 20 to the point where the said west line intersects the north bank of Baptiste Slough, thence westerly along Baptiste Slough through a portion of fractional Sec. 19 to the junction of Baptiste Slough with the Mississippi River, thence along the Mississippi River in a southeasterly direction where it forms the southwesterly boundaries of Lot 8, Sec. 19, and of fractional sections 20, 29, 28, and 33, to the Place of *beginning*.

*Area no. 7.*—All of the lands and waters lying in Townships 6 and 7 N., Range 7 W., which are enclosed by the following definite boundaries: Starting at the point where the north line of Sec. 35, Township 7 N., Range 7 W., intersects the westerly bank of East Channel, thence along East Channel in a northwesterly direction to the point where the easterly boundary of Lot 4, Sec. 26, Township 7 N., Range 7 W. is intersected by the southerly boundary of the right of way of the toll bridge highway operated by the Prairie du Chien Bridge Company, thence along the southeasterly boundary of said highway right of way in a southwesterly direction across lots 4 and 5, Sec. 26, Township 7 N., Range 7 W., to the point where said southerly boundary of said right of way intersects the westerly boundary of said Lot 5, thence in a southerly direction along the westerly boundaries of said Lot 5, of Lots 3, 4, 5 and 6 of Sec. 35, Township 7 N., Range 7 W., and of Lot 1, Sec. 2, Township 6 N., Range 7 W., to the extreme southerly point of said Lot 1, thence in an easterly direction to the extreme southerly point of Lot 3 of said Sec. 2, thence along East Channel in a northeasterly direction where it forms the southeasterly boundaries of Lot 3 of said Sec. 2, and Lot 2, Sec. 1, Township 6 N., Range 7 W., and the easterly and northeasterly boundaries of Lots 3 and 4, Sec. 36, Lot 9, Sec. 35, and Lot 4, Sec. 26, Township 7 N., Range 7 W., to the place of *beginning*.

MINNESOTA-IOWA

*Houston County, Minnesota*

*Allamakee County, Iowa*

*Area number 8.*—All of the lands and waters lying in Townships 100 N. and 101 N., Ranges 3 and 4 W., 5th P. M., which are enclosed by the following definite boundaries: Starting at the point where the north line of Sec. 30, Township 101 N., Range 3 W., 5th P. M. intersects the westerly bank of the Mississippi River, thence West along the north line of said Sec. 30 to a meandered lake, thence around the northerly meandered boundary of said lake to the point of intersection of the northerly meander line of said lake with the east line of Sec. 25, Township 101 N., Range 4 W., thence North along the east line of said Sec. 25 to the northeast corner of said Sec. 25, thence West along the north line of said Sec. 25 to the northwest corner of Lot 7 of said Sec. 25, thence south along the west lines of said Lot 7, of the SE¼NE¼ and of Lot 8, all in said Sec. 25, to the point where the west line of said Lot 8 intersects the northerly meandered boundary of a meandered lake, thence around the westerly meandered boundary of said lake to the point where said meandered boundary is intersected by the south line of said Sec. 25, thence along the south line of said Sec. 25 to the southeast corner of said Sec. 25, thence along the west line of Sec. 31, Township 101 N., Range 3 W., 5th P. M. to the point of intersection of said west line with Minnesota Slough, thence following said Minnesota Slough in southeasterly and southerly directions through Section 31, Township 101 N., Range 3 W., and Sections 6, 7, and 18, Township 100 N., Range 3 W., to the point where the south line of Lot 2, Sec. 18, Township 100 N., Range 3 W., intersects the easterly bank of said Minnesota Slough, thence East along said south line to the southeast corner of said Lot 2, thence south along the west line of Lot 1 of said Sec. 18 to a slough, sometimes referred to as Ferry Slough, thence northeasterly, easterly and southeasterly along said Ferry Slough, where the same forms the southerly boundaries of said Lot 1, Sec. 18 and Lots 3, 5 and 6, Sec. 17 to the junction of said slough with the Mississippi River, thence northerly and northwesterly along the Mississippi River where it forms the easterly boundaries of fractional Sections 17, 8 and 5, Township 100 N., Range 3 W., and the easterly boundaries of fractional Sections 32, 29 and 30, Township 101 N., Range 3 W., to the place of *beginning*, excepting therefrom Lot 3, Sec. 32, Township 101 N., Range 3 W.

IOWA

*Allamakee County*

*Area number 9.*—All of the lands and waters lying in Township 98 N., Range 2 W., 5th P. M., which are enclosed by the following definite boundaries: Starting at the point where the north line of Sec. 28, Township 98 N., Range 2 W., 5th P. M. intersects the westerly bank of Crooked Slough, thence along Crooked Slough in a northwesterly direction to the extreme northerly point of fractional Sec. 21, where Crooked Slough forms a junction with Harpers Slough, thence along Harpers Slough in a southerly direction where it forms the westerly boundaries of said fractional Sec. 21, of Lots 5, 4, 3 and 2, successively, in Sec. 28, of Lot 4, Sec. 33, the northerly boundary of Lot 6, Sec. 33, the westerly boundaries of Lots 2 and 1, Sec. 32, and a part of the southerly boundary of Lot 7, Sec. 33, to the point where said Harpers Slough forms a junction with an unnamed slough opposite the southerly boundary of said Lot 7, thence along said unnamed slough in easterly, northerly, and northwesterly directions, successively, where it forms a part of the southerly boundary of said Lot 7, the southerly, easterly and northerly boundaries of Lot 9, Sec. 33, thence along said slough in a northeasterly direction where said slough separates Lots 3 and 10, Sec. 33, thence along said slough in southeasterly and easterly directions where said slough separates Lots 2 and 10, Sec. 33 and where said slough forms the southwesterly and southerly boundaries of Lot 1, Sec. 33 and the southerly and southeasterly boundaries of Lot 1, Sec. 34, to the junction of said slough with Crooked Slough, thence along Crooked Slough in northwesterly, northerly and northwesterly directions, successively, to the place of *beginning*.

*Area number 10.*—All of the lands and waters lying in Township 97 N., Range 2 W., 5th P. M., which are enclosed by the following definite boundaries: Starting at a point where the north line of Sec. 8, Township 97 N., Range 2 W., intersects the westerly bank of St. Paul Slough, thence following said Slough in northeasterly, easterly, southerly, northeasterly and northerly directions, successively, where it forms the boundary of Lot 7, Sec. 5, Township 97 N., Range 2 W., to its junction with Harpers Slough, thence following said Harpers Slough in westerly and southwesterly directions where it forms the northerly boundaries of Lots 7, 6, and 5, Sec. 5, Township 97 N., Range 2 W., and the westerly boundaries of Lot 5, Sec. 5; Lot 11, Sec. 8; Lots 2 and 1, Sec. 7; Lots 1, 2, and 8, Sec. 18; and Lot 5, Sec. 19, all in Township 97 N., Range 2 W., thence from the southerly point of said Lot 5, Sec. 19, to the northwest corner of Lot 4, Sec. 19, Township 97 N., Range 2 W., thence along the westerly boundary of said Lot 4 to the southwest corner thereof, thence following the slough in southerly, southeasterly, and easterly directions, successively, where it forms the westerly and southerly boundaries of Lot 9, Sec. 19, Township 97 N., Range 2 W., to the junction of said slough with McDonald Slough, thence easterly across McDonald Slough to its junction with the Mississippi River, thence in a northeasterly direction along the Mississippi River to its junction with St. Paul Slough, thence up St. Paul Slough in a general northerly direction to the place of *beginning*, excepting therefrom the following described parcel of land in Lots 3 and 4, Sec. 17, Township 97 N., Range 2 W.; *beginning* at Corner 1, a blazed birch tree, 14 inches in diameter on the bank of St. Paul Slough, near its mouth, and 16 rods south of the northeast corner of said Lot 3, The U. S. Principal Bench Mark #225, a 4 inch Iron Pipe, bears South 63 degrees 30 minutes East across the Mississippi River, the Frank Caya Cottage bears North two rods; thence West, 25 rods to Corner 2, a willow stake; thence North 7 degrees East 90 rods to Corner 3, a willow stake; Thence East, 25 rods to Corner 4, a blazed elm tree 38 inches in diameter on the west bank of St. Paul Slough; thence southwesterly, with the west bank of St. Paul Slough to the place of *beginning*, said exception containing fourteen (14) acres more or less.

*Jackson County*

*Area number 11.*—All of the lands and waters in Township 85 N., Range 5 E., 5th P. M. which are described as follows: That part of the E½NW¼ of Sec. 10 and that part of the E½ of Sec. 10 which lie northerly and easterly of the right of way of the C. M. St. P. R. R. as it is at present maintained and operated; the N½ of Sec. 11 and the N½SW¼ of Sec. 11; and the W½NW¼, SE¼NW¼, NW¼SE¼, and Lots 1 and 2 of Sec. 12.

*Area number 12.*—All of the lands and waters lying in Township 85 N., Range 6 E., 5th P. M., locally known as Railroad Island, and described as follows: Lots 1 and 2, Sec. 15; Lots 1, 2, and 3 and NE¼NE¼, Sec. 22; Lots 1, 2, 3, 4 and 5, SW¼NW¼, NW¼SW¼, E½SW¼, and W½SE¼, Sec. 23; Fractional Sec. 24, Lots 1 and 2, Sec. 25; Lots 1, 2, and 3, Sec. 26.

WISCONSIN

*Buffalo County*

*Area number 13.*—All of the lands and waters lying and being in Sections 6, 7, 16, 17, 18, 19, 20, 21, Township 22 N., Range 13 W., 4th P. M., Sections 1, 2, 3, 4, 10, 11, 12, 13, Township 22 N., Range 14 W., 4th P. M., and Sections 33, 34, 35, 36, Township 23 N., Range 14 W., 4th P. M., which are enclosed by the following definite boundaries: *Beginning* at the point of intersection of the Old Wabasha-Nelson Ferry Road with the tracks of the Chicago, Burlington & Quincy Railroad in the NW¼ Section 6, Township 22 N., Range 13 W.; thence southwesterly along the said ferry road to the slough known as Beef Slough in the NW¼ Section 12, Township 22 N., Range 14 W.; thence southeasterly along the main channel of the said Beef Slough to the Mississippi River in Section 21, Township 22 N., Range 13 W.; thence northwesterly along the Mississippi River to the Chippewa River; thence northerly along the Chippewa River to the C. B. & Q. Railway tracks in the SE¼ Section 33, Township 23 N., Range 14 W.; thence southeasterly along the said railroad tracks to the point of *beginning*; excepting therefrom the following described lands: S½NE¼, W½SE¼ Section 1; SW¼NW¼, N½SW¼ Section 2, Township 22 N., Range 14 W., 4th P. M., NW¼SW¼ Section 34, Township 23 N., Range 14 W.

*Area number 14.*—All of the lands and waters lying and being in Township 20 N., Range 12 W., 4th P. M., described as follows: Lots 9, 10, 11, and 12 in Section 7; Lots 5, 6, 7, 8, 10, 11, 12, 13, and E½SW¼ Section 18; Lots 2, 3, 4, and 5 Section 19; Lots 8, 9, and 10 Section 20; and Lot 2 Section 29, and all of the lands and waters lying and being in Township 20 N., Range 13 W., 4th P. M., described as follows: Lots 12, 13, and 14 Section 1; all fractional Sections 12, 13, and 24, the said lands and waters comprise the island known as Lost Island.

Hunting on private lands within the exterior boundaries of the said refuge is not affected by this order but is subject to such provisions of the State Laws and the Migratory Bird Treaty Act and the regulations thereunder as may apply.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

Dated, September 28, 1937.

## Farm Security Administration.

[Administration Order 41 (Rev. 1) (Suppl. 8) [1]]

LOANS TO INDIVIDUALS FOR RURAL REHABILITATION

SEPTEMBER 15, 1937.

1. Effective fifteen days from the date of this Supplement, paragraph 7c I of AO 41 (Rev. 1) is amended to read as follows:

"7c–I. Regional directors are authorized to delegate to assistant regional directors in charge of RR and/or to regional chiefs of Loan and Collections sections the authority granted to them in paragraphs 7a and b of this Order, except that the authority to approve loans exceeding one thousand dollars ($1,000) and not exceeding two thousand dollars ($2,000) is reserved to regional directors and may be delegated by them to assistant regional directors in charge of RR, or in the absence of the latter, to regional chiefs of Loan and Collections sections for stated periods covering such absences. Loans exceeding two thousand dollars ($2,000) and not exceeding five thousand dollars ($5,000) must be approved personally by the regional director or by an assistant regional director who has been properly designated in writing by the regional director to act for him during his temporary absence. (Such designee will sign documents with his own signature and will place under his name, 'For the Regional Director.') All loans exceeding five thousand dollars ($5,000) will be submitted to the Administrator for approval."

2. Effective fifteen days from the date of this Supplement, paragraph 7c II of AO 41 (Rev. 1) is amended to read as follows:

"7c–II. Regional directors may delegate to state RR directors, assistant state RR directors, and district and county RR supervisors, the authority specified in paragraph 7b I, III, IV, and V of this Order."

3. Effective fifteen days from the date of this Supplement, paragraph 7c III A of AO 41 (Rev. 1) is amended to read as follows:

"7c–III. A. When authority is delegated under this Order to an assistant regional director designated to act for the regional director, an assistant regional director in charge of RR and/or a regional chief of a Loan and Collections section, a signed copy of the delegation of authority will be made available to the regional FC manager."

[1] Supersedes AO 41 (Rev. 1) (Suppl. 1), 5/18/36; AO 176, paragraph 10a, 6/25/36. Amends AO 152, 6/9/36. This Supplement broadens the delegation of authority to approve loans and changes the amounts of the loans which may be approved by the authorized officials.

4. Recipients will check AO 41 (Rev. 1) to insure reference to this Supplement at the points mentioned above.

WILL W. ALEXANDER, *Administrator.*

Approved, September 15, 1937.

H. A. WALLACE,
*Secretary of Agriculture.*

## DEPARTMENT OF COMMERCE.

### Bureau of Marine Inspection and Navigation.

AMENDMENTS TO EXISTING REGULATIONS THAT ESTABLISH LOAD LINES FOR MERCHANT VESSELS OF 150 GROSS TONS OR OVER WHEN ENGAGED ON A FOREIGN VOYAGE BY SEA, A COASTWISE VOYAGE BY SEA, A GREAT LAKES VOYAGE

ESTABLISHMENT OF SUBDIVISION LOAD LINES ON CERTAIN PASSENGER VESSELS ENGAGED ON A VOYAGE BY SEA OR A VOYAGE ON THE GREAT LAKES

Pursuant to the authority granted to the Secretary of Commerce under Section 2 of the Load Line Act, 1929, (46 U. S. C. 85a) and in conformity with the International Load Line Convention, 1930, and under Section 2 of the Coastwise Load Line Act, 1935, amended June 20, 1936, (46 U. S. C. 88a) existing regulations for the establishment of load lines for merchant vessels of the United States of 150 gross tons or over when engaged in a foreign or coastwise voyage by sea (the Great Lakes excepted) and regulations for the establishment of load lines for merchant vessels of 150 gross tons and over when engaged in a voyage on the Great Lakes, subject to the provisions of the acts, supra, are hereby amended as set forth in Supplements 1, 2 and 3 appended hereto.

Pursuant to the authority granted to the Secretary of Commerce under Section 2 of the Coastwise Load Line Act, 1935, as amended June 20, 1936 (46 U. S. C. 88a), and Executive Order 7548, and in conformity with the International Convention for Safety of Life at Sea, 1929; regulations are hereby established and promulgated as set forth in Supplement 4 appended hereto for locating Subdivision Load Lines on passenger vessels subject to the provisions of the Coastwise Load Line Act, 1935, as amended June 20, 1936, and the International Convention for Safety at Sea, 1929, making Coastwise Voyages by Sea, Coastwise and Foreign Voyages on the Great Lakes, and Foreign Voyages by Sea.

[SEAL] DANIEL C. ROPER,
*Secretary of Commerce.*

Approved, September 28, 1937.

---

[*Supplement 1*—Section A]

AMENDMENTS TO THE PRESENT REGULATIONS FOR THE ESTABLISHMENT OF LOAD LINES FOR MERCHANT VESSELS OF 150 GROSS TONS OR OVER WHEN ENGAGED IN AN OCEAN VOYAGE

[Reference herein to page, paragraph, and line is to the 1935 edition of the Regulations for the Establishment of Load Lines for Merchant Vessels of 150 Gross Tons or Over When Engaged in a Foreign Voyage by Sea]

(*a*) On page 1, denote these regulations as "Section A."

(*b*) Delete the caption or title on page 1 and substitute the following caption: "Regulations for the Establishment of Load Lines for Merchant Vessels of 150 Gross Tons or Over When Engaged on a Foreign or Coastwise Voyage." (See Sections B and C for regulations relating to steam colliers, tugs, barges, self-propelled barges, and Great Lakes vessels.)

(*c*) In the first line of Paragraph 1, page 1, after the word "for", insert "(i)". To the last line add the following: "and for (ii) merchant vessels of 150 gross tons or over when engaged in a coastwise voyage by sea from one port or place in the United States or its possessions to another port or place in the United States or its possessions and passes outside the line dividing inland waters from the high seas as defined in Section 2 of the act of February 19, 1895, in conformity with the Coastwise Load Line Act of 1935, amended June 20, 1936, effective for vessels of 4,000 gross tons and over November 27, 1935, and for other vessels covered by the act, August 27, 1936."

(See section C for load line regulations applicable to the Great Lakes.)

(*d*) Paragraph 2. Delete this paragraph and the quoted act to conform with Federal Register Regulations.

(*e*) Renumber paragraphs to and including paragraph 20 (old), making such alterations to paragraph numbers in the text as is necessary to preserve existing reference.

(*f*) Change all references from "Bureau of Navigation and Steamboat Inspection" to "Bureau of Marine Inspection and Navigation."

(*g*) Paragraph 3 (old), fourth line, delete the words "and of". Add at the end of last line the following: "and Coastwise Load Line Act of 1935, as amended June 20, 1936."

(*h*) Paragraph 4 (old). Delete from the second line the following words: "on an international voyage." From the fifth line delete the following: "on an international voyage" and "after January 1, 1933."

Add to paragraph "(C) An existing ship—" the following subparagraph:

"(*c*) Where it is neither reasonable nor practicable to comply with these regulations in their entirety, the assigning authority will, in each case, report to the Bureau of Marine Inspection and Navigation the specific matters in which the vessel is deficient, together with such recommendations as may seem desirable. Upon receipt of this report the Bureau shall determine such addition to the freeboard as will, in the judgment of the Bureau, make the vessel as safe as if it had fully complied with the regulations."

(*i*) Paragraph 5a (old). Delete the following words from the seventh line: "when engaged on a foreign voyage." In paragraph 5b, delete the following from the fourth line: "on a foreign voyage." In paragraph 5c, delete the following from the sixth line: "foreign." In paragraph 5d delete the word "foreign" from the fourth line.

(*j*) Paragraph 7 (old). Delete the paragraph and substitute therefor a new paragraph as follows:

"6. Definition of new and existing ships—

"(*a*) For the purpose of marking and certification of load lines on the International form, a "new ship" is one whose keel was laid on or after July 1, 1932, all other ships being regarded as existing ships.

"(*b*) For the purpose of marking and certification of load lines on the Coastwise form, a "new ship" is one whose keel was laid—

"(i) if of 4,000 gross tons and over, on or after November 27, 1935;

"(ii) if less than 4,000 gross tons, on or after August 27, 1936;

"(iii) all other ships being regarded as existing ships.

(*k*) Paragraph 10 (old). In the second line, after the date "1929", add the following: "and August 27, 1935."

(*l*) Paragraph 17 (old). Add the following words to the title of the paragraph, "Renewal of certificates." In the fourth line, following the date "1929", add the following: "and August 27, 1935, as amended June 20, 1936." In the sixth and tenth lines, delete the words "four years" and substitute therefor the words "five years."

Delete the following Provision, beginning in the twelfth line: "*Provided,* That where in the judgment of the assigning authority an unusual hardship would be inflicted on the vessel were she to be detained for the survey required by these regulations, and provided further that the assigning authority is satisfied as to the condition of the vessel it may, in writing, excuse the vessel from the survey for a period not to exceed one year."

In the second subparagraph, ninth line, delete the word "four" and substitute therefor the word "five", and in the tenth line, delete the word "third" and substitute the word "fourth."

In the third subparagraph of paragraph 17, beginning with the third line, delete the following: "The Bureau of Navigation, and Steamboat Inspection, Department of Commerce, shall also be furnished with a copy of any deferment of the due survey, together with a statement of the circumstances in the case."

(m) Paragraph 18 (old). Delete the entire paragraph and substitute therefor the following:

"17. *Forms of load line certificates.*—The form of certificate certifying to the correctness of the load line mark assigned under these regulations shall be as shown in Appendix B, as follows:

"(*a*) International Load Line Certificate issued to United States vessels engaged in foreign voyages, applicable as stated:

A1 For general use.
A2 For sailing ships.
A3 General use combined with timber deck cargo.

"(*b*) For foreign vessels belonging to countries that have not ratified or acceded to the International Load Line Convention, 1930.

B For general use.

"(*c*) Coastwise Load Line Certificate issued to United States vessels engaged solely in coastwise voyages (other than Special Services provided for by Section B of the Load Line Regulations).

C1 For general use.
C2 For sailing ships.
C3 General use combined with timber deck cargo.

"The assigning authority may provide forms similar to the above, these forms to be approved by the Secretary of Commerce before being issued."

(*n*) Paragraph 20 (old). In the second line, following the date "1929", add the following: "and August 27, 1935, as amended."

(*o*) Paragraph 21 (old). Delete the entire paragraph and substitute therefor the following:

"20. *Log book entries.*—The master of a vessel subject to these regulations shall note in the vessel's log the data required by Section 6 of the Load Line Act of March 2, 1929, and the Coastwise Load Line Act, 1935, as amended; that is, before departing from her loading port or place, the position of the load line mark, port and starboard, as applicable to the voyage and the actual drafts of the vessel forward and aft at the time of departing from port as nearly as the same can be ascertained.

"21. *Control.*—The Collector of Customs may detain a vessel for survey if he has reason to believe that the vessel is proceeding on her voyage in excess of the draft allowed by the load line certificate, due regard being given to the season of the year; or has not been marked with load lines, or has not a valid load line certificate on board.

"Pursuant to the provisions of Section 5 of the Load Line Act of March 2, 1929, and the Coastwise Load Line Act, 1935, as amended, it is hereby certified that a vessel of a foreign country which has ratified the International Load Line Convention, 1930, shall be deemed a vessel of a foreign country as described in Sections 5 of the cited acts, and such a vessel shall be exempt from the provisions of these regulations in so far as the marking of the load lines and the certificating thereof are concerned, only so long as such country similarly recognizes the load lines established by these regulations, for the purpose of a voyage by sea: *Provided,* That the vessel is marked with load lines and has on board a valid load line certificate certifying to the correctness of the marks, the ship shall not be loaded beyond the limits allowed by the certificate, the position of the load line of the ship shall correspond with the certificate, the hull and superstructures shall not have been so materially altered as to affect the calculations on which the load line was based and alterations have not been made so that the protection of openings, guard rails, freeing ports, and means of access to crews' quarters have made the ship manifestly unfit to proceed to sea without danger to human life.

"As provided in Sections 7 of the Load Line Act of March 2, 1929, and the Coastwise Load Line Act, 1935, as amended, the Collector of Customs may, by written order, detain provisionally a foreign vessel for survey should he have reason to believe that such vessel is submerged below the marks allowed by the certificate, or that such vessel is not marked and certificated as provided herein. If a foreign vessel is detained for these reasons the Collector of Customs will immediately arrange for a survey as contemplated by Sections 7 of such acts.

"Should it become necessary for the Collector of Customs to survey a vessel in respect to her load line as provided by Sections 7 of the Load Line Act of March 2, 1929, or the Coastwise Load Line Act, 1935, as amended, the Collector shall, wherever practicable, appoint at least one of the three surveyors required by the act from the surveying staff of the American Bureau of Shipping.

"Should action be taken that would appear likely to result in legal proceedings being taken against a foreign ship, or should the ship be detained, the Consul of the country to which the ship belongs shall be informed as soon as possible of the circumstances of the case."

(*p*) Rule 4. In the subparagraph beginning with the title "Fresh-water load lines," add at the end of the paragraph, after the letters "TF", the following: "This provision for deeper loading in fresh water is not applicable to the Great Lakes."

Delete the last paragraph of Rule 4, beginning with the words, "Where a minimum freeboard" and ending with the words, "as provided in rule 4," and substitute the following paragraph:

"Where the draft is restricted on a basis of subdivision or stability and this draft is less than any of the various seasonal drafts permitted by these regulations the center of the disk shall be located on the line of this restricted draft and it shall be applicable to all zones and seasons. If such a permissible maximum draft comes between the seasonal markings, the seasonal markings below shall also be added. A fresh-water load line may be marked forward of the disk as provided in this rule."

(*q*) To Part 3, add the following as a third paragraph: "*Passenger vessels—Subdivision and stability load lines.*—Where in passenger vessels the position of the maximum load lines are determined by the application of subdivision and stability regulations as provided in Section D pertaining to passenger vessels in the ocean and coastwise trades, the provisions of the regulations herein shall also be effective in so far as they are applicable."

(*r*) Part 8. From the first paragraph, fourth line, delete the following: "on a foreign voyage."

(*s*) Part 9. Under the general heading "Summer Zones", paragraph (6), add as a sentence at the end of subparagraph (a), immediately following the words "south of lat. 11° S," the following: "Mackay is to be considered as being on the boundary of the 'seasonal tropical' and the 'summer' zones."

(*t*) Appendix B. Delete the forms of load line certificates shown and substitute the following forms:

APPENDIX B. (TO SECTION A)

*Forms of Load Line Certificates*

[Form A 1]

INTERNATIONAL LOAD LINE CERTIFICATE

Issued under the authority of the United States of America, Department of Commerce under the provisions of the International Load Line Convention, 1930

[SEAL]

Issued by _____
Certificate No. _____
Name of Ship _____ Official Number _____
Port of Registry _____ Gross Tonnage _____

| *Freeboard from Deck Line* | | *Load Line* |
|---|---|---|
| Tropical | (T) | Above (S) |
| Summer | (S) | Upper edge of line through center of disk. |
| Winter | (W) | Below (S) |
| Winter (North Atlantic) | (WNA) | Below (S) |
| *Allowance for fresh water for all freeboards | | |

(All measurements are to upper edges of the respective horizontal lines)

The upper edge of the deck line from which these freeboards are measured is ____ inches above the top of the ____ deck at side.

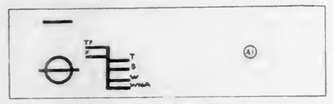

FIGURE A–1.

This is to certify that this ship has been surveyed and the freeboards and load lines shown above have been assigned in accordance with the Convention.

**This certificate remains in force until _____
Issued at _____ on the _____ day of _____, 19____.

(Here follows the signature or seal and description of the assigning authority.)

NOTE.—In accordance with the Load Line Regulations, the disk and lines must be permanently marked by center punch marks or cutting. Letters indicating the assigning authority are to be marked alongside the disk and above the center line. Periodic inspections are to be made at intervals of approximately twelve months.

*Where seagoing steamers navigate a river or inland water, deeper loading is permitted corresponding to the weight of fuel, etc., required for consumption between the point of departure and the open sea.

**At the expiration of this certificate, renewal should be obtained in accordance with the Load Line Regulations and if upon examination the ship is found to be in a satisfactory condition, this certificate will be extended and so indorsed on the reverse side.

(On the reverse side of the load line certificate, or on a separate sheet attached and forming part of the certificate, provision is to be made for annual inspection and renewal endorsements.)

(Reverse side of certificate)

*Annual Inspections*

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

*Renewal of Load Line Certificate*

The provisions of the Convention being fully complied with by this ship, this certificate is renewed until _____, 19____.
Place _____
Date _____

Assigning Authority
By _____
(Surveyor)

*Annual Inspections*

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

*Notes*

[1] The Winter North Atlantic Load Line applies for voyages across the North Atlantic Ocean north of latitude 36° N., during the winter months as defined by the Load Line Regulations. The periods during which the other seasonal load lines apply in different parts of the world are as stated in the Load Line Regulations.

[2] This Load Line Certificate will be canceled by the Department of Commerce if—

(a) The periodic inspections have not been carried out.
(b) Material alterations have been made to the hull or superstructures which would affect the calculations determining the position of the load lines.
(c) The fittings and appliances for the protection of the openings, guard rails, freeing ports, or the means of access to the crew's quarters have not been maintained in as effective a condition as they were when the Certificate was issued.

[3] When this Certificate has expired or been canceled, it must be delivered to the Assigning Authority.

APPENDIX B (TO SECTION A)

[Form A 2]

INTERNATIONAL LOAD LINE CERTIFICATE

Issued under the authority of the United States of America, Department of Commerce under the provisions of the International Load Line Convention, 1930.

[SEAL]
Issued by _____
Certificate No. _____
Name of Ship _____ Official No. _____
Port of Registry _____ Gross Tonnage _____

| *Freeboard from deck line* | | *Load Line* |
|---|---|---|
| Tropical, Summer, Winter | | Upper edge of line through center of disk. |
| Winter—North Atlantic | (WNA) | (Below) Upper edge of line through center of disk. |

Allowance for fresh water for all freeboards_____
(All measurements are to upper edges of the respective horizontal lines)

The upper edge of the deck line from which these freeboards are measured is _____ inches above the top of the _____ back at side.

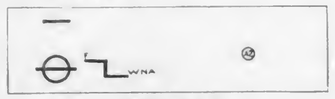

Figure A–2

This is to certify that this ship has been surveyed and the freeboards and load lines shown above have been assigned in accordance with the Convention.

*This certificate remains in force until_____
Issued at_____ on the_____day of_____, 19____

(Here follows the signature or seal and description of the assigning authority.)

NOTE.—In accordance with the Load Line Regulations, the disk and lines must be permanently marked by center punch marks or cutting. Letters indicating the assigning authority are to be marked alongside the disk and above the center line. Periodic inspections are to be made at intervals of approximately twelve months.

*At the expiration of this certificate, renewal should be obtained in accordance with the Load Line Regulations and if upon examination the ship is found to be in a satisfactory condition, this certificate will be extended and so indorsed on the reverse side.

(On the reverse side of the load line certificate, or on a separate sheet attached and forming part of the certificate, provision is to be made for annual inspection and renewal endorsements.)

(Reverse side of Certificate)

*Annual Inspections*

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

_____ _____ _____
(Signature of Surveyor) (Place) (Date)

I have surveyed this ship for the purpose of seeing whether this certificate should remain in force and the survey has been completed to my satisfaction.

(Signature of Surveyor) (Place) (Date)

*Notes*

[1] The Winter North Atlantic Load Line applies for voyages across the North Atlantic Ocean north of latitude 36° N., during the winter months as defined by the Load Line Regulations.

[2] This load line Certificate will be canceled by the Department of Commerce if—

(a) The periodic inspections have not been carried out.
(b) Material alterations have been made to the hull or superstructures which would affect the calculations determining the position of the load lines.
(c) The fittings and appliances for the protection of the openings, guard rails, freeing ports, or the means of access to the crew's quarters have not been maintained in as effective a condition as they were when the Certificate was issued.

[3] When this Certificate has expired or been canceled, it must be delivered to the Assigning Authority.

[Supplement 2—Section B]

REGULATIONS FOR THE VARIANCE OF LOAD LINES FOR STEAM COLLIERS, TUGS, BARGES, AND SELF-PROPELLED BARGES OF 150 GROSS TONS AND OVER WHEN ENGAGED IN SPECIAL SERVICES ON COASTWISE AND INTER-ISLAND VOYAGES

Pursuant to the Coastwise Load Line Act, 1935, as amended June 20, 1936, vesting the Secretary of Commerce with discretion to vary the load line marks from those established by the International Load Line Treaty, 1930, on steam colliers, tugs, barges, and self-propelled barges engaged in special services on inter-island voyages and on coastwise voyages from port to port in the continental United States, the following regulations are hereby established.

ADMINISTRATION

The administrative provisions of Section A, Part 1, of the load line regulations relating to vessels engaged in foreign and coastwise voyages, where applicable, shall apply to vessels subject to Section B except as modified below:

(*a*) Application for the assignment of load lines under Section B for the above classes of vessels shall be made to the Bureau of Marine Inspection and Navigation, stating:

(*a*) Name of vessel and official number
(*b*) Type of vessel (steam collier, tug, barge, or self-propelled barge)
(*c*) Date keel was laid
(*d*) Normal sea speed of vessel
(*e*) Limits of voyage for which approval is requested
(*f*) Normal maximum distance off shore in course of voyage
(*g*) Length of voyage in days and nautical miles
(*h*) Statement of weather conditions to be expected
(*i*) Cargo to be carried.

(*b*) Whenever the Secretary of Commerce shall find that the position of the load line for the classes of vessels above stated may be safely varied from the position fixed by the International Load Line Treaty, 1930, and that any such change will not locate the load line above the actual line of safety, he may approve load lines, as determined by Section B of these regulations, for steam colliers, tugs, barges, and self-propelled barges (separately by class) to be applicable between two specific ports of the continental United States and the intermediate continental United States ports between these limits or between the islands of a group over which the United States has jurisdiction. The marking of such load lines and the certification thereof shall be in accordance with Section B and the Load Line Certificate shall define the limits of the voyage for which the load lines are valid.

(*c*) The use of the special service load line certificate issued under Section B is limited to voyages only as described in the certificate. If the vessel engages on any voyage not contemplated by the certificate where a load line is required, the load line prescribed by Section A shall govern.

(*d*) Vessels engaged on special services in the coastwise trade and the inter-island trade will be certificated on the form shown in Appendix A of Section B.

(*e*) A new ship marked with load lines for special service on a coastwise or inter-island voyage is a ship whose keel was laid on or after September 28, 1937. An existing vessel is one whose keel was laid before that date.

RULES OF ASSIGNMENT

RULE 1. The load line regulations in this section are complementary to those in Section A or Section C (Great Lakes Load Line Regulations), as reference is made thereto.

RULE 2. *Definitions.*—

(*a*) *A steam collier* is a vessel mechanically propelled and specially designed for the carriage of coal in bulk.

(*b*) *A tug* is a vessel specially designed for towing vessels or floating equipment.

(*c*) *A towed barge* is a vessel without sufficient means for self-propulsion and which requires to be towed.

(*d*) *A self-propelled barge* is a vessel mechanically propelled of the type specially designed for use in limited coastwise and Great Lakes service and capable of transiting inter-connecting canals.

RULE 3. *Load Line Markings.*—The load line marks on the ship's sides are to be in accordance with Section A, Rule 4, Figure 1. Seasonal markings such as "Winter North Atlantic" which are not applicable to the voyage will be omitted.

In the case of vessels which engage in special services on coastwise voyages and voyages on the Great Lakes, the marks on the ship's sides are to be in accordance with Figure B–1 shown below. The load lines aft of the combined disk and diamond will be applicable for voyages on the Great Lakes and those on the forward side will be applicable to limited coastwise voyages. The summer line on the ocean will correspond to the summer line on the Lakes and the winter line on the ocean will correspond to the intermediate line on the Lakes.

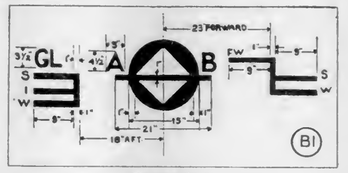

FIGURE B–1

In the case of vessels which operate both on special service coastwise voyages and on unlimited coastwise voyages,

the marks on the ship's sides are to be in accordance with Figure B–2 shown below. The load lines aft of the disk will be applicable to voyages in special service coastwise or inter-island voyages and those on the forward side will be applicable to unlimited coastwise voyages. (A vessel marked for both special service and unlimited coastwise voyages and furnished with a load line certificate on the International form shall, when entering the foreign trade, arrange that the load line markings are in accord with the vessel's International Load Line Certificate by the elimination of the marks aft of the disk.)

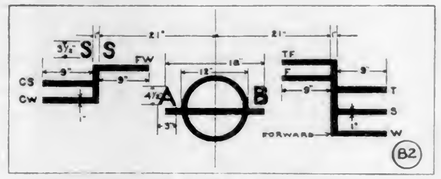

FIGURE B–2.

RULE 4. *Existing vessels.*—In assigning load lines to an existing vessel the provisions of these regulations shall be complied with in principle and detail in so far as is reasonable and practicable, having regard to the proven efficacy of existing arrangements for a special service voyage, and having particular regard to the provision of sufficient means for the protection and safety of the crew.

Where it is neither reasonable nor practicable to comply with these regulations in their entirety, the assigning authority will, in each case, report to the Bureau of Marine Inspection and Navigation the specific matters in which the vessel is deficient with such recommendations as may seem desirable. Upon the receipt of this report the Bureau shall determine such addition to the freeboard as will, in the judgment of the Bureau, make the vessel as safe as if it had fully complied with the regulations.

RULE 5. *Conditions of assignment.*—

(*a*) *Steam colliers.*—The conditions of assignment for steam colliers shall be in accordance with the requirements of Section A, Part 3, and also with the supplementary requirements of Part 7, in cases where a tanker freeboard is assigned.

(*b*) *Tugs.*—The conditions of assignment for tugs shall be in accordance with the provisions of Section C, Part 3, and in addition port lights in exposed casings leading to spaces below the freeboard deck shall be fitted with dead lights.

(*c*) *Towed barges.*—The conditions of assignment for towed cargo barges where the cargo is carried under deck shall be in accordance with Section C, Part 3. In the case of tank barges and cargo barges carrying cargo only on deck, compliance will also be required with the supplementary conditions of Section C, Part 5. In the case of towed cargo barges of the open type, the construction of the vessel must be such as to satisfy the assigning authority that no unusual hazards will be experienced.

(*d*) *Self-propelled barges.*—The conditions of assignment for self-propelled cargo barges carrying cargo under decks shall be in accordance with the provisions of Section C, Part 3. In the case of self-propelled tank barges and self-propelled cargo barges carrying cargo only on deck, compliance will also be required with the supplementary conditions of Section C, Part 5.

RULE 6. *Freeboards.*—When the assigning authority is satisfied that the requirements of these regulations as applicable to the type of vessel under consideration are complied with the freeboards will be computed as follows:

(*a*) *Steam colliers.*—Steam colliers that have constructional features similar to those of a tanker which afford extra invulnerability against the sea may be assigned a reduction of freeboard from that determined under Section A, Part 4. The amount of such reduction shall be determined by the assigning authority, with the approval of the Bureau of Marine Inspection and Navigation, in relation to the freeboard assigned to tankers, having regard to the degree of compliance with the supplementary conditions of assignment laid down for these ships, but without regard to the degree of subdivision provided. The freeboard assigned to such a vessel shall in no case be less than would be assigned the vessel as a tanker, as determined by Section A, Part 7.

(*b*) *Tugs.*—The freeboard is to be computed in accordance with Section C, Part 4. The fresh water and seasonal markings where applicable are to be the same as determined from Section A, Part 4.

(*c*) *Towed cargo barges with cargo under deck.*—The freeboard is to be computed under Section C, Part 4. The fresh water and seasonal markings where applicable are to be determined from Section A, Part 4.

(*d*) *Towed cargo barges with cargo only on deck.*—The freeboard for barges of this type is to be computed in accordance with the requirements of Section C, Part 5. The fresh water and seasonal markings, where applicable, are to be the same as determined from Section A, Part 4.

(*e*) *Towed cargo barges of the open type.*—The load line will be placed where, in the judgment of the assigning authority, with the approval of the Bureau of Marine Inspection and Navigation, the draft will be such that no unusual hazard will be experienced.

(*f*) *Towed tank barges.*—The freeboard is to be computed in accordance with Section C, Part 5. The fresh water and seasonal markings where applicable are to be determined from Section A, Part 4.

(*g*) *Self-propelled cargo barges.*—The freeboard is to be computed under Section C, Part 4. The fresh water and seasonal markings where applicable are to be determined from Section A, Part 4.

(*h*) *Self-propelled tank barges.*—The freeboard is to be computed in accordance with Section C, Part 5. The fresh water and seasonal markings where applicable are to be determined from Section A, Part 4.

RULE 7. The load line certificates for a special service coastwise or special service inter-island voyage are to be on the forms shown in Appendix A.

APPENDIX A (TO SECTION B)

LOAD LINE CERTIFICATE FOR A SPECIAL SERVICE COASTWISE OR INTER-ISLAND VOYAGE

Issued under the authority of the Department of Commerce, United States of America, under the provisions of the Coastwise Load Line Act of August 27, 1935, as amended June 20, 1936.

[SEAL]

Issued by _____

Certificate No. _____

This certificate is valid only for coastwise or inter-island voyages that are between the limits of _____ and _____ provided the vessel is engaged solely in the trade stated herein.

Ship _____ Official No. _____

Port of Registry _____ Trade of vessel _____

Gross Tonnage _____

| *Freeboard from Deck Line* | | *Load Line* |
|---|---|---|
| Tropical _____ | (T) | _____ Above (S) |
| Summer _____ | (S) | Upper edge of line through center of disk |
| Winter _____ | (W) | _____ Below (S) |

*Allowance for fresh water for all freeboards (except on the Great Lakes) _____.

The upper edge of the deck line from which these freeboards are measured is _____ inches above the top of the _____ deck at side.

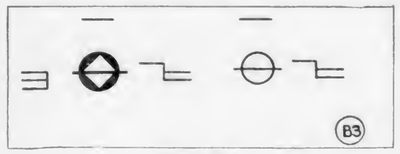

FIGURE B–3.

This is to certify that this ship has been surveyed and the freeboards and load lines shown above have been found to be correctly marked upon the vessel in manner and location as provided by the Load Line Regulations of the Department of Commerce applicable to vessels engaged on this special service voyage.

**This certificate remains in force until _____

Issued at _____ on the _____ day of _____, 19____.

(Here follows the signature or seal and description of the assigning authority.)

NOTE.—In accordance with the Load Line Regulations the disc or diamond and the lines must be permanently marked by center punch marks or cutting.

*Where seagoing steamers navigate a river or inland water, deeper loading is permitted corresponding to the weight of fuel, etc., required for consumption between the point of departure and the open sea.

**Upon the expiration of the certificate renewal must be obtained as provided by the Load Line Regulations and the certificate so endorsed. Endorsement should also be made in the spaces provided on the occasion of each annual inspection required by the Load Line Regulations.

(On the reverse side of the load line certificate, the provision for annual inspection endorsement and for renewal of the certificate is to be the same as for vessels engaged in the foreign trade.)

[Supplement 3—Section C]

AMENDMENTS TO THE PRESENT "REGULATIONS FOR THE ESTABLISHMENT OF LOAD LINES FOR MERCHANT VESSELS OF 150 GROSS TONS OR OVER WHEN ENGAGED IN A VOYAGE ON THE GREAT LAKES"

[Reference herein to page, paragraph, and line is to the 1936 edition of the Regulations for the Establishment of Load Lines for Merchant Vessels of 150 Gross Tons or Over When Engaged in a Voyage on the Great Lakes]

(*a*) Denote these regulations as a "Section C."

(*b*) In paragraph 1, after the date "1935" in the third line, add the following: "Amended June 20, 1936."

(*c*) To paragraph 2, add at the end, the words, "as amended by the Act of June 20, 1936."

(*d*) In paragraph 3 (D) (b), beginning in the fourth line, delete the words in parentheses, as follows: "(where openings to spaces below the freeboard deck are located within houses or erections that are not protected by class 1 closing appliances, steel coamings and covers are fitted to the openings, air ports below the freeboard and forecastle decks are provided with dead covers, windows in deck houses are provided with strong shutters, and scuppers and discharges from spaces below the freeboard deck are fitted with flap valves and in addition a stop valve capable of being operated from a position always accessible)."

Delete the last subparagraph under paragraph 3, beginning with the words, "Where it is neither practical nor reasonable to comply * * *," and substitute therefor the following paragraph:

"Where it is neither reasonable nor practicable to comply with these regulations in their entirety, the assigning authority will, in each case, report to the Bureau of Marine Inspection and Navigation the specific matters in which the vessel is deficient with such recommendations as seem desirable. Upon the receipt of this report the Bureau shall determine such addition to the freeboard as will, in the judgment of the Bureau, make the vessel as safe as if it had fully complied with the regulations."

(*e*) In Paragraph 13, delete the title and substitute the following: "Validity of certificates—Renewal of certificates."

In the sixth and tenth lines, delete the word "five" and substitute the word "six" in each case. Beginning in the twelfth line, delete from paragraph 13 the following words: "provided, that where in the judgment of the assigning authority an unusual hardship would be inflicted on the vessel were she to be detained for the survey required by these regulations, and provided further that the assigning authority is satisfied as to the condition of the vessel it may, in writing, excuse the vessel from the survey for a period not to exceed one year." In the second subparagraph, beginning in the third line, delete the following: "The Bureau of Marine Inspection and Navigation, Department of Commerce, shall also be furnished with a copy of any deferment of the due survey, together with a statement of the circumstances in the case."

(*f*) From paragraph 16, the third line of the second subparagraph, delete the following words: "Or under the United States Ocean Coastwise Regulations."

(*g*) Delete the heading "Control" from paragraph 17 and substitute the words "Log book entries" as a heading, making the first subparagraph subject thereto.

(*h*) Between the first and second subparagraphs of paragraph 17 (old), insert the heading, "18. Control," making the remainder of paragraph 17 (old) subject thereto.

(*i*) Renumber paragraph 18 (old), making it paragraph 19.

(*j*) Add the following to Part 2, Rule 1, as a continuation of the last subparagraph: "Except steel tank barges especially constructed for the carriage of liquids in bulk and steel cargo barges having only small access hatches in the freeboard deck, the load lines for which may be calculated under Part 5."

(*k*) From Part 2, Rule 4, delete the paragraph immediately following the paragraph entitled "Winter Load Line", as follows:

"Where the vessel has been constructed to have a maximum draft and such draft is less than any of the various seasonal drafts permitted by these regulations, the center of the diamond shall be located on the line of this maximum draft and shall be applicable to all seasons. If such maximum draft comes between the seasonal markings, the seasonal markings below shall be applicable."

and substitute therefor the following:

"Where the draft is restricted on a basis of subdivision or stability and this draft is less than any of the various seasonal drafts permitted by these regulations the center of the diamond shall be located on the line of this restricted draft and it shall be applicable to all seasons. If such a permissible maximum draft comes between the seasonal markings, the seasonal markings below shall also be added."

(*l*) In Part 3, delete the text of the third subparagraph headed "Subdivision and stability load lines" and substitute therefor the following:

"*Passenger vessels—Subdivision and stability load lines.*—Where in passenger vessels the position of the maximum load lines are determined by the application of subdivision and stability regulations as provided in Section D pertaining to passenger vessels on the Great Lakes, the provisions of the regulations herein shall also be effective in so far as they are applicable."

(*m*) Delete from Part 3 all of Rule 10 and substitute therefor the following:

"(*a*) On bulk freighters over 350 feet in length steel hatch covers are to be fitted to all exposed hatchways on the freeboard deck and they are to be of such thickness and provided with such stiffening as will enable them to be handled without deformation.

"(*b*) Solid covers are to have stiffeners spaced not over 42 inches apart. The plating is to be not less than .24" at 24-inch spacing and .36" at 42-inch spacing with intermediate thicknesses at intermediate spacings. The stiffeners are not to be less effective than provided by angles, bulb angles or channels riveted or welded to the plate and having a section modulus in inches cubed not less than given by the formula:

$I/y = S \times L^2 \times 0.025$ where—

$S$ = spacing of stiffeners in feet.
$L$ = length in feet of the unsupported spans.
$I$ = moment of inertia of the section.
$y$ = distance from center of gravity of the section to the outermost strain fiber.

"(*c*) Covers of the sliding plate type with flanges on one edge or with stiffeners riveted or welded to one edge shall have a sufficient number of sections so that when closed the spacing of the stiffeners does not exceed 42 inches. Plates are not to be less in thickness than required for solid steel covers in association with the spacing of the stiffeners when closed. The stiffening at the edge of the covers is not to be less effective than required above for solid covers. If hatch covers of the sliding plate type are used for spans exceeding

12'–1", additional support must be provided, the details of which will be specially considered.

"(*d*) Where wood hatch covers are used they are to be made of long leaf yellow pine or fir and the finished thickness is not to be less than 2½ inches in association with a span of 6 feet. The width of each bearing surface is to be at least 2½ inches."

(*n*) Delete from Part 3 all of Rule 11 and substitute therefor the following:

"RULE 11. *Hatchway beams.*—Hatchways having wood covers are to be fitted with a system of main beams all extending in one direction or a system of main beams in association with auxiliary beams across the top of the main beams so arranged that the unsupported spans of the covers do not exceed 6' except where specially approved. The main beams may be of solid, rolled or built shapes and the auxiliary beams may be either rolled shapes or timber of rectangular section. They are to have a section modulus in inches cubed of not less than given by the formula

$$I/y = S \times L^2 \times C$$

where:

$S$ = the breadth of the area supported in feet.
$L$ = the length of the unsupported spans in feet.
$C$ = 0.03 for steel main beams where 18″ coamings are required.
$C$ = 0.025 for steel auxiliary beams where 18″ coamings are required.
$C$ = 0.025 for steel main beams where 12″ coamings are required.
$C$ = 0.02 for steel auxiliary beams where 12″ coamings are required.
$C$ = 0.15 for wood auxiliary beams where 18″ coamings are required.
$C$ = 0.12 for wood auxiliary beams where 12″ coamings are required.
$I$ = moment of inertia of the section.
$y$ = distance from center of gravity of the section to the outermost strain fiber.

"Where rolled section beams are used the top flanges and the top angles in the case of built beams are to extend for the full length of the beams. Where wood auxiliary beams are used they are to be steel shod at all points where they bear on the main beams and at the ends."

(*o*) To Part 4, Rule 36, add to the last subparagraph, after the figure "0.68", the following: "nor more than 0.86."

(*p*) In Part 4, Rule 37, beginning with the third line of the subparagraph next to the last on page 18, delete "10 and 13.5, both inclusive" and substitute in its place the following: "10 and 19, both inclusive."

(*q*) From Part 4, delete Table 3 entitled "Exposed bulkheads of superstructures of standard height" and substitute the following table in its stead:

TABLE 1.—*Exposed bulkheads of superstructures of standard height*

| Bridge front bulkheads, unprotected bulkheads of poops 0.4L or more in length | | Bulkheads of poops partially protected or less in length than 0.4L | | After bulkheads of bridges and forecastles | |
|---|---|---|---|---|---|
| Length of ship (feet) | Bulb angle stiffeners (inches) | Length of ship (feet) | Plain angle stiffeners (inches) | Length of ship (feet) | Plain angle stiffeners (inches) |
| Under 160 | 5½ x 3 x 0.32 | Under 150 | 3 x 2½ x 9/16 | Under 150 | 2½ x 2¼ x ¼. |
| 160 | 6 x 3 x 0.34 | 150 | 3½ x 2½ x 9/16 | 150 | 3½ x 2½ x 5/16. |
| 200 | 7 x 3 x 0.32 | 200 | 4 x 3 x 5/16 | 250 | 3½ x 3 x 5/16. |
| 240 | 7 x 3 x 0.38 | 250 | 5 x 3 x 5/16 | 350 and above | 4 x 3 x 5/16. |
| 280 | 7 x 3 x 0.44 | 300 | 5 x 3 x 3/8 | | |
| 320 | 8 x 3 x 0.40 | 350 | 6 x 3½ x 3/8 | | |
| 360 | 8 x 3 x 0.46 | 400 | 6 x 3½ x 7/16 | | |
| 400 | 9 x 3½ x 0.38 | 450 | 7 x 3½ x 7/16 | | |
| 440 | 9 x 3½ x 0.50 | 500 and above | 7 x 3½ x ½ | | |
| 480 | 10 x 3½ x 0.40 | | | | |
| 520 | 10 x 3½ x 0.52 | | | | |
| 560 and above | 10 x 3½ x 0.64 | | | | |

| Length of ship (feet) | Bulkhead plating (inch) | Length of ship (feet) | Bulkhead plating (inch) | Length of ship (feet) | Bulkhead plating (inch) |
|---|---|---|---|---|---|
| 200 and under | 0.3 | 160 and under | 0.24 | 160 and under | 0.20 |
| 380 and above | 0.44 | 400 and above | 0.38 | 400 and above | 0.30 |

NOTE.—For ships intermediate in length the thickness of bulkhead plating are obtained by interpolation.

(*r*) In Part 4, Rule 42 entitled "Superstructure bulkheads," change the reference in the sixth line from "Table 3" and substitute "Table 1."

(*s*) Add to Part 4, Rule 51 (c), the following sentence: "On tank barges an efficient life line may be accepted in lieu of guard rails."

(*t*) Delete that part of the freeboard table for steamers, Part 4, Rule 64, from 80 ft. length to and including 330 ft. and substitute the following freeboards:

| L | Freeboard (inches) | L | Freeboard (inches) |
|---|---|---|---|
| 80 feet | 7.2 | 210 feet | 23.0 |
| 90 feet | 8.0 | 220 feet | 24.6 |
| 100 feet | 8.9 | 230 feet | 26.3 |
| 110 feet | 9.9 | 240 feet | 28.1 |
| 120 feet | 11.0 | 250 feet | 29.9 |
| 130 feet | 12.1 | 260 feet | 31.8 |
| 140 feet | 13.3 | 270 feet | 33.8 |
| 150 feet | 14.5 | 280 feet | 35.8 |
| 160 feet | 15.7 | 290 feet | 37.8 |
| 170 feet | 17.1 | 300 feet | 40.0 |
| 180 feet | 18.5 | 310 feet | 42.2 |
| 190 feet | 19.9 | 320 feet | 44.6 |
| 200 feet | 21.4 | 330 feet | 47.0 |

Delete footnote I and renumber the three remaining footnotes I, II, and III, respectively.

(*u*) Delete from Part 4, Rule 59, the first seven words, as follows: "In flush deck ships and in ships."

(*v*) To part 5, Rule 67, add the following as the second paragraph: "A forecastle is not required in the case of self-propelled barges, tank barges, and cargo barges carrying cargo only on deck."

(*w*) In Part 5, Rule 68, change the period (.) to a comma (,) after the word "strength" in the fourth line, and add the following: "these conditions may be modified in the case of self-propelled barges." Also add the following as a sentence at the end of Rule 68: "Engine room skylights are to be of substantial construction, fitted with strong glass lights, which may be required to be fitted with steel covers depending on their height above the freeboard deck."

(*x*) In Part 5, add as a second paragraph to Rule 69: "On towed tank barges a wire cable arranged and equipped to facilitate safe communication between both ends of the vessel at all times may be accepted in lieu of a permanent gangway."

(*y*) In Part 5, add the following as a sentence at the end of Rule 70: "Deck houses for the accommodation of the crew, pilot houses, etc., on the freeboard deck are to be of steel efficiently constructed and provided with port lights fitted with steel dead lights."

(*z*) In Part 5, Rule 78, delete that part of the table from 190 feet length to and including 340 feet length and substitute the following freeboards:

RULE 78.—*Freeboard table for tankers*

| L | Freeboard (inches) | L | Freeboard (inches) |
|---|---|---|---|
| 80 feet | 6.4 | 220 feet | 22.8 |
| 90 feet | 7.2 | 230 feet | 24.3 |
| 100 feet | 8.1 | 240 feet | 25.9 |
| 110 feet | 9.1 | 250 feet | 27.5 |
| 120 feet | 10.1 | 260 feet | 29.2 |
| 130 feet | 11.1 | 270 feet | 30.9 |
| 140 feet | 12.2 | 280 feet | 32.7 |
| 150 feet | 13.3 | 290 feet | 34.5 |
| 160 feet | 14.5 | 300 feet | 36.4 |
| 170 feet | 15.8 | 310 feet | 38.3 |
| 180 feet | 17.1 | 320 feet | 40.2 |
| 190 feet | 18.5 | 330 feet | 42.2 |
| 200 feet | 19.9 | 340 feet | 44.3 |
| 210 feet | 21.3 | | |

[Supplement 4—Section D]

REGULATIONS FOR THE ESTABLISHMENT OF SUBDIVISION LOAD LINES ON PASSENGER VESSELS ENGAGED IN (I) AN INTERNATIONAL VOYAGE (II) A COASTWISE VOYAGE (OTHER THAN THE GREAT LAKES) OR (III) A GREAT LAKES VOYAGE

Part 1. Administration.
Part 2. Rules for foreign and coastwise voyages (Great Lakes excepted).
Part 3. Rules for foreign and coastwise voyages on the Great Lakes.

PART 1. ADMINISTRATION

1. Pursuant to Executive Order 7548 of February 5, 1937, issued by Franklin D. Roosevelt, President of the United States, published in the FEDERAL REGISTER, Volume 2, No. 26, February 9, 1937, regulations are hereby established for placing subdivision load lines on passenger vessels mechanically propelled, subject to the International Convention for Safety of Life at Sea, signed at London on May 31, 1929, ratified by the United States Senate June 19, 1936, and proclaimed by the President on September 30, 1936, and pursuant further to the Coastwise Load Line Act, 1935, as amended June 20, 1936, regulations are hereby established for placing subdivision load lines on passenger vessels of 150 gross tons or over making coastwise voyages by sea and on the Great Lakes, also foreign voyages on the Great Lakes.

2. The Bureau of Marine Inspection and Navigation of the Department of Commerce, under the direction of the Secretary of Commerce, is vested with the responsibility and the authority to determine the position of and to insure the correct marking of subdivision load lines on all passenger vessels subject to the International Convention for Safety of Life at Sea, 1929, and the Coastwise Load Line Act, 1935, as amended June 20, 1936.

3. No pasenger vessel of the United States required to be marked with subdivision load lines shall depart from any port or place for a foreign voyage by sea, a coastwise voyage by sea, or a voyage on the Great Lakes; no foreign passenger vessel belonging to a country that has ratified or acceded to the International Convention for Safety of Life at Sea, 1929 [1] shall depart from any port or place under the jurisdiction of the United States, and no foreign passenger vessel of 150 gross tons or over subject to the Coastwise Load Line Act, 1935, as amended June 20, 1936, shall depart from any port or place under the jurisdiction of the United States, including ports on the Great Lakes, unless such passenger vessel has been marked with subdivision load lines in accordance with these regulations and has on board a valid certificate certifying to the correctness of the location of such subdivision load line marks.

[1] Passenger vessels belonging to countries that have ratified or acceded to the International Convention for Safety of Life at Sea, 1929, having been marked with subdivision load lines under that Convention and having on board a valid safety certificate shall be accepted as complying with these regulations in so far as marking and certification of subdivision load lines are concerned.

Subdivision load lines shall be marked on both sides of passenger vessels where determined and in the manner described in Section D, Part 2, and Section D, Part 3, hereof as applicable to the vessel's service.

4. Passenger vessels on the Great Lakes of 150 gross tons or over shall not submerge the subdivision load line applicable to the voyage.

5. Passenger vessels required to be marked with subdivision load lines, engaged on foreign and coastwise voyages other than the Great Lakes, shall not submerge in salt water the subdivision load line applicable to the voyage. Vessels engaged on ocean foreign or coastwise voyages may be marked with fresh-water load lines. A vessel on foreign or coastwise voyages (except the Great Lakes) may have an allowance made for the degree of brackishness of the water in which the vessel is floating but not for the weight of fuel, water, etc., required for consumption between the point of departure and the open sea, and no allowance is to be made for bilge or ballast water that may be in the vessel at the time of departure.

6. For the purpose of Section D of these regulations, a vessel is a passenger vessel if:

(*a*) Engaged on an international voyage by sea, it carries or is authorized to carry more than twelve passengers.

(*b*) Engaged on a coastwise voyage by sea or a voyage on the Great Lakes, it carries or is authorized to carry more than sixteen persons in addition to the crew.

(In Section D of these regulations, whenever the word "vessel" is used, a passenger vessel is meant.)

7. A foreign voyage for the purpose of marking passenger vessels with subdivision load lines is a voyage by sea between a port under the jurisdiction of the United States and a port of a foreign country, its colonies, territories, or protectorates (a voyage exclusively on the Great Lakes excepted).

8. A coastwise voyage by sea, for the purpose of marking passenger ships with subdivision load lines, is a voyage in which a vessel in the usual course of her employment proceeds from one port or place in the United States or its possessions to another port or place in the United States or its possessions and passes outside the line dividing inland waters from the high seas, as defined in Section 2 of the Act of February 19, 1895.

9. A Great Lakes voyage is any voyage from a United States port or place on the Great Lakes to another United States port or place on the Great Lakes or to a Canadian port or place on the Great Lakes.

10. A new passenger vessel is a vessel whose keel was laid or was a vessel converted into a passenger vessel on or after (*a*) November 7, 1936, if engaged in foreign voyages, or (*b*) September 28, 1937, if engaged in coastwise or Great Lakes voyages.

11. An existing passenger vessel in respect to its voyage is any passenger vessel that is not a new passenger vessel as defined herein.

12. New passenger vessels making foreign voyages by sea shall comply with these subdivision load line regulations. An existing passenger vessel engaged in foreign voyages by sea may be permitted relaxation from the requirements of these subdivision load line regulations if, in the opinion of the Bureau of Marine Inspection and Navigation, such requirements are unreasonable or impracticable. A new passenger vessel making coastwise voyages by sea or making coastwise or foreign voyages on the Great Lakes shall comply with these subdivision load line regulations. An existing passenger vessel making coastwise voyages by sea or coastwise or foreign voyages on the Great Lakes may be permitted relaxation from the requirements of these subdivision load line regulations if in the opinion of the Bureau of Marine Inspection and Navigation such requirements are unreasonable or impracticable.

13. *Load line requirements of sections A, B, and C.*—The requirements of sections A, B, and C of these Regulations, as applicable to the vessel and her service, shall be complied

with before a passenger vessel will be marked with and certificated as to subdivision load lines.

14. *Marks to indicate subdivision load lines.*—Marks to indicate the maximum mean drafts to which a passenger vessel may be lawfully submerged shall be permanently marked on each side of the vessel in the form, manner, and location provided by these regulations.

The Bureau of Marine Inspection and Navigation shall determine the position of the subdivision load lines by the application of the requirements and rules contained in these regulations; *Provided, however,* That in determining the position of the load lines for passenger vessels engaged on coastwise voyages by sea and for passenger vessels engaged on coastwise and foreign Great Lakes voyages, due consideration shall be given to the age and condition of the vessel, its subdivision and the efficacy thereof and the probable stability of the vessel if damaged and such increases made to the freeboards as existing conditions indicate to be necessary. The correct marking of subdivision load lines on passenger vessels shall be certified to by the American Bureau of Shipping or a classification society [2] approved by the Secretary of Commerce for such purpose.

Certificates certifying to the correctness of subdivision load line marks shall not be furnished until it is determined that the marks have been correctly placed upon the vessel.

15. *Survey for the establishment and renewal of subdivision load line marks.*—Every passenger vessel to be marked with and certificated for subdivision load lines must comply with the general rules and regulations of the Board of Supervising Inspectors as promulgated for ocean, coastwise, and Great Lakes service as applicable to the particular vessel and the service in which she is to be employed.

Every passenger ship marked with subdivision load lines shall be subjected to the surveys specified below:

(*a*) A survey before the ship is put in service.
(*b*) A periodical survey once every twelve months.
(*c*) Additional surveys as occasion arises.
(*d*) Surveys required by Sections A, B, or C.

The surveys referred to in (*a*), (*b*), and (*c*) above shall be carried out by the local steamboat inspectors, as follows:

(*a*) The survey before the ship is put in service shall include a complete inspection of the hull, machinery and equipment, including the outside of the ship's bottom and the inside and outside of the boilers. This survey shall be such as to insure that the arrangements, material and scantlings of the hull, boilers, and their appurtenances, main and auxiliary machinery, life saving appliances, fire fighting and other equipment fully comply with the requirements of this section of the regulations as applicable to the service for which the ship is intended. This survey shall be such as to insure that the workmanship of all parts of the ship and its equipments is in all respects satisfactory.

(*b*) The periodical survey shall include an inspection of the whole of the hull, boilers, machinery and equipment, including the outside of the vessel's bottom. The survey shall be such as to insure that the vessel as regards the hull, boilers, and their appurtenances, main and auxiliary machinery, life saving appliances and other equipment is in satisfactory condition and fit for the service for which it is intended and that it complies with the requirements of this section of the regulations; *Provided,* That passenger vessels whose certificates of inspection are limited to coastwise voyages by sea shall not be required to have the outside of the vessel's bottom examined oftener than once in two years and vessels whose certificates of inspection are limited to Great Lakes voyages shall not be required to have the outside of the vessel's bottom examined oftener than required by Section C of these regulations.

(*c*) A survey, either general or partial, according to the circumstances, shall be made every time an accident occurs or a defect is discovered which affects the safety of the ship or the efficacy or completeness of its life saving appliances, fire fighting, or other equipment, or whenever any important repairs or renewals are made. The survey shall be such as to insure that the necessary repairs or renewals have been effectively made, that the material and the workmanship of such repairs or renewals are in all respects satisfactory, and that the ship complies in all respects with these regulations.

(*d*) Surveys required under Sections A, B, or C should be carried out in conjunction with the surveys required by this Section (D) of the regulations.

After each survey of the ship has been completed, no change shall be made in the structural arrangements, machinery, equipment, etc., covered by the survey, without the sanction of the Bureau of Marine Inspection and Navigation.

16. *Application for the assignment and renewal of subdivision load lines.*—Application for assignment and renewal of subdivision load lines and certification thereof shall be made in writing to the Bureau of Marine Inspection and Navigation, Department of Commerce, Washington, D. C.

17. *Equivalents.*—Where in these subdivision load line regulations it is provided that a particular fitting, appliance, or apparatus or type thereof, shall be fitted or carried in a vessel engaged on foreign voyages by sea or that any particular arrangement shall be adopted, there may be substituted any other fitting or appliance or type thereof or any other arrangement provided that the Bureau of Marine Inspection and Navigation, Department of Commerce, shall have been satisfied by suitable trials that the fitting, appliance, or apparatus, or type thereof, or that the arrangement substituted is at least as effective as that specified in the subdivision load line regulations.

Where in the application of these subdivision load line regulations to passenger vessels engaged in coastwise voyages by sea and on coastwise and foreign Great Lakes voyages it is desired to substitute other construction, arrangement, fitting, or appliance or type thereof, such substitution may be made if approved by the Bureau of Marine Inspection and Navigation provided the degree of safety provided by these regulations is obtained.

18. *The subdivision load line certificates.*—Passenger vessels engaged in foreign voyages by sea shall have their subdivision load lines certificated on the safety certificate required by the International Convention for Safety of Life at Sea, 1929.[3] These vessels will also be provided with the load line certificate required by Section A hereof, the minimum freeboard shown thereon to be not less than the minimum freeboard corresponding to the principal passenger condition.

Passenger vessels engaged on coastwise voyages by sea and coastwise and foreign voyages on the Great Lakes shall have the position of their subdivision load lines recorded on a load line certificate in the form required by Sections A or C hereof. The fact that they are subdivision load lines is to be noted on the load line certificate.

Passenger vessels engaged in foreign voyages by sea, on coastwise voyages by sea, and Great Lakes voyages shall have the load line certificate limited to one year and renewal shall be limited to one year. The certificate shall be issued by the American Bureau of Shipping or the classification society approved for placing load lines on the vessel: *Provided,* That before issuance and before renewal of the certificate the classification society has received advice from the Bureau of Marine Inspection and Navigation that the vessel is in a condition to receive a certificate of inspection or is in a condition satisfactory to the Bureau of Marine Inspection and Navigation.

[2] In the case of passenger vessels that are required by the International Convention for Safety of Life at Sea to have on board a Safety Certificate, the certification of subdivision load line marks are to be made by letter to the Bureau of Marine Inspection and Navigation, Department of Commerce, Washington, D. C.

[3] Safety certificates shall be issued by the Bureau of Marine Inspection and Navigation, Department of Commerce, Washington, D. C., for a period not to exceed one year.

19. *Validity of subdivision load line certificates.*—Subdivision load line certificates issued to passenger vessels shall only be valid during the time for which the certificate is issued.

If, due to any cause, the conditions as required by these regulations are changed or these regulations are not carried out, the load line certificate may be cancelled and the load lines considered nonexistent: *Provided, however,* That if the conditions causing the cancellation of the certificate are satisfactorily corrected, the load line certificate shall be reinstated for the remainder of its term.

A valid subdivision load line certificate for foreign voyages by sea shall be valid for coastwise voyages by sea and voyages on the Great Lakes. A valid subdivision load line certificate for coastwise voyages by sea shall be valid for voyages on the Great Lakes but not for foreign voyages by sea. A valid subdivision load line certificate for voyages on the Great Lakes shall not be valid for foreign or coastwise voyages by sea.

20. *Drills and inspections.*—In all new and existing passenger vessels drills by the vessels' crew for the operating of watertight doors, side ports, valves, and closing mechanisms of scuppers, ash chutes and rubbish chutes, shall take place weekly. In passenger vessels in which the voyage exceeds one week in duration a complete drill shall be held before leaving port, and others thereafter at least once a week during the voyage, and all watertight power doors and hinged doors in main transverse bulkheads in use at sea shall be operated daily.

The watertight doors and all mechanisms and indicators connected therewith, and all valves the closing of which is necessary to make a compartment watertight, shall be periodically inspected at sea, at least once a week.

21. *Log book entries.*—(*a*) *Applicable to foreign voyages by sea (the Great Lakes excepted).*—The master of any passenger vessel making foreign voyages by sea shall insert at the time of departing from port in the vessel's official log a statement of the position of the subdivision load line mark, port and starboard, in relation to the surface of the water in which the vessel is then floating [4] and shall also enter a statement of the actual drafts of the vessel forward and aft as nearly as the same can be ascertained.[5]

There shall be entered in the official log the time that hinged, watertight doors fitted in bulkheads dividing cargo between deck spaces are opened in port and the time these doors are closed before leaving port. (These doors must be closed, secured, and remain so during the voyage.)

There shall be entered in the official log the time of opening and the time of closing in port portable plates, gangways, cargo ports, coaling ports, and other openings in the ship's hull below the margin line which are required by these regulations to be kept closed at sea. (Section D, Part 2, Rules 20, 28, and 31.) (If it becomes essential for the safety of the ship to open any of these fittings at sea the circumstances and the time of opening and closing shall be entered in the official log.)

There shall be entered in the official log the time of opening, closing, and securing, at sea, watertight doors fitted between bunkers for the purpose of trimming coal.

There shall be entered in the official log the time of opening and closing in port those air ports below the bulkhead deck that are required to be kept closed by these regulations, while at sea. (Section D, Part 2, Rule 28 (e).)

There shall be entered in the official log a record of the following drills and inspections with an explicit record of any defects which may be disclosed and the steps taken to remedy them:

(1) Operation of watertight power doors and watertight hinged doors in main transverse bulkheads in use at sea—daily.

(2) Drills in the operation of watertight doors, airports, valves, and closing mechanisms of scuppers, ash chutes, and rubbish chutes—weekly (when the voyage exceeds one week, a complete drill shall be held before leaving port).

(3) Inspection at sea of all watertight doors together with all mechanisms and indicators connected therewith, all valves the closing of which is necessary to make a compartment watertight—at least once a week.

(*b*) *Applicable to coastwise voyages by sea and voyages on the Great Lakes.*—The master of a passenger vessel engaged on a coastwise voyage by sea or on a voyage on the Great Lakes shall, before the vessel departs from her loading port or place, enter a statement in the ship's record or log book of the position of the subdivision load line, port and starboard, in respect to the surface of the water in which the vessel is then floating and in addition shall also enter the actual drafts of the vessel forward and aft as nearly as the said drafts can be ascertained.[4]

(*c*) *Fresh water allowance.*—In the case of passenger vessels engaged on foreign or coastwise voyages by sea where an allowance is made for the density of the water in which the vessel is floating, this density is also to be noted in case of submergence of the subdivision load line.

22. *Control.*—The duties and responsibilities of the Collectors of Customs in respect to the load lines certified on the safety certificates of and marked on passenger vessels engaged on foreign voyages by sea shall be the same as stated in Section A, paragraph 20, of these regulations.

The duties and responsibilities of the Collector of Customs, in respect to passenger vessels engaged in coastwise voyages by sea or voyages on the Great Lakes are as defined by the Load Line Regulations, Section A, paragraph 20, and Section C, paragraph 17, of these regulations.

23. *Construction.*—The watertight subdivision of every passenger vessel shall be as efficient as possible, having regard to its intended service. This principle is given effect by the requirements of Part 2 hereof, which provide for variations in the standard of subdivision according to the length of the vessel and the degree to which the vessel approaches the exclusive passenger type, the highest standard being required in vessels of the greatest length engaged primarily in the carriage of passengers.

Passenger vessels engaged in foreign voyages by sea or coastwise voyages by sea or voyages on the Great Lakes, to be marked with subdivision load lines shall—

(*a*) If a new ship, comply with the rules and regulations of this section;

(*b*) If an existing ship, shall comply with such rules and regulations unless it can be shown to the satisfaction of the Bureau of Marine Inspection and Navigation, Department of Commerce, that their application is unreasonable and impracticable.

Passenger vessels engaged on (*a*) foreign voyages by sea, (*b*) coastwise voyages by sea, or (*c*) Great Lakes voyages, navigating more than 20 nautical miles and not more than 200 nautical miles off shore, may, with the approval of the Department of Commerce, be allowed relaxation from such of the requirements of rules 9 to 14, inclusive, rules 20 to 32, inclusive, and rule 38 of Section D, Part 2, hereof, dealing with inner bottoms, openings in watertight bulkheads and in vessels' sides below the bulkhead deck and pumping arrangements as may be proved to the satisfaction of the Bureau of Marine Inspection and Navigation to be neither reasonable nor practicable for the service conditions under which the vessel is to operate.

[4] When the draft of the vessel is limited by a seasonal load line located below the subdivision load line the position of the seasonal load line shall be entered in relation to the surface of the water in which the vessel is floating.

[5] When an allowance of draft is made for density of the water in which the vessel is floating, this density is to be noted in the official log.

In the case of passenger vessels engaged on foreign voyages by sea, coastwise voyages by sea, or Great Lakes voyages, operating not over 20 nautical miles off shore, the Bureau of Marine Inspection and Navigation may, with the approval of the Department, make exemptions from the requirements of these regulations if it considers that the route and the conditions of the voyage are such as to render the application of any of the requirements of the subdivision load line rules and regulations unreasonable or unnecessary.

Passenger vessels engaged on foreign voyages by sea, coastwise voyages by sea, and Great Lakes voyages that are such as to make the risks exceptional and, owing to the absence of general cargo, it is practicable to apply a higher standard of subdivision than required by this section, shall have such further subdivision as may be required by the Bureau of Marine Inspection and Navigation provided that the factor of subdivision shall not exceed 0.50 unless it can be shown that the improved subdivision is neither practicable nor reasonable.

24. *Plans and inspections of new and converted vessels.*—There shall be submitted in triplicate to the Bureau of Marine Inspection and Navigation for approval the following plans:

Midship section.
Profile.
Deck plating.
Shell plating.
Inner bottom.
W. T. Bulkheads, tunnels and escape trunks.
Fuel oil, fresh water, and ballast tanks.

These plans should be furnished as early as practicable. If approved, one copy is to be transmitted to the Supervising Inspector in which district the vessel is to be constructed or converted, one copy shall be furnished the owners, and one copy will be retained in the Bureau of Marine Inspection and Navigation as a record.

When a passenger vessel is being built to class with a recognized American classification society, the official approval by such society of construction plans of the vessel may be, in general, accepted as evidence of the efficacy of the structure as indicated on the plans but the submission of plans to and the approval thereof by the Bureau of Marine Inspection and Navigation is required in all cases of new and converted vessels.

In order that the Bureau of Marine Inspection and Navigation may determine the position of the subdivision load lines and as to whether or not the vessel will have satisfactory stability, if damaged below the water line, the following data shall be submitted to the Bureau of Marine Inspection and Navigation:

Lines; body plan; curves of form; Bonjean curves; stability calculations in damaged conditions.
Floodable length curves with a copy of the flooding calculations. Profile and deck arrangement plans.

Either on the above plans or in such other form as may be convenient, the following details shall be clearly indicated:

Extent and subdivision of double bottom.
Location of openings in bulkheads.
Type of watertight doors fitted to close each such opening.
Location of operating stations for each sliding watertight door.
Details of the construction of each type of watertight door with details of the operating gear.
Location of openings in the sides of the vessel.
Where such openings are pipe discharges, the service for which each pipe is used and the space from which it discharges is to be clearly indicated.
Details of the types of valves fitted on each pipe terminating at the shell, stating the material used, and showing the locations of each valve in the pipes and of the operating stations where remote controls are fitted.
Details of the construction of each cargo, gangway, or coaling port.
Details of the types of light and airports fitted.
Details of the construction of each rubbish or ash chute.
Location of openings in the weather deck and the arrangements adopted for their protection and closing.

During the construction or conversion of a passenger vessel subject to being marked with subdivision load lines, the local steamboat inspectors are to satisfy themselves that the structural arrangements are in accordance with the plans approved by the Bureau of Marine Inspection and Navigation and that the workmanship on the vessel is satisfactory. In the case of a vessel building to class with the American Bureau of Shipping or other approved classification society, the construction surveys and tests carried out by the surveyors of such a society may be considered either in whole or in part as evidence of the satisfactory workmanship and proper adherence to the approved structural plans.

Upon completion of the construction of a passenger vessel or the conversion of a vessel to a passenger vessel, the vessel shall be inclined under the supervision of the Bureau of Marine Inspection and Navigation and the position of her center of gravity determined. If the position of the center of gravity is such that the vessel will have adequate stability in the usual service conditions when taken into consideration with subdivision and other requirements and have an ample margin of stability when loaded to the drafts permitted by the subdivision load lines, the subdivision load lines may be marked and certified. The owners shall supply the operating personnel and the material necessary for inclining the vessel and shall furnish such information required by the Bureau of Marine Inspection and Navigation as is necessary to determine the position of the center of gravity of the vessel from the inclining experiment.[6]

PART 2—RULES FOR DETERMINING SUBDIVISION LOAD LINES FOR PASSENGER VESSELS ENGAGED ON FOREIGN AND COASTWISE VOYAGES (THE GREAT LAKES EXCEPTED)

RULE 1. *Definitions.*—

(*a*) The subdivision load line is the water line used in determining the subdivision of the vessel. The deepest subdivision load line is that which corresponds to the greatest draft.

(*b*) The length of the vessel is the length measured between perpendiculars taken at the extremities of the deepest subdivision load line.

(*c*) The breadth of the vessel is the extreme width from outside of frame to outside of frame at or below the deepest subdivision load line.

(*d*) The bulkhead deck is the uppermost deck up to which the transverse watertight bulkheads are carried.

(*e*) The margin line is a line drawn parallel to the bulkhead deck at side and three inches below the upper surface[7] of that deck at side.

(*f*) The draft is the vertical distance from the top of keel[8] amidships to the subdivision load line in question.

(*g*) The permeability of a space is the percentage of that space which can be occupied by water.

The volume of a space which extends above the margin line shall be measured only to the height of that line.

(*h*) The machinery space is to be taken as extending from the top of keel to the margin line and between the extreme main transverse watertight bulkheads bounding the spaces devoted to the main and auxiliary propelling machinery, boilers when installed, and all permanent coal bunkers.

(*i*) Passenger spaces are those which are provided for the accommodation and use of passengers, excluding baggage, store, provision, and mail rooms. For the purpose of rules

[6] The operating personnel of the vessel shall be supplied by the owners with such information regarding the stability of the vessel as is necessary for their guidance in loading, ballasting, and safely operating the vessel.

[7] Where there is a variation in the thickness of the bulkhead deck at side, the top of the deck should be taken at the least thickness of the deck at side above the beam.

[8] Top of keel means molded base line.

3 and 4, spaces provided below the margin line for the accommodation and use of the crew shall be regarded as passenger spaces.

(*j*) In all cases volumes shall be calculated to molded lines; linear dimensions are to be taken in feet and volumes in cubic feet.

RULE 2. *Floodable length.*—

(*a*) The floodable length at any point of the length of a vessel shall be determined by a method of calculation which takes into consideration the form, draft, and other characteristics of the vessel in question.

(*b*) In a vessel with a continuous bulkhead deck, the floodable length at a given point is the maximum portion of the length of the vessel having its center at the point in question which can be flooded under the definite assumptions hereafter set forth in rule 3 without the vessel being submerged beyond the margin line.

(c) In the case of a vessel not having a continuous bulkhead deck, the floodable length at any point may be determined to an assumed continuous margin line up to which, having regard to sinkage and trim after damage, and sides of the vessel and the bulkheads concerned are carried watertight.[9]

RULE 3. *Permeability.*—

(*a*) The definite assumptions referred to in rule 2 relate to the permeabilities of the spaces below the margin line.

In determining the floodable length a uniform average permeability shall be used throughout the whole length of each of the following portions of the vessel below the margin line:[10]

1. The machinery space as defined in rule 1 (*h*);
2. The portion forward of the machinery space; and
3. The portion abaft the machinery space.

(*b*) (1) For steam vessels the uniform average permeability throughout the machinery space shall be determined from the formula—

$$80 \text{ plus } 12.5\ \frac{(a-c)}{v}$$

where

$a$ = volume of the passenger spaces, as defined in rule 1 (i), which are situated below the margin line within the limits of the machinery space.
$c$ = volume of 'tween deck spaces below the margin line within the limits of the machinery space which are appropriated to cargo, coal, or stores.
$v$ = whole volume of the machinery space below the margin line.

(2) For vessels propelled by internal combustion engines, the uniform average permeability shall be taken as five greater than that given by the above formula.

(3) Where it is shown to the satisfaction of the Bureau of Marine Inspection and Navigation that the average permeability, as determined by detail calculation, is less than that given by the formula, the calculated value may be substituted. For the purposes of such calculation, the permeabilities of passenger spaces, as defined in rule 1 (*i*) shall be taken as 95, that of all cargo, coal, and store spaces as 60, and that of double-bottom, oil-fuel, and other tanks at such values as may be approved in each case by the Bureau of Marine Inspection and Navigation.

[9] In the case of a vessel in which the subdivision bulkheads extend to two different decks, the floodable length for that section where the bulkheads extend to the lower deck may be determined by the use of trim lines tangent to a line three inches below the upper surface of the lower deck at side. Where, however, the arrangement is such that the safety is in no way diminished, advantage may be taken of the extra subdivision offered by the bulkheads extending to the higher deck by the use of an assumed margin line.

[10] The volumes as hereafter defined shall be the molded volumes below a line three inches below the upper surface of the bulkhead deck at side. In the case of a vessel not having a continuous bulkhead deck, there shall be but one average permeability for the portion of the vessel before (or abaft) the machinery space, and for the machinery space, the volume for each compartment of vessel being taken to be assumed continuous margin line.

(*c*) The uniform average permeability throughout the portion of the vessel before (or abaft) the machinery space shall be determined from the formula—

$$63 \text{ plus } 35\frac{a}{v}$$

where

$a$ = volume of the passenger spaces, as defined in rule 1 (i) which are situated below the margin line before (or abaft) the machinery space; and
$v$ = whole volume of the portion of the vessel below the margin line before (or abaft) the machinery space.

(*d*) If a 'tween deck compartment between two watertight transverse bulkheads contains any passenger or crew space, the whole of that compartment, less any space completely enclosed within permanent steel bulkheads and appropriated to other purposes, shall be regarded as passenger space. If, however, the passenger or crew space in question is completely enclosed with permanent steel bulkheads, only the space so enclosed need be considered as passenger space.

RULE 4. (*a*) *Permissible length of compartments.*—The maximum permissible length of a compartment having its center at any point in the vessel's length is obtained from the floodable length by multiplying the latter by an appropriate factor called the factor of subdivision. However, the permissible length shall not exceed one fifth of the subdivision length of the ship or eighty feet, whichever is the less, without the special consideration of the Bureau of Marine Inspection and Navigation.

(*b*) *Factor of subdivision.*—The factor of subdivision shall depend on the length of the vessel, and for a given length shall vary according to the nature of the service for which the vessel is intended. It shall decrease in a regular and continuous manner:

1. As the length of the vessel increases, and
2. From a factor A, applicable to vessels primarily engaged in the carriage of cargo, to a factor B, applicable to vessels primarily engaged in the carriage of passengers.

The variations of the factors A and B shall be expressed by the following formulas (i) and (ii) where L is the length of the vessel in feet as defined in rule 1 (*b*):

$$A = \frac{190}{L-198} \text{ plus } 0.18 \quad (L = 430 \text{ and upward}) \qquad \text{(i)}$$

$$B = \frac{100}{L-138} \text{ plus } 0.18 \quad (L = 260 \text{ and upward})^{11} \qquad \text{(ii)}$$

(*c*) *Criterion of service.*—For a vessel of given length the appropriate factor of subdivision shall be determined by the Criterion of Service Numeral (hereinafter called the "Criterion Numeral") as given by the following formulas (iii) and (iv) where:

$C_S$ = the Criterion Numeral;
$L$ = length of the vessel in feet, as defined in rule 1 (b);
$M$ = the volume of the machinery space, as defined in rule 1 (h); with the addition thereto of the volume of any permanent oil fuel bunkers which may be situated above the inner bottom and before or abaft the machinery space;
$P$ = the whole volume of the passenger spaces below the margin line, as defined in rule 1 (i);
$V$ = the whole volume of the vessel below the margin line;
$P_1 = 0.6LN$ where: $L$ = the length of the vessel in feet as defined in rule 1 (b), and
$N$ = the number of passengers for which the vessel is to be certified.

Where, however, it is shown to the satisfaction of the Bureau of Marine Inspection and Navigation that the value of $0.6LN$ so obtained is greater than the sum of $P$ and the

[11] The foregoing method of determining the permissible length should be used to the exclusion of independent calculations, except in the case of vessels which are so exceptional in their arrangement that it is not directly applicable, in which case calculations should be submitted showing that the margin line will not be submerged with an assumed compartment flooded having the same permeability, the same midpoint of length, and a length equal to the length of the compartment in question divided by F.

whole volume of the actual passenger spaces above the margin line, the lower figure may be taken, provided that in no case shall the value of $P_1$ used be less than $0.4LN$. When $P_1$ is greater than $P$—

$$C_S=72\frac{M+2P_1}{V+P_1-P} \quad \text{(iii)}$$

And in other cases—

$$C_S=72\frac{M+2P}{V} \quad \text{(iv)}$$

For vessels not having a continuous bulkhead deck the volumes are to be taken up to the actual margin lines used in determining the floodable lengths.

(*d*) *Rules for subdivision.*—(1) The subdivision abaft the fore peak of vessels 430 feet in length and upward having a criterion numeral of 23 or less shall be governed by the factor *A* given by formula (i); of those having a criterion numeral of 123 or more by the factor *B* given by formula (ii); and of those having a criterion numeral between 23 and 123 by the factor *F* obtained by linear interpolation between the factors *A* and *B*, using the formula:

$$F=A-\frac{(A-B)\times(C_s-23)}{100} \quad \text{(v)}$$

Where the factor *F* is less than 0.40 and it is shown to the satisfaction of the Bureau of Marine Inspection and Navigation to be impracticable to comply with the factor *F* in a machinery compartment of the vessel, the subdivision of such compartment may be governed by an increased factor, which, however, shall not exceed 0.40.

(2) The subdivision abaft the fore peak of vessels less than 430 feet but not less than 260 feet in length having a criterion numeral equal to *S*, where

$$s=\frac{4691-10L}{17}$$

shall be governed by the factor unity; of those having a criterion numeral of 123 or more by the factor *B* given by the formula (ii); of those having a criterion numeral between *S* and 123 by the factor *F* obtained by linear interpolation between unity and the factor *B*, using the formula:

$$F=1-\frac{(1-B)(C_s-S)}{123-S} \quad \text{(vi)}$$

(3) The subdivision abaft the fore peak of vessels less than 430 feet but not less than 260 feet in length and having a criterion numeral less than S, and of all vessels less than 260 feet in length shall be governed by the factor unity; unless it is shown to the satisfaction of the Bureau of Marine Inspection and Navigation to be impracticable to comply with this factor in any part of the vessel, in which case the Bureau of Marine Inspection and Navigation may allow such relaxation as may appear to be justified, having regard to all the circumstances.

(4) The provisions of subparagraph (3) shall apply also to vessels of whatever length, which are to be certified to carry a number of passengers exceeding 12 but not exceeding $\frac{L^2}{7000}$ or 50, whichever is the less.

RULE 5. *Special rules concerning subdivisions.*—

(*a*) A compartment may exceed the permissible length determined by the rules of rule 4 provided the combined length of each pair of adjacent compartments to which the compartment in question is common does not exceed either the floodable length or twice the permissible length, whichever is the less.[13]

If one of the two adjacent compartments is situated inside the machinery space, and the second is situated outside the machinery space, and the average permeability of the portion of the vessel in which the second is situated differs from that of the machinery space, the combined length of the two compartments shall be adjusted to the mean average permeability of the two portions of the vessel in which the compartments are situated.

Where the two adjacent compartments have different factors of subdivision the combined length of the two compartments shall be determined proportionately.

(*b*) *Additional subdivision at forward end.*—In vessels 430 feet in length and upward, one of the main transverse bulkheads abaft the fore peak shall be fitted at a distance from the forward perpendicular which is not greater than the permissible length.

(*c*) *Recessed bulkheads.*—A main transverse bulkhead may be recessed provided that all parts of the recess lie inboard of vertical surfaces on both sides of the vessel, situated at a distance from the shell plating equal to one-fifth the breadth of the vessel, as defined in rule 1 (*c*), and measured at right angles to the center line at the level of the deepest subdivision load line.

Any part of a recess which lies outside these limits shall be dealt with as a step in accordance with the following paragraph.

(*d*) *Stepped bulkheads.*—A main transverse bulkhead may be stepped provided that—

(1) The combined length of the two compartments, separated by the bulkhead in question, does not exceed 90 percent of the floodable length, or

(2) Additional subdivision is provided in way of the step to maintain the same measure of safety as that secured by a plane bulkhead.

(*e*) *Equivalent plane bulkhead.*—Where a main transverse bulkhead is recessed or stepped, an equivalent plane bulkhead shall be used in determining the subdivision.

(*f*) *Minimum spanning of bulkheads.*—If the distance between two adjacent main transverse bulkheads, or their equivalent plane bulkheads, or the distance between the transverse planes passing through the nearest stepped portions of the bulkheads, is less than 10 feet plus 2 percent of the length of the vessel, only one of these bulkheads shall be regarded as forming a part of the subdivision of the vessel in accordance with the provisions of rule 4.

(*g*) *Allowances for local subdivision.*—Where a main transverse watertight compartment contains local subdivision, and it can be shown to the satisfaction of the Bureau of Marine Inspection and Navigation that, after any assumed side damage extending over a length of 10 feet plus 2 percent of the length of the vessel, the whole volume of the main compartment will not be flooded, a proportionate allowance may be made in the permissible length otherwise required for such compartment. In such a case the volume of effective buoyancy assumed on the undamaged side shall not be greater than that assumed on the damaged side.

(*h*) *Longitudinal subdivision.*—Where it is proposed to fit watertight decks, inner skins or longitudinal bulkheads, watertight or nonwatertight, the Bureau of Marine Inspection and Navigation shall be satisfied that the safety of the vessel will not be diminished in any respect, particularly having in view the possible listing effect of flooding in way of such structural arrangements.

(*i*) *Stability when damaged.*—1. The arrangements which fall within the general category of longitudinal subdivision are of such a varied character that it is not possible to lay down definite rules which would apply equitably to all cases that may arise in practice.

2. Calculations of angle of heel or of effect on stability may be necessary and plans showing the proposed transverse and/or longitudinal subdivision are therefore to be submitted for the Bureau of Marine Inspection and Navigation's consideration and decision as to the calculations to be made and the spaces to be assumed flooded. The object of the calculations is to show:

(i) The angle of heel which might result from the flooding of wing compartments due to side damage extending over a length in feet not exceeding $.02L$ plus ten feet.

If this angle is more than seven degrees, the Bureau of Marine Inspection and Navigation will, as a rule, require such arrangements to be made as will reduce the angle to seven degrees.

(ii) The reduction in stability and angle of heel which might result from flooding of such compartments as may reasonably be assumed vulnerable under certain conditions of damage having regard to the arrangements under consideration.

If this angle is such that the margin line would not be submerged, the arrangements may be allowed; otherwise they will require modification.

(iii) The effect on stability of flooding in way of a watertight deck.

3. In making these calculations the ship is to be assumed to be in the worst anticipated service condition as regards stability, the permeabilities of the spaces assumed to be flooded being taken consistent with this condition as far as possible.

4. The stability conditions assumed in these calculations are to be confirmed after the ship has been inclined.

RULE 6. *Peak and machinery space bulkheads, shaft tunnels, etc.*—

(*a*) 1. Every passenger vessel shall have a forepeak or collision bulkhead, which shall be watertight up to the bulkhead deck. This bulkhead shall be fitted not less than 5 percent of the length of the vessel, and not more than ten feet plus 5 percent of the length of the vessel from the forward perpendicular.

2. If a vessel has a long forward superstructure, the forepeak bulkhead shall be extended weathertight to the deck next above the bulkhead deck. The extension need not be fitted directly over the bulkhead below provided it is at least 5 percent of the length of the vessel from the forward perpendicular and the part of the bulkhead deck which forms the step is made effectively weathertight.

(*b*) An afterpeak bulkhead, and bulkheads dividing the machinery space as defined in rule 1 (*h*) from the cargo and passenger spaces forward and aft, shall also be fitted and made watertight up to the bulkhead deck. The afterpeak bulkhead may, however, be stopped below the bulkhead deck, provided the degree of safety of the vessel as regards subdivision is not thereby diminished.

(*c*) In all cases stern tubes shall be enclosed in watertight spaces. The stern gland shall be situated within a watertight shaft tunnel or other space of such volume that if flooded by leakage through the stern gland the margin line will not be submerged.

RULE 7. *Construction and tests.*—

(*a*) All watertight bulkheads, inner skins, decks, recesses, tunnels, tanks, ventilators, trunks, etc., forming part of the subdivision arrangements shall be of such strength and so constructed as to be capable of withstanding with a proper margin of resistance the pressure due to a head of water up to the bulkhead deck. The construction of these parts of the structure will be accepted if in accordance with the requirements of an approved American classification society. Where frames or beams pass through a watertight deck or bulkhead, such deck or bulkhead shall be made watertight without the use of wood or cement.

(*b*) An examination of the watertight bulkheads, recesses, tunnels, and watertight flats shall be made by an inspector and in addition a hose test shall be made in all cases. The pressure in the hose shall not be less than thirty pounds per square inch.

(*c*) 1. The forepeak shall be tested by filling with water to a head up to the deepest subdivision load line or up to two thirds the height from the top of the keel to the bulkhead deck if that be greater.

2. The watertight space enclosing the stern tube shall be tested by filling with water to a head up to the deepest subdivision load line.

(*d*) Tanks which hold liquids and form part of the subdivision of the vessel shall be tested by filling with water to a head at least up to the deepest subdivision load line or up to two thirds of the distance from the top of the keel to the bulkhead deck, or three feet whichever be the greatest. The tests on such tanks are to insure that the subdivision structural arrangements are watertight and are not to be considered a test of the strength or fitness of any tank for the storage of liquids and for which a test of a higher head may be required under the provisions of rule 17.

(*e*) Inner skins shall be tested by filling the space between them and the shell with water to a head up to the bulkhead deck.

RULE 8. *Fire-resisting bulkheads.*—Fire-resisting bulkheads shall be fitted as provided by the rules and regulations of the Board of Supervising Inspectors as applicable to the vessel and service.

RULE 9. *Extent of double bottoms.*—(*a*) In vessels 200 feet and under 249 feet in length a double bottom shall be fitted at least from the machinery space to the forepeak bulkhead, or as near thereto as practicable.

(*b*) In vessels 249 feet and under 330 feet in length a double bottom shall be fitted at least outside the machinery space, and shall extend to the fore and afterpeak bulkheads, or as near thereto as practicable.

(*c*) In vessels 330 feet in length and upwards a double bottom shall be fitted amidships and shall extend to the fore and afterpeak bulkheads or as near thereto as practicable.

(*d*) Where a double bottom is required to be fitted, the inner bottom shall be continued out to the vessel's sides in such a manner as to protect the bottom to the turn of bilge. Such protection will be deemed satisfactory if the line of intersection of the outer edge of the margin plate with the bilge plating is not lower at any point than a horizontal plane passing through the point of intersection with the frame line amidships of a transverse diagonal line inclined at 25 degrees to the base line and cutting it at a point one half the vessel's molded breadth from the middle line.

RULE 10. *Wells in double bottoms.*—Wells constructed in the double bottom in connection with the drainage arrangements shall not extend downward more than necessary, nor shall they be less than eighteen inches from the outer bottom or from the inner edge of the margin plate. A well extending to the outer bottom is, however, permitted at the after end of a shaft tunnel.

RULE 11. *Watertight center girder.*—Double bottom tanks use for fuel oil or fresh water shall have a watertight center girder. This shall not be required for narrow tanks at ends of vessel.

RULE 12.—*Watertight floors.*—Watertight transverse divisions should be fitted in the double bottom under each main watertight subdivision bulkhead or as near thereto as practicable. Where duct keels are fitted, the transverse divisions need not extend across the duct keel.

RULE 13. *Manholes.*—The number of manholes in the inner bottom shall be reduced to the minimum compatible with the design and necessity for access to the double bottom. Efficient covers, capable of being made thoroughly watertight and effectively protected from damage by cargo or coal, shall be fitted to the manholes.

RULE 14. *Air or sounding pipes.*—All air or sounding pipes to the double bottom are to be effectively protected against damage by cargo, coal, etc.

RULE 15. *Tests of inner bottoms.*—Inner bottoms and duct keels shall be tested by filling with water to a head up to the bulkhead deck. Where double bottoms are to be used as tanks, the test head is not to be less than required for tanks forming part of the hull structure. (See rule 17.)

RULE 16. *Tanks for fuel oil, fresh water, liquid cargo, or water ballast.*—(*a*) The installation of fuel-oil tanks in the 'tween decks overhanging the boiler space or adjacent to the vessel's sides abreast the boilers should, where practicable, be avoided, but where found necessary such tanks shall be subdivided into compartments not exceeding twenty one feet in length. No openings are to be cut in the bottom, ends, or sides of fuel-oil tanks except for suction or heater connections.

[13] See subparagraph (*f*). The shorter of the two compartments must not be less than ten feet plus two percent of the length of the vessel.

(*b*) All tanks shall be sufficiently subdivided in order to prevent excessive listing when damaged, and the arrangement of divisional and swash bulkheads is to be such as to avoid excessive dynamic stresses.

(*c*) Cofferdams are to be fitted between fuel-oil tanks and adjacent boiler feed or culinary water tanks so as to prevent the fresh water from being contaminated.

(*d*) Tanks for fuel oil, fresh water, water ballast, or liquid cargo, forming a part of the vessel's structure, are to be constructed in accordance with the requirements of a recognized classification society.

(*e*) The construction of fuel-oil tanks separate from the hull shall conform to the following requirements or the equivalent thereto: Plating shall be not less than five-sixteenths inch in thickness; seams are to be double riveted; all rivet holes shall be fairly drilled or subpunched and reamed to size; rivets shall be spaced not to exceed four diameters; and where practicable, the tanks shall be calked inside and out.

RULE 17. *Tests of tanks.*—All tanks forming part of the vessel's structure shall be tested by filling with water to the height of the load draft, to two thirds of the distance from the top of the keel to bulkhead or freeboard deck, or to two feet above the highest point to which liquid may rise under service conditions, whichever is greatest. Independent fuel-oil tanks are to be tested to a pressure of fifteen pounds per square inch.

RULE 18. *Drainage double bottoms.*—Suitable gutterways are to be fitted around all oil tanks with arrangements for same to drain into sumps, wells, or bilges. Where double bottoms are used for fuel oil, such drainage arrangements shall be made in cargo holds as are necessary to insure that any oil leakage will drain into wells or bilges.

RULE 19. The foregoing rules for the carriage of fuel oil are applicable only to such oil having a flash point not less than 150° F. (Pensky-Marten closed cup tester). Where fuel oil of a lower flash point is to be carried the arrangements are to be specially considered and tanks for such oil must not be fitted adjacent to or beneath the boilers.

RULE 20. *Openings in watertight bulkheads.*—(*a*) The number of openings in watertight bulkheads shall be reduced to the minimum compatible with the design and proper working of the vessel; satisfactory means shall be provided for closing these openings.

(*b*) Where pipes, scuppers, electric-light cables, ets., are carried through watertight subdivision bulkheads, arrangements shall be made to insure the integrity of the watertightness of the bulkheads.

(*c*) Within the machinery space and apart from those leading to bunkers and tunnels, not more than one door may be fitted in each main transverse bulkhead for intercommunication. These doors shall be located so as to have the sills as high as practicable.

(*d*) Doorways, manholes, or access openings are not permitted:

1. In the collision bulkhead below the bulkhead deck.

2. In the main transverse bulkheads dividing a cargo space from an adjoining cargo space or from a permanent or a reserve bunker, except as provided for in rule 22 (*c*) (1).

(*e*) The collision bulkhead may be pierced below the margin line by not more than one pipe for dealing with fluid in the forepeak, provided that the pipe is fitted with a screw-down valve capable of being operated from above the bulkhead deck, the valve chest being secured inside the forepeak to the collision bulkhead.

(*f*) Openings closed only by portable bolted plates are not permitted in watertight bulkheads except in machinery spaces. Such plates shall always be in place before the vessel leaves port and shall not be removed at sea except in case of urgent necessity.

(*g*) Sluice valves shall not be permitted in the watertight subdivision bulkheads.

RULE 21. *Watertight doors, types.*—(*a*) The only types of watertight doors permissible are hinged doors and sliding doors and doors of other equivalent patterns, excluding plate doors secured only by bolts. A sliding door may have a horizontal or vertical motion.

(*b*) The permissible classes of doors are:

Class 1. Hinged doors.

Class 2. Sliding doors, operated by hand gear only.

Class 3. Sliding doors which close by dropping or by the action of a dropping weight, operated by a releasing arrangement above the bulkhead deck and by hand gear.

Class 4. Sliding doors operated by power from a central control and by hand gear.

RULE 22. *Doors, location of allowed types.*—(*a*) Where a door of a particular class is specified, a door of a class bearing a lower number may not be fitted, but a door of a class bearing a higher number may be fitted.

(*b*) Class 1 doors in passenger, crew, and working spaces are only permitted above a deck the molded line of which at its lowest point at side is at least seven feet above the deepest subdivision load line, and they are not permitted in such spaces below such a deck.

(*c*) 1. Class 1 doors may be fitted in bulkheads dividing cargo 'tween deck spaces. These doors shall be closed before the voyage commences and shall be kept closed during the voyage. When it is proposed to fit such doors, the number and arrangements shall be submitted for consideration, and a statement shall be required from the owners certifying as to the absolute necessity of such doors.

2. In special cases, where necessary for loading stores from cargo ports or for access while in port, class 1 doors may be fitted in the bulkheads subject to all the requirements of the foregoing paragraph, and, in addition, where such doors may be accessible at any time during the voyage they shall be fitted with locks to prevent their being opened.

(*d*) All other doors whose sills are above the deepest subdivision load line may, subject to power doors being required in special cases, subparagraphs (f) and (g), be of class 2.

(*e*) When any watertight doors which may sometimes be opened at sea, excluding those at the entrance to tunnels, are fitted in the main transverse watertight bulkheads at such a height that their sills are below the deepest subdivision load line, the following rules shall apply, subject to class 4 doors being required in special cases. (See subparagraphs (*f*) and (*g*).)

1. When the number of such doors exceeds 5, all the watertight sliding doors whose sills are below the deepest subdivision load line shall be of class 4, capable of being simultaneously closed from a station situated on the bridge.

2. When the number of such doors does not exceed 5:

(i) If the criterion numeral does not exceed 30, all the watertight doors whose sills are below the deepest subdivision load line may be of class 2.

(ii) If the criterion numeral exceeds 30 but does not exceed 60, all the watertight doors whose sills are below the deepest subdivision load line may be of class 3.

(iii) If the criterion numeral exceeds 60, all the watertight doors whose sills are below the deepest subdivision load line shall be of class 4.

(*f*) 1. Watertight doors fitted in bulkheads between permanent and reserve coal bunkers shall be always accessible except as provided in the following paragraph for 'tween deck bunker doors.

2. If watertight doors which have sometimes to be open at sea for the purpose of trimming coal are fitted between bunkers in the 'tween decks below the bulkhead deck these doors shall be of class 4.

(*g*) When trunkways in connection with refrigerated cargo are carried through more than one main transverse watertight bulkhead and the sills of the openings are less than 7 feet above the deepest subdivision load line the watertight doors at such openings shall be of class 4.

(*h*) 1. Where trunkways or tunnels for access from crew's accommodations to the stokehold, for piping, or for any other purpose are carried through main transverse watertight bulkheads and are used as a passage at sea, the access to at least one end shall be through a trunk extending watertight to a height sufficient to permit access above the bulkhead deck. The access to the other end of the trunkway or tunnel may be through a watertight door of the type required by its location in the vessel. Such trunkways or tunnels shall not extend through the first subdivision bulkhead abaft the collision bulkhead.

2. A short tunnel extending through not more than one main subdivision compartment and which is closed at one end need not be fitted with a door at the other end, provided its sides are not nearer to the shell than is permitted for the sides of a recess in a bulkhead as stated in rule 5 (*c*) and the volume of the tunnel if included with the volume of the compartment to which it opens does not result in the equivalent length of such compartment being in excess of the permissible length, rule 4 (*b*) (3).

3. Where it is proposed to fit tunnels or trunkways for forced draft, these shall receive the special consideration of the Bureau of Marine Inspection and Navigation.

RULE 23. *Watertight doors, operation and fittings.*—(*a*) Hinged watertight doors (class 1) shall be fitted with catches workable from either side of the bulkhead so spaced that the door can be made effectively watertight. In the case of a door which is required to be closed before the voyage commences and kept closed all during the voyage, the catches may be fitted to operate from one side only, provided it be shown that under all operating conditions the door shall be always closed from the one side.

(*b*) The hand closing gear for sliding doors is to be accessible in all cases and capable of being operated both at either side of the door itself and from above the bulkhead deck. The operating gear should consist of a crank handle or a wheel and should be permanently attached to the shafting. If this cannot be done the handle or wheel must be stowed immediately alongside the working position.

(*c*) A door which closes by dropping or by the action of a dropping weight shall have the releasing gear so arranged that the door can be released both at the door itself and at an accessible position above the bulkhead deck. It shall be fitted with a suitable arrangement to regulate the closing movement. Hand gear shall also be provided as required in subparagraph (*b*) arranged so that after being disengaged in releasing the door it can be quickly reengaged from either the upper or lower position.

(*d*) The power gear for closing doors of class 4 shall be operated from a central control in an accessible position above the bulkhead deck. The central control stations for power doors required under the provisions of rule 22 (*e*) (1) shall be on the bridge. The power gear shall be so arranged that it can also be operated from either side of the door itself, but also so that the door if opened by this local control after being closed from the central control will reclose automatically. The arrangement shall also be such that the door can be kept closed from the local control so that it cannot be opened from the central control. Power doors shall also be fitted with hand gear as required in subparagraph (*b*), permanently attached to the door, unless satisfactory means are provided for speedily reengaging it. The arrangements shall be such that in the event that the power gear is disabled it will in no way interfere with the efficient operation of the hand gear.

(*e*) In all classes of doors indicators shall be fitted at all operating stations other than at the door itself showing whether the doors are open or closed and at all operating stations directions for closing the doors should be clearly marked.

(*f*) Where power doors or doors which close by dropping or by the action of a dropping weight in passenger, crew, or working spaces are capable of being closed from a position from which the doors are not visible, sound signals for giving warning when they are about to be closed are to be provided. These signals are to be arranged to be sounded simultaneously with the action of the closing gear.

(*g*) Where any door in a subdivision bulkhead is located in whole or in part below the margin line and is not provided with devices to indicate at the central control station whether the door is open or closed, a means of communication shall be provided, or a system of gongs shall be provided so that the responsible officer may rapidly communicate with those whose duty it is to close the doors.

RULE 24. *Watertight doors, design and installation.*—(*a*) The design of all watertight doors shall be subject to approval by the Bureau of Marine Inspection and Navigation. Brass rubbing faces where fitted on sliding doors should be protected against damage, and they may be fitted on either the door or the frame. Vertical or horizontal sliding doors are to be designed so that they are not likely to be prevented from closing properly by lodgments from dirt or pressure from coal.

(*b*) The operating gear shall be sufficiently powerful to be capable of closing the door under unfavorable circumstances; any leads of shafting should be direct if possible and arrangements should be provided for the proper lubrication and protection from damage of all parts of the gear.

(*c*) When the bulkhead stiffeners are cut in way of a watertight door the opening is to be suitably framed so as to maintain the full strength of the bulkhead. Where stiffeners are not cut, but the spacing has been increased, the strength and stiffness provided at the sides of the doorways are to be such as to provide not less efficiency than the unpierced bulkhead without taking the door frame into consideration. The frames shall be carefully fitted to the bulkheads and no materials liable to deteriorate with age or readily injured by heat shall be used in the joints. Screens shall be fitted or other arrangements provided to prevent coal from interfering with the closing of watertight coal bunker doors.

RULE 25. *Watertight doors, tests.*—(*a*) Watertight doors shall be tested by water pressure to a head not less than the distance from the proposed location of the door in the vessel to the bulkhead deck, nor less than 20 feet for sliding watertight doors and 10 feet for hinged watertight doors. The test, if made before the door is fitted in the vessel, is intended to prove only the strength of the door and frame and the efficiency of the design; and the framing of the structure on which it is mounted should not be such as to give greater reenforcement to the door frame than will be provided by the bulkhead in the vessel, nor is the power applied in closing the door to be greater than that which will be available in the actual installation. Where there are several doors of the same type to be fitted in a ship one of the type may be selected for test at the place of manufacture or at the shipyard, and, provided the result of the test is satisfactory, the remaining doors of the type may be accepted without such tests.

(*b*) Where the doors are not to be tested under a head of water after installation, extreme care is to be taken in their fitting to see that their frames are in no way deformed, and the watertightness of the attachment of the door frames to the bulkhead as well as the watertightness of the doors is to be tested by a hose in the same manner as prescribed for the bulkheads.

(*c*) All of the closing arrangements and warning signals are to be operated satisfactorily in the presence of an inspector. The closing tests on coal bunker doors should be made when coal is in the bunkers.

RULE 26. *Closing watertight doors at sea.*—All watertight doors shall be kept closed during navigation except when necessarily opened for the working of the vessel and shall always be ready to be immediately closed.

RULE 27. *Openings in vessel's sides below the bulkhead deck.*—(a) The requirements of this rule apply to all openings in the sides of vessels below the bulkhead deck whether or not such openings give direct access to spaces above or below the bulkhead deck, except as otherwise specified.

(*b*) In the case of a vessel not having a continuous bulkhead deck it is necessary that special consideration should be given to the application of this rule, particularly with regard to openings through the sides of the vessel in way of or leading from spaces below the highest of the trim lines used in the development of the floodable length curves.

(c) The number of openings in vessel's sides below the bulkhead deck shall be reduced to the minimum compatible with the proper design and working of the vessel.

(d) The arrangement and efficiency of the means for closing each opening shall be consistent with its intended purpose and the position in which it is fitted, and shall be to the satisfaction of the Bureau of Marine Inspection and Navigation.

RULE 28. *Port lights and dead covers.*—(a) The number of port lights which are capable of being opened shall be reduced to a minimum. No port lights shall be fitted in spaces which are appropriated exclusively to cargo or coal. All port lights that for any reason will be inaccessible at sea are to be closed and secured before leaving port.

(b) If, in a 'tween deck, the sills of any port lights are below a line drawn parallel to the molded line of the bulkhead deck at side and having its lowest point 2½ percent of the breadth of the ship above the deepest subdivision load line, all port lights in that 'tween deck shall be of a nonopening type.

(c) If, in a 'tween deck, the sills of any port lights, other than those that require to be of a nonopening type by subparagraph (b), are below a line drawn parallel to the molded line of the bulkhead deck at side and having its lowest point at a height of 12 feet plus 2½ percent of the breadth of the vessel above the deepest subdivision load line, all the port lights in that 'tween deck shall be of such construction as will effectively prevent any person opening them without the consent of the master of the vessel.

(d) Other port lights may be of an ordinary opening type.

(e) If, in a 'tween deck, the sills of any port lights referred to in subparagraph (c) are below a line drawn parallel to the molded line of the bulkhead deck at side and having its lowest point 4½ feet plus 2½ percent of the breadth of the vessel above the load line at which the vessel is floating on her departure from any port, all the port lights in that 'tween deck shall be closed watertight and locked before the vessel leaves port and they shall not be opened during navigation.

When in any 'tween deck any port light is below a line having its lowest point 4½ feet plus 2½ percent of the breadth of the vessel above the deepest subdivision load line, all the port lights in that 'tween deck shall be of such construction that the foregoing condition can be complied with when the vessel is loaded to her deepest subdivision draft.

(f) All port lights are to be of substantial construction subject to approval of the Bureau of Marine Inspection and Navigation. Nonopening port lights are to be thoroughly watertight and port lights which are capable of being opened shall be so constructed that they can be easily and effectively closed and secured watertight. Port lights which are referred to in subparagraph (c) may have in lieu of the customary wing nut a special round slotted or recessed nut requiring a special wrench fitted on one or more of the bolts. Those referred to in subparagraph (c) may have similar arrangements, but the special nuts are to be protected by sleeves or guards so as to render them incapable of being released by the use of any ordinary tools, such as pipe wrenches, etc. (See American Marine Standards Committee, Standard No. 78, plate XIII.)

(g) Hinged inside dead covers shall be fitted to all port lights—

1. Which are required to be of a nonopening type.
2. Which are fitted within one-eight of the vessel's length from the forward perpendicular.
3. Which are fitted in positions defined in subparagraph (c).
4. Which will not be accessible during navigation.
5. Which are fitted in spaces intended for the accommodation of sailors and firemen.
6. Which are fitted in spaces intended for the accommodation of steerage passengers.

(h) Port lights below the bulkhead deck other than those referred to in the preceding paragraph shall be fitted with efficient inside dead covers, which may be portable and stowed adjacent to the port lights.

(i) Dead covers shall be of efficient design and arranged so that they can be easily and effectively secured watertight. Where fitted to opening-type port lights, they shall be of such design that it will not be necessary to release the special or locked nut in order to secure the dead cover.

RULE 29. *Automatic ventilators.*—Automatic ventilators shall not be fitted in vessels' sides below the bulkhead deck without the special sanction of the Bureau of Marine Inspection and Navigation.

RULE 30. *Inlets and discharges.*—(a) All main and auxiliary inlets and discharges shall be so arranged as to prevent accidental admission of water into the vessel. Cocks or valves are to be fitted to each such inlet or discharge at or near the shell, so arranged that they can be readily opened or closed. Sea chests are to be made with the necks as short as practicable, and where they would require to have long necks if fastened directly to the shell of the vessel, they may, instead, be attached to structural boxes built onto the shell. Sea chests shall be made of cast or forged steel.

(b) Pipes terminating at the shell are not to be fitted in a direct line between the outboard openings and the first rigid connection inboard, but are to be arranged with bends or elbows. Such bends or elbows are not to be of lead or cast iron and are to be sufficient in number to provide for expansion of the pipe, any movement due to the working of the vessel, and to offer reasonable safeguard against damage to the piping due to rubbing or bumping of the vessel in the vicinity of the outboard ends.

(c) Valves fitted on the vessel's sides are to be of substantial construction, are not to be made of cast iron and are to be effectively protected against damage. Where operating gear is provided the lead of shafting should be as direct as possible and all parts of the gear are to be protected against damage.

(d) The number of scuppers, sanitary discharges, tank overflows and other similar openings in vessels' sides shall be reduced to the minimum, either by making each discharge serve for as many as possible of the sanitary and other pipes or in any other satisfactory manner.

(e) Such discharges led through the vessel's sides from spaces below the bulkhead deck shall be fitted with efficient and accessible means for preventing water from passing inboard. It is permissible to have for each separate discharge either one automatic nonreturn valve fitted with a positive means of closing it from above the bulkhead deck or, alternatively, two automatic nonreturn valves without such means, the upper of which valves is to be so situated above the deepest subdivision load line as to be always accessible for examination under service conditions.

(f) In the case of tank overflows, the two nonreturn-valve arrangements as described in subparagraph (b) should always be used unless it is impracticable to arrange the upper valve in an accessible position, in which case the one valve with the positive means of closing may be fitted provided there are suitable arrangements to insure the valve not being closed by unauthorized persons and provided a notice is posted in a conspicuous place at the operating station to the effect that the valve must never be closed except as may be required in an emergency.

(g) Where a positive action valve is fitted the operating position above the bulkhead deck shall be always accessible and indicators shall be provided to show whether the valve is free or closed.

(h) When water closets of the under-waterline type are to be fitted, the arrangements are to be specially considered by the Bureau of Marine Inspection and Navigation.

RULE 31. *Side ports.*—(a) Gangway, cargo, and coaling ports shall be of sufficient strength. They shall be effectively closed and secured watertight before the ship leaves port and shall be kept closed during navigation.

(b) Where it is proposed to fit cargo or coaling ports partly or entirely below the deepest subdivision load line, a full report of the conditions should be made to the Bureau of Marine Inspection and Navigation showing that the working of the vessel would be hampered if the fitting of such ports were not approved.

RULE 32. *Ash chutes.*—(a) The inboard opening of each ash chute, rubbish chute, etc., shall be fitted with an efficient cover.

(b) If the inboard opening is situated below the bulkhead deck the cover shall be watertight and in addition an automatic nonreturn valve shall be fitted in the chute in an easily accessible position above the deepest subdivision load line. When the chute is not in use both the cover and the valve shall be kept closed and secured.

(c) In the case of ash ejectors, or other similar expelling devices, where the inboard openings must necessarily be below the deepest subdivision load line in the boiler room, the foregoing requirements may be waived provided that such ejectors or expelling devices are fitted with efficient valves and other fittings to prevent the accidental admission of water.

RULE 33. *Openings in vessels' sides above the bulkhead deck.*—(a) Port lights, gangways, cargo and coaling ports, and other means for closing openings in the vessels' sides above the bulkhead deck shall be of efficient design and construction and of sufficient strength having regard to the spaces in which they are fitted and their positions relative to the deepest subdivision load line.

(b) Hinged covers which can be effectively closed and secured watertight shall be fitted to port lights in 'tween decks or superstructures immediately above the bulkhead deck in the following locations:

1. In 'tween deck forecastles closed at the after end, from the stem to one-eighth of the vessel's length abaft the stem.
2. In spaces intended for the stowage of cargo, fuel, stores, or the accommodation of sailors, firemen, or steerage passengers, other than when such spaces are in a superstructure having one or both ends open.

(c) Port lights in spaces above the bulkhead deck other than as specified in subparagraph (a) may be fitted with portable dead covers or fitted with outer plugs stowed in readily accessible positions. Such dead covers or plugs are to be provided for each size of port light to the extent of at least 25 percent of the number of each size not fitted with attached dead covers.

RULE 34. *Freeboard deck.*—When the bulkhead deck is below the freeboard deck, attention is invited to the necessity of compliance with Section A of these regulations for openings in the sides of vessels below the freeboard deck.

RULE 35. *Openings in weather deck.*—(a) The bulkhead deck or a deck above it shall be weathertight in the sense that in ordinary sea conditions water will not penetrate in a downward direction.

(b) All openings in the exposed weather deck shall have coamings of ample height and strength and shall be provided with efficient means for expeditiously closing them watertight. All exposed cargo hatches are to be fitted with covers made watertight by the use of pliable gaskets, by heavy canvas tarpaulins thoroughly covering the hatch covers and firmly secured in place by battens which shall be fastened by toggles or wedges, or by the use of efficient screw fastenings.

RULE 36. *Freeing ports.*—Freeing ports and/or scuppers shall be fitted as necessary for rapidly clearing the weather deck of water under all weather conditions.

RULE 37. *Exits.*—(a) Each compartment of every vessel where passengers or crew may be quartered or anyone may be employed shall be provided with at least two means of exit so arranged that should one not be available the other will be. One of these exits must be independent of any watertight doors and should give as direct access to the open deck as practicable.

(b) Where such exits are not readily discernible they shall be clearly marked with appropriate notices.

RULE 38. *Pumping arrangements—Steamships.*—(a) Passenger vessels shall be provided with an efficient pumping plant capable of pumping from and draining any watertight compartment under all practicable conditions after a casualty whether the ship is upright or listed. For this purpose wing suctions will generally be necessary except in narrow compartments at the ends of the ship. Where close ceiling is fitted over the bilges, arrangements shall be made whereby water in the compartment may find its way to the suction pipes. Efficient means shall be provided for draining water from insulated holds.

(b) In addition to the ordinary bilge pump, worked by the main engines, or its equivalent engine-room pump, two independent power bilge pumps shall be provided, except that in ships less than 300 feet in length, having a criterion numeral less than 30, either two efficient hand pumps of the crank type fitted one forward and one aft, or a portable power pump, may be substituted for one of the additional independent power bilge pumps.

In all cases an additional independent power pump shall be fitted when the criterion numeral exceeds 30.

Sanitary, ballast and general service pumps may be accepted as independent power bilge pumps if fitted with the necessary connections to the bilge pumping system.

(c) Where two or more independent power pumps are required, the arrangement shall be such that at least one power pump will be available for use in all ordinary circumstances in which a vessel may be flooded at sea. One of the power pumps shall, therefore, be an emergency pump of a reliable submersible type. A source of power situated above the bulkhead deck shall be available for this pump in any case of emergency.

(d) Where practicable, the power bilge pumps shall be placed in separate watertight compartments so arranged or situated that these compartments will not readily be flooded by the same damage. If the engines and boilers are in two or more watertight compartments, the pumps available for bilge service shall be distributed through these compartments as far as is possible.

(e) With the exception of pumps which may be provided for peak compartments only, each bilge pump, whether operated by hand or by power, shall be arranged to draw water from any hold or machinery compartment in the ship.

(f) Each independent power bilge pump shall be capable of giving a speed of water through the main bilge pipe of not less than 400 feet per minute, and it shall have a separate direct suction, to the compartment in which it is situated, of a diameter not less than that of the bilge main. The direct suctions from each independent power bilge pump shall be arranged to pump from either side of the ship.

(g) Main circulating pumps shall have direct suction connections, provided with non-return valves, to the lowest drainage level in the machinery space, and of a diameter at least two thirds that of the main sea inlet. Where the fuel is, or may be, coal, and there is no watertight bulkhead between the engines and boilers, a direct discharge overboard shall be fitted from at least one circulating pump, or alternatively, a by-pass may be fitted to the circulating discharge.

(h) 1. All pipes from the pumps which are required for draining cargo or machinery spaces shall be entirely distinct from pipes which may be used for filling or emptying spaces where water or oil is carried.

2. Lead pipes shall not be used under coal bunkers or oil fuel storage tanks, nor in boiler or machinery spaces, including motor rooms in which oil settling tanks or oil fuel pump units are situated.

(i) The diameters of bilge mains and branches shall be approved by the Bureau of Marine Inspection and Navigation.

(j) The arrangement of the bilge and ballast pumping system shall be such as to prevent the possibility of water passing from the sea and from water ballast spaces into the cargo and machinery spaces, or from one compartment to another. Special provision shall be made to prevent any deep tank having bilge and ballast connections being inadvertently run up from the sea when containing cargo,

or pumped out through a bilge pipe when containing water ballast.

(*k*) Provision shall be made to prevent the compartment served by any bilge suction pipe being flooded, in the event of the pipe being severed or otherwise damaged, by collision or grounding, in any other compartment. For this purpose, where the pipe is at any part situated near the side of the ship or in a duct keel, there shall be fitted to the pipe in the compartment containing the open end either a nonreturn valve, or a screwdown valve which can be operated from a position above the bulkhead deck.

(*l*) All distribution boxes, cocks and valves in connection with the bilge pumping arrangement shall be in positions which are accessible at all times under ordinary circumstances. They shall be so arranged that in the event of flooding the emergency bilge pump may be operative on any compartment. If there is only one system of pipes common to all the pumps, the necessary cocks or valves for controlling the bilge suctions must be workable from above the bulkhead deck. If in addition to the main bilge pumping system an emergency bilge pumping system is provided, it shall be independent of the main system and so arranged that the emergency pump is capable of operating on any compartment under flooding conditions.

*Motor vessels.*—

(*m*) The bilge pumping arrangements in motor ships shall, so far as practicable, be equivalent to those required for steamships of similar size, except as regards main circulating pumps.

RULE 39. *Astern power.*—Vessels shall have sufficient power for going astern to secure proper control in all circumstances.

RULE 40. *Auxiliary steering apparatus.*—(*a*) Vessels shall be provided with an auxiliary steering apparatus which, however, may be of less power than the main apparatus, and need not be worked by steam or other mechanical power, provided adequate arrangements for manual operation are practicable. A duplicate main steering power plant shall be considered as an auxiliary steering apparatus within the meaning of this paragraph.

(*b*) A spare tiller properly fitted to the rudder stock with relieving tackle should be provided except in particular cases subject to the special approval of the Bureau of Marine Inspection and Navigation, where the design and arrangement of the main tiller are considered such as to warrant its omission.

(*c*) An efficient brake shall be provided so that the change from one gear or tiller to another may be effected when necessary.

RULE 41. *Subdivision load lines.*—(*a*) Subdivision load lines shall be located by measuring vertically down from the deck line required by section A of these regulations.

(*b*) The length, width, and manner of marking the lines shall be as provided in Section A, Part 2, of these regulations.

(*c*) No subdivision load line is to be placed so that the freeboard is reduced from that determined by the highest seasonal mark permitted by Section A.

(*d*) 1. When the highest subdivision load line is located on a vessel used as a passenger vessel in a position between the highest and lowest seasonal load line marks, the seasonal load line marks above the subdivision load line will be omitted and those below will be marked.

2. When the freeboard from the highest subdivision load line on a vessel used as a passenger vessel is greater than the freeboard from the lowest load line permitted by Section A, the load lines required by Section A shall be omitted and the disk with its horizontal line located in line with the highest subdivision load line.

(*e*) One fresh water line is to be marked.[12]

(*f*) Subdivision load lines shall be aft of the vertical line. The vertical line shall be extended as necessary to connect the lowest and highest load lines marked on the vessel.

(*g*) 1. When a vessel has spaces used for cargo and passengers alternatively so that the position of the subdivision load line varies with the service, subdivision load lines for the principal passenger condition shall be marked and denoted by $C_1$ and the alternative conditions marked and denoted by $C_2$, $C_3$, etc. The position of each load line and the conditions under which a particular load line is applicable shall be noted in the certificate.[14]

2. The principal passenger condition for a vessel having spaces used for passengers and cargo alternatively is the condition where only those spaces appropriated exclusively to passengers are taken into consideration for determination of the subdivision load line.

PART 3.—RULES FOR DETERMINING SUBDIVISION LOAD LINES FOR PASSENGER VESSELS ENGAGED ON FOREIGN AND COASTWISE VOYAGES ON THE GREAT LAKES

The rules contained in Part 2 of Section D are applicable in the determination and marking of passenger vessels on the Great Lakes with subdivision load lines except where otherwise stated herein:

(*a*) Passenger vessels on the Great Lakes shall be so subdivided with watertight bulkheads that, based on factors determined by the subdivision load line assigned, the vessel's margin line will not be submerged and the vessel will have positive stability in the event any one main compartment is flooded.

(*b*) Rule 4, Part 2—"Permissible length of compartments"—is not applicable. On Great Lakes passenger vessels the maximum permissible length of a compartment, having its center at any point in the vessels length, is the floodable length.

(*c*) Rule 5, Part 2—"Special rules concerning subdivision"—subparagraphs (*a*), (*b*), and (*d*) (1) are not applicable.

(*d*) Rule 28, subparagraph C, "Port lights of special construction," is not applicable.

(*e*) RULE 41. *Subdivision load lines.*—All references to Section A should read Section C when applied to Great Lakes passenger vessels and a diamond will be substituted for the disk. No "fresh water" lines will be marked.

[F. R. Doc. 37-2887; Filed, September 28, 1937; 9:32 a. m.]

[12] When a subdivision and a normal load line are combined the normal fresh water line only will be used unless the position of the subdivision load line is such that confusion will result, in which case a subdivision fresh water line may be used, marked $FC_1$, and the normal fresh water line omitted.

[14] This entry may be made on the safety certificate required by the International Convention for Safety of Life at Sea, or on the Load Line Certificate.

## BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

[Regulation A[1]]

### DISCOUNTS FOR AND ADVANCES TO MEMBER BANKS BY FEDERAL RESERVE BANKS

CONTENTS

Introduction.
Section 1. Discount of Notes, Drafts and Bills for Member Banks.
(*a*) Commercial, agricultural and industrial paper.
(*b*) Bills of exchange payable at sight or on demand.
(*c*) Construction loans.
(*d*) Agricultural paper.
(*e*) Paper of cooperative marketing associations.
(*f*) Factors' paper.
(*g*) Collateral securing discounted paper.
(*h*) Determination of eligibility.
(*i*) Limitations.
Section 2. Advances to Member Banks.
(*a*) Advances on eligible paper.
(*b*) Financial statements.
(*c*) Advances on other security under section 10 (b) of the Federal Reserve Act.
(*d*) Kinds of collateral which may be used as security for advances under section 10 (b) of the Federal Reserve Act.
Section 3. General Requirements as to Discounts and Advances.
(*a*) Applications for discounts or advances.
(*b*) Financial statements.
(*c*) Speculative use of credit by a member bank.
(*d*) Additional or marginal collateral.
(*e*) Credit extended on security of obligations of the United States.
Section 4. Paper Acquired from Nonmember Banks.
(*a*) Prohibition upon acceptance of nonmember bank paper.
(*b*) Applications for permission.
(*c*) Paper acquired from Federal Intermediate Credit Banks.
Section 5. Discounts for Federal Intermediate Credit Banks.
(*a*) Kinds and maturity of paper.
(*b*) Limitations.
Section 6. Bankers' Acceptances.
(*a*) Definition.
(*b*) Eligibility.
(*c*) Maturities.
(*d*) Dollar exchange acceptances.
(*e*) Evidence of eligibility.
Appendix.
Recommendations of the Board of Governors of the Federal Reserve System as to the minimum standards which should be observed by member banks in making loans upon real estate.
Recommendations of the Board of Governors of the Federal Reserve System as to the minimum standards for installment paper used as collateral security for advances to member banks.
Statutory Provisions.

GENERAL PRINCIPLES

The guiding principle underlying the discount policy of the Federal Reserve banks is the advancement of the public interest. Accordingly, the effect that the granting or withholding of credit accommodation by a Federal Reserve bank may have on a member bank, on its depositors and on the community is of primary importance.

In extending accommodation to any member bank, the Federal Reserve banks are required to have due regard to the demands of other member banks, as well as to the maintenance of sound credit conditions and the accommodation of commerce, industry, and agriculture, and to consider not only the nature of the paper offered, but also the general character and amount of the loans and investments of the member bank, and whether the bank has been extending an undue amount of credit for speculative purposes in securities, real estate, or commodities, or in any other way has conducted its operations in a manner inconsistent with the maintenance of sound credit conditions.

INTRODUCTION

This regulation is based upon and issued pursuant to various provisions of the Federal Reserve Act, the most important of which, together with related provisions of law, are published in the Appendix hereto. The regulation is applicable to the following forms of borrowing from a Federal Reserve bank: (1) discounts for member banks of commercial, agricultural and industrial paper and bankers' acceptances; (2) advances to member banks on their own notes secured by paper eligible for discount or purchase by Federal Reserve banks, by obligations of the United States or certain corporations owned by the United States, or by other security which is satisfactory to the Federal Reserve bank; and (3) discounts for Federal Intermediate Credit banks.

SECTION 1. DISCOUNT OF NOTES, DRAFTS AND BILLS FOR MEMBER BANKS[2]

(*a*) *Commercial, agricultural and industrial paper.*—Any Federal Reserve bank may discount for any of its member banks, under authority of sections 13 and 13a of the Federal Reserve Act, any note, draft, or bill of exchange which meets the following requirements:

(1) It must be a negotiable note, draft, or bill of exchange, bearing the indorsement of a member bank, which has been issued or drawn, or the proceeds of which have been used or are to be used, in producing, purchasing, carrying or marketing goods[3] in one or more of the steps of the process of production, manufacture, or distribution, or in meeting current operating expenses of a commercial, agricultural or industrial business, or for the purpose of carrying or trading in direct obligations of the United States (i. e. bonds, notes, Treasury bills or certificates of indebtedness of the United States);

(2) It must not be a note, draft, or bill of exchange the proceeds of which have been used or are to be used for permanent or fixed investments of any kind, such as land, buildings or machinery, or for any other fixed capital purpose;

(3) It must not be a note, draft, or bill of exchange the proceeds of which have been used or are to be used for transactions of a purely speculative character or issued or drawn for the purpose of carrying or trading in stocks, bonds or other investment securities except direct obligations of the United States (i. e. bonds, notes, Treasury bills or certificates of indebtedness of the United States);

(4) It must have a maturity at the time of discount of not exceeding ninety days, exclusive of days of grace, except that agricultural paper as defined below in this section of this regulation may have a maturity of not exceeding nine months, exclusive of days of grace; but this requirement is not applicable with respect to bills of exchange payable at sight or on demand of the kind described in subsection (*b*) of this section.

(*b*) *Bills of exchange payable at sight or on demand.*—Any Federal Reserve bank may discount for any of its member banks, under authority of section 13 of the Federal Reserve Act, negotiable bills of exchange payable at sight or on demand which (1) bear the indorsement of a member bank, (2) grow out of the domestic shipment or the exportation of nonperishable, readily marketable staples,[4] and (3) are secured by bills of lading or other shipping documents conveying or securing title to such staples. All such bills of exchange shall be forwarded promptly for collection, and demand for payment shall be made promptly, unless the drawer instructs that they be held until arrival of such staples at their destination, in which event they must be presented for payment within a reasonable time after notice of such arrival has been received. In no event shall any such bill be held by or for the account of a Federal Reserve bank for a period in excess of ninety days.

(*c*) *Construction loans.*—In addition to paper of the kinds specified above, any Federal Reserve bank may discount for any of its member banks, under authority of section 24 of the Federal Reserve Act, a negotiable note which (1) represents a loan made to finance the construction of a residential or a farm building whether or not secured by lien upon real estate, (2) is indorsed by such member bank, (3) is accompanied by a valid and binding agreement, entered into by a person[5] acceptable to the discounting Federal Reserve bank, requiring such person to advance the full amount of the loan upon the completion of the construction of such residential or farm building, and (4) matures not more than

[1] This regulation as printed herewith is in the form as revised effective October 1, 1937. (Superseding Regulation A, Series of 1930.) Any inquiry relating to this regulation should be addressed to the Federal Reserve Bank of the district in which the inquiry arises.

[2] Even though paper is not eligible for discount by a Federal Reserve bank for a member bank under the provisions of this regulation, it may be used as security for an advance by a Federal Reserve bank to a member bank under the terms and conditions of subsection (c) and subsection (d) of section 2 of this regulation if it constitutes security satisfactory to the Federal Reserve bank. In addition to the classes of paper mentioned in section 1 of this regulation a Federal Reserve bank may discount bankers' acceptances in accordance with the provisions of section 6 of this regulation.

[3] As used in this regulation the word "goods" shall be construed to include goods, wares, merchandise, or agricultural products, including livestock.

[4] A readily marketable staple within the meaning of this regulation means an article of commerce, agriculture, or industry of such uses as to make it the subject of constant dealings in ready markets with such frequent quotations of price as to make (*a*) the price easily and definitely ascertainable, and (*b*) the staple itself easy to realize upon by sale at any time.

[5] Such person may be the member bank offering the note for discount or any other individual, partnership, association or corporation.

six months from the date such loan was made and not more than ninety days from the date of such discount by such Federal Reserve bank, exclusive of days of grace.

(*d*) *Agricultural paper.*—Agricultural paper, within the meaning of this regulation, is a negotiable note, draft, or bill of exchange issued or drawn, or the proceeds of which have been or are to be used, for agricultural purposes, including the production of agricultural products, the marketing of agricultural products by the growers thereof, or the carrying of agricultural products by the growers thereof pending orderly marketing, and the breeding, raising, fattening, or marketing of livestock.

(*e*) *Paper of cooperative marketing associations.*—Notes, drafts, bills of exchange, or acceptances issued or drawn by cooperative marketing associations composed of producers of agricultural products are deemed to have been issued or drawn for an agricultural purpose within the meaning of the foregoing definition of "agricultural paper", if the proceeds thereof have been or are to be used by such association in making advances to any members thereof for an agricultural purpose, in making payments to any members thereof on account of agricultural products delivered by such members to the association, or to meet expenditures incurred or to be incurred by the association in connection with the grading, processing, packing, preparation for market, or marketing of any agricultural product handled by such association for any of its members. In addition, any other paper of such associations which complies with the applicable requirements of this regulation may be discounted. Paper of cooperative marketing associations the proceeds of which have been or are to be used (1) to defray the expenses of organizing such associations, or (2) for the acquisition of warehouses, for the purchase or improvement of real estate, or for any other permanent or fixed investment of any kind, is not eligible for discount, even though such warehouses or other property is to be used exclusively in connection with the ordinary operations of the association.

(*f*) *Factors' paper.*—Notes, drafts, and bills of exchange of factors issued as such for the purpose of making advances exclusively to producers of staple agricultural products in their raw state are eligible for discount with maturities not in excess of ninety days, exclusive of days of grace.

(*g*) *Collateral securing discounted paper.*—Any note, draft, or bill of exchange eligible for discount is not rendered ineligible because it is secured by the pledge of goods or collateral of any nature, including paper ineligible for discount.

(*h*) *Determination of eligibility.*—A Federal Reserve bank shall take such steps as may be necessary to satisfy itself as to the eligibility of any paper offered for discount. Compliance of paper with the provisions of paragraph (2) of subsection (*a*) of this section may be evidenced by a statement which adequately reflects the borrower's financial worth and evidences a reasonable excess of quick assets over current liabilities, or such compliance may be evidenced in any other manner satisfactory to the Federal Reserve bank.

(*i*) *Limitations.*—The aggregate of notes, drafts, and bills upon which any person, copartnership, association, or corporation is liable as maker, acceptor, indorser, drawer, or guarantor, discounted for any member bank shall at no time exceed the amount for which such person, copartnership, association, or corporation may lawfully become liable to a national bank under the terms of section 5200 of the Revised Statutes of the United States, as amended.[*] The law forbids a Federal Reserve bank to discount for any State member bank notes, drafts, or bills of exchange of any one borrower who is liable for borrowed money to such State member bank in an amount greater than that which could be borrowed lawfully from such State member bank were it a national bank.

SECTION 2. ADVANCES TO MEMBER BANKS

(*a*) *Advances on eligible paper.*—Any Federal Reserve bank may make advances, under authority of section 13 of the Federal Reserve Act, to any of its member banks for periods not exceeding ninety days on the promissory note of such member bank secured by such notes, drafts, bills of exchange, or bankers' acceptances as are eligible for discount by Federal Reserve banks under the provisions of this regulation or for purchase by such banks under the provisions of Regulation B.

(*b*) *Advances on Government obligations.*—Any Federal Reserve bank may make advances, under authority of section 13 of the Federal Reserve Act, to any of its member banks for periods not exceeding fifteen days[1] on the promissory note of such member bank secured (1) by the deposit or pledge of bonds, notes, certificates of indebtedness, or Treasury bills of the United States, or (2) by the deposit or pledge of debentures or other such obligations of Federal Intermediate Credit banks having maturities of not exceeding six months from the date of the advance, or (3) by the deposit or pledge of Federal Farm Mortgage Corporation bonds issued under the Federal Farm Mortgage Corporation Act and guaranteed both as to principal and interest by the United States, or (4) by the deposit of Home Owners' Loan Corporation bonds issued under the provisions of subsection (c) of section 4 of the Home Owners' Loan Act of 1933, as amended, and guaranteed both as to principal and interest by the United States.

(*c*) *Advances on other security under section 10 (b) of the Federal Reserve Act.*—Subject to the provisions of subsection (d) of this section, any Federal Reserve bank may make advances, under authority of section 10 (b) of the Federal Reserve Act, to any of its member banks upon the latter's promissory note secured to the satisfaction of such Federal Reserve bank. The rate on advances made under the provisions of this subsection shall in no event be less than one-half of 1 percent per annum higher than the highest rate applicable to discounts for member banks under the provisions of sections 13 and 13a of the Federal Reserve Act in effect at such Federal Reserve bank. Such an advance must be evidenced by the promissory note of such member bank payable either (1) on a definite date not more than four months after the date of such advance, or (2) at the option of the holder on or before a definite date not more than four months after the date of such advance.

(*d*) *Kinds of collateral which may be used as security for advances under section 10 (b) of the Federal Reserve Act.*—A Federal Reserve bank may accept as security for an advance made under the provisions of subsection (c) of this section assets of any of the classes enumerated below which are satisfactory to the Federal Reserve bank, or paper secured by assets of such classes:

(1) Assets which may be used as collateral security for advances under subsection (*a*) of this section, entitled "Advances on eligible paper", or subsection (*b*) of this section, entitled "Advances on Government obligations";

(2) Paper which would be eligible for discount or for purchase by Federal Reserve banks except by reason of the fact that the period of its maturity is greater than that permitted for paper eligible for discount or purchase;

(3) Investment securities as defined by the Comptroller of the Currency pursuant to section 5136 of the Revised Statutes of the United States;

(4) Obligations evidencing loans upon the security of stock which are made in conformity with the provisions of Regulation U;

(5) Obligations insured under the provisions of Title I or Title II of the National Housing Act;

(6) Debentures, bonds, or other such obligations issued by Federal Home Loan banks or issued under authority of the Federal Farm Loan Act, without regard to the maturity of any such obligations;

[*] Section 5200 of the Revised Statutes of the United States is printed in the Appendix to this regulation (page 2001) together with a tabular analysis of the section prepared in the office of the Comptroller of the Currency (page 2001)

[1] However, under the provisions of the last paragraph of section 13 of the Federal Reserve Act, any Federal Reserve bank may make advances for periods not exceeding ninety days to individuals, partnerships, or corporations (including banks) on their promissory notes secured by direct obligations of the United States at rates fixed for the purpose.

(7) Bills, notes, revenue bonds, and warrants which constitute general obligations of any State or of any political subdivision thereof;

(8) Obligations which are issued or drawn for the purpose of financing, refinancing, or carrying real estate and which comply substantially with the standards set forth in the recommendations relating to real estate loans in the Appendix to this regulation;

(9) Obligations which are issued or drawn for the purpose of financing or refinancing the sale of goods upon an installment basis and which comply substantially with the standards set forth in the recommendations relating to loans upon an installment basis in the Appendix to this regulation, and obligations of businesses principally engaged in extending credit on such basis and in substantial accordance with such standards.

In addition, when in the judgment of the Federal Reserve bank circumstances make it advisable to do so, the Federal Reserve bank may accept as security for an advance under subsection (c) of this section any assets other than those set forth above which are satisfactory to the Federal Reserve bank.

SECTION 3. GENERAL REQUIREMENTS AS TO DISCOUNTS AND ADVANCES

(*a*) *Applications for discounts or advances.*—Every application by a member bank for the discount of paper or for an advance to such bank must contain a certificate of such bank, in form to be prescribed by the Federal Reserve bank, that the paper offered for discount or the security offered for the advance, as the case may be, has not been acquired from a nonmember bank (otherwise than in accordance with section 4 of this regulation) or, if so acquired, that the applying member bank has received permission from the Board of Governors of the Federal Reserve System to discount with the Federal Reserve bank paper acquired from nonmember banks or to obtain advances from the Federal Reserve bank on security so acquired. Every such application shall also contain a notation by the member bank as to whether it has on file a statement which adequately reflects the financial worth of a party primarily liable on the paper offered as security for an advance or for discount or of the person from whom the member bank acquired such paper if such person is legally liable thereon. Every application of a State member bank for the discount of paper must contain a certificate or guaranty to the effect that the borrower is not liable and will not be permitted to become liable to such bank for borrowed money during the time his paper is under discount with the Federal Reserve bank in an amount greater than that which could be borrowed lawfully from such State bank were it a national bank.

(*b*) *Financial statements.*—In order to determine whether paper offered for discount or security offered for an advance is eligible and acceptable, any Federal Reserve bank may require that there be filed with it statements, or certified copies thereof, which adequately reflect the financial worth (1) of one or more parties to any note, draft, or bill of exchange offered for discount or to any obligation offered as security for an advance and (2) of any corporations or firms affiliated with or subsidiary to such party or parties. A Federal Reserve bank may in any case require such other information as it deems necessary.

(*c*) *Speculative use of credit by a member bank.*—Each Federal Reserve bank is required by law to keep itself informed of the general character and amount of the loans and investments of its member banks with a view to ascertaining whether undue use is being made of bank credit for the speculative carrying of or trading in securities, real estate, or commodities, or for any other purpose inconsistent with the maintenance of sound credit conditions; and, in determining whether to grant or refuse discounts or advances, the Federal Reserve bank is required to give consideration to such information. Each Federal Reserve bank may require such information from its member banks as it may deem necessary in order to determine whether such undue use of bank credit is being made.

(*d*) *Additional or marginal collateral.*—In connection with any discount or advance under this regulation, a Federal Reserve bank may require such additional or marginal collateral as it may deem advisable or necessary for its protection; and the requirements of this regulation with respect to collateral shall not be applicable to such additional or marginal collateral. In any case in which additional or marginal collateral is required, it is expected that the Federal Reserve bank in determining the amount will give due regard to the public welfare and the general effects that its action may have on the position of the member bank, on its depositors, and on the community; and in general a Federal Reserve bank should limit the amount of collateral it requires to the minimum consistent with safety. In any case where the amount of the assets of a member bank, at their reasonable value determined in a manner satisfactory to the Reserve bank, required as collateral in connection with any discount or advance under the provisions of this regulation exceeds at the time of the discount or advance 25 per cent of the amount of paper discounted or 125 per cent of the amount of the advance, as the case may be, the Federal Reserve bank shall include an explanation of the facts and circumstances of the case in its loan schedule submitted to the Board of Governors of the Federal Reserve System.

(*e*) *Credit extended on security of obligations of the United States.*—In any case in which the amount of an advance made by a Federal Reserve bank in accordance with the provisions of this regulation on a member bank's promissory note secured by direct obligations of the United States or obligations which are guaranteed both as to principal and interest by the United States is less than the face amount of such obligations, the Reserve bank shall include an explanation of the facts and circumstances of the case in its loan schedule submitted to the Board of Governors of the Federal Reserve System.

SECTION 4. PAPER ACQUIRED FROM NONMEMBER BANKS

(*a*) *Prohibition upon acceptance of nonmember bank paper.*—Except with the permission of the Board of Governors of the Federal Reserve System, no Federal Reserve bank shall discount or accept as security for an advance any assets acquired by a member bank from, or bearing the signature or indorsement of, a nonmember bank, except assets otherwise eligible which were purchased by the offering bank on the open market or otherwise acquired in good faith and not for the purpose of obtaining credit for a nonmember bank.

(*b*) *Applications for permission.*—An application for permission to discount paper acquired from nonmember banks or to use as security for advances assets acquired from nonmember banks shall be made by the member bank which desires to offer such paper for discount or such assets as security and shall state fully the facts which give rise to such application and the reasons why the applying member bank desires such permission. Such application shall be addressed to the Board of Governors of the Federal Reserve System but shall be submitted by the member bank to the Federal Reserve bank of the district, which will forward it promptly to the Board of Governors of the Federal Reserve System with its recommendation.

(*c*) *Paper acquired from Federal Intermediate Credit banks.*—The Board of Governors of the Federal Reserve System hereby grants permission to Federal Reserve banks to discount for member banks paper bearing the signature or indorsement of, or acquired from, Federal Intermediate Credit banks or to make advances to member banks upon the security of paper or assets bearing such a signature or indorsement or so acquired, if otherwise eligible under the law and this regulation.

SECTION 5. DISCOUNTS FOR FEDERAL INTERMEDIATE CREDIT BANKS

(*a*) *Kinds and maturity of paper.*—Any Federal Reserve bank, under authority of section 13a of the Federal Reserve

Act, may discount for any Federal Intermediate Credit bank (1) agricultural paper as defined in section 1 of this regulation, or (2) notes payable to such Federal Intermediate Credit bank covering loans or advances made by it pursuant to the provisions of section 202 (a) of Title II of the Federal Farm Loan Act, which are secured by notes, drafts, or bills of exchange eligible for discount by Federal Reserve banks. Any paper discounted for a Federal Intermediate Credit bank must bear the indorsement of such bank and must have a maturity at the time of discount of not more than nine months, exclusive of days of grace.

(*b*) *Limitations.*—No Federal Reserve bank shall discount for any Federal Intermediate Credit bank any paper which bears the indorsement of any nonmember State bank or trust company which is eligible for membership in the Federal Reserve System under the terms of section 9 of the Federal Reserve Act. In acting upon applications for the discount of paper for Federal Intermediate Credit banks, each Federal Reserve bank shall give preference to the demands of its own member banks and shall have due regard to the probable future needs of its own member banks. Except with the permission of the Board of Governors of the Federal Reserve System, no Federal Reserve bank shall discount paper for any Federal Intermediate Credit bank when its own reserves amount to less than 50 percent of its own aggregate liabilities for deposits and Federal Reserve notes in actual circulation.

SECTION 6. BANKERS' ACCEPTANCES [8]

(*a*) *Definition.*—A banker's acceptance within the meaning of this regulation is a draft or bill of exchange, whether payable in the United States or abroad and whether payable in dollars or some other money, accepted by a bank or trust company, or a firm, person, company, or corporation engaged generally in the business of granting bankers' acceptance credits.

(*b*) *Eligibility.*—Any Federal Reserve bank may discount for any of its member banks any such banker's acceptance bearing the indorsement of a member bank and having a maturity at the time of discount not greater than that prescribed by subsection (c) of this section, which has been drawn under a credit opened for the purpose of conducting or settling accounts resulting from a transaction or transactions involving any one of the following:

(1) The shipment of goods between the United States and any foreign country, or between the United States and any of its dependencies or insular possessions, or between dependencies or insular possessions and foreign countries, or between foreign countries; [9]

(2) The shipment of goods within the United States, provided shipping documents conveying security title are attached at the time of acceptance; or

(3) The storage in the United States or in any foreign country of readily marketable staples [10] provided that the bill is secured at the time of acceptance by a warehouse, terminal, or other similar receipt, conveying security title to such staples, issued by a party independent of the customer or issued by a grain elevator or warehouse company duly bonded and licensed and regularly inspected by State or Federal authorities with whom all receipts for such staples and all transfers thereof are registered and without whose consent no staples may be withdrawn; and provided further that the acceptor remains secured throughout the life of the acceptance. In the event that the goods must be withdrawn from storage prior to the maturity of the acceptance or the retirement of the credit, a trust receipt or other similar document covering the goods may be substituted in lieu of the original document, provided that such substitution is conditioned upon a reasonably prompt liquidation of the credit. In order to insure compliance with this condition it should be required, when the original document is released, either (A) that the proceeds of the goods will be applied within a specified time toward a liquidation of the acceptance credit or (B) that a new document, similar to the original one, will be resubstituted within a specified time.

*Provided,* That acceptances for any one customer in excess of 10 per cent of the capital and surplus of the accepting bank must remain actually secured throughout the life of the acceptance, and in the case of the acceptances of member banks this security must consist of shipping documents, warehouse receipts, or other such documents, or some other actual security growing out of the same transaction as the acceptance, such as documentary drafts, trade acceptances, terminal receipts, or trust receipts which have been issued under such circumstances, and which cover goods of such a character, as to insure at all times a continuance of an effective and lawful lien in favor of the accepting bank, other trust receipts not being considered such actual security if they permit the customer to have access to or control over the goods.

(*c*) *Maturities.*—No such acceptance is eligible for discount which has a maturity at the time of discount in excess of ninety days' sight, exclusive of days of grace, except that acceptances drawn for agricultural purposes and secured at the time of acceptance by warehouse receipts or other such documents conveying or securing title covering readily marketable staples may be discounted with maturities at the time of discount of not more than six months' sight, exclusive of days of grace. Although a Federal Reserve bank may legally discount an acceptance having a maturity at the time of discount not greater than that prescribed above in this subsection, an acceptance should not have a maturity which is in excess of the usual or customary period of credit required to finance the underlying transaction or which is in excess of the period reasonably necessary to finance such transaction. Since the purpose of permitting the acceptance of drafts secured by warehouse receipts or other such documents is to permit the temporary holding of readily marketable staples in storage pending a reasonably prompt sale, shipment, or distribution, no such acceptance should have a maturity in excess of the time ordinarily necessary to effect a reasonably prompt sale, shipment, or distribution into the process of manufacture or consumption.

(*d*) *Dollar exchange acceptances.*—A Federal Reserve bank may also discount any bill drawn by a bank or banker in a foreign country or dependency or insular possession of the United States for the purpose of furnishing dollar exchange as provided in Regulation C, provided that it has a maturity at the time of discount of not more than three months, exclusive of days of grace.

(*e*) *Evidence of eligibility.*—A Federal Reserve bank must be satisfied, either by reference to the acceptance itself or otherwise, that the acceptance is eligible for discount under the terms of the law and the provisions of this regulation. The bill itself should be drawn so as to evidence the character of the underlying transaction, but if it is not so drawn evidence of eligibility may consist of a stamp or certificate affixed by the acceptor in form satisfactory to the Federal Reserve bank.

APPENDIX

*Recommendations of the Board of Governors of the Federal Reserve System as to the Minimum Standards Which Should Be Observed by Member Banks in Making Loans Upon Real Estate*

While recognizing that requirements of individual banks in making loans for the purpose of financing or carrying real estate will vary according to the circumstances of particular transactions, the Board of Governors of the Federal Reserve System believes that certain minimum standards should be observed. Some of these standards are specifically required by law with respect to loans of national banks.

[8] For regulations governing the acceptance by member banks of drafts and bills of exchange drawn on them, see Regulation C.

[9] In accepting any draft or bill of exchange arising out of a shipment of the kind referred to in clause 1 of subsection (*b*) of section 6 of this regulation, the accepting bank will be expected to obtain substantiating evidence as to the eligibility of the transaction underlying such draft or bill of exchange.

[10] See footnote 4 on page 1995.

Others are advisable as a matter of sound banking practice. The examiners for the Federal Reserve banks should take such standards into consideration in reviewing loans of State member banks, and Federal Reserve banks in passing upon applications of member banks for credit accommodations supported by real estate loans should give preference to the acceptance as collateral of such loans as meet these standards. With these considerations in mind the Board recommends that member banks in making or acquiring real estate loans, other than those insured under Title II of the National Housing Act, apply the standards set forth below as minimum requirements:

(1) Obligations issued or drawn for the purpose of financing, refinancing, or carrying real estate should be secured by first lien, evidenced by mortgage, trust deed, or other such instrument, upon improved real estate, including improved farm land and improved business and residential properties;

(2) The amount of the loan or loans evidenced by such obligations should not exceed 50 per cent of the appraised value of the real estate securing such loan or loans and no such loan should be for a longer term than five years, except that any such loan may be in an amount not exceeding 60 per cent of the appraised value of the real estate securing such loan and for a term not longer than ten years if the loan is secured by an amortized mortgage, deed of trust, or other such instrument under the terms of which 40 per cent or more of the principal of the loan will be amortized within a period of not more than ten years by means of substantially equal monthly, quarterly, semiannual, or annual payments on principal with interest added or on principal and interest combined, and member banks should take reasonable steps to satisfy themselves that the payments and other requirements of the obligations will be met in accordance with their terms;

(3) There should be on file with the member bank with respect to such obligations the following documents or properly certified or photostat copies thereof:

(*a*) an appraisal of the value of the real estate which has been made within a reasonable time before the obligation was acquired by the member bank (i) by one or more competent and experienced appraisers independent of the member bank who have no interest, direct or indirect, in the real estate, or (ii) if the member bank maintains a separate real estate department, by one or more officers or employees who are regularly assigned to such department, who specialize in real estate appraisals and who have no interest, direct or indirect, in the real estate, or (iii) by a committee appointed by the board of directors and consisting of not less than two members who are qualified for the purpose and have no interest, direct or indirect, in the real estate, and which appraisal contains, in addition to such other data as may be required by the member bank, statements as to the purpose for which the real estate is used or is proposed to be used and the nature and amount of the income received therefrom;

(*b*) an adequate description of the real estate, including the improvements;

(*c*) evidence of the title to the real estate in the form of a certificate of a title company, a title insurance policy, an opinion of a competent attorney, or other form satisfactory to the member bank;

(*d*) satisfactory evidence that no taxes or assessments thereon are delinquent and that adequate insurance is carried; and

(*e*) such other information and documents as the circumstances of the case may render advisable.

*Recommendations of the Board of Governors of the Federal Reserve System as to the Minimum Standards for Installment Paper Used as Collateral Security for Advances to Member Banks*

While recognizing that requirements of individual banks in making loans for the purpose of financing or refinancing the sale of goods upon an installment basis will vary according to the circumstances of particular transactions, the Board of Governors of the Federal Reserve System believes that certain minimum standards should be observed as a matter of sound banking practice. The examiners for the Federal Reserve banks should take such standards into consideration in reviewing loans of State member banks, and Federal Reserve banks in passing upon applications of member banks for credit accommodations supported by obligations issued or drawn for the purpose of financing or refinancing the sale of goods upon an installment basis should give preference to the acceptance as collateral of such loans as meet these standards. With these considerations in mind, the Board recommends that the standards set forth below be applied by all member banks as minimum requirements in making or acquiring such loans:

(1) Obligations which are issued or drawn for the purpose of financing or refinancing the sale of goods upon an installment basis should be secured by first lien upon or retention of title to such goods through a chattel mortgage, conditional sales contract, bailment lease, or other similar instrument, insuring at all times the continuance of an effective and lawful lien or retention of title in favor of the holder of such obligations;

(2) The goods should be of such nature and the terms of the obligations should be such that in the event of the resale of the goods at any time during the life of the obligations it may reasonably be expected that the sum realized will be substantially greater than that necessary to liquidate the amount of the obligations then unpaid, including interest and all charges; and

(3) Member banks should take reasonable steps to satisfy themselves that the payments and other requirements of the obligations will be met in accordance with their terms.

*Statutory Provisions*

Section 4 of the Federal Reserve Act reads in part as follows:

Said board of directors shall administer the affairs of said bank fairly and impartially and without discrimination in favor of or against any member bank or banks and may, subject to the provisions of law and the orders of the Board of Governors of the Federal Reserve System, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks, the maintenance of sound credit conditions, and the accommodation of commerce, industry, and agriculture. The Board of Governors of the Federal Reserve System may prescribe regulations further defining within the limitations of this Act the conditions under which discounts, advancements, and the accommodations may be extended to member banks. Each Federal reserve bank shall keep itself informed of the general character and amount of the loans and investments of its member banks with a view to ascertaining whether undue use is being made of bank credit for the speculative carrying of or trading in securities, real estate, or commodities, or for any other purpose inconsistent with the maintenance of sound credit conditions; and, in determining whether to grant or refuse advances, rediscounts or other credit accommodations, the Federal reserve bank shall give consideration to such information. The chairman of the Federal Reserve bank shall report to the Board of Governors of the Federal Reserve System any such undue use of bank credit by any member bank, together with his recommendation. Whenever, in the judgment of the Board of Governors of the Federal Reserve System, any member bank is making such undue use of bank credit, the Board may, in its discretion, after reasonable notice and an opportunity for a hearing, suspend such bank from the use of the credit facilities of the Federal Reserve System and may terminate such suspension or may renew it from time to time.

Section 9 of the Federal Reserve Act reads in part as follows:

*Provided, however,* That no Federal Reserve bank shall be permitted to discount for any State bank or trust company notes, drafts, or bills of exchange of any one borrower who is liable for borrowed money to such State bank or trust company in an amount greater than that which could be borrowed lawfully from such State bank or trust company were it a national banking association. The Federal Reserve bank, as a condition of the discount of notes, drafts, and bills of exchange for such State bank or trust company, shall require a certificate or guaranty to the effect that the borrower is not liable to such bank in excess of the amount provided by this section, and will not be permitted to become liable in excess of this amount while such notes, drafts, or bills of exchange are under discount with the Federal Reserve bank.

Section 10 (b) of the Federal Reserve Act reads as follows:

SEC. 10 (b). Any Federal Reserve bank, under rules and regulations prescribed by the Board of Governors of the Federal Reserve System, may make advances to any member bank on its time or demand notes having maturities of not more than four months and which are secured to the satisfaction of such Federal Reserve bank. Each such note shall bear interest at a rate not less than one-half of 1 per centum per annum higher than the highest discount rate in effect at such Federal Reserve bank on the date of such note.

Section 13 of the Federal Reserve Act reads in part as follows:

Upon the indorsement of any of its member banks, which shall be deemed a waiver of demand, notice and protest by such bank as to its own indorsement exclusively, any Federal Reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes, the Board of Governors of the Federal Reserve System to have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this Act. Nothing in this Act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount, and the notes, drafts, and bills of exchange of factors issued as such making advances exclusively to producers of staple agricultural products in their raw state shall be eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States.[11] Notes, drafts, and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 90 days, exclusive of grace.

* * * * *

Upon the indorsement of any of its member banks, which shall be deemed a waiver of demand, notice, and protest by such bank as to its own indorsement exclusively, and subject to regulations and limitations to be prescribed by the Board of Governors of the Federal Reserve System, any Federal reserve bank may discount or purchase bills of exchange payable at sight or on demand which grow out of the domestic shipment or the exportation of nonperishable, readily marketable agricultural and other staples and are secured by bills of lading or other shipping documents conveying or securing title to such staples: *Provided*, That all such bills of exchange shall be forwarded promptly for collection, and demand for payment shall be made with reasonable promptness after the arrival of such staples at their destination: *Provided further*, That no such bill shall in any event be held by or for the account of a Federal reserve bank for a period in excess of ninety days. In discounting such bills Federal reserve banks may compute the interest to be deducted on the basis of the estimated life of each bill and adjust the discount after payment of such bills to conform to the actual life thereof.

The aggregate of notes, drafts, and bills upon which any person, copartnership, association, or corporation is liable as maker, acceptor, indorser, drawer, or guarantor rediscounted for any member bank, shall at no time exceed the amount for which such person, copartnership, association, or corporation may lawfully become liable to a national banking association under the terms of section 5200 of the Revised Statutes, as amended: *Provided, however*, That nothing in this paragraph shall be construed to change the character or class of paper now eligible for rediscount by Federal reserve banks.

Any Federal reserve bank may discount acceptances of the kinds hereinafter described, which have a maturity at the time of discount of not more than ninety days' sight, exclusive of days of grace, and which are indorsed by at least one member bank; *Provided*, That such acceptances if drawn for an agricultural purpose and secured at the time of acceptance by warehouse receipts or other such documents conveying or securing title covering readily marketable staples may be discounted with a maturity at the time of discount of not more than six months' sight exclusive of days of grace.

Any member bank may accept drafts or bills of exchange drawn upon it having not more than six months' sight to run, exclusive of days of grace, which grow out of transactions involving the importation or exportation of goods; or which grow out of transactions involving the domestic shipment of goods provided shipping documents conveying or securing title are attached at the time of acceptance; or which are secured at the time of acceptance by a warehouse receipt or other such document conveying or securing title covering readily marketable staples. * * *

Any Federal Reserve bank may make advances for periods not exceeding fifteen days to its member banks on their promissory notes secured by the deposit or pledge of bonds, notes, certificates of indebtedness, or Treasury bills of the United States, or by the deposit or pledge of debentures or other such obligations of Federal intermediate credit banks which are eligible for purchase by Federal reserve banks under section 13 (a) of this Act, or by the deposit or pledge of Federal Farm Mortgage Corporation bonds issued under the Federal Farm Mortgage Corporation Act, or by the deposit or pledge of bonds issued under the provisions of subsection (c) of Section 4 of the Home Owners' Loan Act of 1933, as amended; and any Federal reserve bank may make advances for periods not exceeding ninety days to its member banks on their promissory notes secured by such notes, drafts, bills of exchange, or bankers' acceptances as are eligible for rediscount or for purchase by Federal reserve banks under the provisions of this Act. All such advances shall be made at rates to be established by such Federal reserve banks, such rates to be subject to the review and determination of the Board of Governors of the Federal Reserve System. If any member bank to which any such advance has been made shall, during the life or continuance of such advance, and despite an official warning of the reserve bank of the district or of the Board of Governors of the Federal Reserve System to the contrary, increase its outstanding loans secured by collateral in the form of stocks, bonds, debentures, or other such obligations, or loans made to members of any organized stock exchange, investment house, or dealer in securities, upon any obligation, note, or bill, secured or unsecured, for the purpose of purchasing and/or carrying stocks, bonds, or other investment securities (except obligations of the United States) such advance shall be deemed immediately due and payable, and such member bank shall be ineligible as a borrower at the reserve bank of the district under the provisions of this paragraph for such period as the Board of Governors of the Federal Reserve System shall determine: *Provided*, That no temporary carrying or clearance loans made solely for the purpose of facilitating the purchase or delivery of securities offered for public subscription shall be included in the loans referred to in this paragraph.

* * * * * *

The discount and rediscount and the purchase and sale by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange, and of acceptances authorized by this Act, shall be subject to such restrictions, limitations, and regulations as may be imposed by the Board of Governors of the Federal Reserve System.

* * * * * *

Any member bank may accept drafts or bills of exchange drawn upon it having not more than three months' sight to run, exclusive of days of grace, drawn under regulations to be prescribed by the Board of Governors of the Federal Reserve System by banks or bankers in foreign countries or dependencies or insular possessions of the United States for the purpose of furnishing dollar exchange as required by the usages of trade in the respective countries, dependencies, or insular possessions. Such drafts or bills may be acquired by Federal reserve banks in such amounts and subject to such regulations, restrictions, and limitations as may be prescribed by the Board of Governors of the Federal Reserve System: * * *.

Section 13a of the Federal Reserve Act as amended reads in part as follows:

Upon the indorsement of any of its member banks, which shall be deemed a waiver of demand, notice, and protest by such bank as to its own indorsement exclusively, any Federal reserve bank may, subject to regulations and limitations to be prescribed by the Board of Governors of the Federal Reserve System, discount notes, drafts, and bills of exchange issued or drawn for an agricultural purpose, or based upon live stock, and having a maturity, at the time of discount, exclusive of days of grace, not exceeding nine months. * * *.

That any Federal reserve bank may, subject to regulations and limitations to be prescribed by the Board of Governors of the Federal Reserve System, rediscount such notes, drafts, and bills for any Federal Intermediate Credit Bank, except that no Federal reserve bank shall rediscount for a Federal Intermediate Credit Bank any such note or obligation which bears the indorsement of a nonmember State bank or trust company which is eligible for membership in the Federal reserve system, in accordance with section 9 of this Act. Any Federal reserve bank may also, subject to regulations and limitations to be prescribed by the Board of Governors of the Federal Reserve System, discount notes payable to and bearing the indorsement of any Federal intermediate credit bank covering loans or advances made by such bank pursuant to the provisions of section 202 (a) of Title II of the Federal Farm Loan Act, as amended (U. S. C., Title 12, ch. 8, sec. 1031), which have maturities at the time of discount of not more than nine months, exclusive of days of grace, and which are secured by notes, drafts, or bills of exchange eligible for rediscount by Federal Reserve banks.

* * * * * *

Notes, drafts, bills of exchange or acceptances issued or drawn by cooperative marketing associations composed of producers of agricultural products shall be deemed to have been issued or drawn for an agricultural purpose, within the meaning of this section, if the proceeds thereof have been or are to be advanced by such association to any members thereof for an agricultural purpose, or have been or are to be used by such association in making payments to any members thereof on account of agricultural products delivered by such members to the association, or if such proceeds have been or are to be used by such association to meet expenditures incurred or to be incurred by the association in connection with the grading, processing, packing, preparation for market, or marketing of any agricultural product handled by such association for any of its members: *Provided*, That the express enumeration in this paragraph of certain classes of paper of cooperative marketing associations as eligible for rediscount shall not be construed as rendering ineligible any other class of paper of such associations which is now eligible for rediscount.

The Board of Governors of the Federal Reserve System may, by regulation, limit to a percentage of the assets of a Federal reserve bank the amount of notes, drafts, acceptances, or bills having a maturity in excess of three months, but not exceeding six months, exclusive of days of grace, which may be discounted by such bank, and the amount of notes, drafts, bills, or acceptances having a maturity in excess of six months, but not exceeding nine months, which may be rediscounted by such bank.

Section 19 of the Federal Reserve Act reads in part as follows:

* * * No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this Act, except by permission of the Board of Governors of the Federal Reserve System.

Section 24 of the Federal Reserve Act reads in part as follows:

Loans made to finance the construction of residential or farm buildings and having maturities of not to exceed six months, whether or not secured by a mortgage or similar lien on the real estate upon which the residential or farm building is being constructed, shall not be considered as loans secured by real estate within the meaning of this section but shall be classed as ordinary commercial loans: *Provided*, That no national banking association shall invest in, or be liable on, any such loans in an aggregate amount in excess of 50 per centum of its actually paid-in and unimpaired capital. Notes representing such loans shall be eligible for discount as commercial paper within the terms of the second paragraph of section 13 of the Federal Reserve Act, as amended, if accompanied by a valid and binding agreement to advance the full amount of the loan upon the completion of the building entered into by an individual, partnership, association, or corporation acceptable to the discounting bank.

Section 5200 of the Revised Statutes of the United States reads as follows:

SEC. 5200. The total obligations to any national banking association of any person, copartnership, association, or corporation shall at no time exceed 10 per centum of the amount of the capital stock of such association actually paid in and unimpaired and 10 per centum of its unimpaired surplus fund. The term "obligations" shall mean the direct liability of the maker or acceptor of paper discounted with or sold to such association and the liability of the indorser, drawer, or guarantor who obtains a loan from or discounts paper with or sells paper under his guaranty to such association and shall include in the case of obligations of a copartnership or association the obligations of the several members thereof and shall include in the case of obligations of a corporation all obligations of all subsidiaries thereof in which such corporation owns or controls a majority interest. Such limitation of 10 per centum shall be subject to the following exceptions:

(1) Obligations in the form of drafts or bills of exchange drawn in good faith against actually existing values shall not be subject under this section to any limitation based upon such capital and surplus.

(2) Obligations arising out of the discount of commercial or business paper actually owned by the person, copartnership, association, or corporation negotiating the same shall not be subject under this section to any limitation based upon such capital and surplus.

(3) Obligations drawn in good faith against actually existing values and secured by goods or commodities in process of shipment shall not be subject under this section to any limitation based upon such capital and surplus.

(4) Obligations as indorser or guarantor of notes, other than commercial or business paper excepted under (2) hereof, having a maturity of not more than six months, and owned by the person, corporation, association, or copartnership indorsing and negotiating the same, shall be subject under this section to a limitation of 15 per centum of such capital and surplus in addition to such 10 per centum of such capital and surplus.

(5) Obligations in the form of banker's acceptances of other banks of the kind described in section 13 of the Federal Reserve Act shall not be subject under this section to any limitation based upon such capital and surplus.

(6) Obligations of any person, copartnership, association or corporation, in the form of notes or drafts secured by shipping documents, warehouse receipts or other such documents transferring or securing title covering readily marketable nonperishable staples when such property is fully covered by insurance, if it is customary to insure such staples, shall be subject under this section to a limitation of 15 per centum of such capital and surplus in addition to such 10 per centum of such capital and surplus when the market value of such staples securing such additional obligations is not at any time less than 115 per centum of the face amount of such obligation, and to an additional increase of limitation of 5 per centum of such capital and surplus in addition to such 25 per centum of such capital and surplus when the market value of such staples securing such additional obligation is not at any time less than 120 per centum of the face amount of such additional obligation, and to a further additional increase of limitation of 5 per centum of such capital and surplus in addition to such 30 per centum of such capital and surplus when the market value of such staples securing such additional obligation is not at any time less than 125 per centum of the face amount of such additional obligation, and to a further additional increase of limitation of 5 per centum of such capital and surplus in addition to such 35 per centum of such capital and surplus when the market value of such staples securing such additional obligation is not at any time less than 130 per centum of the face amount of such additional obligation, and to a further additional increase of limitation of 5 per centum of such capital and surplus in addition to such 40 per centum of such capital and surplus when the market value of such staples securing such additional obligation is not at any time less than 135 per centum of the face amount of such additional obligation, and to a further additional increase of limitation of 5 per centum of such capital and surplus in addition to such 45 per centum of such capital and surplus when the market value of such staples securing such additional obligation is not at any time less than 140 per centum of the face amount of such additional obligation, but this exception shall not apply to obligations of any one person, copartnership, association or corporation arising from the same transactions and/or secured upon the identical staples for more than ten months.

(7) Obligations of any person, copartnership, association, or corporation in the form of notes or drafts secured by shipping documents or instruments transferring or securing title covering livestock or giving a lien on livestock when the market value of the livestock securing the obligation is not at any time less than 115 per centum of the face amount of the notes covered by such documents shall be subject under this section to a limitation of 15 per centum of such capital and surplus in addition to such 10 per centum of such capital and surplus.

(8) Obligations of any person, copartnership, association, or corporation in the form of notes secured by not less than a like amount of bonds or notes of the United States issued since April 24, 1917, or certificates of indebtedness of the United States, Treasury bills of the United States, or obligations fully guaranteed both as to principal and interest by the United States, shall (except to the extent permitted by rules and regulations prescribed by the Comptroller of the Currency, with the approval of the Secretary of the Treasury) be subject under this section to a limitation of 15 per centum of such capital and surplus in addition to such 10 per centum of such capital and surplus.

(9) Obligations representing loans to any national banking association or to any banking institution organized under the laws of any State, or to any receiver, conservator, or superintendent of banks, or to any other agent, in charge of the business and property of any such association or banking institution, when such loans are approved by the Comptroller of the Currency, shall not be subject under this section to any limitation based upon such capital and surplus.

*Tabular Analysis of Section 5200 of the Revised Statutes of the United States Prepared in the Office of the Comptroller of the Currency*

| Obligations (see definition in section 5200 above) | Amounts loanable |
|---|---|
| (A) Accommodation or straight loans, whether or not single name, including liability as endorser or guarantor (where endorser or guarantor receives the proceeds from bank) of paper not coming within exceptions 2 and 4.<br>Loans secured by stocks, bonds, and authorized real estate mortgages. | Maximum limit, 10 percent of bank's paid up and unimpaired capital and surplus. |
| (1) Drafts or "bills of exchange drawn in good faith against actually existing values." | No limit imposed by law. |
| (2) Commercial or business paper (of other makers) actually owned by the person, copartnership, association, or corporation negotiating the same. | No limit imposed by law. |
| (3) Obligations secured by goods or commodities in process of shipment. | No limit imposed by law. |
| (4) Obligations as endorser or guarantor of notes (other than commercial or business paper) maturing within six months, owned by endorser. | 15 percent in addition to 10 percent (A). |
| (5) Bankers' acceptances of the kinds described in section 13 of the Federal Reserve Act. | No limit imposed by law. |

[11] Or Treasury bills or certificates of indebtedness. See act approved June 17, 1929 (46 Stat., 19), amending sec. 5 of Second Liberty Bond Act, approved Sept. 24, 1917 (40 Stat., 290).

*Tabular Analysis of Section 5200 of the Revised Statutes of the United States Prepared in the Office of the Comptroller of the Currency*—Continued

| Obligations (see definition in section 5200 above) | Amounts loanable |
|---|---|
| (6) Obligations secured by shipping, documents, warehouse receipts, or other such documents, transferring or securing title covering readily marketable nonperishable staples— | |
| (a) When the actual market value of the property is not at any time less than shown in table herewith. | 15 percent, secured by 115 percent.<br>5 percent, secured by 120 percent.<br>5 percent, secured by 125 percent.<br>5 percent, secured by 130 percent.<br>5 percent, secured by 135 percent.<br>5 percent, secured by 140 percent. |
| (b) When the property is fully covered by insurance (if customary to insure such commodity), and in no event shall this exception apply to obligations of any one customer arising from the same transactions and/or secured upon the identical staples for more than 10 months. | 40 percent in addition to regular 10 percent loan (A). |
| (7) Obligations secured by shipping documents or instruments covering livestock or giving a lien thereon having a market value of not less than 115 percent of the amount of the loan. | 15 percent in addition to regular 10 percent loan (A). |
| (8) Notes secured by not less than a *like face amount* of bonds or notes of the United States issued since April 24, 1917, or by certificates of indebtedness of the United States, Treasury bills of the United States or obligations fully guaranteed by the United States as to principal and interest. | 15 percent of bank's capital and surplus, *in addition* to the amount allowed under (A), or if the full amount allowed under (A) is not loaned, then the amount which may be loaned in the manner described under (8) is increased by the loanable amount not used under (A). In other words, the amount loaned under (A) must never be more than 10 percent, but the aggregate of (A) and (8) may equal, but not exceed, 25 percent. |
| (9) Loans to any bank or representative in charge of its business, when approved by the Comptroller (Act May 20, 1933). | No limit. |

The above regulation was approved by the Board of Governors of the Federal Reserve System on September 14, 1937, to become effective October 1, 1937.

## FEDERAL HOME LOAN BANK BOARD.

### Home Owners' Loan Corporation.

ADDING NEW SECTION TO PROPERTY MANAGEMENT CHAPTER (CHAPTER 3) OF THE MANUAL

PAYMENT OF DELINQUENT WATER BILLS

*Be it resolved,* That pursuant to the authority vested in the Board by Home Owners' Loan Act of 1933 (48 Stat. 128, 129) as amended by Sections 1 and 13 of the Act of April 27, 1934 (48 Stat. 643–647) and particularly by Sections 4–a and 4–k of said Act as amended, a section be added to the Consolidated Manual, said Section to become effective immediately upon adoption of this resolution, and to be appropriately numbered and added to the Property Management Chapter (Chapter 3) of the Consolidated Manual when completed, and to read as follows:

The General Manager is vested with the authority to direct payment of delinquent water bills where required to assure continuance of water service in respect to properties owned by the Corporation, or those under the jurisdiction of Property Management Division.

The General Manager, with the approval of the General Counsel, is authorized to approve and execute on behalf of the Corporation any agreement with municipal officials or private water companies designed to compromise such water service charges with respect to present or future cases in any state.

Any Regional or State Manager may exercise the authority herein granted, under procedure and limitations prescribed by the General Manager with the approval of the General Counsel.

Adopted by the Federal Home Loan Bank Board on September 27, 1937.

[SEAL] R. L. NAGLE, *Secretary.*

Article VII. Assignments.
Article VIII. Vested rights.
Article IX. Amendments.
Article X. Effective date.

ADMINISTRATIVE RULES OF THE FEDERAL HOUSING ADMINISTRATOR FOR MUTUAL MORTGAGE INSURANCE UNDER TITLE II OF THE NATIONAL HOUSING ACT

*Section I. Approval of Mortgagees*

1. The following institutions are hereby approved as mortgagees under Section 203 (b) of the National Housing Act:

(*a*) National Mortgage Associations,
(*b*) Federal Reserve Banks,
(*c*) Federal Home Loan Banks,
(*d*) Reconstruction Finance Corporation,
(*e*) RFC Mortgage Company, and
(*f*) any other Federal, State or municipal governmental agency that is or may hereafter be empowered to hold mortgages insured under Title II of the National Housing Act as security or as collateral or for any other purpose.

2. Members of the Federal Reserve System, of the Federal Deposit Insurance Corporation, and of the Federal Home Loan Bank System will be approved as mortgagees upon application.

3. Any charitable or nonprofit organization which presents evidence that it is responsible, has permanent funds of not less than one hundred thousand dollars ($100,000), and has experience in mortgage investment, may be approved upon application.

4. Any other institution not hereinbefore mentioned will be approved as a mortgagee upon application if it has the following qualifications and meets the following conditions to the satisfaction of the Administrator:

(*a*) it is a chartered institution or other permanent organization having succession;

(*b*) it is subject to the inspection and supervision of some governmental agency; or
if not subject to inspection and supervision by some governmental agency, it shall submit an independent detailed audit of its books made by an accountant satisfactory to the Administrator and reflecting a condition satisfactory to him, and also, so long as its approval as a mortgagee continues, shall file with the Administrator similar audits at least once in each calendar year and submit at any time to such examination of its books and affairs as the Administrator may require, and comply with any other conditions that the Administrator may impose;

(*c*) its principal activity is lending on or investing in mortgages, funds which are under its own control; and it has sound capital funds properly proportioned to its liabilities and to the character and extent of its operations, which funds shall be of a value of not less than one hundred thousand dollars ($100,000): provided, that this qualification and condition as to the minimum amount of capital funds shall not apply,

(1) to an institution or other permanent organization subject to the inspection and supervision of some governmental agency, or

(2) to an institution or other permanent organization that establishes to the satisfaction of the Administrator that it is a duly authorized loan correspondent of, and if its approval is requested by, an approved mortgagee or assignee which lends on, or invests in, mortgages on a national scale and is subject to the inspection and supervision of some governmental agency, on the condition that the termination of its relationship as such correspondent will be cause (subject to the provisions of subsection (6) of this section) for withdrawal of its approval as an approved mortgagee and on the further condition that the correspondent institution and the institution for which it is authorized to act shall agree to promptly notify the Administrator of the termination of such relationship; and

(*d*) if it is not subject to the inspection and supervision of some governmental agency, it shall submit an agreement in writing: (1) that so long as it continues to be approved as a mortgagee, it will not issue any mortgage participating certificates on which it assumes personal liability, or issue any guaranty with respect to principal or interest of any mortgage, except that any such obligations outstanding on the date of the application of such institution may thereafter be renewed; and (2) that it will segregate all monthly payments under mortgages insured by the Administrator, received by it on account of ground rents, taxes, assessments, and insurance premiums, and will deposit such funds in a special account, or accounts, with some banking institution which is subject to the inspection and supervision of some governmental agency and shall use such funds for no purpose other than that for which they were received.

5. Approval as a mortgagee under this section, of a banking institution or trust company which is subject to the inspection and supervision of some governmental agency, shall be deemed to constitute approval of such institution or company when lawfully acting in a fiduciary capacity in investing fiduciary funds which are under its individual or joint control. Any instrument creating such fiduciary relationship shall be irrevocable and shall provide that upon termination or distribution, any insured mortgages held in the fiduciary estate shall be disposed of to a mortgagee approved under this or the succeeding section.

Nothing in this section shall be construed to permit the sale to the general public of instruments representing the beneficial interest in all or part of one or more insured mortgages.

6. Approval of an institution as a mortgagee may be withdrawn at any time by notice from the Administrator. In the discretion of the Administrator, the transfer of an insured mortgage to a mortgagee not approved to act under this or the succeeding section, or the failure of a mortgagee not subject to the inspection and supervision of some governmental agency, to segregate all funds received from mortgagors on account of ground rents, taxes, assessments and insurance premiums, and to deposit such funds in a special account, or accounts, with some banking institution which is subject to the inspection and supervision of some governmental agency, or the use of such funds for any purpose other than that for which they were received will be cause for withdrawal of approval. Withdrawal of approval will in no case affect the insurance on mortgages theretofore accepted for insurance.

*Section II. Approval of Acceptable Assignees*

1. The Administrator will upon application approve a chartered institution or other permanent organization as an acceptable assignee if such institution or organization meets the following conditions to the satisfaction of the Administrator:

(*a*) it is a corporation or other permanent organization having succession;

(*b*) it has sound capital funds of not less than $100,000;

(*c*) it is subject to the inspection and supervision of some governmental agency;

(*d*) its investments in mortgage loans are intended for its own portfolio; and

(*e*) its facilities are such that it will be able properly to service mortgages held by it.

2. Such an acceptable assignee shall be entitled to acquire insured mortgages from approved mortgagees by assignment after the execution and insurance of such mortgages, and to hold such mortgages without invalidating the insurance thereof, and to service them while so held. An acceptable assignee is not authorized to initiate insured mortgage loans originally or to apply for the insurance of mortgages under Section 203 (a) of the National Housing Act; but shall in all other respects be considered as included in the term "mortgagee" as used in these Administrative Rules and the Regulations of the Federal Housing Administrator.

3. Approval of an institution as an acceptable assignee may be withdrawn at any time by notice from the Administrator. Except in individual cases, approved by the Administrator, transfer of an insured mortgage to a mortgagee not approved to act under this or the preceding section will be cause for withdrawal of approval. Withdrawal of approval will in no case affect the insurance on mortgages theretofore accepted for insurance.

*Section III. Application for Insurance*

1. Any approved mortgagee may submit an application for insurance of a mortgage about to be executed, or of a mortgage already executed, if offered for insurance within one year from the date of execution.

2. The application must be made upon a standard form prescribed by the Administrator.

3. The application must be accompanied by the mortgagee's check for a sum computed at a rate of three dollars ($3) per thousand dollars ($1,000) of the original principal amount of the mortgage loan to be insured, to cover the costs of appraisal by the Administrator, but in no case shall such sum be less than ten dollars ($10). If an application is refused without an appraisal being made by the Administrator, the fee will be returned to the applicant.

If, after insurance, the amount of an insured mortgage is increased either by amendment or by the substitution of a new insured mortgage the fee herein provided for shall be based upon the amount of such increase but in no case shall be less than ten dollars ($10).

The Administrator may agree on fees different from those fixed in this subsection in cases where substantially all residential mortgages and real estate owned or held by an approved mortgagee are examined for mortgage insurance as one operation.

*Section IV. Eligible Mortgages*

To be eligible for insurance—

1. The mortgage must be executed upon a form approved by the Administrator for use in the jurisdiction in which the property covered by the mortgage is situated, by a mortgagor with the qualifications hereinafter set forth in Section V, must be a first lien upon property that conforms with the property standards prescribed by the Administrator, and the entire principal amount of the mortgage must have been disbursed to, or for the account of, the mortgagor.

2. The mortgage should involve a principal obligation in an amount of one hundred dollars ($100) or multiples thereof

but must not exceed sixteen thousand dollars ($16,000) and must not exceed eighty per centum (80%) of the appraised value of the property as of the date the mortgage is insured.

3. The mortgage must have a maturity satisfactory to the Administrator, not to be less than three (3) nor more than twenty (20) years from the date of its execution as shown by the instrument, and should come due upon the first day of a month.

4. The mortgage may bear interest at such rate as may be agreed upon between the mortgagee and the mortgagor, but in no case shall such interest rate be in excess of five per centum (5%) per annum. Interest shall be payable in monthly installments on the principal then outstanding.

5. The mortgage must contain complete amortization provisions satisfactory to the Administrator, requiring monthly payments by the mortgagor not in excess of his reasonable ability to pay as determined by the Administrator. The sum of the principal and interest payments in each month shall be substantially the same. The period during which amortization payments are made should be an exact number of years, or nineteen (19) years and six (6) months.

6. The mortgage may require the mortgagor to pay to the mortgagee an annual service charge at such rate as may be agreed upon between the mortgagee and the mortgagor, but in no case shall such service charge exceed one-half of one per centum (½%) per annum upon outstanding monthly balances. Any such service charge shall be payable in monthly installments.

7. The mortgage may provide for monthly payments by the mortgagor to the mortgagee of an amount equal to one-twelfth (1/12) of the annual mortgage insurance premium payable by the mortgagee to the Administrator. Such payments shall continue only so long as the contract of insurance shall remain in effect. The mortgage should provide that upon the payment of the mortgage before maturity, the mortgagor shall pay the premium charge referred to in Article III, Section 2, of the Regulations.

In the case of building and loan associations in the Commonwealth of Pennsylvania the mortgage may provide for monthly payments by the mortgagor of an amount equal to one-twelfth (1/12) of three-fourths of one per centum (¾%) annually of the original mortgage obligation, in lieu of the service charge and the payments to put the mortgagee in funds to pay the mortgage insurance premium, provided for in subsection 6 and the first paragraph of this subsection.

8. The mortgage shall provide for such equal monthly payments by the mortgagor to the mortgagee as will amortize the ground rents, if any, and the estimated amount of all taxes, special assessments, if any, and fire and other hazard insurance premiums, within a period ending one month prior to the dates on which the same become delinquent. The mortgage shall further provide that such payments shall be held by the mortgagee in a manner satisfactory to the Administrator, for the purpose of paying such ground rents, taxes, assessments, and insurance premiums, before the same become delinquent, for the benefit and account of the mortgagor. The mortgage must also make provision for adjustments in case the estimated amount of such taxes, assessments, and insurance premiums shall prove to be more, or less, than the actual amount thereof so paid by the mortgagor.

9. All monthly payments to be made by the mortgagor to the mortgagee as hereinabove provided, in subsections 4 to 8, inclusive, shall be added together and the aggregate amount thereof shall be paid by the mortgagor each month in a single payment. The mortgagee shall apply the same to the following items in the order set forth:

(*a*) premium charges under the contract of insurance;
(*b*) service charge, if any;
(*c*) ground rents, taxes, special assessments, and fire and other hazard insurance premiums;
(*d*) interest on the mortgage; and
(*e*) amortization of the principal of the mortgage.

Any deficiency in the amount of any such aggregate monthly payment shall, unless made good by the mortgagor prior to the due date of the next such payment, constitute an event of default under the mortgage.

10. The mortgage may provide for a charge by the mortgagee of a "late charge", not to exceed two (2) cents for each dollar of each payment more than fifteen (15) days in arrears, to cover the extra expense involved in handling delinquent payments.

11. The mortgagor must pay to the mortgagee, upon the execution of the mortgage, a sum that will be sufficient to pay the ground rents, if any, and the estimated taxes, special assessments, and fire and other hazard insurance premiums for the period beginning on the date to which such ground rents, taxes, assessments, and insurance premiums were last paid and ending on the date of the first monthly payment under the mortgage and may be required to pay a further sum equal to one annual mortgage insurance premium, plus one-twelfth of such sum.

12. The mortgagee may charge the mortgagor the amount of the appraisal fee provided for in subsection 3 of Section III and an initial service charge to reimburse itself for the cost of closing the transaction. Such service charge shall not exceed one per centum (1%) of the original principal amount of the mortgage or a charge of twenty dollars ($20), whichever is the greater, except that in cases of property under construction or to be constructed where the mortgagee makes partial disbursements and inspections of the property during the progress of construction, such initial service charge may be in an amount not in excess of two and one-half per centum (2½%) of the original principal amount of the mortgage or a charge of fifty dollars ($50), whichever is the greater.

13. In addition to the charges hereinbefore mentioned, the mortgagee shall collect from the mortgagor only recording fees and such appraisal fees and cost of title search as are approved by the Administrator. Nothing in this and the preceding subsection shall be construed as prohibiting the mortgagor from dealing through a broker, who does not represent the mortgagee, if he prefers to do so, and paying the broker such compensation as is satisfactory to the mortgagor.

14. The mortgage must be executed with respect to a project which, in the opinion of the Administrator, is economically sound.

*Section V. Eligible Mortgagors*

1. A mortgagor must establish that after the mortgage offered for insurance has been recorded, the mortgaged property will be free and clear of all liens other than such mortgage and that there will not be outstanding any other unpaid obligation contracted in connection with the mortgage transaction or the purchase of the mortgaged property, except obligations which are secured by property or collateral owned by the mortgagor independently of the mortgaged property.

2. A mortgagor must establish that the periodic payments required in the mortgage submitted for insurance bear a proper relation to his present and anticipated income and expenses.

3. A mortgagor must have a general credit standing satisfactory to the Administrator.

4. A mortgagor is not restricted as to place of residence and need not be the occupant of the property covered by the mortgage.

*Section VI. Eligible Properties*

1. A mortgage to be eligible for insurance must be on real estate held in fee simple, or on leasehold under a lease for not less than ninety-nine (99) years which is renewable, or under a lease with a period of not less than fifty (50) years to run from the date the mortgage is executed.

2. At the time a mortgage is insured there must be located on the mortgaged property a dwelling unit designed principally for residential use for not more than four families. Such unit may be connected with other dwellings by a party wall or otherwise.

3. The buildings on the mortgaged property must conform with the standards prescribed by the Administrator.

4. The mortgaged property, if otherwise acceptable to the Administrator, may be located in any community where the housing standards meet the requirements of the Administrator.

*Section VII. Effective Date*

These Administrative Rules are effective as to all mortgages on which a commitment to insure is issued to an approved mortgagee on or after October 1, 1937.

Issued at Washington, D. C., September 15, 1937.

[SEAL] STEWART MCDONALD,
*Federal Housing Administrator.*

---

REGULATIONS OF THE FEDERAL HOUSING ADMINISTRATOR FOR MUTUAL MORTGAGE INSURANCE UNDER TITLE II OF THE NATIONAL HOUSING ACT

*Article I*

These Regulations may be cited and referred to as "Regulations of the Federal Housing Administrator for Mutual Mortgage Insurance, dated November 1, 1934, as amended October 1, 1937."

*Article II. Definitions*

As used in these Regulations—

1. The term "Administrator" means the Federal Housing Administrator.

2. The term "Act" means the National Housing Act.

3. The term "mortgage" means such a first lien upon real estate as is commonly given to secure advances on, or the unpaid purchase price of, real estate under the laws of the jurisdiction where the real estate is situated, together with the credit instruments if any, secured thereby.

4. The term "insured mortgage" means a mortgage accepted by the Administrator for insurance.

5. The term "mortgagor" means the original borrower under a mortgage and his heirs, executors, administrators, and assigns.

6. The term "mortgagee" means the original lender under a mortgage and its successors and such of its assigns as are approved by the Administrator.

7. The term "contract of insurance" means the endorsement of the Administrator upon the credit instrument given in connection with an insured mortgage, incorporating by reference these Regulations.

*Article III. Premiums*

1. The mortgagee shall pay to the Administrator an annual mortgage insurance premium equal to one-half of one per centum (½%) of the original principal amount of the mortgage, the first such premium to be paid on the date on which such insurance becomes effective by endorsement. Until the mortgage is paid in full, or the mortgaged property is acquired by the Administrator, as hereinafter set forth, or until the contract of insurance is otherwise terminated, the next and each succeeding premium shall be paid thereafter on the same date in each year as that on which the mortgage, by its original terms, is to mature, and the amount of the premium payment for the second year will be adjusted so as to accord with such payment date.

2. In the event that the principal obligation of any mortgage accepted for insurance is paid in full prior to maturity, the mortgagee shall within thirty (30) days thereafter notify the Administrator of the date of prepayment and shall collect from the mortgagor and pay to the Administrator a prepayment premium charge of one per centum (1%) of the original principal amount of the prepaid mortgage, except that if at the time of such prepayment there is placed on the mortgaged property a new insured mortgage in an amount less than the original amount of the prepaid mortgage, such prepayment premium shall be one per centum (1%) of the difference in such amounts.

In no event shall the prepayment premium exceed the aggregate amount of premium charges which would have been payable if the mortgage had continued to be insured until maturity.

No prepayment premium shall be collected by the mortgagee in the following cases:

(*a*) where at the time of such prepayment there is placed on the mortgaged property a new insured mortgage for an amount equal to or greater than the original principal amount of the prepaid mortgage; or

(*b*) where the final maturity specified in the mortgage is accelerated solely by reason of partial prepayments made by the mortgagor which do not exceed in any one calendar year fifteen per centum (15%) of the original face amount of the mortgage; or

(*c*) where the final maturity specified in the mortgage is accelerated solely by reason of payments to principal to compensate for (1) damage to the mortgaged property, or (2) a release of a part of such property if approved by the Administrator; or

(*d*) where payment in full is made of a delinquent mortgage on which foreclosure proceedings have been commenced, or for the purpose of avoiding foreclosure, if the transaction is approved by the Administrator.

Upon such prepayment the contract of insurance shall terminate.

3. In the event that the Administrator terminates, under Section 3 of Article VI, the insurance as to the group to which the insured mortgage is assigned, the mortgagee shall pay to the Administrator an amount equal to that proportion of the annual insurance premium which would otherwise have been payable for the period between the date to which the premium has been paid and the maturity date of the mortgage.

*Article IV. Acceptance for Insurance*

1. Upon accepting a mortgage for insurance, the Administrator shall endorse the original credit instrument in form as follows:

No. ------
Insured under the
National Housing Act
And Regulations of the
Federal Housing Administrator
For Mutual Mortgage Insurance
Dated November 1, 1934
as amended ----------
FEDERAL HOUSING ADMINISTRATOR
By ----------
Authorized agent
Date ----------

The mortgage shall be an insured mortgage from the date of such endorsement. The Administrator and the mortgagee shall thereafter be bound by these Regulations with the same force and to the same extent as if a separate contract had been executed relating to the insured mortgage, including the provisions of these Regulations and of the National Housing Act.

2. A number shall be inserted in each endorsement after the word "No."; and thereafter each contract of insurance may be referred to as "Contract of Insurance No. ------", inserting in such blank the number that appears in the endorsement.

3. After the words "as amended" there shall be inserted the words "October 1, 1937."

*Article V. Classification of Mortgages*

1. Mortgages accepted for insurance shall be so classified in groups that the mortgages in any group shall involve substantially similar risk characteristics and have similar maturity dates.

2. Premium charges received for the insurance of any mortgage, the receipts derived from the property covered by the mortgage and claims assigned to the Administrator in connection therewith, and all earnings on the assets of the group account shall be credited to the account of the group to which the mortgage is assigned.

3. The principal of, and interest paid or to be paid on, debentures issued in exchange for any property, payments made or to be made to the mortgagee and mortgagor, and

expenses incurred in the handling of the property covered by the mortgage and in collection of claims assigned to the Administrator in connection therewith, shall be charged to the account of the group to which such mortgage is assigned.

*Article VI. Rights and Duties of an Approved Mortgagee Under the Contract of Insurance*

1. Whenever the credit balance in the account of the group to which the insured mortgage has been assigned exceeds the remaining unpaid principal of the insured mortgage and all other outstanding insured mortgages assigned to the same group by an amount equal to ten per centum (10%) of the total premium payments which have theretofore been credited to such account, the Administrator shall pay to the mortgagee under the insured mortgage (whether such mortgage is in good standing or not) for the benefit and account of the mortgagor a sum equal to what the unpaid principal of the insured mortgage is, if in good standing, or would be if it were in good standing, as the case may be. Upon such payment by the Administrator the contract of insurance shall terminate.

2. The mortgagee shall accept such payment and apply it in satisfaction of the obligation of the mortgagor under the insured mortgage. If such insured mortgage is in good standing and such payment is sufficient to satisfy the obligation of the mortgagor under it in full, the mortgagee shall coincidently deliver to the mortgagor any instrument or instruments necessary or proper to discharge the insured mortgage.

3. If the credit balance in the account of the group to which the insured mortgage is assigned fails to exceed, before the first day of the month one year prior to the maturity date of the insured mortgage, the remaining unpaid principal of the then outstanding insured mortgages assigned to such group by an amount equal to ten per centum (10%) of the total premium payments which have theretofore been credited to such account, the Administrator, on the first day of the month one year prior to the maturity date of the insured mortgage and after receipt from the mortgagee of the premium provided for in section 3 of Article III, if any, shall—

(*a*) transfer to the general reinsurance account, an amount equal to ten per centum (10%) of the total premium charges theretofore credited to such group account; and

(*b*) transfer to the mortgagee, for the benefit and account of the mortgagor, such proportion of the credit balance remaining in such group account as the outstanding face amount of the insured mortgage bears to the total outstanding face amount of all insured mortgages assigned to such group.

The contract of insurance covering such mortgage shall thereupon terminate, and the mortgagee shall apply such payment against the principal of the insured mortgage.

4. If the mortgagor pays the insured mortgage in full prior to its final maturity date, and pays to the mortgagee the premium charge provided for in section 2 of Article III, if any, the Administrator shall thereupon pay over to the mortgagor such share of the credit balance of the account of the group to which the insured mortgage has been assigned as the Administrator shall determine to be equitable and not inconsistent with the preservation of the solvency of such account and of the Mutual Mortgage Insurance Fund.

5. If the mortgagor fails to make any payment, or to perform any other covenant or obligation under the mortgage, and such failure continues for a period of thirty (30) days, the mortgage shall be considered in default, and the mortgagee shall, within thirty (30) days thereafter, give notice in writing to the Administrator of such default, unless the Administrator has been notified of a previous default which remains uncured.

6. At any time within one year from the date of default the mortgagee, at its election, shall either—

(*a*) with, and subject to, the consent of the Administrator, acquire by means other than foreclosure of the mortgage, possession of, and title to, the mortgaged property; or

(*b*) commence foreclosure of the mortgage; provided, that if the laws of the State in which the mortgaged property is situated do not permit the commencement of such foreclosure within such period of time, the mortgagee shall commence such foreclosure within thirty (30) days after the expiration of the time during which such foreclosure is prohibited by such laws.

The mortgagee shall promptly give notice in writing to the Administrator of the institution of foreclosure proceedings and shall exercise reasonable diligence in prosecuting such proceedings to completion.

For the purposes of this section, the date of default shall be considered as thirty (30) days after (*a*) the first uncorrected failure to perform a covenant or obligation, or (*b*) the first failure to make a monthly payment which subsequent payments by the mortgagor are insufficient to cover when applied to the overdue monthly payments in the order in which they became due.

If after default and prior to the completion of foreclosure proceedings, the mortgagor shall pay to the mortgagee all monthly payments in default and such expenses as the mortgagee shall have incurred in connection with the foreclosure proceedings, notice shall be given to the Administrator, and the insurance shall continue as if such default had not occurred.

7. If the default is not cured as aforesaid, and if the mortgagee has otherwise complied with the provisions of section 6 of this Article, and at any time within thirty (30) days (or such further time as may be necessary to complete the title examination and perfect such title) after acquiring possession of the mortgaged property by foreclosure, or by other means in accordance with subsection (*a*) of section 6 of this Article, tenders to the Administrator possession of, and a deed containing a covenant which warrants against the acts of the mortgagee and all claiming by, through, or under it, conveying good merchantable title (evidenced as hereinafter provided in section 8 of this Article) to, such property undamaged by waste, fire, earthquake, flood, tornado, or subsidence cause by mining operations, and assigns (without recourse or warranty) any and all claims which it may have acquired in connection with the mortgage transaction, and as a result of the foreclosure proceedings or other means by which it acquired such property, the Administrator shall promptly accept conveyance of such property and such assignment and shall deliver to the mortgagee:

(*a*) Debentures of the Mutual Mortgage Insurance Fund as set forth in Section 204 (*b*) of the Act, bearing interest at the rate of three per centum (3%) per annum payable semi-annually on the first day of January and the first day of July of each year, and having a total face value equal to the unpaid amount of the principal of the mortgage, as defined in Section 204 (*a*) of the Act (including all taxes and premiums for insurance against fire and other hazard paid by the mortgagee and interest on the unpaid principal from the date foreclosure proceedings were instituted, or the property was otherwise acquired as provided in section 6 of this Article, to the date of such delivery at the rate of three per centum (3%) per annum, less any amount received on account of interest accrued on such unpaid principal between such dates); and

(*b*) A Certificate of Claim in accordance with Section 204 (*c*) of the Act, which shall become payable, if at all, upon the sale of the property covered by the insured mortgage in accordance with Section 204 (*d*) of the Act. This certificate shall be for an amount which the Administrator shall determine to be sufficient to pay costs of foreclosure, or other such proceedings, including reasonable attorneys' fees, unpaid interest, cost of repairs to the property made by the mortgagee after default to remedy the waste mentioned in this section and any other amounts due under the mortgage and not covered by the amount of the debentures. Each such Certificate of Claim shall provide that there shall accrue to the holder of such certificate with respect to the face amount of such certificate, an increment at the rate of three per centum (3%) per annum.

8. Evidence of title of the following types will be satisfactory to the Administrator:

(*a*) a fee or owner's policy of title insurance, a guaranty or guarantee of title, or a certificate of title, issued by a title company, duly authorized by law and qualified by experience to issue such; or

(*b*) an abstract of title prepared by an abstract company or individual engaged in the business of preparing abstracts of title and accompanied by the legal opinion as to the quality of such title signed by an attorney at law experienced in examination of titles; or

(*c*) a Torrens or similar title certificate; or

(*d*) evidence of title conforming to the standards of a supervising branch of the Government of the United States or of any State or Territory thereof.

Such evidence of title shall be furnished without cost to the Administrator and shall be executed as of a date to include the recordation of the deed to the Administrator, and shall show that, according to the public records, there are not, at such date, any outstanding prior liens, including any past due and unpaid ground rents, general taxes, or special assessments.

If the title and title evidence are such as to be acceptable to prudent lending institutions and leading attorneys generally in the community in which the property is situated, such title and title evidence will be satisfactory to the Administrator and will be considered by him as good and merchantable.

The Administrator will not object to the title by reason of the following matters, provided they are not such as to impair the value of the property for residence purposes, or provided they have been brought to the attention of the insuring office for consideration in fixing the valuation:

(*a*) customary easements for public utilities, party walls, driveways, and other purposes; customary building or use restrictions for breach of which there is no reversion and which have not been violated to a material extent;

(*b*) such restrictions when coupled with a reversionary clause, provided there has been no violation prior to the date of the deed to the Administrator;

(*c*) slight encroachments by adjoining improvements;

(*d*) outstanding oil, water, or mineral rights, except those which include the right to sink wells or shafts on the subject property, withdraw the subjacent support, or otherwise impair the value of the property for residence purposes without payment of adequate damages.

9. In the event that the mortgagee fails to comply with the provisions of sections 6 and 7 of this Article, the contract of insurance shall thereupon terminate, and the mortgagor shall be entitled to receive a share of the credit balance of the account of the group to which the mortgage has been assigned, in such amount as the Administrator shall determine to be equitable and not inconsistent with the preservation of the solvency of such account, and of the Mutual Mortgage Insurance Fund.

*Article VII. Assignments*

1. When the insured mortgage is transferred to another approved mortgagee, such transferee shall notify the Administrator of the acquisition of such mortgage within thirty (30) days thereof, and shall thereupon succeed to all the rights and become bound by all the obligations of the transferor under the contract of insurance; but the transferor shall be released from its obligations under the contract of insurance only upon its giving notice to the Administrator of the transfer of the insured mortgage within thirty (30) days thereof.

Whenever the insured mortgage is transferred to another approved mortgagee for the purposes of collateral only, no notice need be given to the Administrator until such collateral is foreclosed, but the transferor shall remain subject to all the obligations of the contract of insurance.

2. The contract of insurance shall terminate upon the happening of either of the following events:

(*a*) the acquisition of the insured mortgage by, or the pledge thereof to, any person, firm, or corporation, public or private, other than an approved mortgagee, whether individually or in trust for another; provided, that this subsection (*a*) shall not be applicable to a mortgage acquired or held by an approved mortgagee, which is a banking institution or trust company inspected and supervised by some governmental agency, for a trust held or administered by it in a fiduciary capacity, as long as such fiduciary relationship shall remain in effect;

(*b*) the disposal by an approved mortgagee of any partial interest in an insured mortgage or group of insured mortgages (whether to another approved mortgagee or otherwise) by means of a declaration of trust, or by a participation or trust certificate, or by any other device; provided that this subsection (*b*) shall not be applicable to any mortgage so long as it is held in a common trust fund maintained by a bank or trust company (1) exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank or trust company in its capacity as a trustee, executor or administrator; and (2) in conformity with the rules and regulations prevailing from time to time of the Board of Governors of the Federal Reserve System, pertaining to the collective investment of trust funds.

Upon the termination of the insurance under this section, the mortgagor shall be entitled to receive a share of the credit balance of the account of the group to which the insured mortgage has been assigned, in such amount as the Administrator shall determine to be equitable and not inconsistent with the preservation of the solvency of such account and of the Mutual Mortgage Insurance Fund.

*Article VIII. Vested Rights*

Neither the mortgagee nor the mortgagor shall have any vested right in the Mutual Mortgage Insurance Fund, and the determination by the Administrator as to the amount payable out of such fund to, or for the benefit of, the mortgagee and mortgagor under any section or sections of these Regulations shall be final and conclusive as to all parties.

*Article IX. Amendments*

These Regulations may be amended by the Administrator at any time and from time to time, in whole or in part, but such amendment shall not affect the contract of insurance on any mortgage already insured, or any mortgage or prospective mortgage on which the Administrator has made a commitment to insure.

*Article X. Effective Date*

These Regulations are effective as to all mortgages on which a commitment to insure is issued to an approved mortgagee on or after October 1, 1937. Wherever a mortgagee so desires, the provisions of any or all of these Regulations shall become a part of any contract of insurance heretofore made, except that subsections (*a*) and (*b*) of section 7 of Article VI shall apply only to those mortgages insured on or after May 28, 1935.

Issued at Washington, D. C., September 15, 1937.

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 25th day of September, A. D. 1937.

Commissioners: William A. Ayres, Chairman; Garland S. Ferguson, Jr., Charles H. March, Ewin L. Davis, Robert E. Freer.

[Docket No. 2743]

IN THE MATTER OF JUSTIN HAYNES AND COMPANY, INC.

ORDER APPOINTING EXAMINER AND FIXING TIME AND PLACE FOR TAKING TESTIMONY

This matter being at issue and ready for the taking of testimony, and pursuant to authority vested in the Federal Trade Commission, under an Act of Congress (38 Stat. 717; 15 U. S. C. A., Section 41),

*It is ordered*, That William C. Reeves, an examiner of this Commission, be and he hereby is designated and appointed to take testimony and receive evidence in this proceeding and to perform all other duties authorized by law;

*It is further ordered*, That the taking of testimony in this proceeding begin on Tuesday, October 5, 1937, at two o'clock in the afternoon of that day (eastern standard time), in room 500, 45 Broadway, New York.

Upon completion of testimony for the Federal Trade Commission, the examiner is directed to proceed immediately to take testimony and evidence on behalf of the respondent. The examiner will then close the case and make his report.

By the Commission.

[SEAL] OTIS B. JOHNSON, *Secretary.*

*Thursday, September 30, 1937* *No. 189*

## PRESIDENT OF THE UNITED STATES.

EXECUTIVE ORDER

PRESCRIBING REGULATIONS FOR CARRYING INTO EFFECT IN THE VIRGIN ISLANDS CERTAIN PROVISIONS OF THE MARIHUANA TAX ACT OF 1937

WHEREAS section 15 of the Marihuana Tax Act of 1937, approved August 2, 1937 (Public, No. 238, 75th Congress), provides, in part:

"The President is hereby authorized and directed to issue such Executive orders as will carry into effect in the Virgin Islands the intent and purpose of this Act by providing for the registration with appropriate officers and the imposition of the special and transfer taxes upon all persons in the Virgin Islands who import, manufacture, produce, compound, sell, deal in, dispense, prescribe, administer, or give away marihuana.";

AND WHEREAS it is desired that the Governor of the Virgin Islands and the Commissioner of Finance of the Virgin Islands shall, in connection with the Marihuana Tax Act of 1937, perform duties in the Virgin Islands analogous to those performed in the continental United States by the Secretary of the Treasury and his subordinates:

NOW, THEREFORE, by virtue of and pursuant to the authority vested in me by the statutory provisions above set out it is hereby ordered as follows:

SEC. 1. In enforcing the provisions of the Marihuana Tax Act of 1937, the Commissioner of Finance of the Virgin Islands shall perform in the Virgin Islands administrative duties like those the Commissioner of Internal Revenue and collectors of internal revenue are required to perform in the continental United States, and the Governor of the Virgin Islands shall perform duties in the Virgin Islands like those the Commissioner of Narcotics is required to perform in the continental United States.

SEC. 2. On and after the first day of October, 1937, no person in the Virgin Islands shall import, manufacture, produce, compound, sell, deal in, dispense, prescribe, administer, give away, or acquire marihuana unless he shall have complied with the provisions of the said Act in the manner provided for in this Order and regulations issued pursuant thereto.

SEC. 3. Every person in the Virgin Islands who by the terms of the said Act would be required if located within the continental United States to register with the collector of internal revenue of his district, his name or style and his place or places of business, shall register the like information with the Commissioner of Finance of the Virgin Islands on forms to be prescribed by the Governor of the Virgin Islands. At the time of such registry and on or before the first day of July annually thereafter, every person in the Virgin Islands who imports, manufactures, produces, compounds, sells, deals in, dispenses, prescribes, administers, or gives away marihuana shall pay to the Commissioner of Finance of the Virgin Islands special taxes at the rates provided for in section 2 of the said Act: *Provided, however*, that any person in the Virgin Islands who would not be required if located within the continental United States to register or pay a special tax shall not be required to register or pay the special taxes as herein provided.

SEC. 4. The Commissioner of Finance of the Virgin Islands, with the approval of the Governor of the Virgin Islands, shall cause suitable order forms and copies to be prepared for sale to persons as required by section 6 (a) of the Act. The price of the order form as sold by the Commissioner of Finance of the Virgin Islands under section 6 (c) of the Act shall be two cents for the original and one copy. The Commissioner of Finance shall furnish appropriate stamps to represent the payment of the transfer tax levied by section 7 of the said Act. Such stamps shall be provided by the Commissioner of Internal Revenue of the Treasury Department of the United States upon requisition.

SEC. 5. The Governor of the Virgin Islands may prescribe such regulations as may be necessary to carry into full force and effect the provisions of the said Act and this Order. In prescribing such regulations, the regulations prescribed by the Commissioners of Narcotics and Internal Revenue and approved by the Secretary of the Treasury of the United States shall be followed in so far as they can be made applicable to conditions in the Virgin Islands.

SEC. 6. The Governor of the Virgin Islands and any persons acting under his supervision or direction shall have the right to make such inspection and take such action as may be necessary to enforce the provisions of the said Act under this Order.

FRANKLIN D ROOSEVELT

THE WHITE HOUSE,
*September 26, 1937.*

## TREASURY DEPARTMENT.

**Bureau of Customs.**

[T. D. 49166]

RATE OF DUTY ON IMPORTED DATES, FRESH OR DRIED

*To Collectors of Customs:*

Under date of September 10, 1937, Van Dyk & Reeves, Inc., 167 41st Street, Brooklyn, New York, domestic packers of imported dates, requested that they be advised under the provisions of section 516 (b) of the Tariff Act of 1930 (U. S. C., title 19, sec. 1516), as to the classification of and rate of duty assessed on dates, fresh or dried, imported in wooden boxes or other shipping containers, the contents of which weigh with such container more than 10 pounds, and packed in the following manner:

Within each container above described are layers each weighing more than 10 pounds, each layer being separated into individual units by single strips of paper or similar packing material so that the units so separated weigh not more than 10 pounds each. Either the top or bottom of each layer is covered by a single sheet of paper or similar packing material, and the opposite surface of said layer is covered by smaller single sheets, each of which covers two or more single units. Some of the sides and ends of the layers and of the groups of the units which form each layer are covered either wholly or partly by the extension of the sheet or sheets covering the top or bottom of the layer, and others by a single sheet used as a lining for a whole side or end of the wooden box. No unit or group of units weighing not more than ten pounds per unit or group can be separated from the layer without removing or breaking one or more sheets of the packing material.

The Bureau in a letter dated September 24, 1937, advised Van Dyk & Reeves, Inc. that dates imported in the condition above described are assessed with duty at the rate of 1 cent per pound if imported with pits, or at the rate of 2 cents per pound if imported with pits removed, under the provisions of paragraph 741 of the Tariff Act of 1930 (U. S. C., title 19, sec. 1001, par. 741).

In a complaint filed in the Bureau against these classifications and rates of duty the domestic producers contend that such dates packed in the manner described are properly dutiable at the rate of 7½ cents per pounds as dates, fresh or dried, with pits or with pits removed, in packages weighing with the immediate container not more than 10 pounds each, under paragraph 741 of the Tariff Act of 1930.

In the opinion of the Bureau, dates packed in the manner described are not dates in packages weighing with the immediate container not more than 10 pounds each, and the assessment of duty on such dates as dates, fresh or dried, with pits, at the rate of 1 cent per pound, or as dates, fresh or dried, with pits removed, at the rate of 2 cents per pound, under paragraph 741 of the Tariff Act of 1930, is hereby approved and should be continued.

In accordance with the provisions of section 516 (b) of the Tariff Act of 1930 notice is hereby given that the classification of and the rate of duty on merchandise of the character described imported or withdrawn from warehouse after the expiration of 30 days after the date of publication of this letter in the weekly Treasury Decisions will be subject to the decision of the United States Customs Court in the event that a protest is filed under the provisions of that subsection.

[SEAL] J. H. MOYLE,
*Commissioner of Customs.*

Approved, September 25, 1937.

STEPHEN B. GIBBONS,
*Acting Secretary of the Treasury.*

[T. D. 49167]

REGULATIONS FOR ENTRY OF ARTICLES FOR THE EXHIBITION TO BE HELD AT HOUSTON, TEXAS, FROM OCTOBER 11 TO 16, 1937, INCLUSIVE, BY THE OIL WORLD EXPOSITION

SEPTEMBER 25, 1937.

*To Collectors of Customs and Others Concerned:*

Attention is invited to the provisions of Public Resolution No. 66 of the Seventy-fifth Congress, approved August 21, 1937, which read as follows:

That the President of the United States is authorized to invited by proclamation, or in such other manner as he may deem proper, the States of the Union and all foreign countries to participate in the proposed Oil World Exposition, to be held at Houston, Texas, from October 11 to 16, 1937, inclusive, for the purpose of exhibiting samples of fabricated and raw products of all countries produced by the petroleum industry; and the exhibiting of the tools and equipment used by the industry; and bringing together buyers and sellers for promotion of trade and commerce in such products.

SEC. 2. That all articles which shall be imported from foreign countries for the purpose of exhibition at the Oil World Exposition, to be held at Houston, Texas, from October 11 to 16, 1937, inclusive, by the Oil World Exposition, or for use in constructing, installing, or maintaining foreign buildings or exhibits at the said exposition, upon which articles there shall be a tariff or customs duty, shall be admitted without payment of such tariff, customs duty, fees, or charges under such regulations as the Secretary of the Treasury shall prescribe; but it shall be lawful at any time during or within three months after the close of the said exposition to sell within the area of the exposition any articles provided for herein, subject to such regulations for the security of the revenue and for the collection of import duties as the Secretary of the Treasury shall prescribe: *Provided*, That all such articles, when withdrawn for consumption or use in the United States, shall be subject to the duties, if any, imposed upon such articles by the revenue laws in force at the date of their withdrawal; and on such articles which shall have suffered diminution or deterioration from incidental handling or exposure, the duties, if payable, shall be assessed according to the appraised value at the time of withdrawal from entry hereunder for consumption or entry under the general tariff law: *Provided further*, That imported articles provided for herein shall not be subject to any marking requirements of the general tariff laws, except when such articles are withdrawn for consumption or use in the United States, in which case they shall not be released from customs custody until properly marked, but no additional duty shall be assessed because such articles were not sufficiently marked when imported into the United States: *Provided further*, That at any time during or within three months after the close of the exposition any article entered hereunder may be abandoned to the Government or destroyed under customs supervision, whereupon any duties on such article shall be remitted: *Provided further*, That articles which have been admitted without payment of duty for exhibition under any tariff law and which have remained in continuous customs custody or under a customs exhibition bond and imported articles in bonded warehouse under the general tariff law may be accorded the privilege of transfer to and entry for exhibition at the said exposition under such regulations as the Secretary of the Treasury shall prescribe: *And provided further*, That the Oil World Exposition shall be deemed, for customs purposes only, to be the sole consignee of all merchandise imported under the provisions of this Act, and that the actual and necessary customs charges for labor, services, and other expenses in connection with the entry, examination, appraisement, release, or custody, together with the necessary charges for salaries of customs officers and employees in connection with the supervision, custody of, and accounting for articles imported under the provisions of this Act, shall be reimbursed by the Oil World Exposition to the Government of the United States under regulations to be prescribed by the Secretary of the Treasury, and that receipts from such reimbursements shall be deposited as refunds to the appropriation from which paid, in the manner provided for in section 524 of the Tariff Act of 1930.

SEC. 3. That the Government of the United States is not by this resolution obligated to any expense in connection with the holding of such exposition.

(1) All packages containing imported merchandise to be entered under the provisions of the joint resolution shall be plainly marked "Oil World Exposition" and with the name of the country of origin and shall bear separate serial numbers.

(2) All importations of articles of a class requiring a consular invoice, intended for exhibition under the provisions of the joint resolution and valued at more than $100, must be covered by consular invoices certified as provided in article 276 of the Customs Regulations of 1937. Such invoices shall contain the information prescribed under section 481 of the Tariff Act of 1930 (U. S. C., title 19, sec. 1481) and shall show that the articles covered thereby are destined to the port of Houston, Texas, and are intended for exhibition or use at the Oil World Exposition, Houston, Texas.

(3) The Oil World Exposition shall give to the deputy collector of customs at Houston, Texas, such security for compliance with the joint resolution and these regulations as may be approved by the Commissioner of Customs.

(4) The collector of customs at Galveston shall detail an officer to act as his representative at the Oil World Exposition and shall station inside the exhibition buildings as many additional customs officers and employees as may be necessary to properly protect the revenue.

(5) All actual and necessary customs charges for labor, services, and other expenses in connection with the entry, examination, appraisement, release, or custody of imported articles, together with the necessary charges for salaries of customs officers and employees in connection with the

supervision and custody of, and accounting for, articles imported for exhibition at the Oil World Exposition or transferred thereto for exhibition, shall be reimbursed by the Oil World Exposition to the Government, payment to be made monthly to the deputy collector of customs, Houston, Texas, for deposit to the credit of the Treasurer of the United States as a refund to the appropriation "Collecting the revenue from customs."

(6) Articles to be entered under these regulations which arrive at ports other than Houston shall be entered for immediate transportation without appraisement to the latter port in the manner provided by the general customs regulations.

(7) Articles which have been admitted without payment of duty for exhibition under any tariff law and which have remained in continuous customs custody or under a customs exhibition bond may be transferred to entry for exhibition at the Oil World Exposition in the manner prescribed in article 453 (c) of the Customs Regulations of 1937, except that in each case an entry under paragraph (8) of these regulations shall be filed, which shall supersede any previous entry, and no new bond other than that specified in paragraph (3) shall be required. Imported articles in bonded warehouses under the general tariff law may be transferred to entry for exhibition at the Oil World Exposition in the manner prescribed in article 323 of the Customs Regulations of 1937.

(8) Upon the arrival at the port of Houston of articles to be entered under these regulations the same should be entered on a special form of entry to read substantially as follows:

Entry for Exhibition

Entry No. ------

Entry at the port of Houston of articles consigned or transferred to the Oil World Exposition under ---------- I. T. No. ------ ex S. S. ---------- from ---------- on the ------ day of ----------, 1937, for exhibition purposes under Public Resolution No. 66 of the Seventy-fifth Congress, approved August 21, 1937.

| Mark | Number | Package and contents | Quantity | Invoice | Value |
|---|---|---|---|---|---|
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

OIL WORLD EXPOSITION,
By ----------

(9) Upon such entry being made, the deputy collector shall issue a special permit for the transfer of the articles covered thereby to the buildings in which they are to be exhibited or used, or, in the discretion of the deputy collector, to the appraiser's stores for examination and subsequent transfer to the buildings in which they are to be exhibited or used. Upon the receipt of the articles at such buildings or at the appraiser's stores, the same shall be given a tentative appraisal prior to their exhibition or use. All imported exhibits so received in such buildings shall be kept segregated from domestic articles and imported duty-paid articles and shall not be removed from the exhibition building except in accordance with paragraph (11) of these regulations.

(10) If for any reason articles imported for entry under these regulations are not upon their arrival to be delivered immediately at an exhibition building, the importer should so indicate to the deputy collector in writing, who will cause such articles to be placed in a bonded warehouse under a "general order permit" at the importer's risk and expense, and such articles may be entered at any time within one year from the date of importation for exhibition, as herein provided, or under the general tariff law, or for exportation. If not so entered within such period they will be regarded as abandoned to the Government.

(11) Any articles entered under these regulations may be withdrawn for exportation, for abandonment to the Government, destruction under customs supervision, or for consumption or entry under the general tariff law, but not otherwise, at any time during or within three months after the close of the exposition. Upon the withdrawal of such articles for consumption or for entry under the general tariff law, or at the expiration of three months after the close of the exposition in the case of articles not previously so withdrawn, they shall be appraised with due allowance made for diminution or deterioration from incidental handling or exposure. Such appraisal shall be final in the absence of an appeal to reappraisement, as provided in section 501 of the Tariff Act of 1930 (U. S. C., title 19, sec. 1501). In the case of such articles withdrawn for entry under the general tariff law under a warehouse bond or a bond conditioned upon exportation, the statutory period of the bond and any extension thereof shall be computed from the date of withdrawal.

(12) At any time during or within three months after the close of the exposition, any article entered hereunder may be abandoned to the Government or destroyed under customs supervision, as provided in article 808 of the Customs Regulations of 1937.

(13) Any articles entered under these regulations which have not been withdrawn for consumption, entry under the general tariff law, or exportation, or which have not been abandoned to the Government or destroyed under customs supervision, before the expiration of three months after the close of the exposition, shall be regarded as abandoned to the Government.

(14) All entries under these regulations shall be made in the name of the Oil World Exposition, which shall be deemed for customs purposes the sole consignee of the merchandise entered under the act and which shall be held responsible to the Government for all duties and/or charges due the United States on account of such entries; but, in the case of merchandise withdrawn from entry under these regulations, an entry under the general tariff law, in the name of any person duly authorized in writing by the Oil World Exposition to make such entry, may be accepted by the deputy collector, and the bond of the Oil World Exposition shall thereafter be considered as collateral security for any duties and/or charges accruing on the merchandise covered by any such entry, unless the entry is for permanent exhibition, in which case the liability of the Oil World Exposition under its bond with respect to the articles covered by such entry, shall be terminated when the security required by the general tariff law has been given.

(15) The marking requirements of the Tariff Act of 1930 and the regulations promulgated thereunder will not apply to articles imported under these regulations except when such articles are withdrawn for consumption or use in the United States, in which case they shall be released from customs custody only upon a full compliance with the marking requirements of the tariff act and the regulations promulgated thereunder. No additional duty shall be assessed because such articles were not properly marked when imported into the United States.

[SEAL] STEPHEN B. GIBBONS,
*Acting Secretary of the Treasury.*

## KLAMATH IRRIGATION PROJECT, OREGON-CALIFORNIA, TULE LAKE DIVISION, PART ONE

### ORDER OPENING PUBLIC LANDS TO ENTRY

SEPTEMBER 9, 1937.

1. *Public land for which water is available and for which entry may be made.*—In pursuance of the act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof or supplementary thereto it is hereby announced that water will be available in the irrigation season of 1938 and thereafter, and beginning October 25, 1937 entry may be made in accordance with this order for the following-described public lands under the Tule Lake Division of the Klamath Irrigation Project, Oregon-California, as shown on farm unit plats of Ts. 47 and 48 N., R. 5 E., M. D. M., California, to-wit:

*T. 48 N., R. 5 E., M. D. M. California*

| 18 | J | 79.6 | | G | 71.8 |
| | L | 86.5 | | H | 73.7 |

The farm unit plats referred to above were approved on the date of this order and are on file in the office of the Superintendent, Bureau of Reclamation, Klamath Falls, Oregon, and in the local land office at Sacramento, California.

2. *Limit of acreage for which entry may be made.*—The limit of area of public land per entry, representing the acreage which, in the opinion of the Secretary of the Interior, may be reasonably required for the support of a family upon such land, is fixed at the amounts shown upon the farm unit plats for the respective farm units above listed.

3. *Preference rights to ex-service men.*—Pursuant to the provisions of Public Resolution No. 85, 71st Congress, approved June 12, 1930 (46 Stat., 580), and until *January 25, 1938*, the lands described above will be open to entry only by officers, soldiers, sailors, or marines who have served in the Army or Navy of the United States in any war, military occupation, or military expedition, and have been honorably separated or discharged therefrom or placed in the regular Army or Naval Reserve. The same preference rights are applicable to those citizens of the United States who served with the allied armies during the World War and who were honorably discharged, upon their resumption of citizenship in the United States, provided the service with the allied armies was similar to the service with the Army of the United States for which recognition is granted in the aforesaid Public Resolution No. 85; *Provided, however,* That they must be qualified to make entry under the homestead laws and also possess the qualifications as to industry, experience, character, and capital required of all applicants under this order.

4. *Applicants must be qualified.*—No entry shall be accepted by the local land office until applicant therefor has satisfied the Examining Board, appointed for the Klamath project to consider such matters, that he is possessed of such qualifications (in addition to the qualifications required under the homestead laws), as to industry, experience, character, and capital, as in the opinion of the board are necessary to give reasonable assurance of success by the prospective settler.

5. *Requirements as to industry, experience, character, and capital.*—Each applicant must possess good health and have had at least two years' actual experience in farm work and farm practice. He must have at least $2,000 in money free of liability, or the equivalent thereof in livestock, farming equipment, or other assets deemed by the Examining Board to be as useful to the applicant as money.

6. *Examining Board.*—An Examining Board of four members has been appointed by the Secretary of the Interior, to consider the fitness of each applicant to undertake the development and operation of a farm on the Klamath project. Each applicant, except those described in paragraph 12 (a), must appear in person before the Examining Board, and the project superintendent, who is the member representing the United States, and who will act as Secretary of the board, will notify each applicant of the period of time set for his appearance and examination. The members of the board will be present at the project office when the opening is being held, and interested applicants and particularly non-residents, will be examined at such times as it is convenient for them to be present. There must be, of course, some limit of time covering this feature, and the board will fix this limit, and will also announce such other incidental rules as will necessitate one appearance only by each applicant. Careful investigation shall be made to verify the statements and representations made by applicants, to the end that no misunderstanding may prevail, either regarding the applicant's fitness or his appreciation of the problem before him.

7. *Determination of relative standing of applicants.*—The relative standing of the applicants will be based upon a percentage rating with the following maximum weights given to the four perscribed qualifications:

| | *Percent* |
|---|---|
| Character | 15 |
| Industry | 20 |
| Capital | 30 |
| Farm Experience | 35 |

Applicants will be rated according to the following schedules and no applicants will be considered eligible who fall below the minimum named in any one of the headings of

these schedules, or who do not, in the opinion of the board, possess the health and vigor necessary for active farm work:

| Character: | Percent |
|---|---|
| Fair | 5 |
| Good | 6–10 |
| Excellent | 11–15 |
| Industry: | |
| Fair | 5 |
| Good | 6–10 |
| Excellent | 11–20 |
| Capital: | |
| $2,000 to $2,999 | 20 |
| $3,000 to $3,999 | 22 |
| $4,000 to $4,999 | 24 |
| $5,000 to $5,999 | 25 |
| $6,000 to $6,999 | 26 |
| $7,000 to $7,999 | 27 |
| $8,000 to $8,999 | 28 |
| $9,000 to $9,999 | 29 |
| $10,000 or above | 30 |

| Farm experience: | Percent |
|---|---|
| 2 years in farming other than irrigation | 10 |
| 2 years in irrigation farming, any time | 15 |
| 2 years' farming other than irrigation plus 1½% for each additional year's experience up to a total of 12 years (including first 2 years), or a maximum of | 25 |
| 2 years in irrigation farming, in last 4 years | 20 |
| 2 years in irrigation farming, in last 2 years | 25 |
| 3 years in irrigation farming, in last 4 years | 30 |
| 3 years or more in responsible charge of irrigation farm in last 4 years | 35 |

8. *When, and how to apply for a farm unit.*—Any person desiring to acquire any of the said public land must, as a first step, secure from the Superintendent, at Klamath Falls, Oregon, or from the Commissioner, Bureau of Reclamation, Washington, D. C., a farm application blank. The blanks will be available on and after the date of this notice, and full answer must be made to each question propounded therein. The farm application must designate in the first paragraph the particular farm desired. If the applicant claims a preference right on account of military service, he shall attach to this application an affidavit setting forth such military service. The affidavit shall state the applicant's time of service, the unit of which he was a member, the date on which he was honorably discharged, or separated, or transferred to the regular Army or Naval Reserve, and that he did not refuse to wear the uniform of such service or to perform the duties thereof. If the applicant claims a preference right on account of military service with the allied armies during the World War, the affidavit should also state, if true, that the service with the allied armies was similar to the service with the Army of the United States for which recognition was granted in the said Public Resolution No. 85. There shall be attached to said affidavit a copy of such honorable discharge or separation from the service, or the order of transfer to the regular Army or Naval Reserve, as the case may be, which copy shall be certified by a notary public to be a true copy of the original.

9. *When and where to file the farm application.*—The farm application with the proof to be furnished by the ex-Service man, may be filed with the Superintendent at Klamath Falls, Oregon, in person, if convenient, or by mail, or otherwise, prior to October 25, 1937. No advantage will accrue to an applicant presenting his application in person rather than by mail, and, if the applicant does not reside at Klamath Falls, his application should be mailed. Farm applications received on or after October 25, 1937 will be filed and noted in the order of their receipt.

10. *Simultaneous filing of farm applications.*—All applications received prior to October 25, 1937, the date of opening, will be held and treated as simultaneously filed.

11. *Preference rights for ex-service men not filing in accordance with Paragraph 10.*—In order that ex-service men may take advantage of the preference right as provided in Paragraph 3 of this order, in the event that they fail to file prior to October 25, 1937, as set forth in Paragraph 10 above, their applications together with the proof to be furnished by them, must be filed in the Office of the Project Superintendent, Klamath Falls, Oregon, on or prior to January 24, 1938, the day before the date upon which the farm units herein described, except those units for which applications of ex-service men have been accepted, become open to entry by the general public. No advantage will accrue to an applicant presenting his application in person rather than by mail.

12. *Showing of applicants and selection thereof.*—

(a) Where the applicant fails to make a *prima facie* case—that is, where the applicant does not possess good health or does not show at least two years' farm experience, and the assets required in Paragraph 5, the application shall be rejected and the applicant notified thereof by registered mail, and of his right to appeal to the Secretary of the Interior within 10 days from receipt of notice. Like action shall be taken where the evidence of military service is defective or not furnished. All appeals allowed under this order must be filed in the office of the project superintendent at Klamath Falls, Oregon, and within 10 days from receipt of notice.

(b) Each applicant who makes a *prima facie* case and has not been previously examined by the board shall be notified by the board, by registered mail, of the time within which he must appear before it. After such personal examinations, and after consideration of the showing made in the application, the board will rate the applicant in accordance with the scale set forth above, and place such rating in red ink, with the initials of each member of the board upon the face of the farm application blank. Should the applicant fail to appear for examination after due notice, his application will receive no further consideration by the board at that time. Should he later appear his application may be considered for any farm then remaining unassigned. The date of receipt of his application shall then be considered as being the day he actually appeared before the board. The rating necessary to establish qualification is the minimum named in Paragraph 7 of this order, and the applications of all who fail to attain this minimum shall be rejected and the applicants notified thereof by registered mail, and of the right of appeal to the Secretary within 10 days from receipt of notice. After the expiration of the appeal period and in the absence of any pending appeals, the board shall select the 69 applicants (there being 69 farm units) with the highest rating, and notify each of the other applicants that since the number of qualified applicants exceeds the number of available farms it is necessary to reject all applications below the first 69 in qualification ratings. Each rejected applicant may appeal to the Secretary within ten days. In the event that the number of qualified applicants is less than the number of available farm units, and also if in such case there are several applications for the same farm unit, the board shall assign a farm unit to each of such applicants. Whenever practicable, the board shall allow the applicants to exercise a choice of farms; and if it is found practicable to do so, the applicants will be given the right of selection, regardless of other applications, in the order of their ratings. The intent of the law is to select the best qualified applicants for the farms available, and the Government reserves the right to assign the farms regardless of individual preferences. Where two or more applicants have received identical ratings a drawing shall be made by the examining board to determine the order in which the available farms shall be awarded.

13. *Notification of applicant that he has been selected.*—After the expiration of the appeal periods in all of the contingencies named above, or any other that may arise, and in the absence of any pending appeals, the board shall notify each applicant selected for a farm, by registered mail, and enclose a water-rental application for the farm selected, which must be filled in by the applicant and returned to the superintendent within 10 days from a receipt of such notice with payment of the water-rental charges named in paragraph 18 below. Upon receipt by the project superintendent of the water-rental application, executed by the applicant and accompanied by the required payment, the board shall make appropriate notation on a copy of said water-rental application, which will entitle the applicant to file homestead application at the local land office, and the board will return said copy by registered mail to the applicant for that purpose. Such homestead application shall be made within 15 days from the date of receipt of the approved water-rental application. Failure to make homestead entry within the period named will render the application subject to rejection.

14. *Failure of selected applicant to complete transaction.*—If the applicant fails to comply with any of the requirements named above the board will select the next highest in qualification rating, and when the list has been exhausted, and if there still remain lands unallotted, the board will consider applications filed thereafter in the order filed, and such applications will otherwise be handled by the board as prescribed in Paragraph 12.

15. *General entry.*—On and after January 25, 1938, any public lands described herein, which remain unentered, shall be subject to entry under this order by any person having the necessary qualifications. If, on January 25, 1938, prior to 2 p. m., the number of applications filed exceeds the number of available farm units, then the right to make entry for any such farm unit shall be determined in accordance with the procedure described in paragraph 12 of this order.

16. *Warning against unlawful settlement.*—No person shall be permitted to gain or exercise any right under any settlement or occupation of any of said public land begun without having at the time a valid approved water-rental application covering the land in question: *Provided, however*, That this shall not affect any valid existing right obtained by settlement or entry while the land was subject thereto.

17. *Construction charges.*—Section 15 of the act of May 25, 1926 (44 Stat. 639), authorizes and directs the Secretary, when announcement is made of the construction charges for this division, to fix and allocate the construction cost per acre in accordance with the findings and recommendations of the Board of Survey and Adjustments as shown on page 26 of House Document No. 201, 69th Congress, 1st Session. As recited on page 26 of said Document No. 201, the board found that the total gross cost of construction charged to the division, as of June 30, 1925, is $1,640,949; and that this cost should be allocated on the basis of 37,500 acres and not upon 24,200 as heretofore; and that a deduction of $234,407 should be made from the cost named. Applying the deduction of $234,407 would leave a remainder of $1,406,542 and the board's report at this point recites:

"The net cost would be $1,406,542, and this amount, divided by 37,500 acres, would give an average construction cost of $37.50 per acre. This per acre cost of $37.50 does not include any costs for future construction work which will be necessary to complete this division, and this should be particularly noted."

The estimate of cost to complete the works for 33,000 acres which are considered irrigable, is $1,678,000 or a per acre cost of $50.85. This amount added to the per acre cost to June 30, 1925, of $37.50 would make a total per acre cost of $88.35. A summary of the construction estimate for work after June 30, 1925, is attached to and made a part of this order.[1] If the actual cost of future work is less than the estimate of $1,678,000 named above, the construction charge will be proportionately reduced, but the expenditure of $1,678,000 will not be exceeded without the water users agreeing to repay all sums in excess of this amount. In arriving at the per acre rate of $88.35, and as shown above, the write-off of $234,407 authorized in section 15 of the act of May 25, 1926, has been deducted from the total cost, but before this write-off may be actually accomplished, the Secretary of the Interior must require, as set forth in section 45 of the said act of May 25, 1926, a contract with a water users' association or irrigation district whereby such association or irrigation district shall be required to pay the entire charges against all productive lands within the division without regard to default in the payment of charges against any individual tract of land; also as provided in section 45 of the act named, there must be executed a contract of the character described, before the 40-year repayment plan as authorized in this section may be made effective. Since the Tule Lake Division, with the exception of a few tracts, embraces only public land it would not be possible to make such a contract until the lands are opened and entered. Under the circumstances, the division will be operated on a water-rental basis until its agricultural development has advanced sufficiently to permit of a district organization, at which time a so-called joint liability contract will be required and the construction charge will be announced at $88.35 per acre payable over a 40-year period. Should the entrymen or water users fail, or refuse to proceed in the manner required under the act of May 25, 1926, it will become necessary to issue public notice under the Extension Act of August 14, 1914 (38 Stat. 686), without regard to the write-off and under a 20-year repayment plan. This would result in a per acre charge of $49.70 instead of $37.50 for the cost to June 30, 1925, which added to the per acre cost to complete of $50.85, would fix the construction charge at $100.55 per acre payable in 20 years.

[1] See p. 2014.

18. *Water-rental charges.*—The minimum water-rental charge for the irrigation season of 1938 shall be one dollar and eighty cents ($1.80) per acre for each irrigable acre of land in the farm unit, whether water is used or not, which will entitle the entryman to 2½ acre-feet of water per irrigable acre. Additional water will be furnished during the said irrigation season up to a limit of 3½ acre-feet per irrigable acre at the rate of 50 cents per acre-foot, and all further quantities for 75 cents per acre-foot, payable on December 1, 1938. Payment of the minimum charge of one dollar and eighty cents ($1.80) per acre for the irrigation season of 1938 shall be made at the time of filing of water-rental applications: *Provided*, That when water-rental application is filed after June 15, 1938, payment shall be of a minimum charge of one dollar and eighty cents ($1.80) per acre, which payment shall apply as a credit on the minimum charge for the following irrigation season. If payment for water used in addition to the allowance under the minimum charge is not made on or before December 1 as herein provided, there shall be added to the amount unpaid a penalty of one-half of 1 per centum thereof, and there shall be added a like penalty of one-half of 1 per centum on the first day of each month thereafter so long as such default shall continue. No water will be delivered to the entryman in subsequent years until such charge shall have been paid in full. Future charges will be announced by future order or public notice.

19. *Place and manner of payment of water charge.*—All water charges must be paid at the office of the Bureau of Reclamation at Klamath Falls, Oregon, by cash or bank draft, cashier's check, certified check, or postal or express money order, payable to Bureau of Reclamation.

20. *Water-right application under public notice.*—Within three months after date of public notice announcing the construction charges for the land described in this order, each entryman, if required to do so by the Secretary of the Interior, shall make a formal water-right application covering his farm unit. Upon failure to do so, the Secretary may, at his option, cancel the entry in question, with all rights acquired thereunder.

21. *All land to be included in irrigation district.*—Each water-rental application for land covered by this order shall be made on Form 7–289 and the following clause shall be inserted at the bottom of said form:

"I agree to the inclusion of my land in an irrigation district and I agree also to participate in the organization of an irrigation district at the earliest practicable date."

22. *Reservation of rights of way for county highways.*—Rights of way are reserved for county highways across the farm units shown on the farm unit plats along all red lines shown on said plats, said rights of way being 30 feet in width on each side of said lines in all cases where lines are drawn in red solid lines and 60 feet in width out of the farm units crossed by lines drawn in red broken lines. Rights

of way are also reserved for proposed state highway across the farm units abutting the northeasterly side of the Central Pacific Railroad Company's right of way, the said highway right of way being a strip of 100 feet in width, parallel to and touching the said railroad right of way.

23. *Effect of relinquishment prior to one-year's residence.*—In the event that any entry of public land shall be relinquished at any time prior to actual residence upon the land by the entryman for not less than one year, the lands so relinquished shall not be subject to entry for a period of 60 days after the filing and notation of the relinquishment in the local land office. During the 10-day period next succeeding the expiration of such 60-day period, any person having the necessary qualifications may file application for said public land. If, on the tenth day of said 10-day period, prior to 2 p. m. the number of applications filed exceeds the number of available farm units, then the right to make entry for such farm units shall be determined in accordance with the procedure described in paragraph 12 of this order.

24. *Waiver of mineral rights.*—All homestead entries for any of the above-described land will be subject to the laws of the United States governing mineral land and all applicants under this order must waive the right to the mineral content of the land, if required to do so by the Land Office, otherwise the homestead application will be rejected or the homestead entry cancelled.

T. A. WALTERS,
*First Assistant Secretary.*

## DEPARTMENT OF AGRICULTURE.

### Farm Security Administration.

[Memorandum No. 737 (Amendment to Memorandum No. 710)]

APPROVAL OF LOANS TO INDIVIDUALS

SEPTEMBER 15, 1937.

Pursuant to the authority delegated to me in Executive Order No. 7530, dated December 31, 1936, Dr. Will W. Alexander, as Administrator of the Resettlement Administration of the Department of Agriculture, and, in the event of his absence, Mr. C. B. Baldwin, as Deputy Administrator, are hereby authorized to perform on my behalf the following power and function, in addition to those authorized by Memorandum No. 710, dated February 2, 1937:

To approve the making of loans to individuals in amounts not in excess of $10,000 for any one individual; in connection therewith to execute necessary legal instruments, to prescribe the requisite security and the terms and conditions upon which the loans will be made, and to perform such functions in connection with such loans as are specified in Administration Order 41 (Revision 1), paragraph 7b.

[SEAL] H. A. WALLACE, *Secretary.*

[F. R. Doc. 37-2904; Filed, September 29, 1937; 12:32 p. m.]

## DEPARTMENT OF COMMERCE.

### Bureau of Air Commerce.

CIVIL AIR REGULATIONS

Pursuant to the authority contained in the Air Commerce Act of 1926 (44 Stat. 568) as amended, and as further amended by the Act of June 19, 1934 (48 Stat. 1113), the Act of June 19, 1934 (48 Stat. 1116), and Section 12 of the Act of June 12, 1934 (48 Stat. 933, 937), the following civil air regulations are hereby made, established, and issued to be known as

Chapter 20. Pilot Rating
Chapter 21. Airline Pilot Rating
Chapter 23. Ground Instructor Rating
Chapter 24. Mechanic Rating
Chapter 25. Parachute Rigger Rating
Chapter 26. Traffic Control Tower Operator Rating
Chapter 27. Airline Dispatcher Rating
Chapter 40. Scheduled Airline Rating (Interstate)
Chapter 50. Flying School Rating
Chapter 52. Aircraft Repair Station Rating
Chapter 61. Scheduled Airline Rules

Any and all rules or regulations made, established, and issued by the Secretary of Commerce pursuant to law as are inconsistent with the provisions of the above specified civil air regulations are hereby repealed.

Approved, to take effect November 1, 1937, unless otherwise specifically provided in a particular chapter or part thereof.

[SEAL] DANIEL C. ROPER,
*Secretary of Commerce.*

CHAPTER 20. PILOT RATING

20.0. PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the examination and rating of airmen serving in connection with aircraft of the United States as to their qualifications for such service, pilots will be rated in accordance with the following provisions.

20.00. *General Pilot Ratings:* The general classification and rating of pilots will be based upon their hours of solo flight and the kind of aeronautical activity for which they are deemed competent. Each general rating, except student rating, will include an aircraft rating specifying the type, weight and engine classification of the aircraft which the pilot is deemed competent to fly, and a flight area rating specifying the geographical area in which he is deemed competent to pilot aircraft. The general pilot ratings will be as follows:

(a) Student Pilot Rating
(b) Solo Pilot Rating
(c) Private Pilot Rating
(d) Limited-Commercial Pilot Rating
(e) Commercial Pilot Rating
(f) Airline Pilot Rating (Provided for in all respects in CAR 21)
(g) Student Glider Pilot Rating
(h) Private Glider Pilot Rating
(i) Commercial Glider Pilot Rating

20.01. *Special Pilot Ratings:* Special pilot ratings will be based upon satisfactory demonstration of pilot competence as related to skill or qualification for a particular piloting activity. The special pilot ratings will be as follows:

(a) Instructor Rating
(b) Instrument Rating

20.1. GENERAL RATING MINIMUM REQUIREMENTS: To be eligible for a general pilot competency rating, an applicant shall comply with the following minimum requirements prescribed for the particular rating sought.

20.10. *Student Pilot Rating:* To be eligible for a student pilot rating, an applicant shall comply with the following minimum requirements.

20.100. Age—Applicant shall be at least 16 years of age. If applicant be less than 21 years of age at the time of making application, he shall submit with his application the written consent of either parent, or legal or natural guardian, to the issuance of a student pilot rating.

20.101. Character—Applicant shall be of good moral character.

20.102. Citizenship—Applicant may be a citizen of any nationality.

20.103. Education—Applicant shall be able to read, speak, write and understand the English language; except that a citizen of a country granting reciprocal pilot privileges to pilots of the United States on equal terms and conditions will not be required to meet the English language requirements.

20.104. Physical Condition—Applicant shall comply with the following minimum requirements as to physical condition: *Provided,* That the existence of a lesser grade or condition in one or more of the particulars mentioned may not disqualify the applicant if excellence in other particulars or excellence in aeronautical experience or in aeronautical skill offsets the deficiency in the opinion of the Secretary: *Provided, however,* That an increase of such deficiency, which occurs at any time within the effective period of the certificate and cannot be compensated for by some additional excellence (as in aeronautical experience or practical skill), will be ground for the revocation of such certificate:

20.1040 (a). Eye—Applicant shall have a visual acuity of at least 20/50 in each eye separately, without correction; provided that, if the vision in either or both eyes is poorer than 20/50 and is brought up to 20/30 or better in each such eye by glasses, the applicant may be qualified on condition that correcting glasses be worn while piloting aircraft. An average of 30 millimeters or less on the depth perception apparatus, with or without glasses, is required. If the depth perception is greater than 30 millimeters without correction and can be corrected to at least 30 millimeters by glasses, the restriction that correcting glasses be worn while piloting aircraft will apply. No diplopia will be allowed unless corrected by glasses in which case such glasses must be worn while piloting aircraft. There shall be no serious pathology of the eye.

20.1041 (b). Ear, Nose, Throat and Equilibrium—Applicant shall be able to hear the whispered voice at three feet; shall have no acute or chronic disease of the internal ear, no disease or malformation of the nose or throat which may interfere with or be aggravated by flying, and no disturbance in equilibrium.

20.1042. (c). General Physical Condition—Applicant shall have no organic or functional disease or structural defect or limitation which might interfere with the safe piloting of aircraft.

20.1043. (d). Nervous System—Applicant shall have no disease of the mental or nervous system and no abnormality of the personality.

20.105. Aeronautical Knowledge—No minimum requirement is prescribed but, prior to his first solo flight, applicant shall be familiar with the provisions of CAR 60, and such fact shall be certified to by his instructor in accordance with the requirements of CAR 20.652.

20.106. Aeronautical Experience—No minimum requirement.

20.107. Aeronautical Skill—No minimum requirement is prescribed but, prior to his first solo flight, applicant shall have had a minimum of 8 hours dual flight instruction and shall have been deemed, in the opinion of his instructor, competent to make such flight, and such competence shall be certified to by his instructor on the student pilot certificate in the place provided therefor. The date of such flight and the type, weight and engine classification of the aircraft so flown shall also be certified by the instructor in the same manner.

20.11. *Solo Pilot Rating:* To be eligible for a solo pilot rating, an applicant shall comply with the following minimum requirements.

20.110. Age—Same as in CAR 20.100.
20.111. Character—Same as in CAR 20.101.
20.112. Citizenship—Same as in CAR 20.102.
20.113. Education—Same as in CAR 20.103.
20.114. Physical Condition—Same as in CAR 20.104.

20.115. Aeronautical Knowledge—Applicant shall be familiar with and accomplish satisfactorily a written examination on so much of the provisions of CAR 00, 01, 02, 03, 20, 30, 60, 91, 94 and 98, as are pertinent to his rating.

20.116. Aeronautical Experience—Applicant shall have logged at least 5 hours of solo flight time, of which at least 3 hours shall have been logged within the 60 days last preceding the date of filing the application: *Provided, however,* That a graduate of the solo pilot course of a certificated flying school will be deemed to have complied with this requirement upon presentation of his certificate of graduation.

20.117. Aeronautical Skill—Applicant shall demonstrate satisfactorily his ability to pilot aircraft in solo flights including normal take-offs, turns and landings.

20.12. *Private Pilot Rating:* To be eligible for a private pilot rating, an applicant shall comply with the following minimum requirements:

20.120. Age—Same as in CAR 20.100.
20.121. Character—Same as in CAR 20.101.

20.122. Citizenship—Same as in CAR 20.102.

20.123. Education—Same as in CAR 20.103.

20.124. Physical Condition—Same as in CAR 20.104.

20.125. Aeronautical Knowledge—Same as in CAR 20.115 and, in addition, applicant shall satisfactorily accomplish a written examination covering prevailing weather conditions in the United States as encountered in flying, and the forecasting thereof, the analyzing of weather maps and sequence reports as furnished by the United States Weather Bureau, practical air navigation problems and the use of maps, and navigation by terrain (pilotage) and by dead reckoning, including the use of instruments and other aids to navigation in visual contact flying.

20.126. Aeronautical Experience—Applicant shall have logged at least 35 hours of solo flight time, of which at least 5 hours shall have been logged within the 60 days last preceding the date of filing the application: *Provided, however,* That a graduate of the private pilot course of a certificated flying school will be deemed to have complied with this requirement upon presentation of his certificate of graduation. As part of the foregoing, applicant shall have logged at least 5 hours of solo cross-country flying which shall include at least one flight over a course of not less than 50 miles with at least 2 full stop landings at different points on such course. Such experience shall be certified to by some person, other than the applicant, having direct knowledge of the same.

20.127. Aeronautical Skill—Applicant, for rating on heavier-than-air aircraft of a land or water type, exclusive of gliders, shall demonstrate satisfactorily his ability to pilot an aircraft in solo flight and, in addition to normal take-offs, turns and landings, to perform satisfactorily the following maneuvers:

20.1270 (a). From 1,500 feet, with engine throttled, a 360° turn and a landing in normal landing attitude, the wheels touching the ground beyond and within 300 feet of a line or point designated by the examining Bureau inspector.

20.1271 (b). From 1,000 feet, with engine throttled, a 180° turn and a landing in normal landing attitude, the wheels touching the ground beyond and within 300 feet of a line or point designated by the examining Bureau inspector.

20.1272 (c). A series of 3 shallow and 3 steep figure 8 turns, and one 720° steep power turn in each direction. During these maneuvers, the pilot shall not gain or lose more than 200 feet of altitude.

20.1273 (d). A spiral in one direction from 2,000 feet, with engine throttled, and a landing in normal landing attitude, the wheels touching the ground beyond and within 300 feet of a line or point designated by the examining Bureau inspector.

20.1274 (e). A right hand and a left hand spin, each of at least one full turn.

20.1275 (f). Emergency maneuvers such as spirals, side slips and climbing turns, and recovery from stalls and such other maneuvers as the examining Bureau inspector may deem necessary and appropriate to demonstrate the competence of the applicant for the rating sought.

20.128. Aeronautical Skill on Other Types—Applicant, for rating on aircraft other than gliders or conventional heavier-than-air aircraft of a land or water type, shall demonstrate satisfactorily his ability to pilot an aircraft of such other type in solo flight and, in addition to normal take-offs and landings, shall perform such other maneuvers as the examining Bureau inspector may deem necessary and appropriate to demonstrate the competence of the applicant.

20.13. *Limited-Commercial Pilot Rating:* To be eligible for a limited-commercial pilot rating, an applicant shall comply with the following minimum requirements:

20.130. Age—Applicant shall be at least 18 years of age.

20.131. Character—Same as in CAR 20.101.

20.132. Citizenship—Applicant shall be

20.1320 (a). A citizen of the United States, or

20.1321 (b). A citizen of a foreign country which grants reciprocal commercial pilot privileges to citizens of the United States on equal terms and conditions with citizens of such foreign country, or

20.1322 (c). An alien who has filed his declaration of intention to become a citizen of the United States and notifies the Secretary of the serial number of such declaration and of the date thereof and of the court in which it is filed; *provided,* that the certificate of competency is, in such case, subject to revocation if the holder does not from time to time keep the Secretary advised of the status of the proceedings in court and does not diligently and successfully prosecute them and become admitted as a citizen.

20.133. Education—Applicant shall be able to read, speak, write and understand the English language.

20.134. Physical Condition—Applicant shall comply with the following minimum requirements as to physical condition: *Provided,* That the existence of a lesser grade or condition in one or more of the particulars mentioned may not disqualify the applicant if excellence in other particulars or excellence in aeronautical experience or in aeronautical skill offsets the deficiency, in the opinion of the Secretary: *Provided, however,* That an increase of such deficiency, which occurs at any time within the effective period of the certificate and cannot be compensated for by some other excellence (as in aeronautical experience or practical skill), will be ground for the revocation of such certificate:

20.1340 (a). Eye—Applicant shall have a visual acuity of at least 20/20 in each eye separately without correction; an average depth perception of 30 millimeters or less without correction; no diplopia; not more than 1 diopter of hyperphoria; properly balanced eye muscles with an abduction of 3 diopters or more; sufficient accommodation to pass a Bureau test based primarily upon ability to read official aeronautical maps; normal fields of vision, and no pathology of the eye.

20.1341 (b). Ear, Nose, Throat and Equilibrium—Applicant shall be able to hear the whispered voice at eight feet with each ear separately; shall have no acute or chronic disease of the middle or internal ear; no disease of the mastoid; no unhealed perforations of the ear drum; no disease or malformation of the nose or throat which may interfere with or be aggravated by flying, and no disturbance of equilibrium.

20.1342 (c). General Physical Condition—Same as in CAR 20.1042.

20.1343 (d). Nervous System—Same as in CAR 20.1043.

20.135 Aeronautical Knowledge—Same as in CAR 20.125 and, in addition, applicant shall satisfactorily accomplish a written examination on the theory and the practice of flight and the maintenance of aircraft, and on the maintenance and proper use of aircraft power units in common use.

20.136. Aeronautical Experience—Applicant shall have logged at least 60 hours of solo flight time, of which at least 5 hours shall have been logged within the 60 days last preceding the date of filing the application. *Provided, however,* That a graduate of the limited-commercial pilot course of a certificated flying school will be deemed to have complied with this requirement upon presentation of his certificate of graduation. Solo cross-country flying time as provided in CAR 20.126.

20.137. Aeronautical Skill—Same as in CAR 20.127 except as follows:

20.1370 (a). In the maneuvers required by CAR 20.1270, CAR 20.1271 and CAR 20.1273, the wheels shall touch the ground beyond and within 250 feet of the line or point designated.

20.1371 (b). In the maneuvers required by CAR 20.1272, the pilot shall not gain or lose more than 150 feet.

20.1372 (c). In the spins required by CAR 20.1274, the applicant shall perform a 2-turn spin in each direction with an error of not more than plus or minus ¼ turn.

20.138. Aeronautical Skill on Other Types—Same as in CAR 20.128.

20.14. *Commercial Pilot Rating:* To be eligible for a commercial pilot rating, an applicant shall comply with the following minimum requirements:

20.140. Age—Same as in CAR 20.130.

20.141. Character—Same as in CAR 20.101.

20.142. Citizenship—Same as in CAR 20.132.

20.143. Education—Same as in CAR 20.133.

20.144. Physical Condition—Same as in CAR 20.134.

20.145. Aeronautical Knowledge—Same as in CAR 20.135 except that the examinations will be more searching and in greater detail.

20.146. Aeronautical Experience—Applicant shall have logged at least 200 hours of solo flight time, of which at least 5 hours shall have been logged within the 60 days last preceding the date of filing the application: *Provided, however,* That a graduate of the commercial pilot course of a certificated flying school will be deemed to have complied with this requirement upon presentation of his certificate of graduation. As part of the foregoing applicant shall have logged at least 10 hours of solo cross-country flying, which shall include at least one flight over a course of not less than 100 miles with at least three full stop landings at different points on such course. Such experience shall be certified to by some person, other than the applicant, having direct knowledge of the same.

20.147. Aeronautical Skill—Same as in CAR 20.127 except as follows:

20.1470 (a). In the maneuvers required by CAR 20.1270, CAR 20.1271 and CAR 20.1273, the wheels shall touch the ground within 200 feet beyond the line or point designated.

20.1471 (b). In the maneuvers required by CAR 20.1272, the pilot shall not gain or lose more than 100 feet.

20.1472 (c). Applicant shall complete the spins required in CAR 20.1372 except that the permissible error shall be plus or minus ten degrees.

20.148. Aeronautical Skill on Other Types—Same as in CAR 20.128.

20.15. *Student Glider Pilot Rating:* To be eligible for a student glider pilot rating, an applicant shall comply with the following minimum requirements.

20.150. Age—Applicant shall be at least 14 years of age.

20.151. Character—Same as in CAR 20.101.

20.152. Citizenship—Same as in CAR 20.102.

20.153. Education—Same as in CAR 20.103.

20.154. Physical Condition—Applicant shall certify that to the best of his knowledge and belief he has no physical defect which renders him incompetent to pilot a glider.

20.155. Aeronautical Knowledge—No minimum requirements.

20.156. Aeronautical Experience—No minimum requirements.

20.157. Aeronautical Skill—No first solo flight shall be made by a student glider pilot until, in the opinion of his instructor, the student is deemed competent to make such solo flight.

20.16. *Private Glider Pilot Rating:* To be eligible for a private glider pilot rating, an applicant shall comply with the following minimum requirements:

20.160. Age—Same as in CAR 20.150.

20.161. Character—Same as in CAR 20.101.

20.162. Citizenship—Same as in CAR 20.102.

20.163. Education—Same as in CAR 20.103.

20.164. Physical Condition—Same as in CAR 20.154.

20.165. Aeronautical Knowledge—No minimum requirements.

20.166. Aeronautical Experience—No minimum requirements.

20.167. Aeronautical Skill—Applicant shall demonstrate satisfactorily his ability to pilot a glider and to make normal take-offs and landings, a series of moderate banks, and such other maneuvers as the examining Bureau inspector may deem necessary and appropriate to demonstrate the competence of the applicant for the rating sought.

20.17. *Commercial Glider Pilot Rating:* To be eligible for a commercial glider pilot rating, an applicant shall comply with the following minimum requirements:

20.170. Age—Applicant shall be at least 18 years of age.

20.171. Character—Same as in CAR 20.101.

20.172. Citizenship—Same as in CAR 20.132.

20.173. Education—Same as in CAR 20.133.

20.174. Physical Condition—Same as in CAR 20.104.

20.175. Aeronautical Knowledge—Same as in CAR 20.115.

20.176. Aeronautical Experience—Applicant shall have completed 25 gliding flights of which at least 5 flights shall have been made within the 60 days last preceding the date of filing the application.

20.177. Aeronautical Skill—Same as in CAR 20.167 and, in addition, 360° turns will be required.

20.2. SPECIAL RATING MINIMUM REQUIREMENTS: To be eligible for a special pilot competency rating, an applicant shall comply with the following minimum requirements prescribed for the particular rating sought:

20.20. *Instructor Rating:* To be eligible for an instructor rating, an applicant shall comply with the following minimum requirements:

20.200. Age—Same as in CAR 20.130.

20.201. Aeronautical Knowledge—Applicant shall have practical and theoretical knowledge of flight instruction and shall accomplish a satisfactory written and practical examination thereon.

20.202. Aeronautical Experience—Applicant shall be possessed of a valid commercial or private pilot rating, provided that in the latter case he meets the requirements of CAR 20.146.

20.203. Aeronautical Skill—Applicant shall satisfactorily accomplish a practical flight test as to his ability to perform with precision and teach properly such fundamental flight maneuvers as are, in the opinion of the Secretary, deemed necessary and appropriate for safe and sound instruction in the safe piloting of aircraft.

20.21. Instrument Rating: To be eligible for an instrument rating, an applicant shall comply with the following minimum requirements:

20.210. Aeronautical Knowledge—Applicant shall be familiar with the use of such instruments and other navigational aids, both in aircraft and on the ground, as are deemed by the Secretary to be necessary for the navigation of aircraft by instruments, and with meteorology as applied to weather analysis and forecasting, and the applicant shall satisfactorily accomplish a written examination thereon.

20.211. Aeronautical Experience—Applicant shall have logged at least 200 hours of solo flight time as prescribed in CAR 20.146, including a minimum of at least 20 hours of instrument flying instruction and practice, and shall be possessed of a valid private, limited-commercial or commercial pilot rating. In lieu of not to exceed 10 hours of the foregoing 20-hour requirement applicant may show an equal or greater amount of instruction and practice under suitable conditions approved by the Secretary. Applicant shall also be possessed of a valid and appropriate radio license issued by the Federal Communications Commission.

20.212. Aeronautical Skill—Applicant shall satisfactorily accomplish, solely by instruments, a flight test with respect to the following:

20.2120 (a). Straight level flight for a given period of time.

20.2121 (b). Moderately banked 180° and 360° turns in both directions.

20.2122 (c). Minimum glides and maximum climbs, and approaches to stalled attitudes of flight.

20.2123 (d). Climbing turns.

20.2124 (e). Recovery from stalls, skids, slips and spirals, and from banks in excess of 45°.

20.2125 (f). Such other maneuvers as the examining inspector deems necessary.

20.2126 (g). A practical demonstration, while in flight or under simulated conditions, of estimating arrival time, taking into account speed, wind and drift.

20.213. Radio Skill—Applicant shall satisfactorily accomplish, solely by instruments, a flight test with respect to the following:

20.2130 (a). Tuning radio.

20.2131 (b). Orientation.

20.2132 (c). Following radio range.

20.2133 (d). Locating cone of silence.

20.2134 (e). Letting-down-through on the range by the approved instrument approach procedure for the particular airport used in connection with the test.

20.2135 (f). Such other maneuvers as the examining inspector deems necessary.

20.3. PILOT COMPETENCY CERTIFICATE

20.30. *Provision for Issuance:* An appropriate pilot certificate of competency will be issued by the Secretary to a natural person who is an applicant therefor, after approval of an application made and proofs submitted in connection therewith and if upon inspection and examination such applicant is found by the Secretary to meet the appropriate minimum requirements prescribed in CAR 20.1. Holders of valid pilot licenses, except student licenses, may pilot aircraft pursuant to such authority until the expiration thereof. Holders of valid student pilot licenses may pilot aircraft pursuant to such authority until the expiration thereof or for 6 months after the effective date of these regulations, whichever is the shorter period. Upon the expiration of each pilot license as just set forth the holder, upon meeting the requirements for the renewal or re-issuance thereof and for any ratings held, may have issued to him the following certificates and ratings:

(a) If the holder of a student license, a *solo certificate*, provided he has logged at least 5 hours of certified solo flying time and makes application within the effective period of his license. If the holder of a student license with no or less than 5 hours solo flying time, a *student certificate*, which may be issued by a duly authorized Bureau inspector: *Provided*, That application is made within the effective period of such license and a satisfactory physical examination shown, as provided for in CAR 20.104, within the 6 months immediately preceding application for such student certificate: *And, provided, further*, That such student certificate shall expire one year from the date of said physical examination. Otherwise CAR 20.10 and 20.60 shall apply.

(b) If the holder of an amateur license, a solo certificate.

(c) If the holder of a private, limited-commercial or transport license, a private, limited-commercial or commercial certificate respectively, plus an instrument rating if a non-scheduled instrument rating is held and, in the case of the commercial pilot certificate, an instructor rating whether or not a flying instructor's rating is held.

20.300. Aircraft Rating—The type, weight and engine classification of the aircraft (except unconventional aircraft) which the applicant is deemed competent to pilot will be entered upon the pilot certificate. (See CAR 20.54 and 20.55.)

20.301. Flight Area Rating—When limited, the geographical area in which the applicant is deemed competent to pilot the aircraft provided for in CAR 20.302 will be entered upon the pilot certificate. (See CAR 20.56.)

20.302. Special Rating—When issued to an applicant, as provided for in CAR 20.2 and 20.4, any special rating will be entered upon his pilot certificate.

20.303. Identification Card—An appropriate pilot identification card will be issued in connection with a pilot certificate, in the discretion of the Secretary.

20.31. *Application:* Application for a pilot certificate of competency, subscribed under oath, shall be made to the Secretary upon a form supplied for the purpose.

20.310. Application to Amend—When any change in a pilot competency rating is desired, whether affecting the general or special ratings, the applicant shall file a written request therefor with the Secretary upon a form supplied for the purpose.

20.311. Proceeding to Amend—A proceeding to amend a pilot competency rating, whether general or special, may be instituted by the Secretary when, in his opinion, the pilot is no longer competent in respect of some matter specified in the certificate. Notice of such proceeding shall be addressed to the pilot with opportunity for a hearing. In the interim, the certificate may be suspended in whole or in part. Following the hearing, the Secretary may issue a re-rating as to competency.

20.32. *Issuance:* Upon approval of an application duly made, proofs submitted and examinations and tests satisfactorily completed, a pilot certificate of competency will be issued in an appropriate form.

20.320. Temporary Certificate—Following application made for a pilot certificate of competency, but prior to approval thereof and issuance of the certificate, a temporary pilot certificate may be issued by the examining Bureau inspector. A temporary student pilot certificate may be issued by a medical examiner authorized by the Secretary for such purpose.

20.33. *Display:* A pilot certificate of competency shall be kept in the personal possession of the pilot at all times when piloting aircraft, and shall be presented for inspection upon the demand of any passenger, of any authorized official or employee of the Department of Commerce and of any State or municipal official charged with the duty of enforcing local laws or regulations involving Federal compliance, or upon the reasonable request of any other person.

20.34. *Duration:* A pilot certificate of competency, unless sooner suspended or revoked in accordance with the provisions of CAR 20.37, will remain in force for the following periods, for the respective kinds of certificate:

20.340 (a). Student pilot—1 year
20.341 (b). Solo pilot—1 year
20.342 (c). Private pilot—1 year
20.343 (d). Limited-commercial pilot—6 months
20.344 (e). Commercial pilot—6 months
20.345 (f). Airline pilot—6 months (See CAR 21)
20.346 (g). Student Glider pilot—1 year
20.347 (h). Private glider pilot—1 year
20.348 (i). Commercial glider pilot—1 year

20.35. *Renewal:* The term of a pilot certificate (other than a student pilot or student glider pilot certificate) may be renewed, for a like period as the original certificate, upon application within 45 days prior to expiration and upon satisfactory showing of the following facts with respect to the kinds of certificates issued:

20.3500 (a). Student pilot—Not renewable
20.3501 (b). Solo pilot—

(1) 15 hours of solo flight, in aircraft of each type, weight and engine classification for which renewal is sought, within the year preceding expiration, and

(2) a satisfactory physical examination, completed within the 9 months preceding expiration, in accordance with the provisions of CAR 20.104.

20.3502 (c). Private pilot—Same as in CAR 20.351 except that the physical examination provided for shall have been completed within the 14 months preceding expiration.

20.3503 (d). Limited-commercial pilot

(1) 10 hours of solo flight, in aircraft of each type, weight and engine classification for which renewal is sought, within the 6 months preceding expiration, and

(2) a satisfactory physical examination, completed within the 60 days preceding expiration, in accordance with the provisions of CAR 20.134.

20.3504 (e). Commercial pilot—Same as in CAR 20.353.
20.3505 (f). Airline pilot—See CAR 21.
20.3506 (g). Student glider pilot—Not renewable.
20.3507 (h). Private glider pilot—10 gliding flights, or one soaring flight of one hour, within the year preceding expiration.

20.3508 (i). Commercial glider pilot—Same as in CAR 20.356, together with a satisfactory physical examination completed within the 60 days preceding expiration, in accordance with CAR 20.104.

20.3509. Reinstatement—In the event of an emergency which prevents renewal prior to expiration, and upon a showing thereof satisfactory to the Secretary, the applicant may have his pilot certificate validated in accordance with the provisions for renewal in CAR 20.35, provided the flight tests appropriate to the rating are again satisfactorily accomplished. The date of application for reinstatement rather than the expiration date of the certificate shall be controlling in applying CAR 21.35. There shall be but one application for reinstatement following a given lapse.

20.3510. Re-Rating after Lapse—Within 6 months after the expiration date of a private, limited-commercial or commercial pilot certificate the holder thereof may have issued to him a solo pilot certificate upon application therefor and a satisfactory showing to the Secretary of physical competency as provided in CAR 20.351 (2), and of 5 hours of certified solo flying time logged by the applicant within the year preceding application in aircraft of each type, weight and engine classification for which the solo pilot certificate is sought.

20.36. *Non-Transferability:* A pilot certificate of competency is not transferable.

20.37. *Suspension or Revocation:* The following rules will govern the suspension of revocation of pilot competency certificates.

20.370. Automatic Invalidation—Any physical deficiency, or any increase in physical deficiency, which occurs at any time within the effective period of a pilot certificate and which is not compensated for by some additional excellence as provided for in CAR 20.104 and 20.134, will automatically cause the pilot certificate to become invalid for the period of such physical deficiency.

20.371. General Grounds—A pilot certificate of competency may be suspended or revoked by reason of any of the following on the part of the holder thereof:

20.37100 (a). Any false statement in an application for a certificate or in any report required by the Secretary.
20.37101 (b). Use or display of the certificate for any fraudulent purpose.
20.37102 (c). Refusal to exhibit the certificate upon proper demand.
20.37103 (d). Unsound physical or mental condition.
20.37104 (e). Any demonstration of incompetency in the piloting of aircraft.
20.37105 (f). Failure to wear correcting lenses when required.
20.37106 (g). Being under the influence of, or using or having personal possession of, intoxicating liquor, cocaine or other habit-forming drugs while on duty.
20.37107 (h). Carrying any passenger who is obviously under the influence of intoxicating liquor, cocaine or other habit-forming drugs.
20.37108 (i). Carelessness or inattention to duty affecting safety.
20.37109 (j). Performance of any act in connection with aircraft which is contrary to the public safety or interest.
20.37110 (k). Violation of any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

20.38. *Surrender:* Upon notice from the Secretary of the suspension or revocation of a pilot certificate, the holder thereof shall immediately return such certificate to the Secretary.

20.39. *Re-Application:* The following rules will govern the re-application for pilot competency certificates:

(a) An applicant for a solo, private glider or commercial glider pilot certificate who has failed to successfully accomplish any prescribed theoretical or practical examination or test may apply for re-examination in any such subject at any time after the expiration of 45 days from the date of such failure.

(b) An applicant for a private, limited-commercial or commercial pilot certificate who has failed to successfully accomplish any prescribed theoretical or practical examination or test may apply for re-examination at any time after the expiration of 90 days from the date of such failure, provided he shows at least 15 additional hours of certified flying time logged by him.

20.4. SPECIAL COMPETENCY RATING

20.40. *Provision for Issuance:* An appropriate special competency rating will be issued by the Secretary, upon approval of application made and satisfactory proofs submitted, to a natural person who, upon inspection and examination, is found by the Secretary to meet the appropriate minimum requirements prescribed in CAR 20.2.

20.41. *Application:* Same as in CAR 20.31 applied to a special rating.

20.42. *Issuance:* Any special rating issued to a pilot will be entered or indicated at the proper place therefor on the pilot certificate of competency.

20.43. *Duration:* A special rating, unless sooner suspended or revoked in accordance with the provisions of CAR 20.46, will remain in force for the effective period of the particular pilot certificate held.

20.44. *Renewal:* Renewal of a special rating may be effected upon application therefor within 45 days prior to the expiration of the pilot certificate and upon satisfactory showing of the following facts with respect to the kind of rating held:

20.440. Instructor Rating—The requirements appropriate for renewal of private or commercial pilot certificates as provided in CAR 20.35, as the case may be, and a satisfactory showing that the applicant has served as an instructor for not less than 10 hours during the preceding 6 months. The holder of such rating may be required to undergo a re-examination in any of the tests prescribed for the original rating at such times as the Secretary deems necessary.

20.441. Instrument Rating—Applicant shall have logged:
20.4410 (a). If holder of a private pilot certificate—10 hours of flying solely by instruments within the year preceding the expiration of the pilot certificate, 5 hours of which shall have been within 6 months thereof.
20.4411 (b). If holder of a limited-commercial or commercial pilot certificate—5 hours of flying solely by instruments within the 6 months preceding the expiration date of the certificate.
20.4412 (c). In lieu of not to exceed 50% of either of the above requirements applicant may show an equal or greater amount of practice under simulated conditions approved by the Secretary.

20.442. Reinstatement—In the event of an emergency which prevents renewal of any of the foregoing special ratings prior to expiration, and upon a showing thereof satisfactory to the Secretary, the applicant may have his rating or ratings validated in accordance with the appropriate provisions for renewal in CAR 20.440 through 20.441, as the case may be, provided the flight tests appropriate to the particular rating are satisfactorily accomplished. The date of application for reinstatement rather than the expiration date of the rating shall be controlling in applying CAR 20.440 through 20.441. There shall be but one application for reinstatement following a given lapse.

20.45. *Non-Transferability:* A special rating is not transferable.

20.46. *Suspension or Revocation:* A special rating may be suspended or revoked by reason of the suspension or revocation of the pilot certificate or by reason of any of the following, on the part of the holder thereof:

20.460 (a). Any false statement in an application for a pilot rating.
20.461 (b). Unsound physical or mental condition.
20.462 (c). Any demonstration of incompetency in piloting aircraft, particularly as related to any given rating.
20.463 (d). Violation of any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

20.47. *Re-Application:* An applicant for a special competency rating who has failed to successfully accomplish any prescribed test for such rating may apply for re-examination thereon after the expiration of 30 days from the date of such failure.

20.5. EXAMINATIONS AND TESTS

20.50. *General:* The examinations and tests prescribed in the foregoing regulations (both for pilot certificates of competency and for the ratings issued with respect thereto) will be conducted by an authorized officer or employee of the Bureau or by a properly qualified person designated for the purpose by the Secretary.

20.51. *Time and Place:* All examinations and tests will be held at such times and places as the Secretary may designate.

20.52. *Physical Examinations:* The following rules will

govern the physical examinations given in connection with the original issuance of any pilot competency certificate:

20.520 (a). The appropriate physical examination prescribed shall be accomplished before any practical or theoretical test or other examination will be given, and shall be completed within the 9 months preceding application for a solo or private rating, or within the 4 months preceding application for a limited-commercial or commercial pilot rating.

20.521 (b). In lieu of a physical examination conducted by authority of the Secretary, a certified copy of the medical examination for flying in the United States Army, Navy, or Marine Corps, made within the 60 days preceding the date of filing application for a pilot certificate, will be accepted for any pilot rating: *Provided*, That the physical qualifications as shown in such prior examination are not less than those required by these regulations for the kind of pilot certificate of rating applied for.

20.522 (c). A pilot holding a certificate of a lower grade and applying for a certificate of a higher shall pass satisfactorily a new physical examination for the grade applied for unless his prior physical examination was for higher grade and was passed within the time limit prescribed in CAR 20.520.

20.53. *Aircraft Used in Tests:* The applicant shall furnish a certificated aircraft for any flight test involved. Each such aircraft, used in any test for a pilot certificate above the grade of solo pilot, shall be equipped with dual controls and shall accommodate the applicant, the inspector and parachutes for both. Aircraft having only one elevator and aileron control for two seats, or any arrangement whereby all flight and engine controls cannot be handled in a normal or conventional manner from either seat are not considered as having dual controls for the purpose of flight tests for pilot ratings.

20.54. *Aircraft Type Classification:* For purposes of specifying the types of aircraft which the applicant is deemed competent to pilot and for convenience of examining the applicant with respect thereof, the following aircraft type classification is prescribed:

(a) Conventional airplane (land or water)
(b) Unconventional airplane (land or water)
(c) Rotorplane (land or water)
(d) Glider
(e) Aerostat.

20.540. Unconventional aircraft which the applicant is deemed competent to fly will be specified on his pilot certificate by make and model designation only.

20.55. *Aircraft Weight and Engine Classification:* For purposes of specifying the weight and power-plant equipment of aircraft which the applicant is deemed competent to pilot, and for convenience of examining the applicant with respect thereto, the following aircraft weight and engine classification is prescribed:

(a) Class 1—Gross weight not more than 1,500 pounds.
(b) Class 2S—Gross weight between 1,500 and 4,000 pounds, single-engine.
(c) Class 2M—Gross weight between 1,500 and 4,000 pounds, multi-engine.
(d) Class 3S—Gross weight between 4,000 and 10,000 pounds, single-engine.
(e) Class 3M—Gross weight between 4,000 and 10,000 pounds, multi-engine.
(f) Class 4S—Gross weight between 10,000 and 25,000 pounds, single-engine.
(g) Class 4M—Gross weight between 10,000 and 25,000 pounds, multi-engine.
(h) Class 5—Gross weight in excess of 25,000 pounds.

20.550. The holder of a valid private, limited-commercial or commercial pilot certificate may pilot conventional aircraft of a similar type (seaplane, landplane, etc.) and of an equal or lower weight and/or engine classification than as specified on such pilot certificate, except for the carriage of persons or property for hire.

20.56. *Flight Area Classification:* For purposes of specifying the geographical limits within which the applicant is deemed competent to pilot aircraft, the following flight area classification is prescribed.

(a) *Limited*—in which case the radius from the base of aircraft operations within which the pilot is deemed competent to pilot shall be within 10 miles for piloting of aircraft carrying persons for hire, and the name of the particular base will be set forth in the pilot certificate, provided that upon 10 days notice to and approval by the Secretary, said area specified in the certificate issued to a limited-commercial pilot may be changed to a different area.

(b) *Unlimited*—in which case the pilot is deemed by the Secretary to be competent to pilot aircraft without restriction as to geographical limits. Such rating relates only to the competency of the pilot and, of itself, will only authorize the applicant to pilot aircraft in the airspace over those geographical areas (other than airspace reservations and other prohibited areas) wherein the pilot certificate is accorded official recognition as valid and effective.

20.57. *Inspection:* The applicant for a pilot certificate of competency shall offer full cooperation with respect to any inspection or examination which may be made of such applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of a pilot certificate of competency.

20.58. *Standard of Performance:* Every practical and theoretical examination and test shall be accomplished to the satisfaction of the Secretary and the minimum passing grade in the subject of examination and test shall be 70 per cent. Each flight maneuver will be graded separately. Other examinations will be graded as a whole.

20.59. *Reports:* The person giving any examination or test in behalf of the Secretary shall report the result thereof upon an appropriate form to the Secretary and all data collected incident to such examination or test shall be considered as of a confidential nature by all persons conducting such examinations or tests and by all employees of the Department of Commerce.

20.6. PILOT REGULATIONS

20.60. *Certificate Required:* No person shall pilot a civil aircraft on a civil airway, or in interstate or foreign air commerce elsewhere, unless possessed of a valid pilot certificate of competency or, if an alien, possessed of a similar pilot certificate or permit, issued or validated according to the provisions of CAR 65. Accordingly, no person shall make a solo flight of civil aircraft on a civil airway, or in interstate or foreign air commerce elsewhere, unless possessed of such certificate, but, prior to such solo flight, no pilot certificate will be required of a person who is flying with a certificated instructor in an aircraft equipped with fully functioning dual controls as provided in CAR 20.53, and provided further, that said instructor is in full charge of one set of said controls. Even then such flights shall be only for instruction or the demonstration of the aircraft to a bona fide prospective purchaser thereof.

20.61. *Carriage of Persons:* The following rules will govern the carriage of persons in aircraft in flight:

20.160. Student—No person possessed of a valid student pilot certificate or receiving dual instruction shall carry in any aircraft in flight any property or any person other than a certificated instructor. No person who has not attained the age of 16 years shall receive dual instruction in any aircraft.

20.611. Solo Pilot—No person possessed of a valid solo pilot certificate shall carry, for or without hire, any person or property in any aircraft in flight.

20.612. Private Pilot—No person possessed of a valid private pilot certificate shall carry any property or any person for hire in any aircraft in flight.

20.613. Limited-Commercial Pilot—No person possessed of a valid limited-commercial pilot certificate shall carry any person for hire in any aircraft in flight outside or beyond the geographical limits specified in his pilot certificate: *Provided*, That such person may demonstrate aircraft in flight outside the geographical limits of such area to prospective purchasers: *Provided, also*, That such person may carry guests, executives or employees of the company employing him, beyond the geographical limits of such area if no additional payment be made for such carriage: *Provided, further*, That such person may serve as second pilot beyond the geographical limits of such area if accompanied by a person possessed of a valid commercial pilot certificate who is in command of such aircraft.

20.614. Commercial Pilot—No person possessed of a valid commercial pilot certificate shall carry any persons or property in scheduled airline service in interstate or foreign air commerce, unless possessed of a valid instrument rating.

20.615. Glider Pilot—No person shall pilot a glider for any commercial purpose unless possessed of a valid commercial glider pilot certificate.

20.62. *Aircraft Type and Weight:* No person shall pilot for hire, or carry any person for or without hire other than a properly certificated instructor in, an aircraft of a type, weight or engine classification other than as specified in his pilot certificate.

20.63. *Aircraft Flight Area:* No person shall pilot an aircraft carrying any person for hire beyond the geographical limits of the flight area specified in his pilot certificate, except as provided in CAR 20.613.

20.64. *Night Flying:* A commercial, limited-commercial or private pilot who has not had at least 2 hours of night solo flying within the last preceding 90 days shall not pilot aircraft carrying passengers between sunset and sunrise until after he has taken off and landed, between sunset and sunrise, at least 10 times, nor unless at least 3 of such landings were made to a full stop.

20.65. *Instruction:* The following rules will govern the giving of flight instructions:

20.650. Rating Required—No person shall give flying instruction for hire to any other person unless possessed of a valid commercial certificate and a valid instructor rating, or, in case of instruction of glider students, unless possessed of a valid commercial glider pilot certificate. Instruction not for hire may be given by the holder of a valid commercial or private pilot certificate and a valid instructor rating.

20.651. Solo Flight Authorization—No instructor shall authorize, or knowingly permit any person to whom he has given flying instruction to make, any solo flight on a civil airway or in interstate or foreign air commerce elsewhere, unless such person is possessed of a valid pilot certificate.

20.652. Aeronautical Knowledge Certification—No instructor shall authorize, or knowingly permit any person to whom he has given flying instruction to make a first solo flight on a civil airway, or in interstate or foreign air commerce elsewhere, until he has examined such student as to his knowledge of the provisions of CAR 60 and until such student shows a satisfactory knowledge thereof, which facts shall be certified to by such instructor on the student pilot certificate.

20.653. Time Limitations—No instructor shall give more than 6 hours of dual flying instruction in any one day, nor more than 6 days of such instruction in any one week.

20.654. Flying Instruction Time Entries—No instructor shall give flying instruction unless, immediately following each period of such instruction, he makes in the log-book of his student the appropriate certified entries as provided in CAR 20.661.

20.66. *Log-Books:* The following rules will govern pilot log-books:

20.660. General—Every certificated pilot and every person receiving flying instruction shall keep an accurate record of his flying time in a log-book in which the entries with respect to dual instruction have been certified by a certificated instructor and the entries with respect to solo flying time have been certified to by him before a notary public.

20.661. Contents—The log-book shall contain the date of flight, the type of aircraft flown, the aircraft certificate number, a statement of instrument and nightly flying time, the duration of the flight, and the points between which such flight was made, and when any flight results in serious damage to the aircraft, a notation to this effect. Flying instruction time shall be logged in the same manner and, in addition, the instructor shall make complete entries in the log-book of his student showing the nature of each maneuver in which instruction was given and the time spent thereon. The instructor shall attest each such entry with his initials and pilot certificate number and rating thereon. This log-book shall be made available, upon demand, to any authorized representative of the Department of Commerce or State or municipal officer enforcing local regulations or laws involving Federal compliance.

20.662. From and after the effective date of these regulations no flying time shall be taken into account in connection with the issuance, renewal or reinstatement of a pilot certificate unless the aircraft flown was possessed of a valid and appropriate certificate of airworthiness.

20.67. *Foreign Flights:* No person shall be in command of any aircraft of the United States flying in any foreign country unless possessed of a valid private, limited-commercial, commercial or airline pilot certificate, with a rating for the type, weight and engine classification of aircraft so flown.

NOTE.—For permission of U. S. Aircraft to be flown out of the United States with intent to enter a foreign country, see CAR 70.

CHAPTER 21. AIRLINE PILOT RATING

21.0. PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of airmen serving in connection with aircraft of the United States as to their qualifications for such service, airline pilots will be rated as to competence in accordance with the provisions of the following paragraphs.

21.1. MINIMUM REQUIREMENTS: To be eligible for an airline pilot competency rating, an applicant shall comply with the following minimum requirements:

21.10. Age—Applicant shall be at least 23 years of age.

21.11. Character—Applicant shall be of good moral character.

21.12. Citizenship—Applicant shall be

21.120 (a). a citizen of the United States, or

21.121 (b). a citizen of a foreign country which grants reciprocal commercial pilot privileges to citizens of the United States on equal terms and conditions with citizens of such foreign country, or

21.122 (c). an alien who has filed his declaration of intention to become a citizen of the United States and notifies the Secretary of the serial number of such declaration and of the date thereof and of the court in which it is filed: *Provided*, That the certificate of competency is, in such case, subject to revocation if the holder does not from time to time keep the Secretary advised of the status of the proceedings in court and does not diligently and successfully prosecute them and become admitted as a citizen.

21.13. Education:

21.130 (a). Applicant shall be able to read, write, and understand the English language, and shall be able to speak the English language without accent or impediment of speech which would interfere with two-way radio conversation; and

21.131 (b). shall be a high school graduate or what is deemed by the Secretary to be its equivalent from the applicant's showing of general experience and aeronautical experience, knowledge and skill.

21.14. Physical Condition—Applicant shall comply with the following minimum requirements as to physical condition:

21.140 (a). Eye—Applicant shall have a visual acuity of at least 20/20 in each eye separately without correction; an average depth perception of 30 millimeters or less without correction; no diplopia; not more than 1 diopter of hyperphoria; properly balanced eye muscles with an abduction of 3 diopters or more; sufficient accommodation to pass a Bureau test based primarily upon ability to read official aeronautical maps; normal fields of vision; and no pathology of the eye.

21.141 (b). Ear, Nose, Throat and Equilibrium—Applicant shall be able to hear the whispered voice at eight feet with each ear separately; shall have no acute or chronic disease of the middle or internal ear; no disease of the mastoid; no unhealed perforations of the ear drum; no disease or malformation of the nose or throat which may interfere with or be aggravated by flying, and no disturbance in equilibrium.

21.142 (c). General Physical Condition—Applicant shall have no organic or functional disease or structural defect or limitation which might interfere with the safe piloting of aircraft.

21.143 (d). Nervous System—Applicant shall have no disease of the mental or nervous system and no abnormality of the personality.

21.15. Aeronautical Knowledge—Applicant shall be familiar with and shall accomplish a satisfactory written examination on:

21.1500 (a). The provisions of CAR 00, 02, 40, 60, 61 and 98, with CAR 01.70 through 01.74, 04.52 and 04.53, and with 27, 30, 31, 91 and 94 insofar as the same deal with airline operations, and with CAR 41, 70, 71 and 77 if the pilot is to be rated for airline operation in whole or in part without the United States.

21.1501 (b). The fundamentals of air navigation and the use of formulae and of instruments and other navigational aids, both in aircraft and on the ground, which are deemed necessary for the navigation of aircraft by instruments.

21.1502 (c). The general system of weather collection and dissemination.

21.1503 (d). Weather map, weather forecast, and weather sequence abbreviations, symbols and nomenclature.

21.1504 (e). Elementary meteorology, including modern knowledge of the cyclone as associated with fronts.

21.1505 (f). Cloud forms.

21.1506 (g). Department of Agriculture Weather Bureau Circular "N", Instructions for Airway Meteorological Service, and all amendments thereto.

21.1507 (h). Weather conditions, including icing conditions and upper-air winds, affecting aeronautical activities.

21.1508 (i). Air navigation facilities in use on the civil airways, including rotating beacons, course lights, radio ranges, and radio marker beacons.

21.1509 (j). Data obtained from airplane weather observations and meteorological data reported from observations made by pilots engaged in airline flights.

21.1510 (k). The influence of terrain upon meteorological conditions and developments, and the relation thereof to airline flight operations.

21.16. Aeronautical Experience—Applicant shall comply with the following requirements:

21.160 (a). Applicant shall be possessed of a valid commercial pilot rating, or equivalent as determined by the Secretary.

21.161 (b). Applicant shall have logged at least 1,200 hours of certified solo flying time within the last 8 years, of which at least 500 hours shall have been in cross-country flight, and of which at least 5 hours of solo flying time shall have been logged within the 60 days last preceding the date of filing the application.

21.162 (c). Applicant shall have logged at least 100 hours of solo night flying, of which at least 50 hours shall have been cross-country over lighted airways.

21.163 (d). Applicant shall have had at least 20 hours of instrument flying instruction and practice. In lieu of not to exceed 10 hours of the foregoing 20-hour requirement applicant may show an equal or greater amount of instruction and practice under simulated conditions approved by the Secretary.

21.17. Aeronautical Skill—Applicant shall demonstrate satisfactorily his ability to pilot an aircraft of each type, weight and engine classification, as provided in CAR 21.34 and 21.35, on which he seeks rating, in normal take-offs, turns, landings, and the following maneuvers (the maneuvers in CAR 21.175 and 21.176 may be performed in a type of aircraft satisfactory to the examining Bureau inspector):

21.170 (a). From 2,000 feet, with engine throttled, a 360° turn and a landing in normal landing attitude, the wheels touching the ground beyond and within 200 feet of a line or point designated by the examining Bureau inspector.

21.171 (b). From 1,500 feet, with engine throttled, a 180° turn and a landing in normal landing attitude, the wheels touching the ground beyond and within 200 feet of a line or point designated by the examining Bureau inspector.

21.172 (c). A series of 3 shallow and 3 steep figure 8 turns, and one 720° steep power turn in each direction. During these maneuvers, the pilot shall not gain or lose more than 200 feet of altitude.

21.173 (d). A spiral in one direction from 2,000 feet, or higher, with engine throttled, and a landing in normal landing attitude, the wheels touching the ground beyond and within 200 feet of a line or point designated by the examining Bureau inspector.

21.174 (e). Altitudes and permissible errors in CAR 21.170 through 21.173 are applicable when flight tests are conducted in aircraft of a gross weight in excess of 10,000 pounds, otherwise those in CAR 20.1470 through 20.1472 apply.

21.175 (f). Emergency maneuvers such as spirals, side slips and climbing turns, and recovery from stalls, maneuvers in multi-engine equipment with authorized load with one engine inoperative, and such other maneuvers as the examining Bureau inspector may deem necessary to demonstrate the competence of the applicant.

21.176 (g). A right hand and a left hand spin, each of at least two full turns, with not to exceed 10 degrees error.

(NOTE.—The requirements of CAR 21.170 through 21.176 may be met by the holding of a valid commercial rating.)

21.177. Applicant shall accomplish satisfactorily a flight test, solely by instruments, with respect to the following:

21.1770 (a). Straight level flight for a given period of time.

21.1771 (b). Moderate banks during 180° and 360° turns in both directions.

21.1772 (c). Minimum glides and maximum climbs, and approaches to stalled attitudes of flight.

21.1773 (d). Climbing turns.

21.1774 (e). Recovery from stalls, skids, slips and spirals, and from banks in excess of 45°.

21.1775 (f). Such other maneuvers as the examining inspector deems necessary.

21.1776 (g). A practical demonstration, while in flight or under simulated conditions, of estimating arrival time, taking into account speed, wind and drift.

(NOTE.—The requirements of CAR 21.1770 through 21.1774 may be met by the holding of a valid instrument rating.)

21.178. Radio Skill—Applicant shall accomplish a satisfactory flight test, in a hooded cockpit, with respect to the following:

21.1780 (a). Tuning radio.

21.1781((b). Orientation.

21.1782 (c). Following radio range.

21.1783 (d). Locating cone of silence.

21.1784 (e). Letting-down-through on the range by the approved instrument approach procedure for the particular airport used in connection with the test.

21.1785 (f). Such other maneuvers as the examining inspector deems necessary.

21.2 AIRLINE PILOT COMPETENCY CERTIFICATE

21.20. *General:* An airline pilot competency certificate will be issued by the Secretary to a natural person, who is an applicant therefor, after approval of an application made and proofs submitted in connection therewith and if, upon inspection and examination, said applicant is found by the Secretary to meet the minimum requirements prescribed therefor in CAR 21.1. For 6 months after the effective date of these regulations the holder of both a valid transport pilot license and a scheduled air transport rating, upon a showing of the same and upon application made as provided in CAR 21.21, will be issued an airline pilot certificate with ratings specifying aircraft of the type, weight and engine classification as specified on his transport pilot license. In the interim, piloting shall be under authority heretofore granted.

21.21. *Application:* Application for an airline pilot certificate, subscribed under oath, shall be made to the Secretary upon a form supplied for the purpose.

21.210. Application to Amend—When any change in an airline pilot competency rating is desired, the applicant shall file a written request therefor with the Secretary upon a form supplied for the purpose.

21.211. Proceeding to Amend—A proceeding to amend an airline pilot competency rating may be instituted by the Secretary when, in his opinion, the pilot is no longer competent in respect of some matter specified in the certificate. Notice of such proceeding shall be addressed to the pilot with opportunity for a hearing. In the interim, the certificate may be suspended in whole or in part. Following the hearing, the Secretary may issue a re-rating as to competency.

21.22. *Issuance:* Upon approval of an application duly made, proofs submitted and examinations and tests satisfactorily completed, an airline pilot certificate will be issued in an appropriate form.

21.220. Temporary Certificate—Following application made for an airline pilot certificate, but prior to approval thereof and issuance of the certificate, a temporary airline pilot certificate may be issued by the examining Bureau inspector.

21.221. Special Ratings—Any special rating, except an instrument rating, issued as provided in CAR 20.2 and 20.4 will be entered or indicated at the proper place therefor on the airline pilot certificate.

21.222. Any airline pilot, possessed of a valid certificate as such, shall be considered competent to instruct, as outlined in CAR 20.20, other pilots in airline service on the type of equipment in which the instructing pilot is rated.

21.23. *Display:* An airline pilot certificate shall be kept in the personal possession of the pilot at all times when piloting aircraft, and shall be presented for inspection upon the demand of any passenger, or of any authorized official or employee of the Department of Commerce or any State or municipal official charged with the duty of enforcing local laws or regulations involving Federal compliance, or upon the reasonable request of any other person.

21.24. *Duration:* An airline pilot certificate, unless sooner suspended or revoked, as provided in CAR 21.27, will remain in force for 6 months.

21.25. *Renewal:* The term of an airline pilot certificate may be renewed, for a like period as the original certificate, upon application within 45 days prior to expiration and upon satisfactory showing of the following facts:

21.250 (a). 10 hours of solo flight, in aircraft of each type, weight and engine classification for which renewal is sought, within the 6 months preceding expiration.

21.251 (b). 5 hours of flying solely by instruments within the 6 months preceding the expiration date of the certificate. In lieu of 50% of the above requirement, applicant may show an equal or greater amount of practice under simulated conditions approved by the Secretary.

21.252 (c). A satisfactory physical examination by a medical examiner of the Department of Commerce, duly authorized to so examine such pilots, completed within the 45 days preceding expiration, in accordance with the provisions of CAR 21.14. Provided, however, that the existence of a lesser grade or condition in one or more of the particulars mentioned in CAR 21.14 may not disqualify the applicant if excellence in other particulars or excellence in aeronautical experience or in aeronautical skill offsets the deficiency, in the opinion of the Secretary; and *provided*, further, that an increase in such deficiency, which occurs at any time within the effective period of the certificate and cannot be compensated for by some other excellence (as in aeronautical experience or practical skill) will be ground for the revocation of such certificate.

21.253. Reinstatement—In the event of an emergency which prevents renewal prior to expiration, and upon a showing thereof satisfactory to the Secretary, the applicant may have his airline pilot certificate validated in accordance with the provisions for renewal in CAR 21.25, provided the flight tests appropriate to the rating are again satisfactorily accomplished. The date of application for reinstatement rather than the expiration date of the certificate shall be controlling in applying CAR 21.25. There shall be but one application for reinstatement following a given lapse.

21.254. Re-Rating after Lapse—Within 6 months after the expiration date of an airline pilot certificate the holder thereof may have issued to him a solo pilot certificate upon application therefor and a satisfactory showing to the Secretary of physical competency as provided in CAR 21.252, and of 5 hours of certified solo flying time logged by the applicant within the year preceding application in aircraft of each type, weight and engine classification for which the solo pilot certificate is sought.

21.26. *Non-Transferability:* An airline pilot certificate is not transferable.

21.27. *Suspension or Revocation:* The following rules will govern the suspension or revocation of an airline pilot certificate.

21.270. Automatic Invalidation—Any physical deficiency, or any increase in physical deficiency, which occurs at any time within the effective period of an airline pilot certificate and which is not compensated for by some additional excellence as provided for in CAR 21.252, will automatically cause such pilot certificate to become invalid for the period of such physical deficiency.

21.271. General Grounds—An airline pilot certificate may be suspended or revoked by reason of any of the following on the part of the holder thereof:

21.27100 (a). Any false statement in an application for a certificate or in any report required to be submitted by these regulations.

21.27101 (b). Use or display of the certificate for any fraudulent purpose.

21.27102 (c). Refusal to exhibit the certificate upon proper demand.

21.27103 (d). Unsound physical or mental condition.

21.27104 (e). Any demonstration of incompetency in the piloting of aircraft.

21.27105 (f). Failure to wear correcting lenses when required.

21.27106 (g). Being under the influence of, or using or having personal possession of, intoxicating liquor, cocaine or other habit-forming drugs while on duty.

21.27107 (h). Knowingly taking off and carrying any passenger who is obviously under the influence of intoxicating liquor, cocaine or other habit-forming drugs.

21.27108 (i). Carelessness or inattention to duty affecting safety.

21.27109 (j). Performance of any act in connection with aircraft which is contrary to the public safety or interest.

21.27110 (k). Violation of any provision of the Air Commerce Act or any rule or regulations duly issued thereunder.

21.28. *Surrender:* Upon notice from the Secretary of the suspension or revocation of an airline pilot certificate, the holder thereof shall immediately return such certificate to the Secretary.

21.29. *Re-Application:* An applicant for an airline pilot certificate who has failed to successfully accomplish any prescribed test for such rating may apply for re-examination thereon after the expiration of 30 days from the date of such failure, provided he shows at least 10 additional hours of certified solo flying time logged by him, which shall include at least 5 hours of flying solely by instruments.

21.3. EXAMINATIONS AND TESTS

21.30. *General:* The examinations and tests prescribed in these regulations (both for an airline pilot certificate and for the ratings issued with respect thereto) will be conducted by an authorized officer or employee of the Bureau or by a properly qualified person designated for the purpose by the Secretary. During the flight tests the airline may have a check pilot on board.

21.31. *Physical Examination:* In connection with the original issuance of any airline pilot certificate the physical examination prescribed shall be accomplished by a medical examiner of the Department of Commerce, duly authorized to so examine such pilots, before any practical or theoretical test or other examination will be given, and shall be completed within the 60 days preceding the date of filing application for such pilot certificate.

21.32. *Time and Place:* All examinations and tests will be held at such times and places as the Secretary may designate.

21.33. *Aircraft Used in Tests:* The applicant shall furnish a certificated aircraft for any flight test involved. Each such aircraft, used in any test for an airline pilot certificate shall be equipped with dual controls and shall accommodate the applicant and the inspector. Aircraft having only one elevator and aileron control for two seats, or any arrangement whereby all flight and engine controls cannot be handled in a normal or conventional manner from either seat, are not considered as having dual controls for the purpose of flight tests for pilot ratings. Each such aircraft shall have full normal visibility for the check pilot.

21.34. *Aircraft Type Classification:* For purposes of specifying the types of aircraft which the applicant is deemed competent to pilot and for convenience of examining the applicant with respect thereof, the following aircraft type classification is prescribed:

(a) Conventional airplane (land or water)
(b) Unconventional airplane (land or water)
(c) Rotorplane (land or water)
(d) Glider
(e) Aerostat

21.35. *Aircraft Weight and Engine Classification:* For purposes of specifying the weight and power-plant equipment of aircraft which the applicant is deemed competent to pilot, and for convenience of examining the applicant with respect thereto, the following aircraft weight and engine classification is prescribed:

(a) Class 1—Gross weight not more than 1,500 pounds.
(b) Class 2S—Gross weight between 1,500 and 4,000 pounds, single-engine.
(c) Class 2M—Gross weight between 1,500 and 4,000 pounds, multi-engine.
(d) Class 3S—Gross weight between 4,000 and 10,000 pounds, single-engine.
(e) Class 3M—Gross weight between 4,000 and 10,000 pounds, multi-engine.
(f) Class 4S—Gross weight between 10,000 and 25,000 pounds, single-engine.
(g) Class 4M—Gross weight between 10,000 and 25,000 pounds, multi-engine.
(h) Class 5—Gross weight in excess of 25,000 pounds.

21.36. *Inspection:* The applicant for an airline pilot certificate shall offer full cooperation in respect of any inspection or examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of such certificate.

21.37. *Standard of Performance:* Every practical and theoretical examination and test shall be accomplished to the satisfaction of the Secretary and the minimum passing grade in the subject of examination or test shall be 70 per cent. Each flight maneuver will be graded separately. Other examinations will be graded as a whole.

21.38. *Reports:* The person giving any examination or test in behalf of the Secretary will report the result thereof upon an appropriate form to the Secretary and all data collected incident to such examination or test will be considered as of a confidential nature by such person and by all employees of the Department of Commerce.

21.4. PILOT REGULATIONS

21.40. *Certificate Required:* No person shall be in command of an aircraft in certificated scheduled air carrier service for the carriage of passengers on a civil airway, or in interstate or foreign air commerce or elsewhere, unless possessed of a valid airline pilot certificate.

21.41. *Aircraft Type and Weight:* No person holding a valid airline pilot certificate shall pilot for hire, or carry any person for or without hire other than a properly certificated instructor in, an aircraft of a type, weight or engine classification other than as specified in his airline pilot certificate.

21.42. *Night Flying:* Unless an airline pilot has had at least 2 hours of night solo flying within the last preceding 90 days he shall not pilot aircraft carrying passengers for hire, between sunset and sunrise, until after he has taken off and landed, between sunset and sunrise, at least 10 times. At least 3 of such landings shall have been made to a full stop.

21.43. *Log-Books:* The following rules will govern pilot log-books:

21.430. General—Every certificated airline pilot shall keep an accurate record of his flying time in a log-book in which the entries as to solo flying have been certified to by him before a notary public or by an official of the airline of which he is an employee during such time, and in which the entries as to instruction have been certified to by his instructor.

21.431. Contents—The log-book shall contain the date of flight, the type of aircraft flown, the aircraft certificate number, a statement of instrument and night flying time, the duration of the flight, and the points between which such flight was made, and, in addition, when any flight results in serious damage to the aircraft, a notation to this effect. Flying instruction time shall be logged in the same manner and, in addition, the instructor shall make complete entries in the log-book of his student showing the nature of each maneuver in which instruction was given and the time spent thereon. The instructor shall attest each such entry with his initials and pilot certificate number and rating thereon. This log-book shall be made available, upon demand, to any authorized representative of the Department of Commerce or State or municipal officer enforcing local regulations or laws involving Federal compliance.

21.44. *Foreign Flights:* No person shall be in command of any aircraft of the United States flying in any foreign country unless possessed of an airline pilot certificate with a rating for the type, weight and engine classification of aircraft so flown.

NOTE.—For permission of U. S. aircraft to be flown out of the United States with intent to enter a foreign country, see CAR 70.

CHAPTER 23. GROUND INSTRUCTOR RATING

23.0. PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of instructors in civilian schools giving instruction in flying as to their competency for such service, ground instructors will be rated in accordance with the provisions of the following paragraphs.

23.1. MINIMUM REQUIREMENTS: To be eligible for a ground instructor competency rating, an applicant shall have practical and theoretical knowledge of each ground school subject which the applicant desires to teach in a certificated flying school, or elsewhere. Such knowledge shall be sufficient to accomplish satisfactorily a written examination thereon.

23.2. INSTRUCTOR COMPETENCY CERTIFICATE

23.20. *Provision for Issuance:* A ground instructor certificate of competency will be issued by the Secretary upon approval of application made and satisfactory proofs submitted, to a natural person who, upon inspection and examination, is found by the Secretary to meet the minimum requirements prescribed in CAR 23.1 and is, therefore, rated as competent to give instruction in the aviation ground school subject, or subjects, specified.

23.201. Each holder of a valid ground instructor's rating on the date these regulations go into effect may instruct pursuant to such authority until the expiration thereof, and then, upon compliance with the provisions for renewal thereof, have issued to him a ground instructor certificate of competency as provided for herein.

23.21. *Application:* Application for a ground instructor certificate of competency, subscribed under oath, shall be made to the Secretary upon a form supplied for the purpose.

23.210. Application to Amend—When any change in a ground instructor competency rating is desired, the applicant shall file a written request therefor with the Secretary or may make oral or written request of the local Bureau inspector.

23.211. Proceeding to Amend—A proceeding to amend a ground instructor competency rating may be instituted by the Secretary when, in his opinion, the instructor is no longer competent in respect of some matter specified in the certificate. Notice of such proceeding shall be addressed to the instructor with opportunity for a hearing. In the interim, the certificate may be suspended in whole or in part. Following the hearing, the Secretary may issue a rerating as to competency.

23.22. *Issuance:* Upon approval of an application duly made, proofs submitted and examinations and tests satisfactorily completed, a ground instructor certificate of competency will be issued.

23.220. Temporary Certificate—Following application made for a ground instructor certificate, but prior to approval thereof and issuance of the certificate, a temporary ground instructor certificate may be issued by the local Bureau inspector. Likewise, for the period of time elapsing between application for renewal of a certificate and the issuance of the renewal, a temporary certificate may be issued by the local Bureau inspector.

23.23. *Display:* A ground instructor certificate of competency shall be kept in the personal possession of the instructor at all times when he is engaged in giving instruction in ground school subjects to students in any certificated flying school, or elsewhere, and shall be presented upon the demand of any student, school officer, or of any authorized official or employee of the Department of Commerce, or upon the reasonable request of any other person.

23.24. *Duration:* A ground instructor certificate, unless sooner suspended or revoked, as provided in CAR 23.27, will remain in force for the period of one year from date of issuance.

23.25. *Renewal:* A ground instructor certificate may be renewed upon application within 30 days prior to the expiration thereof and upon satisfactory showing that the holder has served in a capacity of ground instructor in an approved school, or elsewhere, for a period of time not less than one-half the duration of his certificate.

23.26. *Non-Transferability:* A ground instructor certificate of competency is not transferable.

23.27. *Suspension or Revocation:* A ground instructor certificate of competency may be suspended or revoked by reason of any of the following on the part of the holder thereof:

23.270 (a). Any false statement in an application for a ground instructor certificate.

23.271 (b). Any demonstration of incompetency in giving instruction in ground school subjects.

23.272 (c). Refusal to exhibit ground instructor certificate upon demand.

23.273 (d). Carelessness or inattention to duty.

23.274 (e). Violation of any provision of the Air Commerce Act or any rules or regulation duly issued thereunder.

23.28. *Surrender:* Upon notice from the Secretary of the suspension or revocation of his ground instructor certificate, the holder shall immediately return such certificate to the Secretary.

23.29. *Re-Application:* An applicant for a ground school instructor certificate, who has failed to successfully accomplish any prescribed examination or test for such rating or certificate, may apply for re-examination therefor after the expiration of 30 days from the date of such failure.

23.3. EXAMINATIONS AND TESTS

23.30. *General:* The examinations and tests prescribed in the foregoing regulations will be conducted by an authorized officer or employee of the Department of Commerce or by a properly qualified person designated by the Secretary. The Secretary may, in his discretion and at any time, require any applicant or the holder of any ground school instructor certificate to undergo a re-examination in any theoretical or practical test prescribed as requisite for such rating or certificate.

23.31. *Time and Place:* All examinations and tests will be held at such time and place as the Secretary may designate.

23.32. *Inspection:* The applicant for any ground instructor certificate of competency shall offer full cooperation in respect of any inspection and examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of a ground instructor certificate of competency.

23.33. *Standard of Performance:* All practical and theoretical examinations and tests shall be accomplished to the satisfaction of the Secretary and the minimum passing grade in the subject of examination or test shall be 70 per cent.

23.34. *Reports:* The person giving any examination or test in behalf of the Secretary will promptly report the result thereof to the Secretary.

23.4. GROUND INSTRUCTOR REGULATIONS: The following rules will govern the giving of instruction in ground school subjects in certificated flying schools.

23.40. *No Instruction Without Certificate:* No person shall give, or offer to give, any instruction in ground school subjects to students of a certificated flying school unless such person is possessed of a valid ground instructor certificate.

CHAPTER 24. MECHANIC RATING

24.0. PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the rating of airmen serving in connection with aircraft of the United States as to their qualifications for such service, mechanics will be rated in accordance with the provisions of the following paragraphs.

24.00. Mechanic ratings will be as follows:

(a) Aircraft Mechanic Rating

(b) Aircraft Engine Mechanic Rating

24.1. MINIMUM REQUIREMENTS: To be eligible for a mechanic competency rating, an applicant shall comply with the following minimum requirements prescribed for the particular rating sought.

24.10. *Aircraft Mechanic Rating:* To be eligible for an aircraft mechanic rating, an applicant shall comply with the following minimum requirements.

24.100. Age—Applicant shall be at least 18 years of age.

24.101. Character—Applicant shall be of good moral character.

24.102. Citizenship—Applicant may be a citizen of any nationality.

24.103. Education—Applicant shall be able to read, speak, write and understand the English language.

24.104. Aeronautical Knowledge—Applicant shall have theoretical and practical knowledge of aircraft structure and rigging, including the control systems, shall know how to properly inspect, maintain, repair and overhaul the same, and shall be familiar with the provisions of CAR 00, 01, 02, 04, 15, 18 and 24.

24.105. Aeronautical Experience—Applicant shall have had at least one year of practical experience in the construction, maintenance, or repair of aircraft.

24.106. Aeronautical Skill—Applicant shall satisfactorily demonstrate, by means of written, oral and practical tests, his ability with respect to the subject matters prescribed in CAR 24.104.

24.11. *Aircraft Engine Mechanic Rating:* To be eligible for an aircraft engine mechanic rating, an applicant shall comply with the following minimum requirements:

24.110. Age—Same as in CAR 24.100.

24.111. Character—Same as in CAR 24.101.

24.112. Citizenship—Same as in CAR 24.102.

24.113. Education—Same as in CAR 24.103.

24.114. Aeronautical Knowledge—Applicant shall have theoretical and practical knowledge of aircraft engines and their accessories, including ignition systems, shall know how to properly inspect, maintain, repair and overhaul the same, and shall be familiar with the provisions of CAR 00, 01, 02, 04, 13, 14, 15, 18 and 24.

24.115. Aeronautical Experience—Applicant shall have had at least one year of practical experience in the maintenance, repair and overhaul of aircraft engines.

24.116. Aeronautical Skill—Applicant shall satisfactorily demonstrate, by means of written, oral and practical tests, his ability with respect to the subject matter prescribed in CAR 24.114.

24.2 MECHANIC COMPETENCY CERTIFICATE

24.20. *Provision for Issuance:* An appropriate mechanic certificate of competency will be issued by the Secretary upon approval of application made and satisfactory proofs submitted, to a natural person who, upon inspection and examination, is found by the Secretary to meet the appropriate minimum requirements prescribed in CAR 24.1 and is, therefore, rated as competent to construct, repair, adjust, or overhaul aircraft or aircraft engines, as the case may be, or for the inspection of any aircraft or engine construction, repairs, adjustments or overhauls.

24.200. Each holder of a valid engine mechanic's license and/or a valid airplane mechanic's license on the date these regulations go into effect may perform service pursuant to such authority until the expiration thereof, and then, upon compliance with the provisions for renewal thereof, have issued to him a mechanic competency certificate with an aircraft mechanic rating and/or an aircraft engine rating thereon, as the case may be, as provided for herein.

24.201. Identification Card—In the discretion of the Secretary, an appropriate mechanic's identification card will be issued with mechanic certificate.

24.21. *Application:* Application for a mechanic certificate, subscribed under oath, shall be made to the Secretary upon a form supplied for the purpose.

24.210. Application to Amend—When any change in a mechanic competency rating is desired, the applicant shall file a written request therefor with the Secretary or may make oral or written request of the local Bureau inspector.

24.211. Proceeding to Amend—A proceeding to amend a mechanic competency rating may be instituted by the Secretary when, in his opinion, the mechanic is no longer competent in respect of some matter specified in the certificate. Notice of such proceeding shall be addressed to the mechanic with opportunity for a hearing. In the interim, the certificate may be suspended in whole or in part. Following the hearing, the Secretary may issue a re-rating as to competency.

24.22. *Issuance:* Upon approval of an application duly made, proofs submitted, and examinations and tests satisfactorily completed, a mechanic certificate of competency will be issued in an appropriate form.

24.220. Temporary Certificate—Following application made for a mechanic certificate of competency, but prior to approval thereof and issuance of the certificate, a temporary mechanic certificate may be issued by the local Bureau inspector. Likewise, for the period of time elapsing between application for renewal of a certificate and the issuance of the renewal, a temporary certificate may be issued by the local Bureau inspector.

24.23. *Display:* A mechanic certificate shall be kept in the personal possession of the mechanic at all times when he is serving in connection with aircraft possessed of a valid aircraft certificate, and shall be presented upon the demand of any passenger in, or owner of, such aircraft upon which such mechanic has worked, or of any authorized official or employee of the Department of Commerce or of any State or municipal official charged with the duty of enforcing local laws or regulations involving Federal compliance, or upon the reasonable request of any other person.

24.24. *Duration:* A mechanic certificate, unless sooner suspended or revoked in accordance with the provisions of CAR 24.27, will remain in force for two years after the date of issue.

24.25. *Renewal:* A mechanic certificate may be renewed upon application within 30 days prior to the expiration thereof and upon satisfactory showing that, during the term of the last certificate, the holder has rendered service, under his certificate, during at least one-half of the term thereof, and that he complies with all of the appropriate minimum requirements prescribed in CAR 24.1. The service so rendered shall be described in written statement under oath subscribed by the applicant. The employer, if any, of the applicant shall certify to the authenticity of such statement.

24.26. *Non-Transferability:* A mechanic certificate is not transferable.

24.27. *Suspension or Revocation:* A mechanic certificate may be suspended or revoked by reason of any of the following, on the part of the holders thereof:

24.270 (a). Any false statement in an application for a certificate or in any report required by the Secretary.

24.271 (b). Using or displaying the certificate for any fraudulent purpose.

24.272 (c). Refusal to exhibit the certificate upon proper demand.

24.273 (d). Carelessness or inattention to duty.

24.274 (e). Any demonstration of incompetency in the construction, repair, adjustment, or overhaul of aircraft, or aircraft engines, or in the inspection of construction, repair, adjustment, or overhaul thereof.

24.275 (f). Being under the influence, or using, or having personal possession, of intoxicating liquor, cocaine, or other habit-forming drugs while on duty.

24.276 (g). Doing any act in connection with aircraft or aircraft engines which is contrary to the public safety or interest, or detrimental to the morale of pilots or mechanics.

24.277 (h). Violation of any provisions of the Air Commerce Act or of any of the rules or regulations duly issued thereunder.

24.28. *Surrender:* Upon notice from the Secretary of the suspension or revocation of his mechanic certificate, the holder shall immediately return such certificate to the Secretary.

24.29. *Re-Application:* An applicant for a mechanic certificate of competency who has failed to successfully accomplish the prescribed theoretical or practical tests may apply for re-examination at any time after the expiration of 90 days, from the date of such failure.

24.3. EXAMINATIONS AND TESTS

24.30. *General:* The examinations and tests prescribed in the foregoing regulations will be conducted by an authorized officer or employee of the Department of Commerce or by a properly qualified person designated for the purpose by the Secretary. The Secretary may, in his discretion and at any time, require any applicant, or mechanic certificate holder, to undergo a re-examination in any theoretical or practical test prescribed as requisite for such certificates.

24.31. *Time and Place:* All examinations and tests will be held at such times and places as the Secretary may designate.

24.32. *Inspection:* The applicant for any mechanic certificate of competency shall offer full cooperation in respect of any inspection and examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of a mechanic certificate of competency.

24.33. *Standard of Performance:* All practical or theoretical examinations and tests shall be accomplished to the satisfaction of the Secretary, and the minimum passing grade in any subject of examination or test shall be 70 per cent.

24.34. *Reports:* The person giving any examination or test in behalf of the Secretary will promptly report the result thereof to the Secretary.

24.4. MECHANIC REGULATIONS: The following rules pertaining to mechanic certificates will govern mechanic services in relation to certificated aircraft:

24.40. *Repair or Overhaul of Aircraft:* A workman or mechanic, other than one possessed of a valid mechanic certificate, may engage in the repair or overhaul of certificated aircraft if such repair or overhaul is in charge of a mechanic possessed of a valid mechanic certificate.

CHAPTER 25. PARACHUTE RIGGER RATING

25.0. PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide by regulation for the rating of airmen serving in connection with aircraft of the United States as to their qualifications for such service, parachute riggers will be rated in accordance with the provisions of the following paragraphs:

25.1. MINIMUM REQUIREMENTS: To be eligible for a parachute rigger competency rating, an applicant shall comply with the following minimum requirements.

25.10. *Age:* Applicant shall be at least 18 years of age.

25.11. *Character:* Applicant shall be of good moral character.

25.12. *Citizenship:* Applicant may be a citizen of any nationality.

25.13. *Education:* Applicant shall be able to read, write, speak and understand the English language.

25.14. *Aeronautical Experience:* Applicant shall show satisfactory proof of having packed 20 or more parachutes under the supervision of a certificated parachute rigger.

25.2. PARACHUTE RIGGER CERTIFICATE

25.20. *Provision for Issuance:* A parachute rigger certificate of competency will be issued by the Secretary, upon approval of application made and satisfactory proofs submitted, to a natural person who, upon inspection and examination, is found by the Secretary to meet the minimum requirements prescribed in CAR 25.1 and is, therefore, rated as competent to pack, repair, inspect, and maintain any parachute used in connection with civil aircraft of the United States.

25.200. Each holder of a valid parachute rigger license on the date these regulations go into effect may perform service pursuant to such authority until the expiration thereof, and then, upon compliance with the provisions for the renewal thereof, have issued to him a parachute rigger certificate, as provided for herein.

25.21. *Application:* Application for a parachute rigger certificate of competency, subscribed under oath, shall be made to the Secretary upon a form supplied for the purpose.

25.210. Application to Amend—When any change in a parachute rigger competency rating is desired, the applicant shall file a written request therefor with the Secretary or may make oral or written request of the local Bureau inspector.

25.211. Proceeding to Amend—A proceeding to amend a parachute rigger competency rating may be instituted by the Secretary when, in his opinion, the parachute rigger is no longer competent in respect of some matter specified in

the certificate. Notice of such proceeding shall be addressed to the parachute rigger with opportunity for a hearing. In the interim, the certificate may be suspended in whole or in part. Following the hearing, the Secretary may issue a rerating as to competency.

25.22. *Issuance:* Upon approval of an application duly made, proof submitted and examinations and tests satisfactorily completed, a parachute rigger certificate of competency will be issued.

25.220. Temporary Certificate—Following application made for a parachute rigger certificate, but prior to approval thereof and issuance of the certificate, a temporary parachute rigger certificate may be issued by the local Bureau inspector. Likewise, for the period of time elapsing between application for renewal of a certificate and the issuance of the renewal, a temporary certificate may be issued by the local Bureau inspector.

25.23. *Display:* A parachute rigger certificate shall be kept in the holder's personal possession when he is working on any parachute and must be presented for inspection upon demand of any prospective wearer, user, or owner of a parachute upon which such rigger has worked, or any authorized official or employee of the Department of Commerce, or State or municipal official charged with enforcing local regulations or laws involving Federal compliance, or upon the reasonable request of any other person.

25.24. *Duration:* A parachute rigger certificate, unless sooner suspended or revoked in accordance with the provisions of CAR 25.27, will remain in force for 2 years after date of issue.

25.25. *Renewal:* A parachute rigger certificate may be renewed upon application within 30 days prior to the expiration thereof and upon satisfactory showing that, during at least one-half of the term thereof, the holder has rendered service under his certificate and has packed at least 25 parachutes.

25.26. *Non-Transferability:* A parachute rigger certificate is not transferable.

25.27. *Suspension or Revocation:* A parachute rigger certificate may be suspended or revoked by reason of any of the following on the part of the holder thereof:

25.270 (a). Any false statement in application for certificate or in any report required by the Secretary.

25.271 (b). Using or displaying certificate for any fraudulent purpose.

25.272 (c). Refusal to exhibit certificate on proper demand.

25.273 (d). Doing any act in connection with parachutes which is contrary to the public safety or interest, or detrimental to the morale of pilots or parachute riggers.

25.274 (e). Any demonstration of incompetency in the repair, maintenance, inspection, or packing of a parachute. Furthermore, the failure of any parachute packed by the certificate holder to open after the rip cord was pulled by the wearer shall be prima facie evidence of incompetency.

25.275 (f). Being under the influence of, or using or having personal possession of intoxicating liquor, cocaine, or other habit-forming drugs while on duty.

25.276 (g). Carelessness or inattention to duty.

25.277 (h). Violation of any provision of the Air Commerce Act or any regulations duly issued thereunder.

25.28. *Surrender:* Upon notice from the Secretary of the suspension or revocation of his parachute rigger certificate, the holder shall immediately return such certificate to the Secretary.

25.29. *Re-Application:* Any applicant for a parachute rigger certificate who has failed to accomplish successfully the prescribed theoretical or practical tests or meet the requirements for such rating or certificate shall be privileged to reapply any time after the expiration of 90 days from the date of such disapproval.

25.3. EXAMINATIONS AND TESTS

25.30. *General:* The examinations and tests prescribed in the foregoing regulations will be conducted by an authorized officer or employee of the Department of Commerce or by a properly qualified person designated by the Secretary. The Secretary may, in his discretion and at any time, require any applicant or the holder of any parachute rigger certificate to undergo a re-examination in any theoretical or practical test prescribed as requisite for such rating or certificate.

25.31. *Time and Place:* All examinations and tests will be held at such time and place as the Secretary may designate.

25.32. *Inspection:* The applicant for any parachute rigger certificate of competency shall offer full cooperation in respect of any inspection and examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of a parachute rigger certificate of competency.

25.33. *Standard of Performance:* All practical and theoretical examinations and tests shall be accomplished to the satisfaction of the Secretary, and the minimum passing grade in the subject of examination or test shall be 70 per cent.

25.34. *Reports:* The person giving any examination or test in behalf of the Secretary will promptly report the result thereof to the Secretary.

25.4. PARACHUTE RIGGER REGULATIONS: The following rules pertaining to parachute rigger certificates will govern parachute rigger services in relation to parachutes:

25.40. *Necessity for Certificate:* No person (other than one designated by, and operating as a parachute packer or rigger for, the Army or Navy) shall pack, repair, inspect, or maintain any parachute used in connection with civil aircraft of the United States, unless possessed of a valid parachute rigger certificate of competency.

25.41. *Responsibility in Repacking:* A person possessed of a valid parachute rigger certificate shall be charged with the responsibility of refusing to repack any parachute which is in an unairworthy conditions.

25.42. *Minimum Facilities:* A person possessed of a valid parachute rigger certificate shall not pack, repack or repair as provided for in CAR 25.43, any parachute except in a place where the minimum facilities for such operations are

(a) A suitable table, at least 3 by 40 feet, with smooth surface;

(b) a rack where parachutes can be suspended for drying and airing;

(c) packing tools and repair equipment suitable for the repacking and repair of the type of parachute involved, and

(d) adequate housing facilities for the above equipment.

25.43. *Minor Repairs:* Repairs such as the replacement of pack-opening rubbers, packs and pilot chutes, and the patching of holes and tears in silk, may be made by any person possessed of a valid parachute rigger certificate.

25.44. *Major Repairs:* Repairs such as the replacement of canopies, panels, shroud lines and harness shall be made only by the manufacturer of the parachute involved, or by another manufacturer of parachutes deemed competent by the Secretary to make such repairs.

CHAPTER 26. AIRPORT CONTROL TOWER OPERATOR RATING

26.0. PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide by regulation for the rating of all airmen serving in connection with aircraft of the United States as to their qualifications for such service and for the issuance of airmen certificates and such other certificates and regulations as the Secretary deems necessary in administering the Act, airport control tower operator ratings will be as follows:

(a) Junior Airport Control Tower Operator Rating.
(b) Associate Airport Control Tower Operator Rating.
(c) Senior Airport Control Tower Operator Rating.

26.1. MINIMUM REQUIREMENTS: To be eligible for an airport control tower operator competency rating, an applicant shall comply with the following minimum requirements prescribed for the rating sought.

26.10. *Junior Control Tower Operator Rating:* To be eligible for a junior control tower operator rating, applicant shall comply with the following minimum requirements.

26.100. Age—Applicant shall be at least 22 years of age.

26.101. Character—Applicant shall be of good moral character.

26.102. Citizenship—Applicant shall be

(a) a citizen of the United States, or

(b) an alien who has filed his declaration of intention to become a citizen of the United States and notifies the Secretary of the serial number of such declaration and of the date thereof and of the court in which it is filed: *Provided,* That the certificate of competency is, in such case, subject to revocation if the holder does not from time to time keep the Secretary advised of the status of the proceedings in court and does not diligently and successfully prosecute them and become admitted as a citizen.

26.103. Education—Applicant shall be able to read, write, and understand the English language, shall be able to speak the English language without accent or impediment of speech which would interfere with intelligible two-way radio conversation, and shall be a high school graduate or its equivalent.

26.104. Physical Requirements—Applicant shall comply with the following minimum requirements as to physical condition.

26.1040 (a). Eye—Applicant shall have a visual acuity of at least 20/20 in each eye separately without correction; an average depth perception of 30 millimeters or less without correction; no diplopia; not more than 1 diopter of hyperphoria; properly balanced eye muscles with an abduction of 3 diopters or more; sufficient accommodation to pass a Bureau test based primarily upon ability to read official aeronautical maps; normal fields of vision, and no pathology of the eye.

26.1041 (b). Ear, Nose, Throat and Equilibrium—Applicant shall be able to hear the whispered voice at eight feet with each ear separately; shall have no acute or chronic disease of the middle or internal ear; no disease of the mastoid; no unhealed perforations of the ear drum; no disease or malformation of the nose or throat which will interfere with or be aggravated by the performance of his duties, and no disturbance of equilibrium.

26.1042 (c). General Physical Condition—Applicant shall have no organic or functional disease, nor any structural defect or limitation which might interfere with the proper performance of his duties.

26.1043 (d). Nervous System—Applicant shall have no disease of the mental or nervous system and no abnormality of the personality.

26.105. Aeronautical Knowledge—Applicant shall be familiar with and accomplish satisfactorily an examination on

26.1050 (a). airway traffic control procedure (See CAR 60),

26.1051 (b). airline schedules at the airport for which he seeks to be rated,

26.1052 (c). airport traffic control regulations for the airport for which he seeks to be rated, and

26.1053 (d). teletype symbols and weather sequences on airways converging on the airport for which he seeks to be rated.

26.106. Aeronautical Experience—No minimum requirements.

26.11. *Associate Airport Control Tower Operator Rating:* To be eligible for an associate airport control tower operator rating an applicant shall comply with the following minimum requirements:

26.110. Age—Applicant shall be at least 25 years of age.

26.111. Character—Same as CAR 26.101.

26.112. Citizenship—Applicant must be a citizen of the United States.

26.113. Education—Same as CAR 26.103.

26.114. Physical Requirements—Same as CAR 26.104, except that vision of 20/30 will be permitted provided applicant has served satisfactorily, in the opinion of the Secretary, as an airport control tower operator for a period of 6 months during the year immediately preceding his application.

26.115. Aeronautical Knowledge—Same as in CAR 26.105, and in addition the applicant shall be familiar with and accomplish satisfactorily an examination on

26.1150 (a). airline operation procedure at the airport for which he seeks to be rated,

26.1151 (b). air navigation facilities within 200 miles of the airport for which he seeks to be rated,

26.1152 (c). air traffic rules as provided in CAR 60,

26.1153 (d). the current Consolidated Interline Safety Agreement, and

26.1154 (e). airline and itinerant radio frequencies and radio procedures.

26.116. Aeronautical Experience—Applicant shall have

26.1160 (a). performed satisfactory service as a junior airport control tower operator for the year immediately preceding the date of application for rating as associate control tower operator, provided the 3 months immediately preceding such application shall have been served satisfactorily at the airport for which applicant seeks to be rated, or have

26.1161 (b). performed satisfactory service as a junior airport control tower operator for the 6 months immediately preceding the date of application for rating as associate control tower operator, provided, however, that the 3 months immediately preceding such application shall have been served satisfactorily at the airport for which applicant seeks to be rated, and provided further that the applicant has served satisfactorily as an airport control tower operator for a period of one year during the 3 years immediately preceding the date of his application, or have

26.1162 (c). performed satisfactory service for the 6 months immediately preceding such application as the operator of the control tower at the airport for which he seeks to be rated, or have

26.1163 (d). performed satisfactory service for one year of the 2 years immediately preceding such application (1) as the operator of an airport control tower, (2) as a fixed base operator, (3) in the operations department of a certificated airline, or (4) as a pilot with at least a commercial pilot competency certificate, and

26.1164 (e). shall possess an appropriate valid radio license issued by the Federal Communications Commission.

26.117. Approval by Examining Board.

26.1170 (a). An applicant shall be given an examination by a board appointed by a designated representative of the Bureau and composed of at least 3 members, one selected from the airport management and the others from airline operation departments, Bureau representatives and military aviation units on the airport or from among other competent aeronautical officials having personal knowledge of the qualifications of the applicant and the duties to be performed.

26.1171 (b). The applicant must receive the approval in writing of a majority of the members of such board before consideration will be given for issuance of a certificate of competency to him.

26.1172 (c). The representative of the Secretary will be the chairman of the examining board and will submit to the Secretary, along with the application, a written report embodying his own opinion and the consensus of the board of examiners as to the qualifications of the applicant for performing the duties of the service for which he seeks rating.

26.12. *Senior Airport Control Tower Operator Rating:* To be eligible for a senior airport control tower operator rating, an applicant shall comply with the following minimum requirements:

26.120. Age—Same as CAR 26.110.
26.121. Character—Same as CAR 26.101.
26.122. Citizenship—Same as CAR 26.112.
26.123. Education—Same as CAR 26.103.
26.124. Physical Requirements—Same as CAR 26.114.
26.125. Aeronautical Knowledge—Same as CAR 26.115.
26.126. Aeronautical Experience—Applicant shall have

26.1260 (a). Performed satisfactory service as an associate airport control tower operator for at least one year during the 18 months immediately preceding the date of application for rating as senior airport control tower operator, provided, however, that at least 3 months of the 6 months' period immediately preceding such application shall have been at the airport for which he seeks to be rated, or have

26.1261 (b). performed satisfactory service for the 6 months immediately preceding application as the operator in charge of the control tower at the airport for which he seeks to be rated, and shall

26.1262 (c). demonstrate satisfactorily his ability to supervise and manage all activities of an airport control tower, including the preparation of such reports as may be required from time to time by the airport management and the Secretary, and

26.1263 (d). Same as CAR 26.1164.

26.127. Approval by Examining Board—Same as CAR 26.117.

26.2. AIRPORT CONTROL TOWER OPERATOR CERTIFICATE

26.20. *Provision for Issuance:* An appropriate airport control tower operator certificate of competency will be issued by the Secretary, upon approval of an application made and satisfactory proofs submitted, to a natural person who upon inspection and examination is found by the Secretary to meet the appropriate minimum requirements prescribed in CAR 26.1, and who is therefore rated as competent to control the movements of aircraft on and in the vicinity of the airport at which his competency to control such aircraft has been demonstrated.

26.21. *Application:* Application for an airport control tower operator certificate of competency, subscribed under oath, shall be made to the Secretary upon a form supplied for that purpose.

26.210. Application to Amend—When any change in an airport control tower operator competency rating is desired, the applicant shall file a written request therefor with the Secretary through a designated inspector or airway traffic control manager of the Bureau.

26.211. Proceeding to Amend—A proceeding to amend an airport control tower operator rating may be instituted by the Secretary when, in his opinion, the operator is no longer competent in respect to some matter specified in the certificate. Notice of such proceeding shall be addressed to such operator with opportunity for a hearing. In the interim, the certificate may be suspended in whole or in part. Following the hearing, the Secretary may issue a rerating as to competency.

26.22. *Issuance:* Upon approval of an application duly made, proofs submitted and examinations and tests satisfactorily completed, an airport control tower operator certificate of competency will be issued in an appropriate form.

26.220. Temporary Certificate—Following application made for an airport control tower operator certificate of competency, but prior to approval thereof and issuance of the certificate, an appropriate temporary certificate may be issued by the examining Bureau representative. This temporary certificate shall remain in force until the appropriate airport control tower operator certificate of competency is issued or denied by the Secretary, but not to exceed a period of 60 days.

26.23. *Display:* An airport control tower operator certificate shall be kept in the personal possession of the operator at all times when he is on duty in connection with the control of aircraft, and shall be presented upon the demand of any authorized official or employee of the Department of Commerce or of any State or municipal official charged with the duty of enforcing local laws or regulations involving Federal compliance, or upon the reasonable request of any other person.

26.24. *Duration:* The airport control tower operator certificate, unless sooner suspended or revoked, shall remain in force for one year from date of issuance, and only for the airport mentioned in the certificate: *Provided, however,* That an airport control tower operator certificate, regardless of rating, shall revert to that of junior airport control tower operator rating for at least 2 months subsequent to the entering upon duty of the holder thereof at a different airport control tower, after which period application may be made for reinstatement of the rating previously held, but for the airport for which applicant seeks to be rated. The operator need not take the physical examination required in CAR 26.104 if he has satisfactorily passed the same within the preceding 12 months.

26.25. *Renewal:* An airport control tower operator certificate may be renewed upon application made within 45 days prior to expiration for the same duration as the original upon showing of

26.250 (a). a satisfactory physical examination, as provided in CAR 26.104, by a designated medical examiner of the Bureau, completed within the 45 days preceding expiration, and

26.251 (b). a letter from his employer or superior officer to the effect that the holder thereof has satisfactorily performed his duties in the airport control tower for at least 3 months immediately preceding date of application for renewal.

26.252. Reinstatement—In the event of an emergency which prevents renewal prior to expiration, and upon a showing thereof satisfactory to the Secretary, the applicant may have his airport control tower operator certificate validated in accordance with the provisions for renewal in CAR 26.25, provided such examinations and tests (including the medical examination within 45 days prior to the application for reinstatement) appropriate to the rating as the Secretary may deem necessary, are satisfactorily accomplished.

26.26. *Non-Transferability:* An airport control tower operator certificate is not transferable.

26.27. *Suspension or Revocation:* An airport control tower operator certificate may be suspended or revoked by reason of any of the following on the part of the holder thereof:

26.270 (a). Violating any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

26.271 (b). Carelessness or inattention to duty affecting safety.

26.272 (c). Unsound physical or mental condition.

26.273 (d). Any demonstration of incompetency in the operation or supervision of an airport control tower.

26.274 (e). Being, or knowingly permitting, a superior, subordinate, fellow operator or other person to be under the influence of, or using, or having personal possession of intoxicating liquor, cocaine, or other habit-forming drug, while present in the airport control tower or on duty directing or controlling aircraft movements.

26.275 (f). Refusing to exhibit his certificate upon proper demand.

26.276 (g). Making any false statements in an application for a certificate or in any report required by the Secretary.

26.277 (h). Performing any act in connection with the control and direction of aircraft which is contrary to the public safety or interest, or detrimental to the morale of pilots or other persons.

26.278 (i). Using or displaying his certificate for any fraudulent purpose.

26.28. *Surrender:* Upon notice from the Secretary of the suspension or revocation of any airport control tower operator certificate, the holder thereof shall promptly return such certificate to the Secretary.

26.29. *Re-Application:* An applicant for an airport control tower operator certificate who has failed to successfully accomplish the prescribed theoretical or practical tests may apply for re-examination at any time after the expiration of 90 days from the date of such failure.

26.3. EXAMINATIONS AND TESTS

26.30. *General:* The examinations and tests prescribed in the foregoing regulations will be conducted by an authorized officer or employee of the Department of Commerce or by a properly qualified person designated for the purpose by the Secretary. The Secretary may, in his discretion and at any time, require any applicant or airport control tower operator certificate holder to undergo a re-examination in any theoretical or practical test prescribed as a requisite for such certificate.

26.31. *Time and Place:* All examinations and tests will be held at such times and places as the Secretary may designate.

26.32. *Physical Examination:* In connection with the original issuance of any airport control tower operator certificate the physical examination prescribed shall be accomplished by a medical examiner of the Department of Commerce duly authorized to so examine applicants for such certificate before any practical or theoretical test or other examination will be given, and shall be completed within the 60 days preceding the date of filing application for such certificate.

26.33. *Inspection:* The applicant for any airport control tower operator certificate shall offer full cooperation in respect of any inspection or examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of such certificate.

26.34. *Standard of Performance:* All practical or theoretical examinations and tests shall be accomplished to the satisfaction of the Secretary and the minimum passing grade in any subject of examination or test shall be 70 per cent.

26.35. *Reports:* The person giving any examination or test in behalf of the Secretary shall promptly report the result thereof upon the appropriate form to the Secretary.

CHAPTER 27. AIRLINE DISPATCHER RATING

27.0 PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide by regulation for the rating of all airmen serving in connection with aircraft of the United States as to their qualifications for such service and for the issuance of airmen certificates and such other certificates and regulations as the Secretary deems necessary in administering the Act, airline dispatchers will be certificated in accordance with the provisions of the following paragraphs.

27.1 MINIMUM REQUIREMENTS: To be eligible for an airline dispatcher competency rating, an applicant shall comply with the following minimum requirements.

27.10 *Dispatcher Rating:* To be eligible for a dispatcher rating:

27.100. Age—Applicant shall be at least 23 years of age.

27.101. Character—Applicant shall be of good moral character.

27.102. Citizenship—Applicant shall be

27.1020 (a). A citizen of the United States, or

27.1021 (b). A citizen of a foreign country which grants reciprocal commercial airmen privileges to citizens of the United States on equal terms and conditions with citizens of such foreign country, or

27.1022 (c). An alien who has filed his declaration of intention to become a citizen of the United States and notifies the Secretary of the serial number of such declaration and of the date thereof and of the court in which it is filed; *Provided,* That the certificate of competency is, in such case, subject to revocation if the holder does not from time to time keep the Secretary advised of the status of the proceedings in court and does not diligently and successfully prosecute them and become admitted as a citizen.

27.103. Education—Applicant shall be able to read, write and understand the English language, and speak the same without accent or impediment of speech that would interfere with two-way radio conversation.

27.104. Aeronautical Knowledge—Applicant shall be familiar with and shall accomplish a satisfactory written examination on:

27.10400 (a). The provisions of CAR 40 and 61 and those parts of CAR 60 which apply to dispatching. In each case the applicant shall understand the relation of each provision to airline operation.

27.10401 (b). The characteristics of at least one make and model of airline aircraft, with particular reference to gross load, pay loads under conditions of various fuel loads, fuel capacity, fuel consumption at specified power outputs, speed-power output, altitude charts. and loading charts.

27.10402 (c). The general system of weather collection and dissemination.

27.10403 (d). Weather map, forecast and sequence abbreviations. symbols and nomenclature. The general principles of modern methods of weather analysis including the application of data obtained from airplane weather observations and meteorological data reported from observations made by pilots engaged in airline flights.

27.10404 (e). Cloud forms, including average heights of their bases and approximate upper and lower limits within which their bases and tops respectively occur.

27.10405 (f). Weather conditions adversely affecting aeronautical activities, the circumstances under which they occur, how these are ascertained and located, and elementary principles of forecasting the conditions.

27.10406 (g). The influence of terrain upon meteorological conditions and developments, and the relation thereof to airline flight operations.

27.10407 (h). Elementary principles of radio communications and radio range operations and weather conditions adversely affecting each.

27.10408 (i). Department of Agriculture Weather Bureau Circular "N", Instructions for Airway Meteorological Service, and all amendments thereto.

27.10409 (j). Air navigation facilities in use on the civil airways, including rotating beacons, course lights, radio ranges. radio marker beacons and intermediate fields.

27.10410 (k). Elementary principles of aircraft navigation, and use and limitations of sensitive type altimeters particularly with respect to barometric settings.

27.105. Aeronautical Experience—Applicant shall

27.1050 (a). have been listed as a dispatcher in the airmen competency letter of an airline and have served as a dispatcher for such airline for at least 6 months of the 18 months' period immediately preceding application, or

27.1051 (b). have served as a first or second pilot for a certificated airline for at least one year of the 3 years imme-

diately preceding application and have served as a dispatcher for such airline for at least 3 months of the 18 months' period immediately preceding application, or

27.1052 (c). have served for 2 years of the 4 years immediately preceding application in the operations department of a certificated airline, or

27.1053 (d). be a graduate of an airline dispatcher course of a certificated flying school, which course is deemed by the Secretary to offer the equivalent of CAR 27.1050 through 27.1052.

27.1054 (e). On the effective date of these regulations and for 6 months thereafter an applicant employed or formerly employed for the purpose of the dispatching and flight control of aircraft in airline service may be deemed by the Secretary to have met the requirements of CAR 27.105, and if so deemed, shall be presumptively entitled to an airline dispatcher rating.

27.1055. Any person now or formerly employed by an airline for the purpose of dispatching and flight control of aircraft in airline service for the periods specified either in CAR 27.1050 or CAR 27.1051 may be deemed by the Secretary to have met these respective requirements as to prior dispatcher service.

27.106. Aeronautical Skill—Applicant shall be able:

27.1060 (a). To make a reasonably accurate and intelligent analysis of a series of Weather Bureau 6-hourly maps, in accordance with modern methods, and forecast therefrom the subsequent weather conditions pertinent to flying operations.

27.1061 (b). To make an accurate and detailed analysis, in accordance with modern methods, of weather conditions prevailing in the general neighborhood of a specified civil airway from a series of Weather Bureau 6-hourly maps and sequency reports, and forecast accurately subsequent weather trends pertinent to flying operations, with particular reference to specified terminals.

27.2 AIRLINE DISPATCHER CERTIFICATE

27.20. *Provision for Issuance:* An airline dispatcher certificate of competency will be issued by the Secretary to a natural person, who is an applicant therefor, after approval of an application made and proofs submitted in connection therewith and, if upon inspection and examination, said applicant is found by the Secretary to meet the minimum requirements prescribed in CAR 27.1. (However, such person shall not dispatch airline aircraft until he has qualified as to route competency in accordance with the provisions of CAR 61.553.)

27.21. *Application:* Application for an airline dispatcher certificate, subscribed under oath, shall be made to the Secretary upon a form supplied for the purpose.

27.22. *Issuance:* Upon approval of an application duly made, proofs submitted, and examinations and tests satisfactorily completed, an airline dispatcher certificate of competency will be issued in an appropriate form.

27.220. Temporary Certificate—Following application made for an airline dispatcher certificate of competency, but prior to approval thereof and issuance of the certificate, a temporary dispatcher certificate may be issued by the local Bureau airline inspector.

27.23. *Display:* An airline dispatcher certificate shall be kept in the personal possession of the holder thereof at all times when he is on duty in connection with the dispatching of airline aircraft, and shall be presented upon the demand of any authorized official or employee of the Department of Commerce or of any State or municipal official charged with the duty of enforcing local laws or regulations involving Federal compliance, or upon the reasonable request of any other person.

27.24. *Duration:* An airline dispatcher certificate, unless sooner suspended or revoked in accordance with the provisions of CAR 27.27, will remain in force for one year after the date of issue.

27.25. *Renewal:* An airline dispatcher certificate may be renewed for additional period of one year upon application within 45 days of expiration and upon proof that the holder thereof has been listed as a dispatcher in the airmen competency letter of an airline and has served as a dispatcher for such airline for at least six months of the 12 months' period immediately preceding expiration of such certificate, or has had experience deemed equivalent by the Secretary.

27.250. Reinstatement—In the event of an emergency which prevents renewal prior to expiration, and upon a showing thereof satisfactory to the Secretary, the applicant may have his airline dispatcher certificate validated in accordance with the provisions for renewal in CAR 27.25.

27.26. *Non-Transferability:* An airline dispatcher certificate is not transferable.

27.27. *Suspension or Revocation:* An airline dispatcher certificate may be suspended or, after hearing, revoked by reason of any of the following, on the part of the holders thereof:

27.270 (a). Any false statement in an application for a certificate or in any report required by the Secretary.

27.271 (b). Using or displaying the certificate for any fraudulent purpose.

27.272 (c). Refusal to exhibit the certificate upon proper demand.

27.273 (d). Carelessness or inattention to duty affecting safety.

27.274 (e). Any demonstration of incompetency in the dispatch of airline aircraft.

27.275 (f). Being under the influence, or using, or having personal possession, of intoxicating liquor, cocaine, or other habit-forming drugs while on duty.

27.276 (g). Doing any act in connection with the dispatch of airline aircraft which is contrary to the public safety or interest.

27.277 (h). Violation of any provision of the Air Commerce Act or any of the rules or regulations duly issued thereunder.

27.28. *Surrender:* Upon notice from the Secretary of the suspension or revocation of his airline dispatcher certificate, the holder shall immediately return such certificate to the Secretary.

27.29. *Re-Application:* An applicant for an airline dispatcher certificate of competency who has failed to successfully accomplish the prescribed theoretical or practical tests may apply for re-examination at any time after the expiration of 30 days, from the date of such failure.

27.3. EXAMINATIONS AND TESTS

27.30. *General:* The examinations and tests prescribed in the foregoing regulations will be conducted by an authorized officer or employee of the Department of Commerce or by a properly qualified person designated for the purpose by the Secretary. The Secretary may, in his discretion and at any time, require any applicant or airline dispatcher certificate holder to undergo a re-examination in any theoretical or practical test prescribed as requisite for such certificates.

27.31. *Time and Place:* All examinations and tests will be held at such times and places as the Secretary may designate.

27.32. *Inspection:* The applicant for an airline dispatcher certificate of competency shall offer full cooperation in respect of any inspection and examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of an airline dispatcher certificate of competency.

27.33. *Standard of Performance:* All practical or theoretical examinations and tests shall be accomplished to the satisfaction of the Secretary and the minimum passing grade in any subject of examination or test shall be 70 per cent.

27.34. *Reports:* The person giving any examination or test in behalf of the Secretary shall promptly report the result thereof upon an appropriate form to the Secretary.

CHAPTER 40. SCHEDULED AIRLINE CERTIFICATION (INTERSTATE)

40.0. PROVISION FOR CERTIFICATION: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide for the examination and rating of and the issuance of certificates to all airlines engaged in interstate or foreign air commerce as to their qualifications for such service, the following regulations are prescribed for such certification of scheduled airlines engaged in interstate air commerce as to their competency.

40.1. GENERAL MINIMUM REQUIREMENTS: To be eligible for a scheduled airline competency certificate, an applicant shall meet and comply with the following general minimum requirements.

40.10. *Economic Strength:* Applicant shall show economic and financial strength sufficient to establish a presumption of ability to operate the airline with reasonable safety as related to the service offered, for a period of at least one year.

40.11. *Route:* Applicant shall show that the route, including any alternate route, over which it proposes to operate is, or prior to operation will be, equipped with such air navigation facilities (including terminal and intermediate airports, intermediate landing fields and ground aids to air navigation) as are deemed by the Secretary to be necessary for safe operation as related to the service offered, provided that on the route to any alternate terminal such operation may be approved provided a signal from the alternate terminal range can be heard.

40.12. *Aircraft:* Applicant shall show certificated aircraft as provided in CAR 04, of a model and number deemed by the Secretary to be necessary for safe operation as related to the service offered, the route traversed, and the operating and maintenance procedures and techniques proposed.

40.13. *Airmen:* Applicant shall show certificated airmen (including both flight and ground personnel) of kind, grade, and number deemed by the Secretary to be necessary for safe operation as related to the service offered, the route traversed, the aircraft used, and the operating and maintenance procedures and techniques proposed.

40.14. *Operations Manual:* Applicant shall show an operations manual, prepared for the use of its airmen, which fully details the operating and communications methods, procedures and techniques proposed for its airline.

40.15. *Maintenance Manual:* Applicant shall show a maintenance manual or suitable equivalent prepared for the use of its airmen and other maintenance personnel which adequately defines the maintenance methods, procedures and technique proposed for its airline operations.

40.16. *Schedules:* Applicant shall show proposed schedules set up with due regard to sufficient time for the adequate servicing of fuel and oil at intermediate stops, to prevailing winds, and on the basis of a cruising speed of the aircraft at not to exceed that corresponding to the specified cruising power output of the engines as specified in the operations manual.

40.2. PASSENGER MINIMUM REQUIREMENTS: To be eligible for a scheduled airline competency certificate for the carriage of persons in interstate air commerce, an applicant, in addition to meeting the minimum requirements provided for in CAR 40.1, shall meet and comply with the following minimum requirements prescribed for the particular kind of operation proposed.

40.20. *Route Requirements: Visual-Contact Day Operation*

40.200. Airway—Applicant shall show that the regular route over which the proposed operations will be conducted is, or prior to authorization will be, within the limits of a civil airway. (If applicant's proposed route does not lie within the limits of a civil airway, a petition requesting that a civil airway be designated to embrace such route may be made simultaneously with the airline certificate application.)

40.201. Airports—Applicant shall show that the airport to be used at each proposed route terminal and scheduled intermediate stop is possessed of a valid airport competency rating with relation to each aircraft which applicant proposes to use in its operation.

40.202. Public Protection—Applicant shall show that reasonable and adequate facilities and safety devices (including protection from revolving aircraft propellers) are provided for the protection of the public at each terminal and scheduled intermediate stop.

40.203. Intermediate Fields—Applicant shall show intermediate fields, available for safe landings with the load authorized for the route or part thereof, located at not more than 100 mile intervals along the proposed route provided that at the discretion of the Secretary, intermediate fields may be permitted or required at other than 100 mile intervals.

40.204. Refueling Facilities—Applicant shall show that adequate refueling facilities, including equipment to test gasoline storage tanks for the presence of water and to remove any water or condensation found therein, are provided at each terminal, scheduled intermediate stop and intermediate field where refueling is contemplated.

40.205. Radio Facilities—Applicant shall show a two-way ground-to-aircraft radio telephone communication system at each terminal and at such points as may be deemed necessary by the Secretary to insure satisfactory communications over the entire route under normal operating conditions. Such system shall be independent of radio facilities provided by Federal or other governmental agencies.

40.206. Weather Reporting—Applicant shall show weather reporting services at the proposed terminals and enroute, adequate to insure sufficient weather reports prepared from observations made and released by the United States Weather Bureau or by a source approved by it.

40.21. *Route Requirements: Visual-Contact Night Operation*

40.210. Airway—Applicant shall meet the requirements of CAR 40.200 and, in addition, shall show that the proposed route is equipped with such airway beacons and obstruction lights as are deemed by the Secretary to be adequate for safe airline operation at night.

40.211. Airports—Applicant shall meet the requirements of CAR 40.201 and, in addition, shall show that the airport to be used at each proposed terminal and scheduled intermediate

stop is equipped with such lighting facilities as are deemed by the Secretary to be adequate for safe airline operation at night.

40.212. Public Protection—Same as in CAR 40.202.

40.213. Intermediate Fields—Applicant shall meet the requirements of CAR 40.203 and, in addition, shall show that such intermediate fields are equipped with lighting facilities as required by CAR 40.211.

40.214. Refueling Facilities—Same as in CAR 40.204.

40.215. Radio Facilities—Same as in CAR 40.205.

40.216. Weather Reporting—Same as in CAR 40.206.

40.22. *Route Requirements: Instrument and/or Over the Top Operation*

40.220. Airway—Applicant shall meet the requirements of CAR 40.200 for day operation, or of CAR 40.210 for night operation. In addition, for either day or night operation, applicant shall show that the proposed route is equipped with such radio range beacons (or equivalent facilities) projecting courses over the proposed route, as are deemed by the Secretary to be adequate for safe airline operation. Application shall also show other radio navigational aids (including radio markers) as may be deemed necessary by the Secretary.

40.221. Airports—For day operation applicant shall show that the airport to be used at each proposed route terminal, scheduled intermediate stop and alternate terminal is possessed of a valid airport competency rating with relation to each aircraft which applicant proposes to use in its operation. For night operation applicant shall meet the foregoing requirements and, in addition, shall show that the proposed terminal, scheduled intermediate stop, and alternate, airports are provided with such lighting facilities as are deemed by the Secretary to be adequate for safe airline operation at night.

40.222. Public Protection—Same as in CAR 40.202.

40.223. Intermediate Fields—Same as in CAR 40.203 for day operation, and as in CAR 40.213 for night operation.

40.224. Refueling Facilities—Same as in CAR 40.204.

40.225. Radio Facilities—Same as in CAR 40.205.

40.226. Weather Reporting—Same as in CAR 40.206.

40.23. *Aircraft Requirements: Visual-Contact Day Operation*

40.230. If Single Engine Operation over Land—Applicant shall show land aircraft of a model and number necessary for safe operation, or applicant may show a similar number of water aircraft if the route to be flown over is such that the aircraft can, at all times, reach open water deemed suitable by the Secretary for a safe landing in the event of complete power failure. Single-engine aircraft may be operated over civil airways provided such airways are deemed by the Secretary to have suitable landing terrain.

40.231. If Single-Engine Operation over Water—Applicant shall show water aircraft of a model and number necessary for safe operation, or applicant may show a similar number of land aircraft if the route to be flown over is such that the aircraft can, at all times, reach land deemed suitable by the Secretary for a safe landing in the event of complete power failure.

40.232. If Multi-Engine Operation over Land—Applicant shall show aircraft of a model and number necessary for safe operation. Applicant shall also show that such aircraft (other than those specifically listed as in scheduled airline service by the applicant prior to January 1, 1935) to be used on the proposed route or part thereof are capable, with any one engine completely out of commission, of maintaining level flight with authorized load for the route or part thereof at an altitude of at least 1,000 feet above the highest obstruction to flight on the valley level of such route or part thereof on which the aircraft will be operated.

40.233. If Multi-Engine Operation over Water—Applicant shall show aircraft of a model and number necessary for safe operation. Applicant shall also show that such aircraft, which are to be used on the proposed route or part thereof are capable, with any one engine completely out of commission, of maintaining level flight with authorized load at an altitude of at least 1,000 feet above the water. No multi-engine land aircraft shall be operated over water, beyond gliding distance from shore without the aid of power, unless such aircraft is equipped with a fully retractable landing gear with one or more suitable emergency exits located in the upper half of the fuselage, with life preservers or other adequate flotation devices readily available for each person on board, with a Very's pistol and cartridges or equivalent signal equipment deemed suitable by the Secretary, and with radio equipment as required by CAR 40.253, 40.2530, and 40.2531. The landing gear shall be in the retracted position in the event of an emergency landing upon water. The requirements of flotation devices and signal equipment are not applicable where the operation over water is merely that of landings and take-offs, provided there is marine rescue equipment deemed suitable by the Secretary.

40.234. Number of Aircraft—Applicant shall show aircraft, certificated as provided in CAR 04.53, of a number sufficient to permit the maintenance of all schedules proposed, as provided for in CAR 40.16.

40.235. Radio Equipment—Applicant shall show that each aircraft is equipped with an approved two-way radio telephone having sufficient power to permit communication, under normal operating conditions, with at least one ground station used or to be used by the applicant on the regular or alternate route, and capable of communication with other aircraft of the applicant in flight. In addition, each aircraft shall be provided with at least one radio receiving system capable of receiving radio range beacon signals and weather broadcasts.

40.236. Hangar Facilities—Applicant shall show hangar or other facilities adequate for the proper maintenance of the aircraft, engines, equipment and parts.

40.237. Shop Facilities—Applicant shall show shop facilities (including facilities for servicing, repair, and overhaul) adequate for the proper maintenance of all aircraft, engines and equipment used.

40.238. Inspection and Overhaul Organization and Procedures—Applicant shall show inspection and overhaul organization, procedures and techniques adequate for the proper maintenance of all aircraft, engines and equipment used.

40.24. *Aircraft Requirements: Visual-Contact Night Operation*

NOTE.—Single-engine aircraft may not be used in night operation with passengers.

40.240. If Operation over Land—Applicant shall show multi-engine land aircraft, which meet the flight performance requirements of CAR 40.232, and of a number necessary for safe operation as provided for in CAR 40.234.

40.241. If Operation over Water—Applicant shall show multi-engine land aircraft, which meet the flight performance and equipment requirements of CAR 40.233, and of a number necessary for safe operation as provided for in CAR 40.234.

40.242. Number of Aircraft—Same as in CAR 40.234.

40.243. Radio Equipment—Same as in CAR 40.235.

40.244. Hangar Facilities—Same as in CAR 40.236.

40.245. Shop Facilities—Same as in CAR 40.237.

40.246. Inspection and Overhaul Organization and Procedures—Same as in CAR 40.238.

40.25. *Aircraft Requirements: Instrument and/or Over the Top Operation*

NOTE.—Single-engine aircraft may not be used in an instrument or over the top operation with passengers.

40.250. If Operation over Land—Applicant shall show multi-engine aircraft of a model and number necessary for safe operation. Applicant shall also show that such aircraft (other than those specifically listed as in scheduled airline service by the applicant prior to January 1, 1935) to be used on the proposed route, or part thereof, are capable, with any one engine completely out of commission, of maintaining level flight, with authorized load for the route or part thereof, at an altitude equivalent to 1000 feet above the highest part of the terrain on the proposed instrument course of the route, or part thereof.

40.251. If Operation over Water—Same as in CAR 40.241

40.252. Number of Aircraft—Same as in CAR 40.234.

40.253. Radio Equipment—Same as in CAR 40.235 and, in addition, applicant shall show that there is installed in each aircraft to be used in instrument and/or over the top operation (during day or night) over the proposed route, or part thereof, one additional separate radio receiving system capable of receiving radio range signals and weather broadcasts. Such receiver system shall normally operate from the main source of electrical supply of the aircraft but, in event of failure of the normal power source, shall be capable of being switched to operate from an independent power source. This system shall include an independent power source capable of operating such receiver continuously for a period of at least 4 hours. It is also required that such receiver operate from an independent antenna or from either of two antennaes. Two sets of headphones shall be carried in the aircraft at all times.

40.2530. Radio Direction Finder—There shall also be installed in such aircraft an approved radio direction finder, covering at least the frequency range of 200 to 400 kilocycles. The design of the radio direction finder shall be such as to permit its regular operation in the taking of line bearings on any station to which the direction finder may be tuned without altering the course of the aircraft. The radio direction finder shall also be provided with means to eliminate, insofar as possible consistent with the advancement of the art, that type of interference commonly known as rain, snow, sleet or dust static. The radio direction finder shall provide means for audible reception of radio range and weather broadcast messages. It may be installed in lieu of the emergency receiver required in CAR 40.253 provided that an independent power source equal to that described therein for such receiver is employed on either the beacon receiver required therein or on this radio direction finder. (Effective January 1, 1938).

40.2531. Radio Anti-Static Antenna—There shall also be installed on such aircraft an approved radio antenna system, which has for its purpose the collection of radio range signals, weather broadcast and emergency messages transmitted within the frequency range of 200 to 400 kilocycles. The design of this antenna system shall be such as to eliminate insofar as possible, consistent with the advancement of the art, that type of interference commonly known as rain, snow, sleet or dust static. This antenna system shall be designed to operate efficiently when used in conjunction with a receiver installed aboard such aircraft which has for its primary purpose the reception of radio range signals, weather broadcast and emergency messages.

40.254. Hangar Facilities—Same as in CAR 40.236.

40.255. Shop Facilities—Same as in CAR 40.237.

40.256. Inspection and Overhaul Organization and Procedures—Same as in CAR 40.238.

40.26. *Airmen Requirements: Visual-Contact Day Operation*

40.260. Number—Applicant shall show airmen of a number sufficient to permit the maintaining of all schedules proposed, under safe operating conditions.

40.261. First Pilots—Applicant shall show that prior to the issuance of the airline certificate all persons employed to serve as first pilots for the airline meet the following minimum requirements for qualification as to aircraft and route competency.

40.2610 (a). Each first pilot shall be possessed of a valid airline pilot competency rating with specifications or ratings indicating competency to pilot aircraft of each model to be used by him in scheduled operation.

40.2611 (b). Each first pilot, within the 6 months immediately preceding his qualification for the route, shall have made one one-way trip without passengers over the proposed route or part thereof on which he will pilot aircraft for applicant, landing at least once at each terminal, scheduled intermediate stop and intermediate field. If landings cannot be effected at each intermediate field, then the pilot shall make a ground examination, or where impracticable by reason of field conditions, a visual examination from the air at a safe low altitude, of each such field on which no landing was made and shall render a written inspection report thereon promptly to the Secretary; in the case of a visual examination he shall submit to the Secretary a sketch of the field setting forth its condition, obstructions and surrounding terrain. During the preliminary trip, the survey and landing may be accomplished by 2 or more first pilots flying together, provided each lands the aircraft at every terminal, intermediate stop and intermediate field.

40.2612 (c). Each first pilot shall have made 2 round trips, in addition to the trip required by CAR 40.2611 over the proposed route or part thereof on which he will pilot aircraft for applicant as first pilot, without passengers, or shall have made 3 round trips in addition to that required by CAR 40.2611 as second pilot, with or without passengers, within the 12 months immediately preceding his qualification for such route.

40.2613 (d). During these trips required by CAR 40.2611 and CAR 40.2612 the flights shall be visual-contact and the visibility shall be not less than 5 miles as observed from the aircraft.

40.2614 (e). Each first pilot to be qualified as to route competency with respect to an alternate route shall have complied with the provisions of CAR 40.2611 and 40.2613 as applied to such alternate route.

40.262. Second pilots—Applicant shall show that each person employed to serve as a second pilot for the airline is possessed of at least a valid commercial pilot competency rating and before serving as second pilot in any aircraft in scheduled airline service shall have demonstrated, to an airline inspector representing the Secretary or to a check pilot or instructor of the airline duly authorized by the Secretary, his ability to take-off and land such aircraft by making at least 3 satisfactory take-offs and landings in each model of aircraft in which he is to serve. Six months after the effective date of these regulations each applicant for or holder of an airline competency certificate will be required to show that each such person is possessed of a valid instrument rating, unless possessed of a valid airline pilot competency rating.

40.263. Airline Dispatchers—Applicant shall show that each person assuming aircraft dispatcher duties for the airline is familiar with the route or part thereof over which he will dispatch aircraft, the weather characeristics and phenomena peculiar to such route, the nature and peculiarities of the terrain and of obstructions to flight, the air navigation facilities available on the ground and in the aircraft, the contents of the operations manual of the proposed airline and the aircraft limitations specified in the certificates of the aircraft proposed for use. Six months after the effective date of these regulations each applicant for or holder of an airline competency certificate will be required to show that each such person is possessed of a valid and appropriate airline dispatcher competency rating.

40.27. *Airmen Requirements: Visual-Contact Night Operation*

40.270. Number—Same as in CAR 40.260.

40.271. First Pilots—Same as in CAR 40.261, except that at least one trip required by CAR 40.2612 shall have been made between the hours of sunset and sunrise, except that for qualification on an alternate route flights shall be made in accordance with CAR 40.2614.

40.272. Second Pilots—Same as in CAR 40.262.

40.273. Airline Dispatchers—Same as in CAR 40.263.

40.28. *Airmen Requirements: Instrument and/or Over the Top Operation*

40.280. Number—Same as in CAR 40.260.

40.281. First Pilots—Same as in CAR 40.261 and, in addition, applicant shall show that each first pilot, for whom instrument authorization is sought, has demonstrated to an airline inspector representing the Secretary or to a check pilot or instructor of the airline duly authorized by the Secretary, his capability with respect to the following:

40.2810 (a). Familiarity with the aircraft, including demonstration of ability to maneuver such aircraft with the load authorized for the route or part thereof, with any one engine fully throttled, at an altitude equivalent to 1000 feet above

the highest part of the terrain on the proposed instrument course of the route, or part thereof, to be flown by the pilot in airline service.

40.2811 (b). Familiarity with the route and with instruments, including demonstration of ability to fly solely by instruments, under actual or simulated conditions, over the route for which qualification is sought.

40.2812 (c). Familiarity with procedures, including demonstration of ability to accomplish a let-down-through by instruments, according to the procedure specified in the appropriate competency letter, at one station at least, on the route, in each model of aircraft to be used by the pilot in airline operation. Such demonstrations as to the other stations as deemed necessary by the Secretary may be made to an airline inspector representing the Secretary, or to a check pilot or instructor of the airline duly authorized by the Secretary, under simulated conditions or by equivalent means approved by the Secretary.

40.282. Second Pilots—Are required for all instrument operations and shall meet the minimum requirements of CAR 40.262.

40.283. Airline Dispatchers—Same as in CAR 40.263.

40.29. *Miscellaneous Requirements*

40.290. Weather Minimums—Authorization of ceiling and visibility minimums for purposes of flight clearance and for transition from instrument to visual-contact flights and vice-versa will be made by the Secretary and will be based upon the following considerations affecting the clearance and completion of the flight:

(a) the terrain conditions affecting the flight area necessary for the working out of an approach and let-down-through procedure, or for a climb-up-through procedure; and

(b) the skill and experience of dispatcher personnel; and

(c) the skill and experience of pilot personnel; and

(d) the model and maneuverability of the aircraft; and

(e) the obstructions to flight, considered both vertically and horizontally, in the vicinity of the landing area; and

(f) the quality and quantity of meteorological service and of other ground aids to flight available.

40.291. Airline Operation Skill—Applicant shall demonstrate, during a test period (of not less than 10 days of operation) determined by the Secretary (in which time applicant may in the discretion of the Secretary carry mail or goods, as the case may be, in interstate air commerce), ability to operate with safety a scheduled airline service over the route proposed, with the aircraft and airmen proposed, and by means of the operating and maintenance procedures and techniques proposed. For extensions of established operations the test period will be determined by the Secretary on the basis of the length of the proposed extension, pilot qualifications, air navigation facilities and all other factors affecting the applicant's proposed operation.

40.3. GOODS MINIMUM REQUIREMENTS: To be eligible for a scheduled airline competency certificate for the carriage of goods (including mail) in interstate air commerce, an applicant, in addition to meeting the minimum requirements provided for in CAR 40.1, shall meet and comply with the following minimum requirements prescribed for the particular kind of operation proposed:

40.30. *Route Requirements: Visual-Contact Day Operation*

40.300. Airway—Same as in CAR 40.200.

40.301. Airports—Same as in CAR 40.201.

40.302. Public Protection—Same as in CAR 40.202.

40.303. Intermediate Fields—Same as in CAR 40.203.

40.304. Refueling Facilities—Same as in CAR 40.204.

40.305. Radio Facilities—Same as in CAR 40.205.

40.306. Weather Reporting—Same as in CAR 40.206.

40.31. *Route Requirements: Visual-Contact Night Operation*

40.310. Airway—Applicant shall meet the requirements of CAR 40.200 and shall show that the proposed route is provided with such obstruction lights as are deemed by the Secretary to be adequate for safe airline operation at night. In addition applicant shall show that the proposed route is equipped with such airway beacons as are deemed by the Secretary to be adequate for safe airline operation, or the applicant may show that the proposed route is equipped with such radio range beacons (or equivalent facilities) projecting courses over the proposed route as are deemed adequate by the Secretary for safe airline operation.

40.311. Airports—Same as in CAR 40.211.

40.312. Public Protection—Same as in CAR 40.202.

40.313. Intermediate Fields—Same as in CAR 40.213.

40.314. Refueling Facilities—Same as in CAR 40.204.

40.315. Radio Facilities—Same as in CAR 40.205.

40.316. Weather Reporting—Same as in CAR 40.206.

40.32. *Route Requirements: Instrument and/or Over the Top Operation*

40.320. Airway—Applicant shall meet the requirements of CAR 40.200 for a proposed day operation, or of CAR 40.310 for a proposed night operation. In addition, for either day or night operation, applicant shall show that the proposed route is equipped with radio range beacons (or equivalent facilities) projecting courses over the proposed route, as are deemed to be adequate by the Secretary for safe airline operation. Applicant shall also show other radio navigational aids (including radio markers), as may be deemed necessary by the Secretary.

40.321. Airports—Same as in CAR 40.221.

40.322. Public Protection—Same as in CAR 40.202.

40.323. Intermediate Fields—Same as in CAR 40.203 for day operation, and as in CAR 40.213 for night operation.

40.324. Refueling Facilities—Same as in CAR 40.204.

40.325. Radio Facilities—Same as in CAR 40.205.

40.326. Weather Reporting—Same as in CAR 40.206.

40.33. *Aircraft Requirements: Visual-Contact Day Operation*

40.330. If Single-Engine Operation over Land—Same as in CAR 40.230.

40.331. If Single-Engine Operation over Water—Same as in CAR 40.231.

40.332. If Multi-Engine Operation over Land—Applicant shall show aircraft of a model and number necessary for safe operation. Applicant shall also show that such aircraft to be used on the proposed route or part thereof are capable, with any one engine completely out of commission, of maintaining level flight with the authorized load for the route or part thereof at an altitude of at least 1,000 feet above the airport at each terminal and scheduled intermediate stop on the route or part thereof on which the aircraft will be operated.

40.333. If Multi-Engine Operation over Water—Same as in CAR 40.233.

40.334. Number of Aircraft—Applicant shall show aircraft, certificated as provided in CAR 04.52, of a number sufficient to permit the maintenance of all schedules proposed, as provided for in CAR 40.16.

40.335. Radio Equipment—Same as in CAR 40.235.

40.336. Hangar Facilities—Same as in CAR 40.236.

40.337. Shop Facilities—Same as in CAR 40.237.

40.338. Inspection and Overhaul Organization and Procedures—Same as in CAR 40.238.

40.34. *Aircraft Requirements: Visual-Contact Night Operation*

40.340. If Single-Engine Operation over Land—Applicant shall show aircraft, except float seaplanes, of a model and number necessary for safe operation, and, in addition thereto, that the civil airways over which the proposed operation is to be conducted are deemed by the Secretary to have suitable landing terrain.

40.341. If Single-Engine Operation over Water—Applicant shall show aircraft, except float seaplanes, of a model and number necessary for safe operation. Applicant shall also show that the route to be flown over is such that the aircraft can, at all times, reach land deemed suitable by the Secretary for a safe landing in the event of complete power failure.

40.342. If Multi-Engine Operation over Land—Same as in CAR 40.332.

40.343. If Multi-Engine Operation over Water—Same as in CAR 40.233.

40.344. Number of Aircraft—Same as in CAR 40.334.

40.345. Radio Equipment—Same as in CAR 40.235 and, in addition, applicant shall meet the requirements of CAR 40.253, 40.2530 and 40.2531 if the proposed route is not equipped with airway beacons as provided in CAR 40.210.

40.346. Hangar Facilities—Same as in CAR 40.236.

40.347. Shop Facilities—Same as in CAR 40.237.

40.348. Inspection and Overhaul Organization and Procedures—Same as in CAR 40.238.

40.35. *Aircraft Requirements: Instrument and/or Over the Top Operation*

40.350. If Single-Engine Operation over Land—Same as in CAR 40.340.

40.351. If Single-Engine Operation over Water—Same as in CAR 40.341.

40.352. If Multi-Engine Operation over Land—Same as in CAR 40.332.

40.353. If Multi-Engine Operation over Water—Same as in CAR 40.233.

40.354. Number of Aircraft—Same as in CAR 40.334.

40.355. Radio Equipment—Same as in CAR 40.253, 40.2530, and 40.2531.

40.356. Hangar Facilities—Same as in CAR 40.236.

40.357. Shop Facilities—Same as in CAR 40.237.

40.358. Inspection and Overhaul Organization and Procedures—Same as in CAR 40.238.

40.36. *Airmen Requirements: Visual-Contact Day Operation*

40.360. Number—Same as in CAR 40.260.

40.361. First Pilots—Applicant shall show prior to the issuance of the airline certificate that all persons employed to serve as first pilots for the airline meet the following minimum requirements for qualification as to aircraft and route competency:

40.3610 (a). Each first pilot shall be possessed of at least a valid commercial pilot competency rating with specifications or rating indicating competency to pilot aircraft of each model to be used by him in scheduled operation. Each first pilot shall also be possessed of a valid instrument rating, unless possessed of a valid airline pilot competency rating.

40.3611 (b). Each first pilot, within the 6 months immediately preceding his qualification for the route, shall have made one one-way trip over the proposed route, or part thereof on which he will pilot aircraft for applicant, landing at least once at each terminal, scheduled intermediate stop and intermediate field. If landings cannot be effected at each intermediate field, then the pilot shall make a ground examination, or where impracticable by reason of field conditions, a visual examination from the air at a safe low altitude, of each such field on which no landing was made and shall render a written inspection report thereon promptly to the Secretary; in the case of a visual examination he shall submit to the Secretary a sketch of the field setting forth its condition, obstructions and surrounding terrain. During the preliminary trip, the survey and landing may be accomplished by 2 or more first pilots flying together, provided each lands the aircraft at every terminal, intermediate stop and intermediate field.

40.3612 (c). During the trip required by CAR 40.3611 the flight shall be visual-contact and the visibility shall be not less than 5 miles as observed from the aircraft.

40.3613 (d). Each first pilot to be qualified as to route competency with respect to an alternate route shall have complied with the provisions of CAR 40.3611 and 40.3612 as applied to such alternate route.

40.362. Second Pilots—Applicant shall show that each person employed to serve as a second pilot for the airline is possessed of at least a valid commercial pilot competency rating and before serving as second pilot in any aircraft in scheduled airline service shall have demonstrated, to an airline inspector representing the Secretary or to a check pilot or instructor of the airline duly authorized by the Secretary, his ability to take-off and land such aircraft, by making at least 3 satisfactory take-offs and landings in each model of aircraft in which he is to serve.

40.363. Airline Dispatchers—Same as in CAR 40.263.

40.37. *Airmen Requirements: Visual-Contact Night Operation.*

40.370. Number—Same as in CAR 40.260.

40.371. First Pilots—Same as in CAR 40.361, except that each first pilot shall have logged at least 1,200 hours of certified solo flying time, and the trip required by CAR 40.3611 shall have been made between the hours of sunset and sunrise.

40.372. Second Pilots—Same as in CAR 40.362 and, in addition, 6 months after the effective date of these regulations, each applicant for or holder of an airline competency certificate will be required to show that each such person is possessed of a valid instrument rating, unless possessed of a valid airline pilot competency rating.

40.373. Airline Dispatchers—Same as in CAR 40.263.

40.38. *Airmen Requirements: Instrument and/or Over the Top Operation*

40.380. Number—Same as in CAR 40.260

40.381. First Pilots—Same as in CAR 40.361, except that each first pilot shall have logged at least 1,200 hours of certified solo flying time, and, in addition, applicant shall show that each first pilot, for whom an instrument authorization is sought, has demonstrated to an airline inspector representing the Secretary or to a check pilot or instructor of the airline duly authorized by the Secretary, his capability with respect to the following:

40.3810 (a). Familiarity with the aircraft, including demonstration of ability to maneuver such aircraft with the load authorized for the route or part thereof; and, if a multi-engine operation, then the foregoing and in addition thereto a demonstration of ability to maneuver such aircraft with said load with any one engine fully throttled, at an altitude equivalent to 1,000 feet above the highest part of the terrain on the proposed instrument course of the route, or part thereof to be flown by the pilot in airline service.

40.3811 (b). Familiarity with the route and with instruments, including demonstration of ability to fly solely by instruments, under actual or simulated conditions, over the route for which qualification is sought.

40.3812 (c). Familiarity with procedures, including demonstration of ability to accomplish a let-down-through by instruments, according to the procedure specified in the appropriate competency letter, at one station at least on the route or part thereof, having radio range facilities that are intended for such use by the pilot. Such demonstration shall be conducted at least at each pilot division terminal in each model of aircraft to be used by the pilot in airline operation. Such demonstrations as to other stations as deemed necessary by the Secretary may be made to an airline inspector representing the Secretary, or to a check pilot or instructor of the airline duly authorized by the Secretary, under simulated conditions by equivalent means approved by the Secretary.

40.382. Second Pilots—Same as in CAR 40.262.

40.383. Airline Dispatchers—Same as in CAR 40.263.

40.39. *Miscellaneous Requirements*

40.390. Weather Minimums—Same as in CAR 40.29, giving consideration to the fact that no passengers are being carried in this operation and providing for the most rapid progress of the art of flying.

40.391. Airline Operation Skill—Same as in CAR 40.291.

40.4. AIRLINE COMPETENCY CERTIFICATE

40.40. *Provision for Issuance:* An airline competency certificate will be issued by the Secretary to an applicant after approval of application made and proofs submitted in connection therewith and if, upon inspection and examination, said applicant is found by the Secretary to meet the general requirements prescribed in CAR 40.1 and the appropriate particular minimum requirements prescribed in CAR 40.2 or 40.3 and is, therefore rated as competent to engage in intestate air commerce for the carriage of mail, goods, or passengers, in scheduled operation as specified in the

certificate or appended competency letters (provided for in CAR 40.5). Airlines conducting authorized operations shall have until 90 days after the effective date of these regulations to apply for the airline certificate as provided in CAR 40.41. In the interim operations shall be under authority heretofore granted. Also, any airline which heretofore has proven its competency for safe operation shall be entitled presumptively to the airline certificate so applied for.

40.41. *Application:* Application for a scheduled airline certificate shall be made to the Secretary and subscribed under oath by the applicant in the manner outlined in Form AC 40–1.

40.410. Number of Copies—Applicant shall submit at least three copies of the application duly completed and executed, and, in the discretion of the Secretary, may be required to submit a greater number not to exceed ten.

40.411. Application to Amend—When changes in, or amendments thereto, the original application are desired, the applicant shall submit one copy in addition to the number previously required for the original application, of the amended page or pages, incorporating the change or changes desired in the manner provided in CAR 40.41. These copies shall be submitted to the Secretary through the supervising airline inspector involved and shall not be effective until written approval of the Secretary has been received, except that a 30-day period of provisional approval may be granted by the supervising airline inspector for changes in pilot and dispatcher personnel.

40.412. Proceeding to Amend—A proceeding to amend an airline certificate may be instituted by the Secretary when, in his opinion, the airline operator is no longer competent in respect of some matter specified in the certificate. Notice of such proceeding will be addressed to the airline operator with opportunity for a hearing. In the interim, the part of the certificate effected may be suspended in whole or in part. Following the hearing, the Secretary may issue a rerating as to competency, in which event the findings will be incorporated in a new competency letter.

40.413. Inspection—The applicant for an airline certificate shall offer full cooperation with respect to any inspection or examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of such airline certificate.

40.42. *Temporary Permit:* Following application made for an airline certificate, but prior to approval thereof and issuance of the certificate, a temporary permit may be issued by the Secretary in order to enable the applicant to demonstrate ability to meet and comply with the minimum requirements of CAR 40.291 pertaining to airline operation skill. During such period no pay passengers shall be carried.

40.43. *Issuance:* An airline certificate will be issued in an appropriate form in accordance with the provisions of CAR 40.40.

40.44. *Display:* The airline certificate in its current and effective form (or a copy thereof) shall be conspicuously posted in the principal office of the airline where it may be readily seen, and any such certificate shall be presented for inspection upon demand of any authorized officer or employee of the Department of Commerce, or upon the reasonable request of any other person. Facsimile copies of such airline certificate may be posted for display elsewhere.

40.45. *Duration:* An airline certificate will remain effective for an indeterminate time, or until

(a) the certificate is suspended or revoked, or
(b) the airline service is discontinued.

40.46. *Non-Transferability:* An airline certificate is not transferable, except with the consent of the Secretary.

40.47. *Suspension or Revocation:* An airline certificate may be suspended or, after hearing, revoked, in whole or in part, for any of the following reasons:

40.470 (a). Any false statement by the airline operator in the application for such certificate, or in any information accompanying such application, or in any report required by the Secretary.

40.471 (b). Violation on the part of the operator of any of the terms, conditions, specifications, limitations or other provisions of such airline certificate.

40.472 (c). Violation on the part of the operator of any of the terms, conditions, specifications, limitations or other provisions of any competency letter appended to such certificate

40.473 (d). Violation on the part of the operator of any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

40.474 (e). Grossly negligent or willful (and inexcusable) violation by any employee of the operator of any of the terms, conditions, specifications, limitations or other provisions of such airline certificate or any competency letter appended thereto, or of any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

40.475 (f). Suspension of airline service by the operator, except for reasons beyond control of the operator.

40.476 (g). Any unsafe operation of the airline.

40.477 (h) Any failure to maintain safety standards requisite to the obtaining of such certificate.

40.48. *Surrender:* Upon notice from the Secretary of the suspension or revocation of an airline certificate, the operator to whom it has been issued shall immediately return such certificate to the Secretary.

40.49. *Re-application:* An operator whose application for an airline certificate has been disapproved may re-apply at any time.

40.5. AIRLINE COMPETENCY LETTERS

40.50. *Provision for Issuance:* To provide necessary minimum safety standards for the operation of a domestic scheduled airline with sufficient flexibility to meet new and constantly changing situations, 6 airline competency letters will be appended to each airline certificate by the Secretary. Such letters will establish the basis for, and set the limitations upon, the competency of the airline operation and will be deemed an integral part of the airline certificate. The 6 competency letters will be as follows:

40.500 (a). Service Competency Letter
40.501 (b). Route Competency Letter
40.502 (c). Aircraft Competency Letter
40.503 (d). Maintenance Competency Letter
40.504 (e). Airmen Competency Letter
40.505 (f). Weather Competency Letter

40.51. *Application:* Application for an airline certificate will constitute, without other formality, application for a competency letter of each kind.

40.510. Application to Amend—Application to amend a competency letter of any kind may be made by amending the application for the airline certificate as provided for in CAR 40.411.

40.511. Proceeding to Amend—A proceeding to amend a competency letter of any kind may be instituted by the Secretary when, in his opinion, the airline operator is no longer competent in respect of some matter specified in the letter. Notice of such proceeding will be addressed to the airline operator with opportunity for a hearing. In the interim, the part of the letter effected may be suspended in whole or in part. Following the hearing, the Secretary may issue a re-rating as to competency in which event the findings will be incorporated in a new competency letter.

40.512. Inspection—Same as in CAR 40.413.

40.52. *Temporary Letter:* Following application made for an airline certificate, but prior to approval and issuance thereof, temporary competency letters may be issued for the purpose of enabling applicant to demonstrate ability to meet the requirements as to service, route, aircraft, maintenance, airmen, and weather competency, for the duration of the temporary permit provided for in CAR 40.42.

40.53. *Issuance:* Upon approval of an application duly made and proofs submitted (including inspection and examination), a competency letter will be issued in an appropriate form.

40.54. *Display:* No competency letter need be posted for purposes of display, but any such letter shall be presented in its current and effective form for inspection upon demand

of any authorized officer or employee of the Department of Commerce, or upon the reasonable request of any other person.

40.55. *Duration:* A competency letter will remain effective for an indeterminate time, or until

(a) the letter is superseded by a later competency letter of the same kind, or
(b) the letter is suspended or revoked, or
(c) the certificate of which it is a part is suspended or revoked, or
(d) the airline service is discontinued.

40.56. *Non-Transferability:* A competency letter is not transferable, except with the consent of the Secretary.

40.57. *Suspension or Revocation:* A competency letter may be suspended or revoked for any of the reasons specified in CAR 40.47.

40.58. *Surrender:* Upon notice from the Secretary of the suspension or revocation of a competency letter, the operator to whom it has been issued shall immediately return such letter to the Secretary.

40.59. *Re-Application:* An operator, whose application for a competency letter has been disapproved, may re-apply at any time.

CHAPTER 50. FLYING SCHOOL RATING

50.0 PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of Commerce to provide by regulation for the rating of civilian schools giving instruction in flying, as to the adequacy of the course of instruction, as to the suitability and airworthiness of the equipment, and as to the competency of the instructors, flying school ratings will be as follows:

(a) Advanced Flying School Rating
(b) Primary Flying School Rating

50.1. MINIMUM REQUIREMENTS: To be eligible for a flying school competency rating, an applicant shall comply with the following minimum requirements prescribed for the particular rating sought.

50.10. *Advanced Flying School Rating:* To be eligible for an advanced flying school rating, an applicant shall comply with the following minimum requirements.

50.100. Flying Instructors—Applicant shall show that each person employed to give, or giving, flight instruction for the school is possessed of both a valid and appropriate pilot certificate and a valid instructor rating.

50.101. Aircraft for Flight Instruction—Applicant shall show

50.1010 (a). that each aircraft to be used for purposes of flight instruction is possessed of a valid aircraft certificate.

50.1011 (b). that at least one certificated aircraft is available for purposes of flying instruction for each 15 students enrolled in flying courses.

50.1012 (c). one or more types of aircraft, normally used for primary dual instruction and deemed satisfactory to the Secretary for such purpose, available for purposes of flying instruction, and 2 or more other types, one of which shall be a cabin aircraft of at least 4-place capacity. All aircraft used for night flying instruction shall be appropriately certificated as provided in CAR 04.

50.102. Hangar and Shop Facilities—Applicant shall show hangar space sufficient to adequately house all aircraft used for purposes of flying instruction and shall show shop facilities, equipment and personnel sufficient to maintain such aircraft in an airworthy condition.

50.103. Landing Area—Applicant shall show a landing area available for flying instruction which at least complies with the following:

50.1030 (a). Size and Design—The landing area shall have (1) at least 1,800 feet of effective landing length in all directions, or (2) at least 3 landing strips not less than 500 feet, permitting landing in at least 6 directions at all times, with at least one landing strip aligned with the general direction of the prevailing wind, the landing strips not to cross or converge at angles of less than 40 degrees, nor any of the landing strips to be less than 1,800 feet in effective landing length, or (3) at least 2 landing strips not less than 500 feet wide, permitting landing in at least 4 directions at all times, with at least one landing strip aligned with the general direction of the prevailing wind, the landing strips not to cross or converge at an angle of less than 80 degrees, nor any of the landing strips to be less than 2,500 feet in effective landing length. The foregoing are sea level dimensions.

50.1031 (b). Surface—The landing area shall be suitable for the taking off and landing of aircraft under all ordinary weather conditions, which area shall present a firm, smooth, well drained surface which is free from obstructions.

50.104. Flying Instruction Curriculum—Applicant shall show a flying instruction curriculum so organized as to offer the following courses of flight instruction:

50.1040 (a). Solo Pilot Flight Course—So arranged as to give each student a minimum of 15 hours total flying time, of which not less than 8 hours shall be dual or check time and not less than 7 hours of solo time in which the student is the sole occupant of the aircraft.

50.1041 (b). Private Pilot Flight Course—So arranged as to give each student a minimum of 35 hours total flying time, of which not less than 10 hours, nor more than 15 hours, shall be dual or check time, which may be credited as solo time for the purpose of qualifying for a pilot rating. The course shall also be so arranged as to give each student a minimum of 2 hours solo experience in flying at least one type of aircraft other than that used for primary dual instruction and at least 5 hours of solo cross-country flying, which shall include at least one flight over a course of not less than 50 miles with at least 2 full stop landings at different points on the course.

50.1042 (c). Limited-Commercial Pilot Course—Same as in CAR 50.1041, except that the total flying time shall be a minimum of 60 hours of which not less than 15 hours, nor more than 20 hours, shall be dual or check time.

50.1043 (d). Commercial Pilot Flight Course—So arranged as to give each student

50.10430 (1). a minimum of 175 hours total flying time, of which not less than 25 hours, nor more than 40 hours, shall be dual or check time, which may be credited as solo time for the purpose of qualifying for a pilot rating.

50.10431 (2). a minimum of 10 hours solo experience in flying each of two distinct types of aircraft other than the aircraft used for primary dual instruction.

50.10432 (3). at least 10 hours of solo flying in at least one type of cabin aircraft, of at least 4-place capacity, which shall be loaded with ballast to the approved gross weight for such aircraft during such flights.

50.10433 (4). At least 10 hours of solo night flying.

50.10434 (5). At least 10 hours of solo cross-country flying, which shall include at least one flight over a course of not less than 100 miles with at least 3 full stop landings at the different points on the course.

50.105. Ground Instructors—Applicant shall show that each person giving, or employed to give ground instruction

for the school is possessed of a valid and appropirate ground instructor certificate.

50.106. Aircraft for Ground Instruction—Applicant shall show the following aircraft and aircraft engine demonstration equipment specificaly set aside for ground school instruction:

50.1060 (a). One modern type aircraft complete, with engine.

50.1061 (b). 2 additional types of aircraft wings, showing different types of construction and methods of attachment to the fuselage.

50.1062 (c). 3 aircraft engines of different make in current use, 2 of which shall be air-cooled types, and one water-cooled.

NOTE.—The foregoing equipment is not required to be in airworthy condition, and may have been damaged, provided it has been repaired sufficiently for complete assembly.

50.107. Class Room Facilities—Applicant shall show at least one class room for each 100 persons enrolled, which room shall be capable of seating at least 20 students. All places where instruction is given shall be furnished with suitable and adequate facilities.

50.108. Ground Instruction Curriculum—Applicant shall show a ground instruction curriculum so organized as to offer the following courses of ground instruction:

50.1080 (a). Solo Pilot Ground School Course—So arranged as to give each student at least the following instruction:

50.10800 (1). Civil Air Regulations—5 hours.

50.1081 (b). Private Pilot Ground School Course—Same as in CAR 50.1080, and in addition at least 20 hours in aerial navigation and meteorology as outlined in CAR 20.125, and 5 hours in general service of aircraft.

50.1082 (c). Limited-Commercial Pilot Ground School Course—So arranged as to give each student at least the following instruction:

50.10820 (1). Civil Air Regulations—5 hours.

50.10821 (2). Aircraft engines (including principles of internal-combustion, carburetion, cooling, lubrication, and construction, inspection, maintenance and repair of various types)—15 hours.

50.10822 (3). Aircraft (including history of aviation, theory of flight, nomenclature, aerodynamics, and design, construction, rigging, inspection, maintenance, and repair of various types)—15 hours.

50.10823 (4). Aerial navigation and meteorology—20 hours.

50.10824 (5). Shop practice—5 hours of each of the above required 15 hours on aircraft and on engines may be shop practice on the basis of 3 hours shop practice equivalent to 1 hour of classroom instruction. Shop practice shall be under the direct supervision of a certificated ground instructor. Shop practice as permitted by these regulations is interpreted to mean maintenance and repair instruction. Such instruction, if given, shall be conducted in a specially designated place and on equipment provided for that purpose and shall not be conducted on the actual flying equipment. This, however, shall not be interpreted as prohibiting students from working in the repair shops under the supervision of mechanics holding valid mechanic certificates of competency.

50.10825 (6). Parachutes—1 hour.

50.1083 (d). Commercial Pilot Ground School Course—So arranged as to give each student at least the following instruction:

50.10830 (1). Civil Air Regulations—5 hours.

50.10831 (2). Aircraft Engines—Same as in CAR 50.10821—25 hours.

50.10832 (3). Aircraft—Same as in CAR 50.10822—30 hours.

50.10833 (4). Meteorology—15 hours.

50.10834 (5). Aerial navigation, including the subject of radio and its use—20 hours.

50.10835 (6). Aircraft instruments—10 hours.

50.10836 (7). Parachutes—1 hour.

50.10837 (8). Shop practice—10 hours of the above required 25 hours on engines and 10 hours of the above required 30 hours on aircraft may be shop practice, on the basis of 3 hours shop practice equivalent to 1 hour of classroom instruction. Shop practice shall be under the direct supervision of a certificated ground instructor.

50.11. *Primary Flying School Rating:* To be eligible for a primary flying school rating, an applicant shall comply with the following minimum requirements:

50.110. Flying Instructors—Same as in CAR 50.100.

50.111. Aircraft for Flight Instruction—Applicant shall show

50.1110 (a). that each aircraft to be used for purposes of flying instruction is possessed of a valid aircraft certificate.

50.1111 (b). that at least one certificated aircraft is available for purposes of flying instruction for each 15 students enrolled in flying courses.

50.1112 (c). one or more types of aircraft, normally used for primary dual instruction and deemed satisfactory to the Secretary for such purpose, available for purposes of flying instruction.

50.112. Hangars and Shop Facilities—Same as in CAR 50.102.

50.113. Landing Area—Same as in CAR 50.103.

50.114. Flying Instruction Curriculum—Same as in CAR 50.104, except that 50.1043 is not required.

50.115. Ground Instructors—Same as in CAR 50.105.

50.116. Aircraft for Ground Instruction—Applicant shall show at least one modern type aircraft complete with aircraft engine. The foregoing equipment need not be in airworthy condition.

50.117. Class Room Facilities—Same as in CAR 50.107.

50.118. Ground Instruction Curriculum—Same as in CAR 50.108, except that CAR 50.1082 and CAR 50.1083 are not required.

50.2. FLYING SCHOOL CERTIFICATE

50.20. *Provision for Issuance:* A flying school certificate of competency will be issued by the Secretary, upon approval of application made and satisfactory proofs submitted, to a flying school which, upon inspection and examination, is found by the Secretary to meet the appropriate minimum requirements prescribed in CAR 50.1 and is, therefore, rated as competent to give instruction in flying.

50.200. Civilian schools giving instruction in flying and holding valid approved school certificates may operate pursuant to such authority until the expiration thereof or for 6 months after these regulations go into effect, whichever is the shorter period. Thereafter flying school certificates will be issued, upon application, pursuant to these regulations.

50.21. *Application:* Application for a flying school certificate shall be made to the Secretary, subscribed under oath, upon a form supplied for the purpose, and shall be accompanied by two copies of the flying and ground instruction curricula.

50.210. Application to Amend—When any change in a flying school competency rating is desired, the applicant shall file a written request therefor with the Secretary upon a form supplied for the purpose.

50.211. Proceeding to Amend—A proceeding to amend a flying school competency rating may be instituted by the Secretary when, in his opinion, the flying school is no longer competent in respect of some matter specified in the certificate. Notice of such proceeding shall be addressed to the flying school with opportunity for a hearing. In the interim, the certificate may be suspended in whole or in part. Following the hearing, the Secretary may issue a rerating as to competency.

50.22. *Issuance:* Upon approval of an application duly made and proofs submitted, including inspection and examination, an appropriate flying school certificate of competency will be issued.

50.220. Temporary Certificate—Following application made for a flying school certificate, but prior to approval thereof and issuance of the certificate, a temporary flying school certificate may be issued by the examining Bureau inspector.

50.23. *Display:* The flying school certificate (or a copy thereof) in its currently effective form shall be conspicuously posted in the principal office of the flying school where it may be readily seen, and any such certificate shall be presented for inspection upon demand of any authorized officer or employee of the Department of Commerce, or upon the reasonable request of any other person.

50.24. *Duration:* A flying school certificate, unless sooner suspended or revoked in accordance with the provisions of CAR 50.27, will remain in force for one year after date of issue.

50.25. *Renewal:* The term of a flying school certificate may be renewed upon written application within 45 days prior to expiration and upon a satisfactory showing that the school is in active operation and maintained pursuant to the requirements of these regulations.

50.26. *Non-Transferability:* A flying school certificate is not transferable.

50.27. *Suspension or Revocation:* A flying school certificate may be suspended or revoked, in whole or in part, for any of the following acts or statements on the part of the flying school owner, operator, or employee thereof:

50.270 (a). Any false statement by the flying school operator in the application for the certificate, or in any information accompanying such certificate, or in any report required by the Secretary.

50.271 (b). Violation of any of the terms, conditions, specifications, limitations, or other provisions of the flying school certificate.

50.272 (c). Violation of any provision of the Air Commerce Act or any rule or regulation duly issued thereunder.

50.273 (d). Suspension of flying school service.

50.274 (e). Any unsafe operation of the flying school.

50.275 (f). Any failure to maintain safety standards requisite to the obtaining of such certificate.

50.276 (g). Any advertising which directly, or impliedly, states that the flying school is certificated as competent to offer any course of instruction in flying or ground school courses for which it does not, in fact, possess a valid flying school competency rating.

50.28. *Surrender:* Upon notice from the Secretary of the suspension or revocation of the flying school certificate, the operator to whom it has been issued shall promptly return such certificate to the Secretary.

50.29. *Re-Application:* An operator whose application for a flying school certificate has been disapproved may re-apply at any time after the expiration of 30 days from the date of such disapproval.

50.3. FLYING SCHOOL REGULATIONS: The following rules and regulations will govern the conduct and operation of flying schools:

50.30. *Inspection:* The applicant for any flying school certificate of competency shall offer full cooperation in respect of any inspection and examination which may be made of said applicant upon proper demand by any authorized representative of the Secretary prior or subsequent to the issuance of a flying school certificate of competency.

50.31. *Curriculum*

50.310. Changes—Any proposed change in the curriculum of a certificated flying school shall be submitted to the Secretary for approval, and no change shall be made prior to such approval.

50.32. *Instruction*

50.320. Standard of Instruction—Each certificated flying school shall maintain a standard of ground or flying instruction, or both, to assure that 9 out of every 10 graduates therefrom who apply for a pilot certificate of competency satisfactorily qualify for such pilot certificate.

50.321. Spin Instruction—All certificated flying schools shall give instruction, to each student enrolled for flying instruction, in the recovery from stalls and spins prior to the student's first solo flight.

50.322. Refresher Courses—A certificated flying school may give refresher courses in ground or flying subjects, or both, for the purpose of qualifying pilots who already have had the necessary total flying time for the kind of pilot certificate for which they intend to apply.

50.323. Dual Instruction Restrictions—All dual instruction given by a certificated flying school shall be in the vicinity of the airport or other instruction area, except that not to exceed 2 hours dual cross-country will be permitted and credited toward the student's total time as a portion of his dual and check time.

50.324. Limitation on Flying Instruction Hours—No person shall give, or offer to give, more than 6 hours of dual flying instruction in one day, nor more than 6 days in any one week, to students in a certificated flying school.

50.33. *Examinations:* Upon the completion of each course (meaning each subject taught therein) offered in a certificated flying school, each student taking such course shall be given an examination on the subject matter covered, and all grades attained in such examinations shall be made a part of each student's individual record, and a copy thereof maintained by the school.

50.34. *Records:* Every certificated flying school shall keep an adequate individual record of each student enrolled therein, which record shall include a chronological log of all instruction. The entire record shall be certified to by an authorized official of such school.

50.35. *Reports:* A report and student roster shall be submitted to the Secretary by the owner or operator of each certificated flying school on January first and July first of each calendar year. Such student roster shall list:

(a) The names of all students enrolled,

(b) The course or courses for which they are enrolled,

(c) The names of all students who have been graduated within the period reported on, and

(d) The names of all students dropped from enrollment, within the period reported on, with the reasons therefor.

50.36. *Graduation Certificate:* Each student who is graduated from a certificated flying school shall be furnished with a graduation certificate by such school, which certificate shall show the flying and/or ground course or courses completed and the grade obtained by such student in each subject of such course, together with a statement of the graduate's totals of both dual and solo flying time.

50.37. *Miscellaneous:*

50.370. Flying School Regulations to be Posted—A copy of these flying school regulations (CAR 50) shall be posted conspicuously on the air school bulletin board for the information and guidance of all students enrolled by the school.

50.371. Credit for Dual Time—When a student applies for a pilot certificate as a graduate of a certificated flying school, such graduate may be privileged to count a portion of his dual or check time toward the solo-flying experience required for a pilot certificate subject to the restrictions set forth in CAR 50.1040, 50.1041, 50.1042 and 50.1043, provided he applies for such certificate within 30 days after the date of graduation.

CHAPTER 52. AIRCRAFT REPAIR STATION RATING

52.0. PROVISION FOR RATING: Pursuant to the provisions of the Air Commerce Act requiring the Secretary of

Commerce to provide for the re-rating of aircraft as to their airworthiness, aircraft repair stations will be rated as to their competence in various classifications of repair activity in accordance with the following provisions.

52.1. REPAIR STATION CERTIFICATE

52.10. *Application:* Application for a certificate of competency for an aircraft repair station shall be made to the Secretary on Form AC 52–1 supplied for the purpose.

52.11. *Minimum Requirements:* A repair station, in order to be eligible for certification, shall show the following:

52.110 (a). Facilities and equipment as specified in CAR 52.4 for the classification, or classifications, in which certification is desired.

52.111 (b). Certificated personnel as specified in CAR 18.4.

52.12. *Issuance:* Upon approval of an application duly made and proofs submitted, an aircraft repair station certificate will be issued by the Secretary. The classification, or classifications, of activity in which the repair station is deemed competent will be set forth in a letter of transmittal which accompanies and is a part of the certificate.

52.120. Aircraft repair stations holding valid approved repair station certificates may operate pursuant to such authority for 6 months after these regulations go into effect. Thereafter aircraft repair station certificates will be issued, upon application, pursuant to these regulations.

52.13. *Display:* An aircraft repair station certificate, together with its letter of transmittal as provided for in CAR 52.12, shall be displayed in a prominent place in the repair station.

52.14. *Duration:* An aircraft repair station certificate will remain effective for a period of one year from date of issuance or until

52.140 (a). it is sooner cancelled upon the written request of the owner, or

52.141 (b). it is sooner suspended or revoked, or

52.142 (c). ownership of the repair station is sooner transferred.

52.15. *Renewal:* The term of an aircraft repair station certificate may be renewed for additional periods of one year on application of the holder to the Secretary, provided proof is made satisfactorily to show that the station is in active operation and provided also, that an inspection satisfactorily shows that such station is maintaining the standards required for obtaining such certificate.

52.16. *Non-Transferability:* An aircraft repair station certificate is not transferable.

52.17. *Suspension or Revocation:* An aircraft repair station certificate may be suspended or revoked by reason of any of the following on the part of the holder of such certificate or on the part of any employee of such holder:

52.170 (a). Violation of the Air Commerce Act or any rule or regulation duly issued thereunder.

52.171 (b). Any false statement in an application for a certificate or in any report required to be furnished.

52.172 (c). Any demonstration of incompetency, carelessness or negligence, or the use of inferior or improper material.

52.173 (d). Failure to maintain the facilities, equipment or personnel required by CAR 52.11.

52.174 (e). Use or display of the certificate for fraudulent or improper purpose.

52.175 (f). Refusal to submit to inspection upon proper demand by a representative of the Secretary.

52.176 (g). Any false, misleading or incomplete statements in advertising pertaining to the certificated repair station.

52.177 (h). Performance of any act which is deemed by the Secretary to be contrary to the public safety or interest, or detrimental to the morale of airmen, owners or operators.

52.178 (i). Concealment of or withholding of information as to structural defects, damage or faulty workmanship, from the aircraft owner, or from an authorized representative of the Secretary, or from any State or municipal official charged with the duty of enforcing local laws or regulations involving Federal compliance.

52.18. *Surrender:* Upon notice from the Secretary of the suspension or revocation of an aircraft repair station certificate, the holder thereof to whom same has been issued shall immediately return such certificate to the Secretary.

52.19. *Re-Application:* An applicant for an aircraft repair station certificate which has been denied may apply again at the expiration of 90 days from the date of denial.

52.2. INSPECTION: The applicant for, or holder of, an aircraft repair station certificate shall offer full cooperation in respect of any inspection which may be made of such repair station as to facilities, equipment, personnel, techniques, practices or workmanship, upon proper demand by a representative of the Secretary prior to or subsequent to the issuance of any such certificate.

52.3. ADVERTISING: A certificated aircraft repair station shall be privileged to advertise its standing as such only with respect to the classification, or classifications, of activity in which it is rated as competent in the letter of transmittal of its certificate. The advertisement shall not fail to incorporate mention of such classification, or classifications.

52.4. CLASSIFICATION REQUIREMENTS

52.400. *General:* Every certificated aircraft repair station shall show the following facilities and equipment:

52.4000 (a). A stock room properly set up to insure the proper segregation of materials.

52.4001 (b). A proper system of keeping records of all work.

52.4002 (c). Facilities and equipment for making small drawings.

52.4003 (d). Suitable housing facilities adequately heated and lighted.

52.4004 (e). Adequate certificated personnel qualified to perform or supervise the type of work involved.

52.401. *Minimum:* The minimum requirements as to facilities and equipment for the various classifications of activity are as set forth hereinafter. An aircraft repair station which does not meet the specific item requirements set forth for a particular class of work may be eligible for certification if it shows adequate and suitable substitutes for such items.

52.402. *Class 1—Welded Steel Tube Structure:* A repair station certificated for repair work on welded steel tube structure shall show the following facilities, equipment and supplies in addition to those specified in CAR 52.400. These requirements do not include facilities suitable for the repair of fittings, which shall be in accordance with CAR 52.406.

52.4020 (a). Acetylene welding equipment with proper assortment of torch tips and supplies.

52.4021 (b). Portable buffer.

52.4022 (c). Bench and vise.

52.4023 (d). Power-driven emery wheel.

52.4024 (e). Hand tools, including hack saws, clamps, micrometers suitable for both tubing and flat stock, level and a full set of reamers.

52.4025 (f). Adequate supply of all standard sizes of SAE–1025 and SAE–4130 tubing and sheet available.

52.4026 (g). Supplies and equipment for painting and applying protective coatings to the inside as well as to the outside of tubing.

52.4027 (h). Portable drill.

52.4028 (i). Magnifying glass of at least 4–6 power.

52.4029 (j). Long and short trammel rods with adjustable points suitable for aligning fuselage bays.

52.403. *Class 2—Wooden Structure, Excluding Box and Laminated Spars, and Wood Covered Fuselages, Wings and Control Surfaces:* A repair station certificated for repair work on wooden structure, excluding box and laminated spars, and wood covered fuselages, wings and control surfaces, shall show the following facilities, equipment and supplies in addition to those specified in CAR 52.400:

52.4030 (a). Band and rip saws.

52.4031 (b). Planer or joiner, unless factory spars used or satisfactory local mill available.

52.4032 (c). Hand tools, including clamps.

52.4033 (d). Bench, sawhorses and vise.

52.4034 (e). Supply of wood, including aircraft spruce, mahogany plywood and birch plywood, or satisfactory available source.

52.4035 (f). Supply of casein or highest quality animal glue, including proper facilities for mixing.

52.4036 (g). Supplies and equipment for varnishing and for applying other protective coatings.

52.4037 (h). Soldering equipment and other facilities for fabricating drag wires and drag wire lugs.

52.4038 (i). Supply of necessary small standard parts.

52.4039 (j). Sanding machine.

52.404. *Class 3—Fabric Covering:* Repair stations which are certificated for work on fabric covering shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.4040 (a). Suitable sewing machine.

52.4041 (b). Suitable separate space for doping, including proper ventilation, temperature and humidity control.

52.4042 (c). Hand tools.

52.4043 (d). Supply of fabric and tape suitably stored, or satisfactory available source.

52.4044 (e). Doping brushes.

52.4045 (f). Supply of dope and thinner properly stored.

52.4046 (g). Suitable equipment for spray painting, including compressor and spray gun.

52.405. *Class 4—Wood Covered Fuselages, Wings and Control Surfaces, and Box and Laminated Spars:* A repair station which is certificated for work on wood covered fuselages, wings and control surfaces, and box and laminated spars, shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.4050 (a). An adequate press or a sufficient number of clamps.

52.4051 (b). All the items specified in CAR 52.403 except item (h).

52.406. *Class 5—Steel Fittings:* A repair station which is certificated for work on steel fittings shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.4060 (a). Acetylene welding equipment with proper assortment of torch tips and supplies.

52.4061 (b). Drill press.

52.4062 (c). Portable drilling machine with full set of drills.

52.4063 (d). Work bench and vise.

52.4064 (e). Hand tools, including micrometers, full set of reamers, and tools for laying out fittings.

52.4065 (f). Cutting and forming tools.

52.4066 (g). An adequate supply of SAE–1025 and SAE–4130 sheet steel available.

52.4067 (h). Supplies and equipment for painting and applying protective coatings.

52.4068 (i). A supply of necessary small standard parts.

52.4069 (j). Magnifying glass of at least 4–6 power.

52.407. *Class 6—Aluminum Alloy Structure, Excluding Fittings:* A repair station which is certificated for work on aluminum alloy aircraft structure, excluding fittings, shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.40700 (a). Complete heat-treating equipment for rivets and structural parts, and forming machinery, or satisfactory available source.

52.40701 (b). Rivet dies and air hammer, or the equivalent.

52.40702 (c). Hand tools and clamps.

52.40703 (d). Work bench and vise.

52.40704 (e). Shear for cutting and brake for bending sheet metal.

52.40705 (f). Drill press.

52.40706 (g). Portable drill machine with full set of drills.

52.40707 (h). A suitable supply of aluminum alloy sheets and rivets, or satisfactory available source.

52.40708 (i). A supply of necessary small standard parts.

52.40709 (j). Pressure indicator and control for air rivet hammer.

52.40710 (k). Magnifying glass of at least 4–6 power.

52.408. *Class 7—Aluminum Alloy Fittings:* A repair station which is certificated for work on aluminum alloy fittings shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.4080 (a). Drill press.

52.4081 (b). Portable drilling machine with full set of drills.

52.4082 (c). Work bench and vise.

52.4083 (d). Hand tools including micrometers, full set of reamers, and tools for laying out fittings.

52.4084 (e). Cutting and forming tools.

52.4085 (f). An adequate supply of aluminum alloy sheet and bar stock, or satisfactory available source.

52.4086 (g). Supplies and equipment for painting and for applying protective coatings.

52.4087 (h). Heat-treating equipment, or satisfactory available source.

52.4088 (i). A supply of necessary small standard parts.

52.4089 (j). Magnifying glass of at least 4–6 power.

52.409. *Class 8—Assembly:* Assembly operations shall be understood to include such operations as the installation of fuel or oil tanks and piping; the installation of control system parts; the installation of seats, instruments or other such equipment; and the joining together of two or more major components of the airplane. Repair stations which are certificated for this type of work shall show the following facilities, equipment and supplies in addition to those specified in CAR 52.400:

52.40900 (a). Soldering equipment and supplies.

52.40901 (b). Cable splicing equipment.

52.40902 (c). A supply of aircraft bolts, nuts, clevis pins, cotter pins, cable, cable shackles, thimbles and turnbuckles of all the usual sizes, on hand or satisfactory available source.

52.40903 (d). Level and protractor for rigging.

52.40904 (e). A supply of such hand tools and small parts as are necessary for the purpose intended.

52.40905 (f). Step ladders of sufficient height and a satisfactory tail stand.

52.40906 (g). Suitable equipment for annealing and bending fuel and oil lines.

52.40907 (h). Work bench and vise.

52.40908 (i). Long and short trammel rods.

52.40909 (j). Plumb bob.

52.40910. (k). Tape at least 50 feet long.

52.410. *Class 9—Aluminum Alloy Propeller Blades and/or Steel Hubs:* A repair station which is certificated for work on aluminum alloy propeller blades and/or steel hubs, shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.41000 (a). Balancing stand with knife edge and arbor with suitable mandrels.

52.41001 (b). Propeller surface table and mandrels.

52.41002 (c). Supply of crocus cloth.

52.41003 (d). Riffle files.

52.41004 (e). Drilling machine with full set of drills.

52.41005 (f). A supply of lead wool, and tools suitable for removing and repacking lead wool.

52.41006 (g). A supply of caustic soda and nitric acid.

52.41007 (h). Precision calipers.

52.41008 (i). Protractor for measuring angle of bend, as illustrated in Figure 18 of ACM 18.

52.41009 (j). Suitable tanks in which to etch propeller blades.

52.41010 (k). Suitable press for straightening propeller blades cold.

52.41011 (l). Suitable twisting bars.

52.41012 (m). Magnifying glass of at least 4–6 power.

52.41013 (n). Portable power grinder and buffer with grinding wheel.

52.41014 (o). Manufacturer's dimensioned drawings.

52.41015 (p). Means of placing manufacturer's identification numbers and date of repair on blades so that disassembly is unnecessary at the time of inspection.

52.41016 (q). Metal face plate and protractor for measuring pitch angles.

52.41017 (r). No-go gauge.

52.41018 (s). Spline adapter and stand.

52.41019 (t). Cadmium plating equipment installed or readily available.

52.411 *Class 10—Wooden Propellers:* A repair station which is certificated for work on wooden propellers shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.41100 (a). Balancing stand with knife edge and arbor with suitable mandrels.

52.41101 (b). Propeller bench with vise or arbor for holding propeller while being repaired.

52.41102 (c). Wood files.

52.41103 (d). Complete soldering equipment.

52.41104 (e). Tin snips or metal shears, and shim stock.

52.41105 (f). A supply of high grade animal and casein glue, and facilities for mixing.

52.41106 (g). A supply of high grade quick drying varnish.

52.41107 (h). A supply of tipping material and wood screws, or satisfactory available source.

52.41108 (i). Adequate glue press.

52.41109 (j). Scrapers.

52.41110 (k). Means of placing manufacturer's identification numbers and date of repair on the blades.

52.412. *Class 11—Engines:* A repair station which is certificated for work in connection with engine repairs or overhaul shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.41200 (a). Micrometers, inside and outside.

52.41201 (b). Engine disassembly stand.

52.41202 (c). Complete set of precision measurement tools, including reamers, taps, and valve grinding tools.

52.41203 (d). Propeller hub puller.

52.41204 (e). Wash tank and air pressure cleaning equipment located in a space separated from the final assembly space so that fog from cleaning may not settle on parts ready for assembly.

52.41205 (f). Turning lathe.

52.41206 (g). Sand blast equipment, or readily available source.

52.41207 (h). Block and tackle equipment.

52.41208 (i). A supply of engine service manuals.

52.41209 (j). A supply of standard parts such as nuts, bolts, cotters and gaskets, or satisfactory available source.

52.41210 (k). Heating torch.

52.41211 (l). Level plate.

52.41212 (m). Set of "V" blocks and shim material.

52.41213 (n). Height gauge.

52.41214 (o). Suitable test stand for running-in engines, or available.

52.41215 (p). Supply of engine enamel.

52.41216 (q). Welding torch.

52.41217 (r). Brass and copper lock wire.

52.41218 (s). Record system for showing total hours, hours since last overhaul, tear-down, inspection, parts disposal, parts replacement and log of test run.

52.41219 (t). Assembly stand.

52.41220 (u). Magnifying glass of at least 4–6 power.

52.41221 (v). Equipment suitable for checking alignment of master link, connecting rods and crankshaft.

52.41222 (w). High-pressure spark plug testing machine.

52.41223 (x). Carburetor test stand.

52.41224 (y). Equipment available for testing electrical accessories such as starters and generators.

52.41225 (z). Equipment for testing complete ignition systems, or available.

52.41226 ($a^1$). Portable electric drill press and set of drills.

52.41227 ($b^1$). Power-driven emery wheel and buffer.

52.413 *Class 12—Instruments:* A repair station which is certificated for work in connection with aircraft instrument repair or overhaul shall show the following equipment, facilities and supplies in addition to those specified in CAR 52.400:

52.4130 (a). Airspeed indicator test apparatus as follows:

Manometer (inch in tenths scale with a light liquid such as water or kerosene).
Pressure pump (sensitive bulb type).
Vibrator.
Four-way stop-cock with suitable length hose for connections.
Stand for supporting indicator.

52.4131 (b). Altimeter test apparatus as follows:

Manometer (mercury) mm scale.
Vacuum pump.
Bell jar.
Vacuum pump plate.
Ascent and descent rate indicator.
Mounting panel.
Vibrator with momentary switch.
Four-way stop-cock with suitable metering valves and suitable length hose for connections.
Pressure altitude chart (millimeters and feet).
Vacuum wax.
Barometer.

52.4132 (c). Climb indicator test apparatus as follows:

Manometer (mercury) mm scale.
Vacuum pump.
Bell jar.
Vacuum pump plate.
Ascent and descent rate indicator.
Mounting panel.
Vibrator with momentary switch.
Four-way stop-cock with suitable metering valves and suitable length hose for connections.
Pressure altitude chart (millimeters and feet).
Vacuum wax.
Barometer.
Stop watch.

52.4133 (d). Magnetic compass compensating equipment as follows:

Compass compensation equipment (for testing either magnetic or induction compasses) should include either (1), or in lieu thereof, (2), (3), (4) and (5) of the following:

52.41330 (1). Magnetic compass equipped with removable compensating magnets.

NOTE.—Any serviceable magnetic compass equipped with removable compensating magnets may be used as a master compass, provided the compensating magnets are removed before being used. In no case will a compass, having compensating magnets permanently installed, be used as a master compass.

52.41331 (2). A circular swinging base having a radius at least equal to the length of the largest airplane to be swung.

NOTE.—The platform should be situated not less than 75 yards from any aircraft and at least 100 yards from any steel structures such as hangars or railroads. Starting with the magnetic north, radii should be laid out every 30°.

52.41332 (3). Special dolly for elevating the tail to approximately flight position.

NOTE.—The dolly must be rigid and strong enough to hold the airplane while the engine is running at half throttle.

52.41333 (4). Pair of single-wheel blocks.

52.41334 (5). Several 50-pound sand bags.

NOTE.—For putting across the rear of the fuselage of nose-heavy airplanes.

52.4134 (e). Tachometer test stands as follows:

Veedor liquid tachometer.
Gear box for driving tachometer being tested.
Balance wheel to prevent sudden changes in speed.
Variable speed electric motor.

CHAPTER 61. SCHEDULED AIRLINE RULES (INTERSTATE)

61.0. CERTIFICATION

61.00. *Certificate Required:* No scheduled airline shall be operated in interstate air commerce for the carriage of mail, goods, or persons, or any combination thereof, unless

(a) possessed of a valid airline certificate (or temporary permit) issued by the Secretary of Commerce, and

(b) possessed of valid competency letters (or temporary letters) relating to service, route, aircraft, maintenance, airmen, and weather, issued by the Secretary of Commerce and appended to such certificate and deemed a part thereof.

61.01. *Violation of Terms:* No scheduled airline shall be operated in interstate air commerce for the carriage of mail, goods, or persons, or any combination thereof, in violation of any of the terms, conditions, specifications, limitations, or other provisions

(a) contained in its airline certificate or temporary permit, or

(b) contained in any current competency letter or temporary letter relating to service, route, aircraft, maintenance, airmen, or weather.

61.1. SERVICE

61.10. *Service Performed and Changes:* No scheduled airline shall perform or render any service, as related to the carriage of mail, goods, or persons, or to day or night operation, until rated competent to render such service in an appropriate competency letter issued by the Secretary. When an airline operator desires to effect a change in the kind of service offered with respect to the above, application for a competency rating therefor shall be made to the Secretary in accordance with CAR 40.510.

61.11. *Schedules*

61.110. Operations Schedules—Shall be set up with due regard to sufficient time for the adequate servicing of fuel and oil at intermediate stops, to prevailing winds, and of a basis of cruising speed of the aircraft at not to exceed the specified cruising power output of the engines as operated in the aircraft. All airline aircraft when being tested for ratings will be checked to determine cruising speeds that are to be approved. Block-to-block time shall be used in establishing time from stop to stop.

61.2. ROUTE

61.20. *Route Operation and Changes:* No scheduled airline shall operate over any route or part thereof until rated competent to operate thereover in an appropriate competency letter, issued by the Secretary. When an airline operator desires to effect a change in the route flown over, application for a competency rating therefor shall be made to the Secretary in accordance with CAR 40.510.

61.21. *Regular Route:* The conduct of operations by a scheduled airline shall at all times be in strict accordance with the terms of its route competency letter.

61.22. *Regular Stops:* Regular terminals and intermediate stops shall be used only as specified in the route competency letter.

61.23. *Alternate Airports:* Regular terminals, intermediate stops or other adequate airports, may be used as alternates when used for the purpose of complying with clearance requirements, provided such alternates are listed as such in the route competency letter.

61.24. *Alternate Route:* No scheduled airline shall operate over any alternate route until rated competent to operate thereover in an appropriate competency letter issued by the Secretary, and the conduct of operations by such airline shall at all times be in strict accordance with the terms of its route competency letter.

61.3. AIRCRAFT

61.30. *Aircraft Operation and Changes:* No scheduled airline shall operate any aircraft until rated competent with respect thereto in an appropriate competency letter issued by the Secretary. When an airline operator desires to effect a change in the model aircraft utilized, application for a competency rating therefor shall be made to the Secretary in accordance with CAR 40.510.

61.31. *Single-Engine Aircraft*

61.310. Day Operation over Land—No single-engine float seaplane shall be operated over land unless such aircraft can, at all times, reach open water suitable for a landing in the event of complete power failure.

61.311. Night Operation over Land—No single-engine aircraft shall be operated at night with passengers.

61.312. Day Operation over Water—The following rules shall govern the operation of single-engine aircraft in day operation over water:

61.3120 (a). No single-engine land aircraft shall be operated over water unless such aircraft can at all times reach land suitable for a landing in the event of a complete power failure.

61.3121 (b). No single-engine water aircraft may be operated over water unless a landing may be effected at all times within a distance of eight miles from shore, in the event of a complete power failure.

61.3122 (c). No single-engine water aircraft shall be operated over water, except during such time and seasons as permit the use of such water for landing without any hazard from floating ice or freezing water spray.

61.313. Night Operation over Water—No single-engine aircraft shall be operated at night with passengers.

61.32. *Multi-Engine Aircraft*

61.320. Day Operation over Land—No multi-engine float seaplane shall be operated over land unless such aircraft can, at all times, reach open water suitable for a landing in the event of a complete power failure.

61.321. Night Operation over Land—No multi-engine float seaplane shall be operated at night over land.

61.322. Day Operation over Water—The following rules will govern the operation of multi-engine aircraft in day operation over water:

61.3220 (a). No multi-engine aircraft shall be operated over water, beyond gliding distance without the aid of power,

unless completely equipped for over-water flying, as provided in CAR 40.233.

61.3221 (b). No multi-engine aircraft shall be operated over water unless such aircraft can, at all times, maintain an altitude of at least 1,000 feet above the water, with any one engine completely out of commission and with the authorized load for the route or part thereof.

61.3222 (c). No multi-engine seaplane shall be operated over water except during such time and seasons as permit the use of such water for landing without any hazard from floating ice or freezing water spray.

61.3223 (d). When one engine fails in a twin-engine aircraft operating over water, the aircraft shall be headed toward, and thereafter continuously flown toward, the shore nearest in terms of time.

61.323. Night Operation over Water—The following rules will govern the operation of multi-engine aircraft in night operation over water:

61.3230 (a). Multi-engine water aircraft, except float seaplanes, may be operated over water at night for the carriage of mail and goods.

61.3231 (b). Same as CAR 61.3221.

61.3232 (c). No multi-engine aircraft shall be operated over water at night beyond gliding distance from shore without the aid of power, unless completely equipped for over-water flying, as provided in CAR 40.233.

61.3233 (d). Same as CAR 61.3223.

61.33. *Instruments:* No scheduled airline shall operate any aircraft in scheduled airline service unless such aircraft is possessed of all instruments required by the provisions of CAR 04.52 and 04.53. Flight instruments shall be properly functioning at the time of clearance and take-off of the aircraft.

61.34. *Equipment:* No scheduled airline shall operate any aircraft in scheduled airline service unless such aircraft is possessed of all equipment required by the provisions of CAR 04.52 and 04.53. Such equipment shall, at the time of clearance and take-off of the aircraft, be in a serviceable condition and ready for use.

61.35. *Maintenance*

61.3500. General—Each aircraft operated by a scheduled airline shall be maintained in a continuous condition of airworthiness, in accordance with accepted standards and practices, and the terms of the aircraft and maintenance competency letters.

61.3501. Organization—A maintenance organization shall be set up by the airline and it shall be responsible for the continuous condition of the airworthiness of all aircraft, engines, propellers, accessories and instruments, for the proper maintenance of adequate facilities, for the adequacy and competence of maintenance personnel and for the preparation and dissemination of such maintenance reports as are required by the Secretary.

61.3502. Supervision—All phases of maintenance duties shall be adequately supervised by qualified mechanics, mechanics in charge, crew chiefs, or foremen.

61.3503. Inspection—An adequate inspection organization shall be set up by the airline and it shall be responsible for determining that all maintenance work conforms to Department of Commerce requirements as to workmanship, methods employed, and materials used, as provided in CAR 61.35. Each inspector shall hold valid mechanic's certificate for the type of inspection involved.

61.3504. Workmanship—Workmanship shall be at least equivalent to that generally accepted as conforming to good practice as related to the airworthiness of the aircraft or auxiliary equipment.

61.3505. Methods—Methods employed shall conform to those generally accepted as good practice. Insofar as they apply, the methods provided for in CAR 18 shall be utilized.

61.3506. Materials—Materials used shall conform, when possible, to Army, Navy or CAR 18 specifications. In no case shall materials be used of physical properties less than those of the material used by the manufacturer of the equipment or component in question insofar as the airworthiness of such equipment or component is affected.

61.3507. Mechanics—An adequate staff of qualified mechanics and experienced artisans shall be employed by the airline operator and kept available for the performance of functions of maintenance and other duties which are reasonable and necessary to the safe and orderly operation involved. Each such mechanic and artisan shall be relieved of all airline duties for a period of at least 24 consecutive hours during each week of duty or equivalent thereof.

61.3508. Training Program—A training program shall be maintained so that maintenance personnel may at all times be familiar with the duties required, with particular reference to the introduction into airline service of new or unfamiliar equipment.

61.3509. Distribution of Personnel—Sufficient maintenance personnel shall be stationed or provided for along the airline route and at such scheduled stops as may be deemed necessary by the Secretary to provide proper service to flight equipment and auxiliaries thereto.

61.3510. Shops and Facilities—At least one general overhaul and maintenance shop containing adequate working space shall be provided for by the operator. Such shop shall be properly lighted, ventilated and heated.

61.3511. Stock—An adequate quantity of spare parts and supplies shall be kept on hand or readily available at all times.

61.3512. Adequate Facilities—Adequate facilities for the proper servicing, maintenance and repair of airline aircraft and auxiliary equipment shall be available at all points along the airline deemed necessary or advisable by the Secretary.

61.3513. Inflammable Material—Including dope, gasoline, etc., shall be kept remote from that portion of shops where sparks or open flames present fire hazards, by their proximity.

61.3514. Refueling Requirements—The following rules will govern the operations incident to the refueling of airline aircraft:

61.35140 (a). Water elimination facilities shall be provided at all refueling points.

61.35141 (b). A daily check for the presence of water in fuel and storage and dispensing tanks shall be made and a record of such water checks shall be kept.

61.35142 (c). Where refueling is accomplished during conditions of rain or snow, precautions shall be taken to prevent the entrance of moisture into the fuel tanks of the aircraft.

61.35143 (d). During refueling the aircraft and the fuel dispensing apparatus shall both be grounded to a point or to points of zero electrical potential.

61.35144 (e). When refueling is accomplished at night, adequate lights shall be provided to insure proper servicing.

61.35145 (f). No smoking and no fires or flames shall be permitted in the immediate vicinity of an aircraft while refueling is being accomplished.

61.35146 (g). When practicable, the aircraft electrical switches shall be not turned on or off while refueling is being accomplished.

61.35147 (h). When passengers are permitted to remain in the cabin while refueling is being accomplished, a responsible cabin attendant shall remain in the cabin at or near the cabin door.

61.3515. Alteration and Repairs—Airline aircraft, including training aircraft, aircraft engines, propellers and approved components thereof, shall be altered or repaired only in conformity to the procedures provided in CAR 18. Reports of such alterations or repairs shall be submitted promptly to the Secretary through the airline maintenance inspector having supervision of the operation involved.

61.3516. *Records:* Current records shall be kept of the total time of service, the time since last overhaul, and time since last inspection, on all aircraft, engines, propellers and where practicable on instruments and accessories.

61.4. MAINTENANCE MANUAL

61.40. *Necessity For:* In order to properly maintain flight equipment, each operator of a scheduled airline shall prepare and maintain a maintenance manual for the use and guidance of the maintenance personnel.

61.41. *Contents:* Each maintenance manual shall contain instructions for each operation covering the overhaul, check, inspection and servicing of flight equipment and other equipment auxiliary thereto, and shall also contain a copy of the current maintenance competency letter. The duties and responsibilities of each mechanic in charge, crew chief, foreman and inspector shall be clearly prescribed.

61.42. *Form:* The maintenance manual shall be loose-leaf in form, and each page therein shall be numbered and dated to show the currency of all material contained therein. All copies of such manual shall at all times be kept up to date.

61.43. *Delivery of Copies:* A copy of the maintenance manual shall be furnished to at least the following persons:

61.430 (a). the Secretary of Commerce,

61.431 (b). the Chief, Airline Inspection Section, Bureau of Air Commerce,

61.432 (c). each airline maintenance inspector of the Bureau of Air Commerce in charge of inspection of any part of the airline,

61.433 (d). each chief of maintenance of the airline,

61.434 (e). each chief inspector of the airline, and

61.435 (f). each mechanic of the airline in charge of all stations where servicing, inspection, checks or overhauls is or are done.

61.44. *Record of Copies:* Each airline operator shall keep a complete record of all persons to whom copies of its maintenance manual have been supplied.

61.45. *Changes:* The following rules will govern changes made in the maintenance manual:

61.450 (a). Any change issuing from the Secretary pertaining to the maintenance manual shall be promptly incorporated in the maintenance manual and copy thereof sent, in the form of a new page of such manual, to each person required to hold a copy of the manual. Each amended page of the manual shall be properly dated.

61.451 (b). Upon receipt of such amended page or pages the recipient shall insert the current information in the manual.

61.452 (c). No change shall be made in any of the overhaul, check or inspection periods contained in the manual without the approval in writing of the Secretary.

61.453 (d). Any data not issuing from the Secretary may be changed by the operator, without the approval of the Secretary, provided such change is not inconsistent with any Federal regulation or competency letter or safe maintenance practice. Notice of such change shall be promptly given in accordance with CAR 61.450.

61.46. *Retirement of Parts Program:* A retirement of parts program shall be set up by the operator based upon the experience of the operator and the best information available including recommendations from the original manufacturer of the equipment.

61.5. AIRMEN

61.50. *Airmen Utilization and Changes:* No scheduled airline shall utilize any pilot or dispatcher until such airman has been rated competent for the particular airline operation by the Secretary. When an airline operator desires to effect a change in the airmen listed in the airmen competency letter, application for a competency rating therefor shall be made to the Secretary in accordance with CAR 40.510.

61.51. *First Pilot*

61.510. Aircraft Commander—The first pilot shall be in command of the aircraft at all times during flight, and shall be responsible for the safety of persons and goods carried, and for the conduct and safety of the members of the crew.

61.511. Aircraft Competency—The first pilot shall meet the appropriate minimum requirements of CAR 40 and be listed in the airmen competency letter as approved for service to be performed.

61.512. Instrument Competency—The first pilot, in addition to meeting the minimum requirements for an instrument rating provided for in CAR 20.21 and the appropriate provisions of CAR 21, as the case may be, must prove satisfactorily to the operator's check pilot, at least every six months after entry into service in accordance with the training program required by CAR 61.53, his ability to pilot and navigate by instruments an aircraft of a make and model to be flown by him in the airline service. Additional checks may be required by the Secretary in his discretion.

61.513. Route Competency—The first pilot shall meet the appropriate minimum requirements of CAR 40 and be listed in the airmen competency letter as approved for the route, or part thereof, specified therein. No pilot shall be scheduled over an alternate route unless he has met the requirements of CAR 61.5141 regarding qualification over such route.

61.514. Route Competency Expiration—The following rules will govern conditions of route competency expiration, as related to first pilots:

61.5140 (a). Regular Route—After 6 consecutive months' absence from flight duty over a regular route, or part thereof, a first pilot will no longer be deemed competent for the carriage of persons in airline service over such route or part thereof.

61.5141 (b). Alternate Route—After 12 consecutive months' absence from flight duty over an alternate route, a first pilot will no longer be deemed competent for the carriage of persons in airline service over such route.

61.515. Route Competency Renewal—The following rules will govern conditions of route competency renewal, as related to first pilots:

61.5150 (a). A first pilot, who has been absent from flight duty over a regular route, or part thereof, for a period of less than 12 consecutive months and whose route competency has expired in accordance with the provisions of CAR 61.5140, will be deemed competent for such route, or part thereof, upon completion of one round trip flight over the route, or part thereof, as pilot (without passengers) or as second pilot (with or without passengers), and upon notice to the Secretary of such flight with weather conditions as outlined in CAR 40.2613.

61.5151 (b). A first pilot, who has been absent from flight duty over an alternate route for a period of more than 12 consecutive months and whose route competency has expired in accordance with the provisions of CAR 61.5141, will be deemed competent for such alternate route upon compliance with the requirements of CAR 40.2611, CAR 40.2612 and CAR 40.2613, as to such alternate route.

61.516. Logging Flight Time—A first pilot shall log the total actual flight time elapsing during his command of the aircraft.

61.517. Logging Instrument Flight Time—Instrument time may be logged as such only when the aircraft is flown solely by reference to instruments either under actual or simulated conditions. (Over-the-top flying shall not be logged as instrument time.)

61.518. Flight Time Limitations—The following rules will provide the limitations as to the first pilot flight time:

61.5180 (a). A first pilot may be scheduled to fly 8 hours or less during any 24 consecutive hours, without a rest period during such 8 hours. If such pilot be scheduled to fly in excess of 8 hours during any 24 consecutive hours, he shall be given an intervening rest period at or before the termination of 8 scheduled hours of flight duty. Such rest period shall equal at least twice the number of hours flown since the last preceding rest period and in no case shall such rest period be less than 8 hours. During such rest period, the pilot shall be relieved of all duties with the airline.

61.5181 (b). When a first pilot has flown in scheduled airline service in excess of 8 hours during any 24 consecutive hours, he shall receive 24 hours of rest before being assigned any duty with the airline.

61.5182 (c). A first pilot shall not fly in excess of 30 hours during any 7 consecutive days. Relief from all duty for not less than 24 consecutive hours shall be provided for and given to such pilot at least once during any 7 consecutive days.

61.5183 (d). A first pilot shall not fly in scheduled airline service as a member of the crew more than 100 hours in any one month.

61.5184 (e). A first pilot shall not fly in airline service more than 1,000 hours in any calendar year.

61.5185 (f). All first pilot flight time limitations of these regulations are applicable even though such pilot may be used as a second pilot except when first pilot is qualifying on a regular route or alternate route on which he is not qualified.

61.5186 (g). A first pilot shall not do other commercial flying while employed by an airline operator when such flying will exceed any flight time limitations specified herein.

61.519. Physical Examination—A first pilot shall complete a satisfactory physical examination given by a medical examiner designated by the Secretary in accordance with the requirements of CAR 20.3504 and 21.252, as the case may be. Additional examinations may be required by the Secretary at his discretion.

61.52. *Second Pilot*

61.520. When Required—A second pilot will be required in the following cases when passengers are carried:

61.5200 (a). When the aircraft used is of a design incorporating multi-engine features, combined with retractable landing gear or wing flaps or of a single-engine design incorporating both retractable landing gear and wing flaps, or

61.5201 (b). when the first pilot is required to fly 5 or more hours during any 24 consecutive hours without an intervening rest period equal to at least 2 hours for each hour flown since the last preceding rest period. Such rest period when required shall not be less than 8 hours, or

61.5202 (c). when the operation authorized permits instrument flying, or

61.5203 (d). when, in the opinion of the Secretary, the usual and customary duties of a first pilot in the navigation and conduct of a flight would be unduly interfered with through the necessity of performing other duties.

61.521. Aircraft Competency—A second pilot shall meet the minimum requirements prescribed in CAR 40.262.

61.522. Instrument Competency—At least once each 6 months after entry into service as a second pilot, each second pilot shall have his log-book certified to the effect that he is capable of flying by instruments and has demonstrated such fact to a first pilot, check pilot, or to the chief pilot of the airline, which person shall so certify.

61.523. Logging Flight Time—A second pilot may log 50% of the total actual flight time or he may log the full flight time during which he was the sole manipulator of the controls, provided that if such time be in excess of 50% of the total flight time, the time so flown by the second pilot shall be certified by the first pilot.

61.524. Flight Time Limitations—A second pilot shall not fly as a member of the crew in scheduled airline service, more than 100 hours in any month.

61.53. *Pilot Technique Maintenance*

61.530. Responsibility of Operator—In order to maintain a high standard of pilot technique, the airline operator shall be responsible for proper and periodic instruction, in their respective duties, of all first and second pilots employed by such operator. The instruction so given to first pilots shall at least include single-engine operation and approach for landing with maximum load authorized for the route or portion thereof, in each type of aircraft to be used by the pilot in scheduled airline service, and instrument approach procedures.

61.531. Transition Training—If a first pilot has not flown a particular make and model of aircraft, within the previous 90 days, he shall before being scheduled in such equipment receive flight training on such aircraft, including:

61.5310 (a). 5 take-offs and landings, with one-half to three-quarters of the useful load aboard.

61.5311 (b). One landing of the 5 provided for in CAR 61.5310, with one engine fully throttled approach, effected during the day, and where night operation is authorized one landing of the 5 provided for in CAR 61.5310, with one engine fully throttled approach, effected at night.

61.532. Persons Carried During Transition Training—During such pilot transition training, no persons other than airline personnel on airline business may be carried.

61.533. Pilot Certification for Equipment—When such tests are not conducted by a Department of Commerce airline inspector, an authorized check pilot shall certify to the pilot's capabilities on the equipment involved.

61.534. Check Pilots—Each airline operator shall provide a sufficient number of check pilots to insure that each pilot constantly meets and complies with the minimum pilot requirements pertaining to scheduled airline service. No check pilot so provided by the operator shall check any first pilots for the airline until such check pilot has been approved therefor by the Secretary. No check of pilot capabilities made in behalf of the airline operator abrogates the authority of the Secretary to make whatever pilot checks are deemed by him to be necessary in the interests of safe airline operation.

61.535. Training Program—A pilot training and instruction program satisfactory to the Secretary shall be maintained by the airline. The operator shall submit it to the Secretary within 60 days of certification of the airline.

61.54. *Radio Operator*

61.540. Pilot as Operator—The first or second pilot may serve in the capacity of a radio operator, subject to the rules of the Federal Communications Commission in respect to the grade of operator's license required.

61.55. *Dispatchers*

61.550. Number Required—The airline operator shall provide an adequate number of certificated airline dispatchers, necessary for the type of operation involved, for the purpose of dispatching airline aircraft.

61.551. Location—One or more airline dispatchers shall be located at such terminal or intermediate points on the route as may be deemed by the Secretary to be necessary for the operation involved.

61.552. Dispatcher Competency Certificate—Each dispatcher used by the airline for the purpose of dispatching airline aircraft shall be possessed of a valid dispatcher's certificate, in accordance with the provisions of CAR 27.

61.553. Route Competency—The following rules shall govern a dispatcher's route competency:

61.55300 (a). He shall have made at least one round trip over the route, or part thereof, on which he is to serve during the previous 90 days prior to dispatching any airplane over such route or part thereof.

61.55301 (b). He shall observe and be familiar with the prevailing weather phenomena peculiar to the route, or part thereof, for which qualification is sought.

61.55302 (c). He shall be familiar with the airline operation over the route, or part thereof, for which qualification is sought.

61.55303 (d). He shall be familiar with the contents of the airline operations manual.

61.55304 (e). He shall be familiar with the airmen and weather competency letters over the route or part thereof for which qualification is sought.

61.55305 (f). He shall be familiar with the general and special rules of the airline concerning dispatch of aircraft in scheduled operations.

61.55306 (g). He shall be familiar with the aircraft used by the airline.

61.55307 (h). He shall be familiar with the provisions of the aircraft certificates and with the loading charts for the equipment used.

61.55308 (i). He shall be familiar with the maximum authorized loads, with respect to the route or part thereof, for the aircraft to be used.

61.55309 (j). He shall be familiar with the fuel and oil consumption of the aircraft, with respect to the airline operating conditions.

61.55310 (k). He shall be familiar with the available charts used to compute the air speed of the aircraft and the fuel consumption, at various altitudes and power outputs of the aircraft engines.

61.55311 (l). He shall be familiar with the local United States Weather Bureau and Bureau of Air Commerce personnel.

61.55312 (m). He shall be familiar with the radio facilities in the aircraft used.

61.55313 (n). He shall be familiar with the peculiarities and limitations of each radio range and radio marker station over the route, or part thereof, for which route competency is sought.

61.55314 (o). He shall be familiar with the effect of weather conditions upon the radio reception by the aircraft to be used.

61.55315 (p). He shall be familiar with the time-tables which ordinarily apply to the airline operation.

61.55316 (q). He shall be familiar with any airway facility, additional to those mentioned in CAR 61.55313 enroute, to, or located at, alternate airports approved as such, for the route or part thereof, in the route and weather competency letter.

61.554. Route Competency Maintenance—Each dispatcher, listed in the airline airmen competency letter shall make at least one round trip over the route, or part thereof, on which he dispatches airline aircraft in scheduled operations, at least once each 6 months.

61.555. A dispatcher shall not dispatch visual-contact, instrument and/or over-the-top flights, either day or night, below the respective minimums specified for such flights in the weather competency letter, except as provided in CAR 61.71094.

61.556. Dispatcher Route Competency Expiration—After 24 consecutive months' absence from dispatching duty over a route or part thereof, a dispatcher will no longer be deemed competent to dispatch aircraft in scheduled operations over such route or part thereof.

61.557. Dispatcher Time Limitations—The following rules will govern the hours of duty for authorized dispatchers:

61.5570 (a). Maximum Consecutive Hours of Duty—No dispatcher shall be on duty as such for a period of more than 10 consecutive hours.

61.5571 (b). Maximum Hours of Duty in 24 Consecutive Hours—If a dispatcher is scheduled to be on duty as such for more than 10 hours in a period of 24 consecutive hours, he shall be given a rest period of not less than 8 hours, at or before the termination of 10 hours of dispatcher duty except in emergencies due to illness or unavoidable absence of a dispatcher due to weather during a qualification trip or other circumstances beyond the control of the operator.

61.5572 (c). Dispatcher's Time Off—Relief from all duty with the airline for not less than 24 hours shall be provided for and given each dispatcher at least once during any consecutive 7 days, or equivalent thereto within one calendar month.

61.6. WEATHER

61.60. *Reports:* The following rules shall govern the use of weather reports by scheduled airline operators:

61.600 (a). No weather report shall be used to control flight movements unless prepared from observations made and released by the United States Weather Bureau, or by a source approved by such Bureau including pilots' flight observation reports.

61.601 (b). The weather reports used shall be the latest reports available.

61.602 (c). The last airway weather report entered upon the clearance form or attached thereto shall be not more than one hour and 15 minutes old at the time the aircraft departs on a scheduled flight, except that off-course weather reports or on-call weather reports may be entered thereupon or attached thereto if the last such report is not more than 2 hours old.

61.603 (d). Barometric pressures, corrected to sea level readings, shall be utilized exclusively.

61.604 (e). All ceiling heights, reported by pilots in flight either by radio or by entry on forms, shall be with reference to altitude above sea level.

61.605 (f). Forecasts made by the Weather Bureau or company meteorologists, or both, may be used.

61.7 FLIGHT OPERATIONS

61.70. *Prior to Clearance*

61.700. Aircraft to be Airworthy—No scheduled airline shall operate any aircraft unless, at the time of use, the aircraft is in an airworthy condition, conforms with the terms of its current aircraft certificate and is loaded in conformity with the current loading schedule which is a part of such certificate.

61.701. Adequately Serviced—Before departure on any flight, the airline aircraft shall be adequately serviced. The first pilot shall be responsible for the proper servicing of the aircraft, although he may delegate the actual work of supervision to a second pilot or other airman.

61.702. Adequate Fuel Supply—The following rules shall govern the minimum fuel supply to be carried by all airline aircraft:

61.7020 (a). Visual-Contact Operation (Day or Night)—No airline aircraft shall be dispatched or shall take off without fuel and oil sufficient, considering the wind and other weather conditions to be encountered during the course of the flight, at least

(1) to complete such flight to the point cleared to, and thereafter.

(2) to fly for a period of 45 minutes at normal cruising consumption for the flight.

61.7021 (b). Instrument or Over-the-Top Operation (Day or Night)—No airline aircraft shall be dispatched or shall take off without fuel and oil sufficient, considering the wind and other weather conditions to be encountered during the course of the flight, at least

(1) to complete such flight to the point cleared to, and thereafter

(2) to fly to and land at the alternate airport designated in the clearance and most distant from the point cleared to, and thereafter

(3) to fly for a period of 45 minutes at normal cruising consumption for the flight.

61.703. Radio Ground Check—Immediately preceding departure from originating station it shall be determined that both day and night frequencies of the two-way radio, as well as all additional frequencies whose use are contemplated during the flight, are working satisfactorily. The method of determining this shall be by radio contact on each frequency with at least one ground station.

61.704. Passengers Aboard During Refueling—Passengers may be permitted to remain in the cabin during refueling, provided:

61.7040 (a). There is no smoking in the aircraft, and

61.7041 (b). there is no smoking on the ground in the vicinity of the aircraft, and

61.7042 (c). an employee of the operator is stationed in the entrance to the passenger cabin and remains there alert for any emergency until refueling is completed.

61.705. Notice of Other Aircraft in Flight on Route—Prior to clearance, it shall be the responsibility of the dispatcher to ascertain from the best information available what other aircraft flights are in progress over the route to be flown, the results of which shall be made known to the pilot. After departure of the scheduled flight the dispatcher will continue to advise his flight or flights the progress of all other known aircraft in flight on the course, crossing courses, converging courses, etc.

61.71. *Dispatching Rules (For Clearance)*

61.7100. Necessity for Dispatching Authorization—No scheduled airline flight shall be started except on the authority of an airline dispatcher whose name appears in the airmen competency letter as qualified for the route, or part thereof, on which the flight takes off.

61.7101. Dispatcher Reporting for Duty—No dispatcher shall clear a flight of airline aircraft unless he has been on duty, at the station from which such clearance is effected, for a period sufficient to become familiar with existing conditions. He shall continue on duty until the aircraft has landed in completion of a trip, or until the dispatching supervision has been taken over by an adjacent airline dispatcher or by another dispatcher who has relieved him after such relief dispatcher has been on duty for a period sufficient to become familiar with existing conditions.

61.7102. Clearance Form: Approval—The clearance form used shall be approved by the Secretary. (Note: A sample form may be obtained from the Secretary which contains substantially the material that would be acceptable.)

61.7103. Clearance Preparation and Execution—A clearance form shall be properly prepared and executed for each flight between designated clearance points, and shall be signed by the first pilot and by an authorized dispatcher or by duly authorized station personnel of the operator after receiving current authority from the authorized dispatcher on duty only when both the first pilot and the dispatcher believe the flight may be made with safety. The original copy shall be given to the first pilot and a duplicate copy shall be kept in the station file for a period of at least 30 days.

61.7104. Clearance Contents—The following rules will govern the clearance contents:

61.71040 (a). The clearance shall contain or have attached thereto all current weather reports as outlined in 61.60 over the airway or part thereof and, when available, any off-airway or on-call weather reports considered necessary or desirable by the pilot or dispatcher to insure the safety of the flight.

61.71041 (b). When available, the latest terminal and airway forecasts shall be included in or attached to the clearance and shall be considered by the dispatcher responsible and first pilot before clearance.

61.71042 (c). The dispatcher or duly authorized station personnel shall attach or enter all current reports or information pertaining to irregularities of navigational aids and facilities affecting the flight. He shall also inform the pilot, during flight, of any additional or different irregularities and the flight shall be controlled accordingly.

61.7105. Clearance Request Repetition—When a pilot requests clearance from a dispatcher authorized to clear the proposed flight and is refused such clearance, he shall not make a similar request from another dispatcher.

61.7106. Change in Clearance by Radio—If a change in clearance is desirable while the aircraft is in flight, the pilot may be given a change in clearance by radio by an authorized dispatcher, provided the two-way conversation appears in the radio log. If the pilot is refused such change by one dispatcher, he shall not make a similar request of another dispatcher.

61.7107. Weather Minimums: General—The following rules relating to weather conditions will govern the dispatching of airline aircraft. No scheduled airline aircraft shall be dispatched unless:

61.71070 (a). At the time of take-off, the ceiling and visibility at the point of departure are equal to or better than those specified for departure in the weather competency letter.

61.71071 (b). In the event of ground fog, all take-offs or landings shall be made in strict accordance with the procedure specified in the weather competency letter.

61.7108. Weather Minimums: Visual-Contact Clearance—The following rules relating to weather conditions will govern the dispatching of airline aircraft in visual-contact operation. No scheduled airline aircraft shall be dispatched unless:

61.71080 (a). The hourly weather report and sequence and current weather forecasts shall show a trend that gives sufficient indication that the ceilings and visibilities along the entire route to be flown are and will remain at or above the minimums specified in the weather competency letter until the flight arrives at the point cleared to.

61.71081 (b). During day operation minimum visibility shall be one mile except contact flight may be made when visibility is reduced to one-half mile by local smoke, dust, haze, blowing snow or sand.

61.71082 (c). During night operation at least one beacon on the course shall be visible from the aircraft at all times.

61.7109. Weather Minimums: Instrument or Over-the-Top Clearance—The following rules relating to weather conditions will govern the dispatching of airline aircraft in instrument and/or over-the-top operation:

61.71090 (a). No scheduled airline aircraft shall be dispatched unless the observed weather information and current weather forecasts, pertaining to the point cleared to, give sufficient indication at the time of clearance that the ceiling and visibility are or will be, when the flight would arrive at such point, at or above the minimums specified in the weather competency letter for letting-down-through.

61.71091 (b). When the observed weather information and current weather forecasts pertaining to the point cleared to give sufficient indication, at the time of clearance, that the ceilings and visibility are, and will remain until the flight would arrive at such point, at or above the minimums specified in the weather competency letter for letting-down-through, there shall be at least one designated alternate airport or intermediate field specified on the appropriate flight clearance. Such alternate airport or field shall be suitable for landing and be within the fuel and oil requirements as outlined in CAR 61.702.

61.71092 (c). If the alternate referred to in CAR 61.71091 is equipped with a radio range beacon, the weather conditions existing thereat at the time of clearance must indicate that the ceilings and visibility are, and will remain until the flight would arrive at such point, at or above the minimums specified in the weather competency letter for letting-down-through, and the hourly weather report sequence and current forecast shall show a trend that gives sufficient indication of weather conditions continuing so until the flight would arrive thereat.

61.71093 (d). If the alternate referred to in CAR 61.71091 is not equipped with a radio range beacon, the weather conditions existing thereat at the time of clearance must be equal to, or better than, broken clouds and a ceiling of 1,000 feet and visibility of 2 miles, and the hourly weather report sequence and forecast shall show a trend that gives sufficient indication of continuing so until the flight would arrive thereat. The Secretary may, in his discretion, prescribe higher minimums.

61.71094 (e). When the ceiling or visibility at the point cleared to is below the minimum specified in the weather competency letter for landing-down-through, but the weather reports pertaining to such point at such time shall show a trend, by the hourly sequence and current forecast, that gives sufficient indication of the weather conditions improving to or above such minimums upon arrival of the flight thereat, 2 designated alternate airports or intermediate fields specified in the appropriate flight clearance. Each such alternate shall be suitable for landing and be within the fuel and oil requirements, as outlined in CAR 61.702.

61.71095 (f). If any one of the alternates, referred to in CAR 61.71094, is equipped with a radio range beacon, the weather conditions existing at such alternate at the time of clearance shall not be less than the minimums provided for in CAR 61.71092.

61.71096 (g). If any one of the alternates, referred to in CAR 61.71094, is equipped with a radio range beacon, the weather conditions existing at such alternate at the time of clearance shall not be less than the minimums provided for in CAR 61.71093.

61.7110. Clearance of Flights on Alternate Routes—Clearance of flights on alternate routes shall not be permitted unless such route or routes have been approved and listed in the letter of competency, and conditions on the regular route are such that the flight would otherwise be canceled or delayed, or when for the purpose of keeping pilots qualified over such routes. When such flights are made for qualifying pilots, such flights shall be made by visual-contact with visibility not less than 5 miles as observed from the aircraft over the entire route. When flights are cleared over alternate routes due to conditions on the regular route being such that flight is considered inadvisable, the weather conditions on the alternate route shall be equal to or better than those listed in the letter of competency for the particular alternate route.

61.7111. Late or Off-Schedule Flights—When variations from the regular schedules occur, the dispatcher shall take

such action or issue such special orders as may be necessary and proper.

61.7112. Flight Hazards—No scheduled airline flight shall be dispatched, or permitted to continue in flight, when there is a known probability of its encountering any hazardous conditions in making or continuing such flight.

61.72. *Flight Preparation and Take-Off Rules*

61.7200. Radio Ground Check—Before departure from the originating terminal on any scheduled airline operation, at least one check shall be made by the pilot of the radio system to be used in flight.

61.7201. Radio Check After Take-Off—When a trailing antenna is used, a precautionary radio check to determine possible loss of such antenna shall be made as soon as practicable after take-off.

61.7202. Control Tests—The pilot shall test the flight controls on the ground and determine that they are functioning properly.

61.7203. View of Traffic—Immediately prior to take-off, the pilot shall maneuver the aircraft to a position from which he can observe incoming and outgoing aircraft.

61.7204. Engine Tests—Before the take-off run, the aircraft engine or engines shall be individually tested at full throttle, except that supercharged engines shall be tested at run-up r. p. m. at the manifold pressure specified by the operator for the particular conditions involved. The engine temperatures (including oil, carburetor, and head temperatures) shall be normal and each magneto shall be individually tested.

61.72040 (a). No person other than a certificated airman may run-up the engine or engines of an airline aircraft while such engines are installed in an airline aircraft.

61.72041 (b). Engine run-ups shall be conducted in such a manner as to minimize the effect of loose gravel, cinders and like material in contacting the propeller blades, aircraft control, lift and stabilizing surfaces.

61.7205. Instrument Tests—Before the take-off run, as many as possible of the aircraft flight instruments, and particularly all pressure gauges and gyroscopic flight instruments, shall be tested by the pilot to determine that they are all functioning properly.

61.7206. Take-Off Restrictions—No pilot shall take-off any airline aircraft if, in his opinion, the aircraft is not airworthy. No pilot shall take-off any airline aircraft at any time when an engine is not functioning properly.

61.7207. Runway Utilization—The take-off shall be started from a point which makes available the greatest length of runway, considering the direction of the wind.

61.7208. Restricted-Vision Take-Offs—If a method of take-off, under conditions of restricted vision (including conditions of ground fog), is specified in the weather competency letter, it shall be strictly followed.

61.7209. Banking after Take-Off—So far as practicable, the aircraft shall not be banked immediately after take-off until at least a minimum altitude of 500 feet has been attained.

61.7210. Pilots at Controls—Neither pilot shall leave the controls during ascent of the aircraft immediately following take-off.

61.7211. Take-Off from Fields Not Designated as Airports—No scheduled airline aircraft shall take-off with passengers from any field not designated as an airport until such aircraft has been properly cleared by a dispatcher authorized to act in such an emergency and until a complete agreement has been reached by both the pilot in command of such flight and the authorized dispatcher that such clearance can be accomplished with safety.

61.73. *Flight Course and Enroute Rules*

61.730. Alternate Routes—Scheduled airline aircraft shall not be operated over an alternate route unless authorized to do so in a route competency letter and then only in compliance with the provisions thereof.

61.731. Deviation from Airway—Scheduled airline aircraft shall not deviate from the prescribed airway except when the circumstances render such deviation necessary as an emergency safety measure. Any such deviation shall be explained by the pilot in a written report to the airline operations manager. The operations manager shall furnish a copy of such report with comments promptly to the Secretary.

61.732. Dispatcher Emergency Decisions—In an emergency situation, arising during the course of the flight, which requires immediate decision and action on the part of the dispatcher, and that is known to him, the airline dispatcher shall notify and advise the pilot as to such situation. Further, the dispatcher shall determine from the pilot what final decision has been made by such pilot and shall enter it in the station radio log.

61.74. *Flight Altitude Rules*

61.740. Visual-Contact Day or Night—Except during take-offs and landings, no scheduled airline aircraft shall be flown at an altitude less than 500 feet above the ground, or within 500 feet from any mountain, hill, or other obstruction to flight, except as may be specifically approved by the Secretary.

61.741. Instrument Flights—Altitudes established for instrument flights by the provisions of CAR 60.—— shall be strictly adhered to during such flights. Except during take-offs, and final approaches and landings, no instrument flight shall be conducted within 1,000 feet above the ground or any obstruction.

61.742. Maximum Altitude of Flight Operations—In scheduled airline aircraft carrying passengers and operating at an altitude above 15,000 feet above sea level, there shall be a competent cabin attendant provided to observe and care for the passengers. Scheduled airline flights above 15,000 feet are prohibited except for the periods of time which are necessary to clear obstructions to flight and to avoid hazardous weather conditions. Scheduled airline flights at altitudes above 18,000 feet are prohibited unless specifically permitted by the terms of the weather competency letter.

61.75. *Instrument Approach Rules*

61.750. Altitude Maintenance on Initial Approach—When making an initial approach to a radio range station, on instruments or on top of overcast or clouds, an aircraft in scheduled airline operation shall not descend below the pertinent minimum altitude for initial approach specified in the weather competency letter for such station, until arrival over the radio range station has been definitely proved by the method outlined in the appropriate instrument approach procedures of the weather competency letter.

61.751. Letting-Down-Through Procedure—When instrument authority is authorized standard instrument approach procedure shall be established by the operator for each radio range station used or to be used for letting-down-through, and approved by the Secretary and included in the weather competency letter. The letting-down-through methods, procedures and minimums specified, shall be strictly adhered to.

61.76. *Landing Rules*

61.760. Pilots at Controls—The pilots shall remain at their controls during the final approach and landing.

61.761. Restricted-Vision Landing—The Method of landing under conditions of restricted vision, when authorized, will be specified in the weather competency letter and shall be strictly adhered to.

61.77. *Flight Interruption Rules*

61.770. Weather Interruption—If any hazardous flight condition is encountered enroute, the pilot shall broadcast information as to the course of action which he is taking and as to his reasons therefor.

61.771. Mechanical Interruptions—In the event of any mechanical failure or interruption (including failure of engine, flight instrument, radio, or other essential component of the aircraft) which may involve the safety of the flight, the pilot shall proceed to and land at the nearest place where a safe landing can be effected. (For general pilot authorization, in emergency situations, see CAR 61.7812.)

61.78. *General Pilot Rules*

61.7800. Command of Flight—The first pilot shall be in command during the flight of the aircraft.

61.7801. Remaining at Controls—The pilots shall remain at their posts while the aircraft is in flight and shall not leave the pilots' compartment except when it is necessary in attend-

ing to their regular duties or when replaced by a person authorized in CAR 61.7803. When a second pilot is required to attend passengers, he shall not, unless the first pilot deems it necessary, leave the pilots' compartment until the aircraft has ascended to its cruising altitude, or during the final stages of an approach for a landing.

61.7802. Manipulation of Controls—No person, other than a first or second pilot shall manipulate the controls of an airline aircraft while in scheduled flight, provided, however, that at the discretion of the first pilot such restriction shall not apply to an authorized airline inspector of the Department of Commerce or to properly qualified company personnel.

61.7803. Pilots' Compartment—The door or doors between the pilots' compartment and the passenger compartment shall be kept closed when the aircraft is in flight. No person shall be admitted to such pilots' compartment while the aircraft is in scheduled flight, except at the discretion of the first pilot, an employee authorized by the operator or any of the following personnel of the Department of Commerce may be admitted

Secretary of Commerce
Assistant Secretary of Commerce
Director of Air Commerce
Assistant Director of Air Commerce
Chief, Certificate and Inspection Division
Chief, Airline Inspection Section
Supervisor, Air Traffic Control
Airline Inspectors of Operation
Airline Inspectors of Maintenance
Airline Inspectors of Radio

61.7804. Radio Head-Sets—A radio telephone headset shall be worn by the first pilot or by a second pilot and the radio tuned to appropriate frequencies at least during the time while the aircraft is in flight or taxiing.

61.7805. Time of Reporting for Duty—The pilot in command of any scheduled flight and the second pilot shall report to the operations office of the operator in sufficient time prior to the start of any scheduled flight to study and familiarize themselves with weather conditions on the route to be flown and for the plan of flight to be executed for the proposed schedule.

61.7806. Local Airport Rules and Interline Agreements—Pilots shall at all times comply with accepted safety agreements or practices, including current interairline agreements and local airport traffic rules.

61.7807. Pilot Seat Belts—Any pilot while actually manipulating or in a situation where he may have to take over the controls shall keep his seat belt fastened at all times.

61.7808. Maneuvers—All aircraft maneuvers not necessary to the safe and orderly progress of the flight shall be avoided.

61.7809. Maps and Flight Equipment—It shall be the responsibility of the pilot in command before any scheduled flight is started to have in his possession in the cockpit proper flight and navigational facility maps, including instrument approach procedures when instrument flight is authorized, and such other flight equipment as may be necessary to properly conduct the particular flight proposed.

61.7810. Flashlights—It shall be the responsibility of the pilot in command to see that 2 satisfactory flashlights in good working order are provided in the aircraft and accessible to both pilots.

61.7811. Emergency Decisions—The first pilot is authorized, in emergency situations which require immediate decision and action, to resolve upon a course of action which is required by the factors and information available to him. He may, in such situations, deviate from prescribed methods, procedures or minimums to the extent required by considerations of safety. When such emergency authority is exercised, the pilot shall keep the proper control station fully informed regarding the progress of the flight. He shall submit a written report of any such deviation to his operations manager. The operations manager shall furnish a copy of such report, with his comments, promptly to the Secretary.

61.79. *Miscellaneous Rules*

61.790. Distribution of Notices—The operator shall set up some provisions for the prompt transmission of all information pertaining to changes and irregularities of all navigational aids and facilities over his entire system. In addition where inter-airline agreements, airway traffic control regulations, and local airport traffic rules, etc., have been provided and adopted, on any portion of the route or routes, prompt notice and appropriate instructions shall be given to all personnel concerned.

61.791. Airline Aircraft Proving Period

61.7910 (a). All airline aircraft of a new make or model shall have at least 100 hours of proving tests in the hands of an airline operator, under the supervision of an authorized representative of the Bureau of Air Commerce before authority for carrying passengers may be issued. At least 50 hours of such tests shall be on scheduled operation and include at least 10 hours of night operation.

61.7911 (b). In the case of major changes on aircraft previously proved, or the use of the same aircraft on a different operation, 50 hours of proving tests similar to that outlined in the preceding paragraph may be required, at least 25 hours of which shall be in scheduled operation.

61.7912 (c). During the tests specified in (a) and (b) above, passengers other than those essential to the tests are prohibited. Mail, express and/or cargo may be carried, at the discretion of the Secretary.

61.792. Smoking Rules—The operator may permit smoking in scheduled airline aircraft except in berths of sleeper planes and during refueling, provided:

61.7920 (a). The aircraft carries a second pilot or cabin attendant, who shall notify passengers when and where smoking is prohibited.

61.7921 (b). Sufficient ash containers of a suitable type are provided.

61.793. No Smoking Signs—A prominent "No Smoking" sign shall be displayed in berths.

61.794. Smoking in Pilot Compartment—When the operator permits smoking in the pilot compartment, suitable ash containers for the members of crew shall be provided. In no event shall smoking be permitted during take-offs, landing and refueling.

61.795. Radio Rules—The following rules will govern the use and operation of radio facilities by an airline operator.

61.7950 (a). Radio facilities, exclusive of the emergency equipment, in the aircraft shall be operating and ready for immediate use at all times when the aircraft is in flight.

61.7951 (b). The radio communications system required by the civil air regulations shall at all times be operated in strict accordance with the rules and regulations provided therefor by the Federal Communications Commission.

61.7952 (c). Where a communication channel serves point-to-point contacts in addition to ground to plane it is required that priority of the circuit be given to plane to ground and ground to plane communication. Where in the opinion of the Secretary the volume of point-to-point traffic is so heavy as to interfere with the primary purpose of the circuit, i. e., plane to ground and ground to plane contacts, the Secretary may require that all other traffic be removed from this circuit.

61.8. OPERATIONS MANUAL

61.80. *Necessity For:* Each operator of a scheduled airline shall prepare and maintain an operations manual for the use and guidance of the airline flight and ground personnel. If desired by the operator, such manual may be broken down into two or more parts, on a divisional basis, but the manual for each division shall be complete as pertains to such division.

61.81. *Contents:* Each operations manual, including a divisional manual, shall contain

61.810. (a) a copy of the current route and weather competency letters,

(b) a copy of all interline traffic agreements affecting the particular operation involved; and

(c) any other data or information which the operator desires to include for the efficiency or safety of the operation.

61.82. *Form:* The operations manual shall be loose-leaf in form, and each page therein shall be numbered and dated to show the currency of all material contained therein. All copies of such manual shall at all times be kept up to date.

61.83. *Delivery of Copies:* A copy of the operations manual shall be furnished to at least the following persons:

(a) the Secretary of Commerce;
(b) the Chief of the Airline Inspection Section, Bureau of Air Commerce;
(c) each airline inspector of the Bureau of Air Commerce in charge of inspection on any portion of the route, including any division thereof;
(d) each airline first pilot;
(e) each airline second pilot;
(f) each person authorized for dispatching duty;
(g) each airline aircraft radio operator; and at
(h) each airline terminal and scheduled intermediate stop.

61.84. *Record of Copies:* Each airline operator shall keep a complete record of all persons to whom copies of its operations manual have been furnished.

61.85. *Changes:* The following rules will govern changes made in the operations manual:

61.850 (a). Any change, issuing from the Secretary, pertaining to the route or weather competency letter shall be promptly incorporated in the operations manual and a copy thereof sent, in the form of a new page of such manual, to each person required to hold a copy of the manual. Each amended page of the manual shall be properly dated.

61.851 (b). Upon receipt of such new page or pages, the recipient shall insert the current information in the manual.

61.852 (c). No change shall be made in any of the terms, specifications, conditions, limitations, or other provisions appearing in the airline certificate or in any appended competency letter without the approval, in writing, of the Secretary.

61.853 (d). Any data not issuing from the Secretary may be changed by the operator, without approval of the Secretary, provided such change is not inconsistent with any Federal regulation or competency letter or safe operation practice. Notice of any such change shall be given promptly in accordance with the provisions of CAR 61.850.

61.9. REPORTS

61.90. *General:* Each scheduled domestic airline operator shall furnish the Secretary such reports as may be required by him.

61.91. *Monthly Report:* A monthly operations report shall be submitted on Form No. AC 61–1 to the Secretary not later than the 20th of the next succeeding month.

61.92. *Mechanical Interruption:* Two copies of mechanical interruption in flight report shall be submitted to the Secretary, through the airline maintenance inspector of the Bureau of Air Commerce who is assigned to such operation, on Form No. AC 61–2 as soon as possible, but not later than 10 days after a mechanical interruption occurs.

61.93. *Weather Interruption:* A weather interruption report shall be submitted to the Secretary on Form No. AC 61–3 as soon as possible but not later than 10 days after a weather interruption occurs. A duplicate copy thereof shall be sent to the Bureau of Air Commerce airline inspector who is assigned to such operation.

61.94. *Mechanical Record:* The records of the airline operator covering mechanical trouble shall be made available upon request to the Bureau of Air Commerce airline maintenance inspector who is assigned to such operation, or to any other authorized representative of the Secretary.

61.95. *Irregularity Report:* All airmen, including flight and ground personnel, shall immediately report any irregularity or hazard which exists on or adjacent to any civil airway, and which in their opinion, makes for unsafe operation of aircraft in flight. Such report shall be made to the airline operations manager, who shall verify its accuracy to the best of his ability. If the report is justified, notice of the irregularity or hazard shall at once be given to the Secretary.

## RURAL ELECTRIFICATION ADMINISTRATION.

[Administrative Order No. 141]

ALLOCATION OF FUNDS FOR LOANS

SEPTEMBER 27, 1937.

By virtue of the authority vested in me by the provisions of Section 4 of the Rural Electrification Act of 1936, I hereby allocate, from the sums authorized by said Act, funds for loans for the projects and in the amounts as set forth in the following schedule:

| Project designation: | *Amount* |
|---|---|
| Wisconsin 8025B Monroe | $72,000 |

JOHN M. CARMODY, *Administrator.*

[F. R. Doc. 37–2902; Filed, September 29, 1937; 9:51 a. m.]

## SECURITIES AND EXCHANGE COMMISSION.

SECURITIES EXCHANGE ACT OF 1934

RULE AS TO NON-DISCLOSURE OF CERTAIN INFORMATION

The Securities and Exchange Commission acting pursuant to authority conferred upon it by the Securities Exchange Act of 1934, particularly Section 23 (a) thereof, and finding that the disclosure of information obtained in the course of examinations and investigations conducted pursuant to Sections 17 (a) and 21 (a) would be contrary to the public interest and would interfere with the execution of the functions vested in the Commission, hereby adopts the following rule:

*Rule A4. Non-disclosure of Information Obtained in the Course of Examinations and Investigations*

Information or documents obtained by officers or employees of the Commission in the course of any examination or investigation pursuant to Section 17 (a) or 21 (a) shall, unless made a matter of public record, be deemed confidential. Officers and employees are hereby prohibited from making such confidential information or documents available to anyone other than a member, officer, or employee of the Commission, unless the Commission authorizes the disclosure of such information or the production of such documents as not being contrary to the public interest. Any officer or employee who is served with a subpoena requiring the disclosure of such information or the production of such documents shall appear in court and, unless the authorization described in the preceding sentence shall have been given, shall respectfully decline to disclose the information or produce the documents called for, basing his refusal upon this rule. Any officer or employee who is served with such a subpoena shall promptly advise the Commission of the service of such subpoena, the nature of the information or documents sought, and any circumstances which may bear upon the desirability of making available such information or documents.

The foregoing action shall be effective immediately upon publication.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 29th day of September, A. D. 1937.

[File No. 43–77]

IN THE MATTER OF HAVERHILL ELECTRIC COMPANY

NOTICE OF AND ORDER FOR HEARING

A declaration having been duly filed with this Commission, by Haverhill Electric Company, a subsidiary of New

England Power Association, pursuant to Section 7 of the Public Utility Holding Company Act of 1935, regarding the issue by said Haverhill Electric Company to North Boston Lighting Properties, a registered holding company of which the declarant is a subsidiary, of 3% Demand Notes of Haverhill Electric Company in the aggregate principal amount of $674,375 to evidence a loan of a like aggregate amount to be made by North Boston Lighting Properties to Haverhill Electric Company;

*It is ordered*, That a hearing on such matter be held on October 18, 1937, at 10:00 o'clock in the forenoon of that day at Room 1103, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.; and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before October 12, 1937.

*It is further ordered*, That Robert P. Reeder, an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

## TREASURY DEPARTMENT.

### Bureau of Narcotics.

LAW AND REGULATIONS RELATING TO THE IMPORTATION, MANUFACTURE, PRODUCTION, COMPOUNDING, SALE, DEALING IN, DISPENSING, PRESCRIBING, ADMINISTERING, AND GIVING AWAY OF MARIHUANA

[*The original document as filed with the Division of the Federal Register, The National Archives, is preceded by the Marihuana Tax Act of August 2, 1937 (50 Stat. 551), and Treasury Decision No. 28 of September 1, 1937 (2 F. R. 1808).*]

INTRODUCTORY

The Marihuana Tax Act of 1937, imposes special (occupational) taxes upon persons engaging in activities involving articles or material within the definition of "marihuana" contained in the Act, and also taxes the transfer of such articles or material.

These regulations deal with details as to tax computation, procedure, the forms of records and returns, and similar matters. These matters in some degree are controlled by certain sections of the United States Revised Statutes and other statutes of general application. Provisions of these statutes, as well as of the Marihuana Tax Act of 1937 are quoted, in whole or in part, as the immediate or general basis for the regulatory provisions set forth. The quoted provisions are from the Marihuana Tax Act of 1937 unless otherwise indicated.

Provisions of the statutes upon which the various articles of the regulations are based generally have not been repeated in the articles. Therefore, the statutory excerpts preceding the several articles should be examined to obtain complete information.

CHAPTER I

*Laws Applicable*

SEC. 7 (e). All provisions of law (including penalties) applicable in respect of the taxes imposed by the Act of December 17, 1914 (38 Stat. 785; U. S. C. 1934 ed., title 26, secs. 1040–1061, 1383–1391), as amended, shall, insofar as not inconsistent with this Act, be applicable in respect of the taxes imposed by this Act.

ART. 1. *Statutes applicable.*—All general provisions of the internal revenue laws, not inconsistent with the Marihuana Tax Act, are applicable in the enforcement of the latter.

CHAPTER II

*Definitions*

SEC. 1. That when used in this Act—

(a) The term "person" means an individual, a partnership, trust, association, company, or corporation and includes an officer or employee of a trust, association, company, or corporation, or a member or employee of a partnership, who, as such officer, employee, or member, is under a duty to perform any act in respect of which any violation of this Act occurs.

(b) The term "marihuana" means all parts of the plant Cannabis sativa L., whether growing or not; the seeds thereof; the resin extracted from any part of such plant; and every compound, manufacture, salt, derivative, mixture, or preparation of such plant, its seeds, or resin; but shall not include the mature stalks of such plant, fiber produced from such stalks, oil or cake made from the seeds of such plant, any other compound, manufacture, salt, derivative, mixture, or preparation of such mature stalks (except the resin extracted therefrom), fiber, oil, or cake, or the sterilized seed of such plant which is incapable of germination.

(c) The term "producer" means any person who (1) plants, cultivates, or in any way facilitates the natural growth of marihuana; or (2) harvests and transfers or makes use of marihuana.

(d) The term "Secretary" means the Secretary of the Treasury and the term "collector" means collector of internal revenue.

(e) The term "transfer" or "transferred" means any type of disposition resulting in a change of possession but shall not include a transfer to a common carrier for the purpose of transporting marihuana.

ART. 2. as used in these regulations:

(a) The term "Act" or "this Act" shall mean the Marihuana Tax Act of 1937, unless otherwise indicated.

(b) The term "United States" shall include the several States, the District of Columbia, the Territory of Alaska, the Territory of Hawaii, and the insular possessions of the United States except Puerto Rico and the Virgin Islands. It does not include the Canal Zone or the Philippine Islands.

(c) The terms "manufacturer" and "compounder" shall include any person who subjects marihuana to any process of separation, extraction, mixing, compounding, or other manufacturing operation. They shall not include one who merely gathers and destroys the plant, one who merely threshes out the seeds on the premises where produced, or one who in the conduct of a legitimate business merely subjects seeds to a cleaning process.

(d) The term "producer" means any person who induces in any way the growth of marihuana; and any person who harvests it, either in a cultivated or wild state, from his own or any other land, and transfers or makes use of it, including one who subjects the marihuana which he harvests to any processes rendering him liable also as a manufacturer or compounder. Generally all persons are included who gather marihuana for any purpose other than to destroy it. The term does not include one who merely plows under or otherwise destroys marihuana with or without harvesting. It does not include one who grows marihuana for use in his own laboratory for the purpose of research, instruction, or analysis and who does not use it for any other purpose or transfer it.

(e) The term "special tax" is used to include any of the taxes, pertaining to the several occupations or activities covered by the Act, imposed upon persons who import, manufacture, produce, compound, sell, deal in, dispense, prescribe, administer, or give away marihuana.

(f) The term "person" occurring in these regulations is used to include an individual, partnership, trust, association, company or corporation; also a hospital, college of pharmacy, medical or dental clinic, sanatorium, or other institution or entity.

(g) Words importing the singular may include the plural; words importing the masculine gender may be applied to the feminine or the neuter.

(h) The definitions contained herein shall not be deemed exclusive.

CHAPTER III

*Special Taxes*

Registration

SEC. 3232. *United States Revised Statutes.*—No person shall be engaged in or carry on any trade or business hereinafter mentioned until he has paid a special tax therefor in the manner hereinafter provided.

SEC. 2 (a). Every person who imports, manufactures, produces, compounds, sells, deals in, dispenses, prescribes, administers, or gives away marihuana shall (1) within fifteen days after the effective date of this Act, or (2) before engaging after the expiration of such fifteen-day period in any of the above-mentioned activities, and (3) thereafter, on or before July 1 of each year, pay the following special taxes respectively: • • •

SEC. 2 (b). Any person subject to the tax imposed by this section shall, upon payment of such tax, register his name or style and his place or places of business with the collector of the district in which such place or places of business are located.

SEC. 17. This Act shall take effect on the first day of the second month after the month during which it is enacted.

ART. 3. *Persons liable.*—Liability to payment of special tax and registration attaches to every person who imports, manufacturers, produces, compounds, sells, deals in, dispenses, prescribes, administers, or gives away marihuana. As to the liability of a person engaged in one or more of the foregoing activities to several taxes see Article 10.

ART. 4. *Manner and time of registration.*—Every person who engages, at any time during the first sixteen days of October, 1937, in any activity subjecting him to special tax shall, on or before the sixteenth day thereof, file application for registration and return of tax liability, hereinafter sometimes referred to as the "application", and pay the tax or taxes enumerated in Article 10 for the period ending June 30, 1938. Any person not engaging in any such activity during the sixteen days mentioned, but so engaging thereafter shall file the application and pay the tax, before commencing such activity. Filing of successive applications and payment of tax are required on or before July 1 of each year thereafter, during which taxable activitiy continues. Form 678c shall be executed by those filing applications on or before October 16, 1937, and for original or nonsuccessive registrations after that date. Form 678d shall be used for successive registrations on or before July 1, annually, as long as taxable activity continues. The forms may be obtained from the collector.

SEC. 3451. *United States Revised Statutes.*—Every person who simulates or falsely or fraudulently executes or signs any bond, permit, entry, or other document required by the provisions of the internal-revenue laws, or by any regulation made in pursuance thereof, or who procures the same to be falsely or fraudulently executed, or who advises, aids in, or connives at such execution thereof, shall be imprisoned for a term not less than one year nor more than five years; and the property to which such false or fraudulent instrument relates shall be forfeited.

ART. 5. *False applications.*—The false or fraudulent execution or signing of any application for registration or any supporting affidavit required shall subject the offending person to the liabilities imposed by Section 3451, Revised Statutes.

ART. 6. *Signatures—Individuals.*—The application must be signed by the person desiring registration.

*Firms and corporations.*—The application of a firm must be signed by a member, that of a corporation by an officer duly authorized to act. The names of the real owners must be disclosed if the business is being carried on under an assumed or trade name or that of a former owner. If owned by a partnership, the name of each partner must appear. In the case of a corporation, the names of the principal officers must be shown.

*Institutions.*—When an institution is subject to tax the head thereof or of the department wherein marihuana is used shall sign the application for registration.

ART. 7. *Oath—When required.*—If the tax is more than $10, the application must be under oath. If the tax is not in excess of $10, the application may be signed or acknowledged before two witnesses in lieu of an oath. The witnesses must themselves sign the application in their capacity as such.

*Execution.*—The jurat may be executed by any officer authorized to administer oaths. No charge is made if documents required by these regulations are sworn and subscribed to before a deputy collector or an internal-revenue agent.

ART. 8. *Inventory required.*—Every person, making application for registry or reregistry in class III who is not required to render returns on Form 961 and its supplements or on Form 810 and its supplements, or in class IV or V, must prepare under oath or affirmation, in duplicate, an inventory of all marihuana and preparations thereof on hand. Persons making application for registry between October 1, 1937, and June 30, 1938, shall prepare the inventory as of October 1, 1937, or any date between October 1, 1937, and the date of application. Persons making application for registry or reregistry on or after July 1, 1938, shall prepare the inventory as of December 31 preceding the date of the application or any date between December 31 and the date of the application. The inventories may

be prepared on Form 713 (used by registrants under the Harrison Narcotic Law, as amended, for submitting inventories of narcotic drugs on hand), copies of which may be obtained from collectors upon request. If the taxpayer is engaged in more than one of these classes of business, a separate inventory must be prepared for each class. The original inventory must be forwarded to the collector with the application for registration, and the duplicate must be kept on file by the maker for a period of two years. Persons also applying for registration under the Harrison Narcotic Law, as amended, in any one of the classes with respect to which they are required to submit inventories, on Form 713, of narcotic drugs and preparations on hand, may include the marihuana inventory on this same form.

ART. 9. *Registry numbers.*—Upon approval of the application the collector will assign a registry number to the applicant. The numbers are issued serially without regard to classes. The same number shall be retained throughout all the consecutive periods for which the applicant may be registered. In the case of one engaged in business at two or more places or registered in two or more classes at the same place a separate number will be assigned for each place or class. The registry number of a person who discontinues operations will not be assigned to any other person for any portion of the same fiscal year.

*Classification*

SEC. 2. (a) (Cont.) * * * (1). Importers, manufacturers, and compounders of marihuana, $24 per year.

(2) Producers of marihuana (except those included within subdivision (4) of this subsection), $1 per year, or fraction thereof, during which they engage in such activity.

(3) Physicians, dentists, veterinary surgeons, and other practitioners who distribute, dispense, give away, administer, or prescribe marihuana to patients upon whom they in the course of their professional practice are in attendance, $1 per year or fraction thereof during which they engage in any of such activities.

(4) Any person not registered as an importer, manufacturer, producer, or compounder who obtains and uses marihuana in a laboratory for the purpose of research, instruction, or analysis, or who produces marihuana for any such purpose, $1 per year, or fraction thereof, during which he engages in such activities.

(5) Any person who is not a physician, dentist, veterinary surgeon, or other practitioner and who deals in, dispenses, or gives away marihuana, $3 per year: PROVIDED, That any person who has registered and paid the special tax as an importer, manufacturer, compounder, or producer, as required by subdivisions (1) and (2) of this subsection, may deal in, dispense, or give away marihuana imported, manufactured, compounded, or produced by him without further payment of the tax imposed by this section.

(b) Where a tax under subdivision (1) or (5) is payable on July 1 of any year it shall be computed for one year; where any such tax is payable on any other day it shall be computed proportionately from the first day of the month in which the liability for the tax accrued to the following July 1.

ART. 10. *Rates of tax.*—Persons subject to tax are divided into classes as shown by the table below:

| Class | Annual tax rate | Persons liable |
|---|---|---|
| I | $24 | Importers, manufacturers and compounders. |
| II | 1 | Producers, except those included in Class V. |
| III | 3 | Dealers, other than physicians, dentists, veterinary surgeons or other practitioners. |
| IV | 1 | Physicians, dentists, veterinary surgeons and other practitioners. |
| V | 1 | Producers and other persons, other than importers, manufacturers, producers and compounders, who use marihuana in a laboratory for the purpose of research, instruction, or analysis. |

Persons registering in classes I or III shall pay the entire tax if business is commenced in July, but if business is commenced after the month of July the amount due is to be reckoned proportionately from the first day of the month in which business is begun to July 1 following. Persons registering in classes II, IV or V shall pay the tax of $1 a year or for any fractional part thereof, regardless of when business is commenced.

ART. 11. *Importers.*—Every person who imports marihuana is subject to tax as an importer at the rate of $24 per annum in Class I. A manufacturer or compounder who is also an importer is not thereby required to pay more than one tax.

ART. 12. *Manufacturers and compounders.*—Every person coming within the definition set out in Article 2 (c) is subject to tax as a manufacturer or compounder at the rate of $24 per annum in Class I.

ART. 13. *Producers.*—Every person coming within the definition set out in Article 2 (d) is subject to tax as a producer at the rate of $1 per annum or fraction thereof in Class II.

ART. 14. *Dealers.*—Generally, one who sells, gives away, or dispenses marihuana in any form, is subject to tax as a dealer at the rate of $3 per annum in Class III. However, liability as a dealer does not attach to a physician, dentist, veterinary surgeon, or other practitioner who, incidentally to the legitimate practice of his profession, dispenses marihuana. A physician, dentist, veterinary surgeon, or other practitioner who sells or dispenses marihuana apart from the legitimate practice of his profession incurs liability as a dealer. A manufacturer, compounder, or producer, who has paid special tax in such capacity does not incur additional liability on account of sales of his own products at the place of production, or in the case of an importer at his principal place of business. As to the limited right of a manufacturer or producer to sell free from payment of additional special tax away from the factory or place of production, see Article 17. Except as indicated, liability for additional tax as a dealer is incurred at each additional place where sales are made. Retail druggists who have paid tax as dealers do not incur liability as manufacturers or compounders on account of compounding marihuana preparations to fill legitimate prescriptions even though the preparations are compounded in advance of receipt of prescriptions, so long as they are used for prescription purposes only.

ART. 15. *Practitioners.*—Physicians, dentists, veterinary surgeons, and other practitioners, including institutions, who prescribe, distribute, dispense, give away, or administer marihuana, are subject to tax at the rate of $1 per annum or fraction thereof in Class IV.

*Interdistrict practice.*—A practitioner maintaining an office where he is duly registered with the collector of the district in which the office is located, and where his complete stock of marihuana and marihuana records are kept, may distribute, dispense, give away, administer, or prescribe marihuana in other collection districts in which he may be lawfully engaged in the practice of his profession, within the United States, in the course of his professional practice only, without incurring additional tax liability.

ART. 16. *Laboratory use.*—Chemists occupying an independent status and not that of employees, in other words in business for themselves, who make analyses of marihuana or use marihuana in analyzing other substances in a laboratory, and persons who produce or obtain and use in a laboratory any marihuana for the purpose of research, instruction, or analysis, if not registered as an importer, manufacturer, compounder, or producer, are subject to tax at the rate of $1 per annum or fraction thereof in Class V, provided no marihuana is manufactured or compounded for sale or for removal for consumption or sale.

*Particular Situations*

SEC. 3235. *United States Revised Statutes.*—The payment of the special tax imposed shall not exempt from an additional special tax the person carrying on a trade or business in any other place than that stated in the collector's register; but nothing herein contained shall require a special tax for the storage of goods, wares, or merchandise in other places than the place of business, nor, except as hereinafter provided, for the sale by manufacturers or producers of their own goods, wares, and merchandise, at the place of production or manufacture, and at their principal office or place of business, provided no goods, wares, or merchandise shall be kept except as samples at said office or place of business.

SEC. 3236. *United States Revised Statutes.*—Whenever more than one of the pursuits or occupations hereinafter described are carried on in the same place by the same person at the same time, except as hereinafter provided, the tax shall be paid for each according to the rates severally prescribed.

SEC. 2 (c) In the event that any person subject to a tax imposed by this section engages in any of the activities enumerated in subsection (a) of this section at more than one place, such person shall pay the tax with respect to each such place.

(d) Except as otherwise provided, whenever more than one of the activities enumerated in subsection (a) of this section is carried on by the same person at the same time, such person shall pay the tax for each such activity, according to the respective rates prescribed.

ART. 17. *Several places of business.*—Generally a taxpayer must pay as many special taxes as he has places of business. Thus if a concern has one or more separate branches where any of the various taxable businesses is carried on, tax must be paid for each branch separately. However, a manufacturer or producer upon a single payment of special tax may sell products of his own manufacture or production at both the place of manufacture or production and his principal office or place of business, provided no products, except samples, are kept at said office or place of business. Tax does not attach with respect to a warehouse where marihuana is stored, provided no sales are made at such place.

ART. 18. *Itinerant vendors.*—No person is permitted to deal in marihuana except upon orders received or engagements made at, with respect to, or by reason of, a fixed address. A peddler of marihuana will be regarded as incurring a separate tax liability and committing an additional offense at each place where a sale is made.

ART. 19. *Partnerships.*—A partnership is subject to the same tax liability as an individual. Should either of the partners also individually engage in a taxable activity, he will incur additional liability with respect to such activity.

ART. 20. *Institutions.*—Hospitals, colleges, medical and dental clinics, sanatoriums, and other institutions not exempt as public institutions are subject to the same special tax liability as other persons dealing in or handling marihuana in the same manner.

SEC. 3 (a). No employee of any person who has paid the special tax and registered, as required by section 2 of this Act, acting within the scope of his employment, shall be required to register and pay such special tax.

ART. 21. *Principals.*—Principals, rather than agents, are liable to the taxes imposed. Employers and other principals will be regarded as responsible for the acts of employees and other agents within the scope of their employment.

ART. 22. *Employees.*—An employee of a person who has registered and paid tax will not himself incur liability to tax so long as he acts solely within the scope of his employment. However, an employee who, within or without the scope of his employment, does any unlawful act, will be held personally liable.

ART. 23. *Nurses.*—Nurses are regarded as agents of the practitioners or institutions under whose direction or supervision their duties are performed, and they are not permitted to register, nor are they permitted to be in possession of marihuana except as such agents, or as patients. Marihuana left by a practitioner with a nurse, to be administered during his absence, upon discharge of the nurse must be returned to the practitioner, who will account for the marihuana on his records. Any marihuana found in the possession of a nurse not at the time under the supervision of a practitioner shall be forfeited to the Government.

ART. 24. *Traveling salesmen.*—Traveling salesmen who merely solicit orders and forward them to their respective principals are not required to register or pay any tax.

SEC. 3243. *United States Revised Statutes.*—The payment of any tax imposed by the internal-revenue laws for carrying on any trade or business shall not be held to exempt any person from any penalty or punishment provided by the laws of any State for carrying on the same within such State, or in any manner to authorize the commencement or continuance of such trade or business contrary to the laws of such State or in places prohibited by municipal law; nor shall the payment of any such tax be held to prohibit any State from placing a duty or tax on the same trade or business, for State or other purposes.

ART. 25. *Operation of State Laws.*—Payment of special tax under Federal law confers no right or privilege to conduct business contrary to State law. The holder of a special-tax stamp issued by the Federal Government may still be punishable under a State law prohibiting or regulating the production, manufacture or sale of marihuana. On the other hand, compliance with State law affords no immunity under Federal law. Persons who engage in business in violation of the law of a State are, nevertheless, required to pay special tax as imposed under the internal-revenue laws of the United States.

*Delinquent and False Returns*

SEC. 3176. United States Revised Statutes, as amended by Sec. 1103 of the Revenue Act of 1926 and by Sec. 619 (d) of the Revenue Act of 1928. * * * If the failure to file a return (other than a return of income tax) or a list is due to sickness or absence, the collector may allow such further time, not exceeding 30 days, for making and filing the return or list as he deems proper. * * * In case of any failure to make and file a return or list within the time prescribed by law, or prescribed by the Commissioner of Internal Revenue or the collector in pursuance of law, the Commissioner shall add to the tax 25 per centum of its amount, except that when a return is filed after such time and it is shown that the failure to file it was due to a reasonable cause and not to willful neglect, no such addition shall be made to the tax. In case a false or fraudulent return or list is willfully made, the Commissioner shall add to the tax 50 per centum of its amount.

The amount so added to any tax shall be collected at the same time and in the same manner and as a part of the tax unless the tax has been paid before the discovery of the neglect, falsity, or fraud, in which case the amount so added shall be collected in the same manner as the tax.

Sec. 406 of the Revenue Act of 1935. In the case of a failure to make and file an internal-revenue tax return required by law, within the time prescribed by law or prescribed by the Commissioner in pursuance of law, if the last date so prescribed for filing the return is after the date of the enactment of this Act, if a 25 per centum addition to the tax is prescribed by existing law, then there shall be added to the tax, in lieu of such 2 per centum: 5 per centum if the failure is for not more than 30 days, with an additional 5 per centum for each additional 30 days or fraction thereof during which failure continues, not to exceed 25 per centum in the aggregate.

Sec. 404 of the Revenue Act of 1935. Notwithstanding any provision of law to the contrary, interest accruing during any period of time after the date of the enactment of this Act upon any internal-revenue tax (including amounts assessed or collected as a part thereof) or customs duty, not paid when due, shall be at the rate of 6 per centum per annum.

ART. 26. *Delinquent returns.*—Every person from whom a special-tax return is required who, without reasonable cause, fails to file such return on time is subject to certain penalties. Under Section 406 of the Revenue Act of 1935 the penalty for delinquency is 5 per cent, if the failure is for not more than 30 days, and an additional 5 per cent for each additional 30 days, or fraction thereof, during which the delinquency continues, not to exceed 25 per cent in the aggregate.

ART. 27. *Sickness or absence.*—If the collector is satisfied that failure to file a return is due to sickness or absence, he may extend the time for not more than 30 days. Since any member of a firm may make the return, sickness or absence of less than all the members of a firm will not relieve from liability to the penalty for failure to make return, nor afford ground for extension of time.

ART. 28. *Failure of agent.*—If an attorney or agent is delegated to make a return and pay special tax, the principal will incur the penalty if the return is not filed within the time prescribed by law.

ART. 29. *Delinquent payment.*—Failure to pay the amount of an assessment within 10 days after issuance of Form 17 (First Notice and Demand) causes to accrue a 5 per cent penalty and interest at the rate of 6 per cent per annum from the date of the expiration of the 10-day period to the date of payment.

ART. 30. *False returns.*—For making a false or fraudulent return additional liability amounting to 50 per cent of the total tax is incurred. If a return covers only a portion of a year or period for which liability is incurred, the return is false as a whole and not merely as to that portion of the year or period omitted.

ART. 31. *When penalty accrues.*—In view of the positive language of Section 2 (a) of the Act, all persons engaging in business under this Act will be regarded as delinquent and the penalties provided are applicable unless applications are filed (1) not later than October 16, 1937, or (2) before engaging in business if business is commenced after October 16, 1937, and (3) thereafter on or before July 1 of each year or on or before the date upon which liability is incurred.

*Changes After Tax Payment*

SEC. 3241, *United States Revised Statutes.* When any person who has paid the special tax for any trade or business dies, his wife or child, or executors or administrators or other legal representatives, may occupy the house or premises, and in like manner carry on, for the residue of the term for which the tax is paid, the same trade or business as the deceased before carried on, in the same house, and upon the same premises, without the payment of any additional tax. And when any person removes from the house or premises for which any trade or business was taxed to any other place, he may carry on the trade or business specified in the collector's register at the place to which he removes without the payment of any additional tax; PROVIDED, That all cases of death, change, or removal, as aforesaid, with the name of the successor to any person deceased, or of the person making such change or removal shall be registered with the collector, under regulations to be prescribed by the Commissioner of Internal Revenue.

ART. 32. *Change of control.*—Certain persons other than the taxpayer may, without incurring additional liability, carry on the business at the same address and for the remainder of the period for which special tax was paid. To secure such right the party or parties continuing the business must execute, within 30 days, a return on Form 678c, showing the basis of the right. As to liability for failure to register change, see Article 37. Under the conditions indicated the parties having such right include the following:

(1) The relict, children, or other legal representatives of a deceased taxpayer.

(2) A receiver or referee in bankruptcy, or an assignee for the benefit of creditors.

(3) The partner or partners remaining after death or withdrawal of a member.

Special tax, reckoned from the first day of the month in which the change occurs, is incurred and must be paid by the parties indicated under the conditions stated:

(1) Where additional partners are taken into a firm operating under the old or a new firm name.

(2) Where a corporation is formed to continue the business of a partnership, or a new charter is issued to a former corporation.

(3) Where a stockholder or other party continues a business previously conducted by a corporation, whether or not the corporation is dissolved.

ART. 33. *Change of name or location.*—The name of an individual, firm, or corporation that has paid special tax may be changed, or a special-tax payer may relocate his place of business, without incurring additional tax liability, provided the change is registered with the collector.

ART. 34. *Registration.*—A special-tax payer who changes his name or relocates his place of business shall within 30 days execute a new return on Form 678c, marked "Revised registry." The return shall set forth the date of change and the new name or address. The return shall be forwarded with the special-tax stamp to the collector who issued the stamp for recording the change.

ART. 35. *Removal within district.*—Where a taxpayer removes his business to another address within the district the collector will enter on his Record 10 the new address and the date of removal, and will note the change on the face of the special-tax stamp which he will return to the taxpayer.

ART. 36. *Removal to another district.*—Where a taxpayer removes his business to another district the collector who issued the stamp will enter on his Record 10 the new address and date of removal, and will transmit the stamp to the collector of the district to which the taxpayer removed. The collector of that district will then make entry on his Record 10, as in the case of a new registrant, and note the taxpayer's new address and the collector's name, title and district, and the date, on the stamp, which will be returned to the taxpayer.

ART. 37. *Liability for failure to register change.*—A person succeeding to a business for which tax has been paid, or a taxpayer who relocates his business, without registering the change within 30 days, as required by Articles 33 and 34, respectively, will be liable to the tax, to the penalty set forth in Article 26 for failure to make return, and also to penalty for carrying on business without payment of tax.

*Special Tax Stamps*

SEC. 3238. *United States Revised Statutes.*—All special taxes imposed by law, including the tax on stills or worms, shall be paid by stamps denoting the tax, and the Commissioner of Internal Revenue is required to procure appropriate stamps for the payment of such taxes; and the provisions of sections thirty-three hundred and twelve and thirty-four hundred and forty-six, and all other provisions of law relating to the preparation and issue of stamps for distilled spirits, fermented liquors, tobacco, and cigars, shall, so far as applicable, extend to and include such stamps for special taxes; and the Commissioner of Internal Revenue shall have authority to make all needful regulations relative thereto.

ART. 38. *Issuance of stamps.*—Stamps covering special taxes are issued in two forms, with and without coupons. Stamps without coupons are for use in cases where the full tax is due regardless of the period covered. Coupon stamps are for use in cases where the tax may be prorated. The coupon stamps are issued to registrants in Classes I and III, and the stamps without coupons to registrants in Classes II, IV and V.

Collectors will distinctly write or print on the stamp, before it is issued, the taxpayer's name, address, and registry number, and the number of the class in which registered.

SEC. 3239. *United States Revised Statutes.*—Every person engaged in any business, avocation, or employment, who is thereby made liable to a special tax, shall place and keep conspicuously in his establishment or place of business all stamps denoting the payment of said special tax; and any person who shall, through negligence, fail to so place and keep said stamps, shall be liable to a penalty equal to the special tax for which his business rendered him liable and the costs of prosecution; but in no case shall said penalty be less than ten dollars. And where the failure to comply with the foregoing provision of law shall be through willful neglect or refusal, then the penalty shall be double the amount above prescribed: *Provided*, That nothing in this section shall in any way affect the liability of any person for exercising or carrying on any trade, business, or profession, or doing any act for the exercising, carrying on, or doing of which a special tax is imposed by law, without the payment thereof.

ART. 39. *Posting of stamps.*—Every special tax stamp issued to a taxpayer must be kept posted conspicuously on the premises where the business is operated. One who fails so to post a stamp thereby incurs liability to a penalty, equal to and in addition to the tax, plus the costs of prosecution; but in no case shall the penalty (not including the costs of prosecution) be less than $10. Where the failure is willful the penalty is doubled. This liability is additional to any and all liability otherwise incurred.

ART. 40. *Certificates in lieu of stamps lost or destroyed.*—These regulations shall apply to certificates on Form 785 issued in lieu of special tax stamps lost or destroyed.

CHAPTER IV

*Transfer Taxes*

Rates of Tax

SEC. 7 (a). There shall be levied, collected, and paid upon all transfers of marihuana which are required by section 6 to be carried out in pursuance of written order forms taxes at the following rates:

(1) Upon each transfer to any person who has paid the special tax and registered under section 2 of this Act, $1 per ounce or marihuana or fraction thereof.

(2) Upon each transfer to any person who has not paid the special tax and registered under section 2 of this Act, $100 per ounce of marihuana or fraction thereof.

SEC. 7 (b). Such tax shall be paid by the transferee at the time of securing each order form and shall be in addition to the price of such form. Such transferee shall be liable for the tax imposed by this section but in the event that the transfer is made in violation of section 6 without an order form and without payment of the transfer tax imposed by this section, the transferor shall also be liable for such tax.

SEC. 7 (c). Payment of the tax herein provided shall be represented by appropriate stamps to be provided by the Secretary and said stamps shall be affixed by the collector or his representative to the original order form.

SEC. 8 (a). It shall be unlawful for any person who is a transferee required to pay the transfer tax imposed by section 7 to acquire or otherwise obtain any marihuana without having paid such tax; and proof that any person shall have had in his possession any marihuana and shall have failed, after reasonable notice and demand by the collector, to produce the order form required by section 6 to be retained by him, shall be presumptive evidence of guilt under this section and of liability for the tax imposed by section 7.

ART. 41. *Scope of tax.*—Except as otherwise provided, each transfer of marihuana to a person within the United States is subject to tax, to be paid in the manner hereinafter indicated. The tax is due whether the transferor be located within the United States or elsewhere. The tax applies to every transfer, no matter how often the same material may be transferred. It is no basis of exemption that a transferred article was produced from material on the transfer of which tax was paid.

ART. 42. *Amount of tax.*—Where the transfer is to a taxable person who has duly registered and paid special tax, the transfer tax is at the rate of $1 per ounce or fraction thereof. If the transfer is to a person who has not registered and paid special tax under this Act, tax at the rate of $100 per ounce or fraction thereof is due.

SEC. 7 (d). All provisions of law relating to the engraving, issuance, sale, accountability, cancelation, and destruction of tax-paid stamps provided for in the internal-revenue laws shall, insofar as applicable and not inconsistent with this Act, be extended and made to apply to stamps provided for in this section.

ART. 43. *Method of payment.*—The tax is paid by attachment of adhesive stamps to order forms as hereinafter shown. Stamps of various denominations bearing the words "Marihuana Tax Act of 1937" have been prepared. Only such stamps shall be used in payment of the transfer tax. Payment for the stamps shall be made when application for the order form is submitted.

ART. 44. *Affixing and canceling stamps.*—The "Marihuana Tax Act" stamp, evidencing the payment of the transfer tax, shall be affixed to the original order form by the collector or his representative, and the person so affixing the stamp shall cancel it by writing or stamping thereon, in ink, his initials, and the day, month, and year, or shall, by cutting with a machine or punch, affix his initials and the date as aforesaid, in such manner as to render it unfit for reuse. The cancellation shall not so deface the stamp as to prevent its denomination and genuineness from being readily determined.

SEC. 803. *Revenue Act of 1926.*—Whoever • • •

(c) Willfully removes, or alters the cancellation or defacing marks of, or otherwise prepares, any adhesive stamp, with intent to use, or cause same to be used, after it has been already used, or knowingly or willfully buys, sells, offers for sale, or gives away, any such washed or restored stamp to any person for use, or knowingly uses the same;

(d) Knowingly and without lawful excuse (the burden of proof of such excuse being on the accused) has in possession any washed, restored, or altered stamp, which has been removed from any vellum, parchment, paper, instrument, writing, package, or article;

Is guilty of a misdemeanor, and upon conviction shall be punished by a fine of not more than $1,000, or by imprisonment for not more than five years, or both, and any such reused, canceled, or counterfeit stamp and the vellum, parchment, document, paper, package, or article upon which it is placed or impressed shall be forfeited to the United States.

ART. 45. *Reuse of stamps prohibited.*—A stamp once affixed to one order form cannot lawfully be removed and affixed to another. As to refunds for amounts paid for stamps, see Article 94.

Order Forms

SEC. 6 (a). It shall be unlawful for any person, whether or not required to pay a special tax and register under section 2, to transfer marihuana, except in pursuance of a written order of the person to whom such marihuana is transferred, on a form to be issued in blank for that purpose by the Secretary.

SEC. 6 (c). The Secretary shall cause suitable forms to be prepared for the purposes before mentioned and shall cause them to be distributed to collectors for sale. The price at which such forms shall be sold by said collectors shall be fixed by the Secretary, but shall not exceed 2 cents each. Whenever any collector shall sell any of such forms he shall cause the date of sale, the name and address of the proposed vendor, the name and address of the purchaser, and the amount of marihuana ordered to be plainly written or stamped thereon before delivering the same.

SEC. 6 (d). Each such order form sold by a collector shall be prepared by him and shall include an original and two copies, any one of which shall be admissible in evidence as an original. The original and one copy shall be given by the collector to the purchaser thereof. The original shall in turn be given by the purchaser thereof to any person who shall, in pursuance thereof, transfer marihuana to him and shall be preserved by such person for a period of two years so as to be readily accessible for inspection by any officer, agent, or employee mentioned in section 11. The copy given to the purchaser by the collector shall be retained by the purchaser and preserved for a period of two years so as to be readily accessible to inspection by any officer, agent, or employee mentioned in section 11. The second copy shall be preserved in the records of the collector.

ART. 46. *Written order required for transfer of marihuana.*—Except as otherwise provided, every person seeking to obtain marihuana shall make application on Form 679a (Marihuana) to the collector of internal revenue for the district in which the transferee is located for the purchase of an order form. The application shall show (1) the transferee's name, address and, if registered, the registry number, (2) the name and address of the transferor, and (3) a description, including quantities, of the desired articles or materials to be transferred. The application must be accompanied by a certified check, cash, or money order in payment of the transfer tax, (see Article 42) plus 2 cents in payment of the order form.

ART. 47. *Signing of applications.*—Generally applications for order forms shall be signed by the same person or persons signing the application for registration. (See Article 6.) However, when it is impracticable for the person signing the application for registration to sign the applications for order forms they may be signed by another person, provided a power of attorney authorizing such other person to sign the applications for order forms has previously been filed with and approved by the collector. The power of attorney shall be executed in the same manner as applications for registration. The power of attorney shall show the signature of the person thereby authorized to sign applications for order forms and shall affirm that the signature so shown is his signature.

ART. 48. *Signatures to be compared.*—Upon receipt by the collector of an application for an order form the signature on such application shall be compared with that appearing on the application for registration or in the power of attorney. (See Article 47.) Unless the collector is satisfied that the application is authentic it will not be honored.

ART. 49. *Procedure regarding order forms.*—Upon receipt of a properly executed application, accompanied by a sum sufficient to cover the transfer tax and the price of the order form, the collector will execute the order form in triplicate. There shall be shown on each of the three copies the date of issuance, the name and address of the proposed transferor, the name and address of the transferee, and a description, including quantities, of the desired articles or materials. As to affixing of the tax stamp to the original order form, see Article 44. The duplicate and triplicate shall show the date the stamp was purchased and cancelled. The original and duplicate shall be delivered to the transferee, who shall in turn submit the original to the transferor. The triplicate shall be retained by the collector. The transferor shall preserve the original, and the transferee shall preserve the duplicate, for a period of two years so as to be readily accessible for inspection by any officer, agent, or employee mentioned in section 11 of the Act.

ART. 50. *Applications to be filed.*—The collector will stamp each application with the date when the order form is issued, enter thereon the serial number of the order form sold in pursuance thereof, and file all applications numerically according to such serial numbers.

ART. 51. *Importations.*—A collector of internal revenue issuing an order form for the procurement of marihuana from a foreign country shall prepare and issue to the transferee (importer) a document reciting that an order form has been issued. The document shall show the serial number of the order form, the name and address of the transferee, the name and address of the transferor, and the kind and quantity of marihuana covered by the order form. The transferee, in order to obtain release of the marihuana from customs' custody, shall present the document to the collector of customs at the port of entry. No importation of marihuana shall be released from customs' custody until

the aforesaid document has been presented to the collector of customs. Seeds may be imported by a registered importer without payment of transfer tax or procurement of order forms. (See Section 6 (b) (5) of the Act.) A registered importer desiring to import seeds without the use of order forms shall obtain from the collector of internal revenue for the district in which he is registered a certificate of registration (see Article 68), and no importation of seeds shall be released from customs' custody without evidence of issuance of an order form or presentation of a certificate of registration.

Exceptions

SEC. 6 (b). Subject to such regulations as the Secretary may prescribe, nothing contained in this section shall apply—

(1) To a transfer of marihuana to a patient by a physician, dentist, veterinary surgeon, or other practitioner registered under section 2, in the course of his professional practice only: *Provided*, That such physician, dentist, veterinary surgeon, or other practitioner shall keep a record of all such marihuana transferred, showing the amount transferred and the name and address of the patient to whom such marihuana is transferred, and such record shall be kept for a period of two years from the date of the transfer of such marihuana, and subject to inspection as provided in section 11.

(2) To a transfer of marihuana, made in good faith by a dealer to a consumer under and in pursuance of a written prescription issued by a physician, dentist, veterinary surgeon, or other practitioner registered under section 2: *Provided*, That such prescription shall be dated as of the day on which signed and shall be signed by the physician, dentist, veterinary surgeon, or other practitioner who issues the same: *Provided further*, That such dealer shall preserve such prescription for a period of two years from the day on which such prescription is filed so as to be readily accessible for inspection by the officers, agents, employees, and officials mentioned in section 11.

(3) To the sale, exportation, shipment, or delivery of marihuana by any person within the United States, any Territory, the District of Columbia, or any of the insular possessions of the United States, to any person in any foreign country regulating the entry of marihuana, if such sale, shipment, or delivery of marihuana is made in accordance with such regulations for importation into such foreign country as are prescribed by such foreign country, such regulations to be promulgated from time to time by the Secretary of State of the United States.

(4) To a transfer of marihuana to any officer or employee of the United States Government or of any State, Territorial, District, county, or municipal or insular government lawfully engaged in making purchases thereof for the various departments of the Army and Navy, the Public Health Service, and for Government, State, Territorial, District, county, or municipad or insular hospitals or prisons.

(5) To a transfer of any seeds of the plant Cannabis sativa L. to any person registered under section 2.

ART. 52. *When order forms not required.*—The use of order forms in effecting transfers of marihuana is not required:

(1) For dispositions to patients or for use of animals by duly qualified and registered practitioners in the course of their professional practice only.

(2) For dispositions by registered dealers pursuant to properly executed prescriptions of registered practitioners.

(3) For lawful exporations.

(4) For dispositions to exempt officials.

(5) For transfers of any seeds of the plant Cannabis sativa L. to any person registered under section 2 of the Act.

ART. 53. *Dispensing by practitioners.*—Practitioners may dispense marihuana to bona fide patients pursuant to the legitimate practice of their professions without prescriptions or order forms.

All persons and institutions registered as members of Class IV (practitioners, see Article 15), whether they be physicians, dentists, veterinary surgeons, hospitals, sanatoriums, medical schools or colleges, dispensaries not connected with a Federal, State, county, or municipal institution, welfare bureaus, or charitable institutions, must keep a daily record showing the kind and quantity of marihuana dispensed or administered, the name and address of each person to whom dispensed or administered, the name and address of the person upon whose authority the marihuana is dispensed or administered, and the purpose for which it is dispensed or administered. Such records shall be kept for a period of two years in such manner as to be readily accessible to inspection by investigating officers.

ART. 54. *Form of record.*—No special record form will be furnished by the Government for the use of those registered as practitioners. Hospitals and institutions should keep records in the manner best calculated to meet the conditions existing therein. The record that is kept, however, should enable an inspecting officer quickly to ascertain the quantity and kind of marihuana used daily. The initials of the practitioner giving directions for the administering of marihuana should appear on the patient's record chart, or a separate prescription giving the name and address of the patient, the date, and the physician's signature or initials should be filed with the pharmacist in charge of the drug room before the marihuana leaves his charge. If both chart and prescription are used, reference to the prescription should be made on the chart.

ART. 55. *Who may issue prescriptions.*—A prescription for marihuana may be issued only by a physician, dentist, veterinary surgeon, or other practitioner who has duly registered, or an exempt official.

ART. 56. *Who may fill prescriptions.*—A prescription for marihuana may only be filled by a dealer registered in Class III or by an exempt official, or by a member of Class I who is qualified to sell marihuana at retail.

ART. 57. *Purpose of issue.*—A prescription, in order to be effective in legalizing the possession of marihuana and eliminating the necessity for use of order forms, must be issued for legitimate medical purposes.

ART. 58. *Responsibility for issue.*—The duty of properly preparing prescriptions is upon the practitioner, and he is liable to the penalties provided by the Act in case of failure to insert the information required by the law. A prescription may be prepared by a secretary or agent for the signature of a practitioner, but the practitioner will be held responsible in case the prescription does not conform in all essential respects to the law and regulations. A corresponding liability rests upon the dealer who fills a prescription not prepared in the form prescribed by law.

ART. 59. *Manner of execution.*—All prescriptions for marihuana must be dated as of and signed on the day when issued and must bear the full name and address of the patient and the name, address, and registry number of the practitioner. A practitioner may sign a prescription in the same manner as he would sign a check or legal document, as, for instance, J. H. Doe, John H. Doe, or John Henry Doe. Prescriptions should be written with ink or indelible pencil or typewritten; if typewritten, they should be signed by the practitioner.

ART. 60. *Refilling of prescriptions.*—The refilling of a prescription for marihuana is prohibited.

ART. 61. *Partial filling.*—As a general rule, the partial filling of marihuana prescriptions is unlawful. If, however, a dealer is unable to supply the full quantity called for in a prescription, he may, if an emergency exists, and he later advises the issuing practitioner, supply a portion of the marihuana called for by the prescription, provided he makes a suitable notation on the face of the prescription of the quantity furnished and a suitable explanation of the reason for not supplying the full quantity on the back of the prescription. No further quantity will be supplied except upon a new prescription.

ART. 62. *Telephone orders.*—Except as hereinafter provided the furnishing of marihuana pursuant to telephone advice of practitioners is prohibited whether prescriptions covering such orders are subsequently received or not. In an emergency a dealer may deliver marihuana through his employee or responsible agent pursuant to a telephone order, provided the employee or agent is supplied with a properly prepared prescription before delivery is made, such prescription to be turned over to the dealer and filed by him as required by law within a reasonable time after delivery.

ART. 63. *Form to be used.*—The Government does not furnish prescription forms. Any prescription form may be used, provided it is properly executed and shows the required information.

ART. 64. *Filing.*—Dealers who fill marihuana prescriptions are required to keep them in a separate file for a period of two years in such manner as to be readily accessible to inspection by investigating officers. However, if the dealer is registered under the Harrison Narcotic Law, as amended, as a retail dealer, and keeps marihuana prescriptions on the narcotic prescription file, it will be deemed a compliance with this article.

ART. 65. *Labels on container.*—The dealer filling a prescription must affix to the container a label showing the name and registry number of the dealer, the serial number of the prescription, the name and address of the patient, and the name, address, and registry number of the person writing the prescription.

ART. 66. *Exportations.*—Any person desiring to export marihuana to a country which regulates importations thereof shall present to the nearest collector of customs an application on Form 161a, for authorization to make such exportation, which application shall be accompanied by an import permit issued by the government of the country of destination or other evidence which shall be satisfactory to the Commissioner of Narcotics that the applicant has complied with the requirements of the laws and regulations of the country of destination with respect to such proposed exportation thereto. Such application will be forwarded by the collector of customs to the Commissioner of Narcotics who, if satisfied that the applicant has complied with such laws and regulations of the country of destination, shall approve the application, which approval will authorize the collector of customs at the port of export to clear the shipment for exportation without the use of order forms or payment of the transfer tax.

ART. 67. *Orders and prescriptions.*—Persons registered under the Act may transfer marihuana to exempt officials pursuant to orders and prescriptions issued by such exempt officials. Such orders and prescriptions should be prepared on official blanks if such blanks are provided, or otherwise on official stationery, and must show the name, title, and official address of the person by whom executed. No order may be filled unless it is accompanied by a certificate of exemption which has been issued by the collector. (See Chapter VI.)

ART. 68. *Transfer of seeds.*—Before making transfers of unsterilized seeds, the transferor must receive from the transferee a certificate of registration showing him (the transferee) to be qualified under the Act to acquire such seeds. Certificates of registration will be issued by the collector for the district in which the transferee is registered, upon request of the transferee. Records covering receipts and dispositions of such seeds must be kept in the same manner as records of other transactions in marihuana. (See Article 73.)

CHAPTER V

*Information Returns and Records*

Returns

SEC. 10 (a). Every person liable to any tax imposed by this Act shall keep such books and records, render under oath such statements, make such returns, and comply with such rules and regulations as the Secretary may from time to time prescribe.

ART. 69. *Returns required of importers for other than medicinal use.*—Every person registered as an importer, who imports marihuana in any form for any purpose other than the manufacture of medicinal products or the distribution through wholesale or retail drug channels for medicinal use, shall render a quarterly return on Form 961, and its supplement Form 961a, to the collector of internal revenue for the district on or before the 15th day of April, July, October and January, for the quarterly periods ending March 31, June 30, September 30 and December 31, respectively. Each such return shall account for all marihuana on hand and imported, in whatever form, and all sales, exports or other dispositions of marihuana.

ART. 70. *Returns required of manufacturers and compounders for other than medicinal use.*—Every person registered as a manufacturer or compounder, who uses marihuana in any form in the manufacture or compounding of other than medicinal products, shall render a quarterly return on Form 961, and its supplement Form 961a, to the collector of internal revenue for the district on or before the 15th day of April, July, October and January, for the quarterly periods ending March 31, June 30, September 30 and December 31, respectively. Each such return shall account for all marihuana, and all marihuana products other than those specifically excepted by the Act, which are on hand, purchased, or otherwise acquired, all manufacture or compounding thereof, and all sales, exports or other dispositions of marihuana or its products.

ART. 71. *Returns required of importers, manufacturers and compounders for medicinal use.*—Every person registered as an importer, manufacturer, or compounder, in Class I under the Act, who imports, purchases or otherwise acquires marihuana or preparations containing marihuana for use in the manufacture or compounding of medicinal products or for distribution through wholesale or retail drug channels or direct to practitioners for medicinal use, shall render a monthly return on Form 810 and its supplements Forms 810a, 810b, 810c, 810d and 811c to the collector of internal revenue for the district on or before the 15th day of the month succeeding that for which the return is rendered. Returns for marihuana and its medicinal products will be rendered on these forms in accordance with instructions appearing thereon relating to opium and coca leaves and their derivatives. All receipts of marihuana for medicinal distribution or manufacture or compounding will be reported on Form 810a, all dispositions on Form 810b, all manufacturing or compounding operations on Form 810c, all packaging operations on Form 810d, and a semiannual inventory of marihuana and preparations on hand will be rendered as of June 30 and December 31, and will be made a part of the June and December returns, respectively.

Where a person required by this article to render a return for marihuana on Form 810 and its supplements is also registered in Class I under the Harrison Narcotic Law, as amended, and renders a return under that Act on these same forms, the marihuana return may be made a part of such monthly narcotic return, but separate detail sheets, Forms 810a, 810b, 810c, 810d, and 811c must be used to report marihuana transactions. The totals of the various detail sheets of marihuana transactions will be carried to the "Other Opium Alkaloids" column of the summary, Form 810.

ART. 72. *Returns required of producers.*—Every person registered as a producer of marihuana in Class II under the Act shall render an annual return on Form 960, to the collector of internal revenue for the district on or before the 15th day of January, for the annual period ending December 31 of the preceding year. Each such return shall show, both by the number of plots or fields and their total area, all marihuana under cultivation at the beginning of the period, planted or brought under cultivation during the period, harvested or otherwise disposed of during the period and under cultivation at the close of the period. Each such return shall also account for all bulk marihuana on hand and produced during the period, in whatever form, and all sales, exports, or other dispositions of marihuana during the period.

Farmers producing hemp for fiber by retting the entire crop in the field where grown, removing only the matured hemp stalks and no other part of the plant from the field will report either the quantities of such matured stalks gathered or the total fiber yield in the space provided therefor at the bottom of Summary No. 1. No further accounting for such matured stalks need be made. If any part of the plant, other than such matured stalks, is removed from the field such material must be fully accounted for in Summary No. 2. Producers who are also registered as manufacturers, compounders or dealers will also render returns on the forms prescribed for manufacturers, compounders, or dealers to cover transactions entered into under such registration.

ART. 73. *Returns required of dealers for other than medicinal use.*—Every person registered as a dealer in Class III

under the Act, who purchases and sells or otherwise acquires and disposes of marihuana or its products for other than distribution through wholesale or retail drug channels, shall render a quarterly return on Form 961, and its supplement Form 961a, to the collector of internal revenue for the district on or before the 15th day of April, July, October and January for the quarterly periods ending March 31, June 30, September 30 and December 31, respectively. Each such return shall account for all marihuana on hand and purchased, or otherwise acquired, in whatever form, and all sales, exports, or other dispositions of marihuana.

ART. 74. *Returns required of dealers for medicinal use.*—Every wholesale or retail druggist, pharmacist, or other person registered as a dealer in Class III under the Act, who purchases or otherwise acquires and sells or otherwise transfers marihuana or its preparations exclusively for medicinal purposes in any manner except pursuant to prescriptions of registered practitioners, as elsewhere authorized in these regulations, shall render a monthly return on Form 810 and its supplements Forms 810a, 810b and 811c to the collector of internal revenue for the district on or before the 15th day of the month succeeding that for which the return is rendered. Returns for marihuana and its medicinal products will be rendered on these forms in accordance with instructions appearing thereon relating to opium and coca leaves and their derivatives. All receipts of marihuana for medicinal distribution will be reported on Form 810a, and all transfers or other dispositions on Form 810b, and a semiannual inventory of marihuana and preparations on hand will be rendered as of June 30 and December 31, and will be made a part of the June and December returns, respectively.

Where a person required by this article to render a return for marihuana on Form 810 and its supplements is also registered in Class 1 under the Harrison Narcotic Law, as amended, and renders a return under that Act on these same forms, the marihuana return may be made a part of such monthly narcotic return, but separate detail sheets, Forms 810a and 810b, must be used to report marihuana transactions. The totals of the various detail sheets of marihuana transactions will be carried to the "Other Opium Alkeloids" column of the Summary, Form 810.

ART. 75. *General requirements regarding records required of registrants.*—The details of all marihuana imported, purchased, received, compounded or manufactured, and all marihuana exported, sold, used in compounding or manufacture, or otherwise disposed of as reported on Form 961, shall be reported in supplemental detail sheets Form 961a, which shall be affixed to and become a part of such return. Detail sheets will be fully identified and numbered to correspond with the numbers of the summaries and lines to which they relate. The detailed report of imports shall show for each importation the name and address of the foreign consignor, the foreign port of export, the American port of import, and the kind and quantity of marihuana imported. Producers will report the details of all seeds purchased or received for planting and all marihuana exported, sold or otherwise disposed of on page 3, Form 960. The detailed report of purchases shall show for each purchase the name and address of the seller, and the kind and quantity of marihuana purchased. The detailed report of other receipts shall show for each entry full information as to the circumstances of such receipt, the name and address of the person from whom acquired, and the kind and quantity of marihuana received. The detailed report of nonmedicinal marihuana products manufactured or compounded will show the date of completed manufacture or compounding and the kind and quantity of the product.

The detailed report of exports shall show in each instance the name and address of the foreign consignee, the kind and quantity of marihuana exported, the American port of export, and the foreign port of import. The detailed report of sales shall show for each sale the name, address, internal revenue collection district and registry number of the purchaser, the kind and quantity of marihuana sold, and the value of tax stamps affixed to the order form pursuant to which the sale was made. The detailed report of other dispositions shall show for each entry full information as to the disposition made of such marihuana and the kind and quantity of marihuana so disposed of. The detailed report of marihuana used in manufacture or compounding will show the kind and quantity so used, the date placed into process and the name of the product to be manufactured or compounded therefrom. Returns shall be prepared in duplicate and the duplicate retained by the registrant.

ART. 76. *Returns required to be under oath.*—All returns required by these regulations shall be rendered under oath, and shall be signed and sworn to by the registrant, if an individual, by a member of the firm, if a partnership, or by a principal officer, if a corporation. Where it is impracticable for the person interested to execute returns, they may be executed by another person pursuant to power of attorney prepared and filed as outlined in Art. 47.

### Records

ART. 77. *Laboratory use.*—Persons who have registered and paid the tax to obtain and use in a laboratory any marihuana for the purpose of research, instruction, or analysis, are required to keep complete records relating to the receipt, disposal, and stock on hand, of all marihuana. A special record shall also be kept showing the date, the quantity and kind of marihuana used, the particular purpose or object of such use, and also showing as to the resulting product or residue, the date, quantity and kind, and manner of disposition. The Government does not furnish blanks for the keeping of this record, but it should be in a form substantially as follows:

| Marihuana used | | | | Identification and disposition of marihuana or resulting products and residues | | | |
|---|---|---|---|---|---|---|---|
| Date | Detailed description | Quantity | Purpose | Date | Products or residues | Quantity | Disposition |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |

### General Provisions

ART. 78. *Records and returns to be retained.*—All order forms, duplicate forms, prescription records, returns, and inventories required to be kept on file by the taxpayer shall be retained and available for inspection for a period of not less than two years.

SEC. 10 (b). Any person who shall be registered under the provisions of section 2 in any internal-revenue district shall, whenever required so to do by the collector of the district, render to the collector a true and correct statement or return, verified by affidavits, setting forth the quantity of marihuana received or harvested by him during such period immediately preceding the demand of the collector, not exceeding three months, as the said collector may fix and determine. If such person is not solely a producer, he shall set forth in such statement or return the names of the persons from whom said marihuana was received, the quantity in each instance received from such persons, and the date when received.

ART. 79. *Special reports.*—Statements pursuant to the foregoing section will be rendered on Form 680 in the manner and at the time requested by the collector of internal revenue.

SEC. 11. The order forms and copies thereof and the prescriptions and records required to be preserved under the provisions of section 6, and the statements or returns filed in the office of the collector of the district under the provisions of section 10 (b) shall be open to inspection by officers, agents, and employees of the Treasury Department duly authorized for that purpose, and such officers of any State, or Territory, or of any political subdivision thereof, or the District of Columbia, or of any insular possession of the United States as shall be charged with the enforcement of any law or municipal ordinance regulating the production, sale, prescribing, dispensing, dealing in, or distributing of marihuana. * * *

ART. 80. *Examining records.*—Any officer, agent, or employee of the Treasury Department authorized to enforce the act, and any officer of any State, Territory, the District of Columbia, or insular possession of the United States charged with the enforcement of any law or municipal ordinance relating to the traffic in marihuana, shall have authority to examine the books, papers, and records kept pursuant to these regulations, and may require the production thereof.

ART. 81. *Records open to inspection.*—All order forms, duplicate forms, prescription records, returns, and inventories required under the Act or these regulations to be kept on file must be kept so that they can be readily inspected.

### CHAPTER VI

### *Special Exemptions*

### Exempt Officials

SEC. 3 (b). An officer or employee of the United States, any State, Territory, the District of Columbia, or insular possession, or political subdivision, who, in the exercise of his official duties, engages in any of the activities enumerated in section 2 of this Act shall not be required to register or pay the special tax, but his right to this exemption shall be evidenced in such manner as the Secretary may by regulations prescribe.

ART. 82. *Exempt officials.*—Officials of the United States, the District of Columbia, any State, Territory, or insular possession of the United States, or of any county, municipality or other political subdivision therein, who, in the exercise of their official duties, acquire, dispense, or handle marihuana, are not thereby required to register or pay special tax, but their right to such exemption shall be evidenced as hereinafter provided.

ART. 83. *Military and naval officers.*—The Surgeon General of the Army and the Surgeon General of the Navy will respectively furnish to the Commissioner of Internal Revenue lists showing the names, addresses, and official status of all officers and contract surgeons authorized to obtain marihuana for official use. Quarterly amendatory lists showing additions to, eliminations from, or other changes to be made in previous lists shall also be furnished. The commanding officer of the National Guard of each State will likewise furnish original and amendatory lists to each collector of such State, similarly identifying the officers authorized to procure marihuana. With respect to procurement of marihuana by officers of the character indicated, see Article 85 entitled "procurement of marihuana."

ART. 84. *Civil officers.*—Each civil officer of the United States, or the District of Columbia, or of any State, Territory, or insular possession of the United States, or any county, municipality, or other political subdivision, claiming exemption from registration and tax under the Act, must file with the collector for the district in which he is located a certificate from a superior official showing the official status and official address of the person claiming exemption and (1) whether he is to purchase the marihuana or obtain it from official stocks, and (2) whether or not the officer is to administer or dispense marihuana. Each such statement must be renewed on or before July 1 of each year.

ART. 85. *Procurement of marihuana.*—Each order for the purchase of marihuana by an exempt official must be accompanied by a certificate, issued by the collector for the district in which the purchasing official is located, on official stationery in the following form:

_____ (Name) _____ (Rank or official capacity)

_____ (Post of duty or official address)

has evidenced his exemption from registration and payment of taxes under the Marihuana Tax Act of 1937, in the manner prescribed by the Commissioner of Narcotics, with the approval of the Secretary of the Treasury, and is entitled to purchase marihuana without the use of official order forms for the use of

_____ (Name of government and department thereof)

Certificates in accordance with the foregoing form will be issued by the collectors upon request but no certificate may be issued for any officer or official unless the list or statement on file indicates that such officer or official is required to purchase marihuana.

If an official is engaged in a private business or privately practices a profession in which marihuana is imported, manufactured, produced, compounded, sold, dealt in, dispensed, prescribed, administered, or given away, such official must register and pay the special tax for such private activity, and the marihuana for such private purposes must be secured upon regular order forms.

SEC. 8 (b). No liability shall be imposed by virtue of this section upon any duly authorized officer of the Treasury Department engaged in the enforcement of this Act or upon any duly authorized officer of any State, or Territory, or of any political subdivision thereof, or the District of Columbia, or of any insular possession of the United States, who shall be engaged in the enforcement of any law or municipal ordinance dealing with the production, sale, prescribing, dispensing, dealing in, or distributing of marihuana.

ART. 86. *Enforcement officers.*—Special agents and customs agents, for the establishment of drawback under customs laws and regulations, inspectors of the Food, Drug and Insecticide Administration, Department of Agriculture, in connection with their duties in enforcing the Food and Drugs Act, and State or Federal officials engaged in their duties in enforcing any State or Federal marihuana law, are entitled to procure from any person registered under the Marihuana Tax Act of 1937 samples of marihuana, and registrants may lawfully furnish to any such persons for the purposes stated, the required samples, taking a receipt therefor, which shall be filed with their official order forms and records.

### Transfer Procedure by Officials

ART. 87. *Orders and prescriptions.*—Orders and prescriptions issued by exempt officials as such for marihuana should be prepared on official blanks if such blanks are provided, or otherwise on official stationery, and must show the name, title, and official address of the person by whom executed.

ART. 88. *Filling and filing orders and prescriptions.*—An order issued for marihuana by an exempt official as such may be filled only by a person registered as an importer, manufacturer, compounder, producer, or dealer. Prescriptions of like issue may be filled only by retail druggists registered as dealers or by manufacturers supplying thereon marihuana of their own manufacture or compounding. Any registrant who fills an improperly prepared order or prescription may be charged with violation of Section 6 of the Act. Orders and prescriptions of exempt officials should when filled, be filed with the regular marihuana orders and prescriptions otherwise required.

### Transfers to Puerto Rico and the Virgin Islands

SEC. 15. The provisions of this Act shall apply to the several States, the District of Columbia, the Territory of Alaska, the Territory of Hawaii, and the insular possessions of the United States, except the Philippine Islands. In Puerto Rico the administration of this Act, the collection of the special taxes and transfer taxes, and the issuance of the order forms provided for in section 6 shall be performed by the appropriate internal-revenue officers of that government, and all revenues collected under this Act in Puerto Rico shall accrue intact to the general government thereof. The President is hereby authorized and directed to issue such Executive orders as will carry into effect in the Virgin Islands the intent and purpose of this Act by providing for the registration with appropriate officers and the imposition of the special and transfer taxes upon all persons in the Virgin Islands who import, manufacture, produce, compound, sell, deal in, dispense, prescribe, administer, or give away marihuana.

[*Here follows the text of Executive Order No. 7715, dated September 26, 1937, entitled "Prescribing Regulations for Carrying into Effect in the Virgin Islands Certain Provisions of the Marihuana Tax Act of 1937"* (2 F. R. 2008).]

ART. 89. *Transfers to be made pursuant to orders.*—No person in the continental United States may transfer marihuana to a person in Puerto Rico or in the Virgin Islands, except pursuant to an order form, bearing appropriate transfer tax stamp, issued by the appropriate officers in those territories. The transfer or other disposition of marihuana by any person in the continental United States to

any person in Puerto Rico or in the Virgin Islands otherwise than as above described, shall subject the offending party or parties to the penalties provided by the Marihuana Tax Act of 1937. (See Art. 102.)

ART. 90. *Record of transfers required.*—Each transfer or other disposition of marihuana to persons in Puerto Rico or the Virgin Islands shall be recorded and reported by the transferor in the same manner as a transfer within the continental United States.

CHAPTER VII

*Administrative Provisions*

Assessment of Tax

SECTION 3182, UNITED STATES REVISED STATUTES

The Commissioner of Internal Revenue is hereby authorized and required to make * * * assessments of all taxes and penalties * * * where such taxes had not been duly paid by stamp at the time and in the manner provided by law, * * *.

ART. 91. *Assessment of taxes not paid by stamp.*—Tax due on the transfer of marihuana not paid by attachment of stamps to order forms shall be reported for assessment. Special tax which the taxpayer refuses or fails to pay may likewise be reported for assessment.

Jeopardy Assessment

SECTION 1105, REVENUE ACT OF 1932, AS AMENDED BY SECTION 510, REVENUE ACT OF 1934

(a) If the Commissioner believes that the collection of any tax (other than income tax, estate tax, and gift tax) under any provision of the internal-revenue laws will be jeopardized by delay, he shall, whether or not the time otherwise prescribed by law for making return and paying such tax has expired, immediately assess such tax (together with all interest and penalties the assessment of which is provided for by law). Such tax, penalties, and interest shall thereupon become immediately due and payable, and immediate notice and demand shall be made by the collector for the payment thereof. Upon failure or refusal to pay such tax, penalty, and interest, collection thereof by distraint shall be lawful without regard to the period prescribed in section 3187 of the Revised Statutes, as amended.

(b) The collection of the whole or any part of the amount of such assessment may be stayed by filing with the collector a bond in such amount, not exceeding double the amount as to which the stay is desired, and with such sureties, as the collector deems necessary, conditioned upon the payment of the amount collection of which is stayed, at the time at which, but for this section, such amount would be due.

ART. 92. *Jeopardy assessment.*—(a) Whenever, in the opinion of the collector, the collection of the tax will be jeopardized by delay, he should report the matter promptly to the Commissioner by telegram or letter. The communication should recite the full name and address of the person involved, the kind and amount of taxes, the period involved, and such statement of the circumstances and recommendation as will enable the Commissioner immediately to determine and assess the tax due, together with all penalties.

(b) If a jeopardy assessment is made, the taxpayer may stay the collection of the tax by filing with the collector a bond in such amount, not exceeding double the amount of the tax, and with such sureties, as the collector deems necessary, conditioned upon the payment of the tax at the usual time. In lieu of surety or sureties the taxpayer may deposit with the collector United States Liberty bonds or other bonds or notes of the United States having a par value not less than the amount of the bond required to be furnished, together with an agreement authorizing the collector to sell or collect such bonds or notes so deposited in case of default.

Payment by Check, Etc.

SECTION 1118 (A) REVENUE ACT OF 1926

Collectors may receive, at par with an adjustment for accrued interest, notes or certificates of indebtedness issued by the United States and uncertified checks in payment of income, war-profits, and excess-profits taxes and any other taxes payable other than by stamp, during such time and under such rules and regulations as the Commissioner, with the approval of the Secretary, shall prescribe; but if a check so received is not paid by the bank on which it is drawn the person by whom such check has been tendered shall remain liable for the payment of the tax and for all legal penalties and additions to the same extent as if such check had not been tendered.

ART. 93. *Payment by check, etc.*—(a) Collectors may receive uncertified checks in payment of assessments (but not in payment for stamps), if such checks are collectible at par—that is, for their full amount, without deduction for exchange or other charges. The collector will stamp on the face of each check before deposit the words "This check is in payment of an obligation to the United States and must be paid at par. No protest.", with his name and title.

(b) If the bank upon which any such check is drawn should, for any reason, refuse to pay it at par, the check should be returned through the depository bank and treated as a dishonored check. All expenses incident to the attempt to collect such check and the return of it through the depository bank must be borne by the drawer, since no deduction can be made from amounts received in payment of taxes. Unless the taxpayer whose check has been returned uncollected by the depository bank makes the check good immediately, or pays the amount thereof, the collector should proceed to collect the tax as though no check had been given. A taxpayer who tenders a check, whether certified or not, in payment of taxes, is not released from his obligation until the check has been paid.

Redemption of or Allowance for Stamps

ACT OF MAY 12, 1900, AS AMENDED BY SECTION 1013 (A) OF THE REVENUE ACT OF 1924

That the Commissioner of Internal Revenue, subject to regulations prescribed by the Secretary of the Treasury, may, upon receipt of satisfactory evidence of the facts, make allowance for or redeem such of the stamps, issued under authority of law, to denote the payment of any internal-revenue tax, as may have been spoiled, destroyed, or rendered useless or unfit for the purpose intended, or for which the owner may have no use, or which through mistake may have been improperly or unnecessarily used, or where the rates or duties represented thereby have been excessive in amount, paid in error, or in any manner wrongfully collected. Such allowance or redemption may be made, either by giving other stamps in lieu of the stamps so allowed for or redeemed, or by refunding the amount or value to the owner thereof, deducting therefrom, in case of repayment, the percentage, if any, allowed to the purchaser thereof; but no allowance or redemption shall be made in any case until the stamps so spoiled or rendered useless shall have been returned to the Commissioner of Internal Revenue, or until satisfactory proof has been made showing the reason why the same cannot be returned; or, if so required by the said Commissioner, when the person presenting the same cannot satisfactorily trace the history of said stamps from their issuance to the presentation of his claim as aforesaid.

* * * * *

*Provided, further,* That no claim for the redemption of or allowance for stamps shall be allowed unless presented within four years after the purchase of such stamps from the Government.

SEC. 2. That the finding of facts in and the decision of the Commissioner of Internal Revenue upon the merits of any claim presented under or authorized by this Act shall, in the absence of fraud or mistake in mathematical calculation, be final and not subject to revision by any accounting officer.

SEC. 3. That all laws and parts of laws in conflict with any of the provisions of this Act are hereby repealed.

ART. 94. *Claims.*—Amounts paid for stamps used in excess, or on instruments not actually effective, may be refunded, upon claim properly presented to the collector. All claims for the redemption of or allowance for stamps must be presented to the collector on Form 843 within four years after the purchase of said stamps from the Government. In filing a claim for the redemption of or allowance for stamps covering the tax on the transfer of marihuana, the stamps involved shall be submitted therewith, or if it is impracticable to submit the stamps, they shall be presented to a deputy collector or other internal-revenue representative, who shall write on the face of the stamps the words "Claim for refund filed" and a statement from such internal-revenue representative shall be furnished showing that such indorsement has been made. The claim shall be forwarded to the Collector of Internal Revenue for the district in which the taxpayer is located who shall certify as to the date the stamps were purchased. The provisions of sections 3220 to 3228, United States Revised Statutes, do not apply to the redemption of or allowance for internal-revenue stamps, and the authority for such redemption or allowance is the Act of May 12, 1900 (31 Stat. 177), as amended by section 1013 (a) of the Revenue Act of 1924, set forth hereinbefore.

Refunds

SECTION 3220 OF THE REVISED STATUTES, AS AMENDED BY SECTION 1111 OF THE REVENUE ACT OF 1926 AND SECTION 619 (B) OF THE REVENUE ACT OF 1928

Except as otherwise provided by law in the case of income, war-profits, excess-profits, estate, and gift taxes, the Commissioner of Internal Revenue, subject to regulations prescribed by the Secretary of the Treasury, is authorized to remit, refund, and pay back all taxes erroneously or illegally assessed or collected, all penalties collected without authority, and all taxes that appear to be unjustly assessed or excessive in amount, or in any manner wrongfully collected; also to repay to any collector or deputy collector the full amount of such sums of money as may be recovered against him in any court, for any internal-revenue taxes collected by him, with the cost and expenses of suit; also all damages and costs recovered against any assessor, assistant assessor, collector, deputy collector, agent, or inspector, in any suit brought against him by reason of anything done in the due performance of his official duty, and shall make report to Congress at the beginning of each regular session of Congress of all transactions under this section.

SECTION 3228 OF THE REVISED STATUTES, AS AMENDED BY SECTION 1112 OF THE REVENUE ACT OF 1926, SECTION 619 (C) OF THE REVENUE ACT OF 1928, AND SECTION 1106 OF THE REVENUE ACT OF 1932

(a) All claims for the refunding or crediting of any internal-revenue tax alleged to have been erroneously or illegally assessed or collected, or of any penalty alleged to have been collected without authority, or of any sum alleged to have been excessive or in any manner wrongfully collected must, except as otherwise provided by law in the case of income, war-profits, excess-profits, estate, and gift taxes, be presented to the Commissioner of Internal Revenue within four years next after the payment of such tax, penalty, or sum. The amount of the refund (in the case of taxes other than income, war-profits, excess-profits, estate, and gift taxes) shall not exceed the portion of the tax, penalty, or sum paid during the four years immediately preceding the filing of the claim, or if no claim was filed, then during the four years immediately preceding the allowance of the refund.

SECTION 1106 (B) OF THE REVENUE ACT OF 1932

(b) The amendment made by subsection (a) of this section to section 3228 of the Revised Statutes shall not bar from allowance a claim for refund filed prior to the enactment of this Act which but for such enactment would have been allowable.

ART. 95. *Refunds.*—As indicated hereinbefore, the transfer tax is ordinarily paid by the purchase and affixing of stamps, while special-tax stamps are issued in payment of special taxes. However, in exceptional cases, such taxes may be paid pursuant to assessment. Claims for refund of amounts so paid by assessment are governed by sections 3220 and 3228, United States Revised Statutes, as amended. Such claims must be presented within four years next after payment of the taxes.

Miscellaneous

ART. 96. *Safeguarding of marihuana.*—Marihuana must at all times be securely kept and properly safeguarded where it will be available for inspection by properly authorized officers, agents, and employees of the Treasury Department.

ART. 97. *Procedure with reference to losses.*—Where, through breakage of the container or other accident, otherwise than in transit between transferor and transferee, marihuana is lost or destroyed, the person having title thereto shall make affidavit as to the kind and quantity of the marihuana items lost or destroyed and the circumstances involved, and immediately forward the affidavit to the Narcotic District Supervisor. A copy of such affidavit shall be retained and filed with the other marihuana records. See appendix for list of Narcotic District Supervisors, their headquarters and States embraced.

Where marihuana is lost by theft, or otherwise lost or destroyed in transit between transferor and transferee, a sworn statement of the facts, including a list of marihuana items stolen, lost or destroyed, and documentary evidence that the local authorities were notified, shall immediately upon ascertainment of the occurrence be filed with the Narcotic District Supervisor by the consignee. A copy of the sworn statement shall be retained and filed with the other marihuana records of the consignee.

In case of loss in transit the transferor is not authorized to make good the loss by duplicating the shipment on the same order form. A separate order form covering each and every shipment of marihuana is required. But see Article 94 as to claims for redemption of stamps unnecessarily used.

ART. 98. *Procedure on discontinuance of business.*—Where it is desired to discontinue business the taxpayer should, before the discontinuance, dispose of all marihuana on hand. Where the discontinuance occurs on any date other than June thirtieth the special-tax stamp or stamps should be returned to the collector who will mark each such stamp "Business discontinued" with the date, and return the stamp to the taxpayer who shall file it with his marihuana records and retain it for a period of two years. The rendering of returns subsequent to the date of discontinuance will not be demanded, provided all marihuana has been accounted for and an affidavit is submitted in duplicate to the collector certifying that no further transactions of that class will be consummated. One copy of this affidavit will be forwarded to the Commissioner of Narcotics. Before business is discontinued the marihuana on hand may be disposed of either pursuant to an order form or to an exempt official, or by shipment to the Narcotic District Supervisor of the district, as provided in the following paragraphs for the disposition of excess, undesirable, or useless stock.

Excess, undesirable, or useless marihuana in the possession of a registered person may be disposed of by shipment, charges prepaid, to the Narcotic District Supervisor of the district. If the person has paid tax in a class under which returns are required to be rendered and the marihuana to be disposed of is a part of the stock for such class, an inventory of the marihuana shipped must be prepared in triplicate on the form used for detailed reporting of dispositions. The original inventory must be filed with the return for such class for the period in which the disposition takes place, the duplicate copy to be made a part of the retained copy of the return and the triplicate copy to be forwarded with the marihuana when shipped for disposition. If the marihuana is stock with respect to which returns are not required, an inventory shall be prepared in quadruplicate on Form 142, the duplicate of which shall be forwarded with the marihuana when shipped and the triplicate retained on file by the taxpayer for a period of two years. The shipper shall notify the Narcotic District Supervisor, advising of the size and description of the container in which the marihuana is being forwarded, and enclosing the original and quadruplicate copy of the inventory which has been prepared.

The Narcotic District Supervisor will retain the quadruplicate copy of Form 142 in his file and forward the original to the Commissioner of Narcotics.

Forfeitures and Penalties

SEC. 9 (a). Any marihuana which has been imported, manufactured, compounded, transferred, or produced in violation of any of the provisions of this Act shall be subject to seizure and forfeiture and, except as inconsistent with the provisions of this Act, all the provisions of internal-revenue laws relating to searches, seizures, and forfeitures are extended to include marihuana.

(b) Any marihuana which may be seized by the United States Government from any person or persons charged with any violation of this Act shall upon conviction of the person or persons from whom seized be confiscated by and forfeited to the United States.

(c) Any marihuana seized or coming into the possession of the United States in the enforcement of this Act, the owner or owners of which are unknown, shall be confiscated by and forfeited to the United States.

(d) The Secretary is hereby directed to destroy any marihuana confiscated by and forfeited to the United States under this section or to deliver such marihuana to any department, bureau, or other agency of the United States Government, upon proper application therefor under such regulations as may be prescribed by the Secretary.

ART. 99. *Disposition of forfeited marihuana.*—Marihuana forfeited to the United States under these provisions of the law may be delivered to any department, bureau, or other agency of the United States Government upon proper application addressed to the Commissioner of Narcotics. The application shall show the name, address, and official title, bureau or agency, and department, of the person to whom the marihuana is to be delivered, the kind and quantity of marihuana desired and the purpose for which intended. The

delivery of such marihuana shall be ordered by the Commissioner of Narcotics if, in his opinion, there exists a medical or scientific need therefor. The order will be filled by the Drugs Disposal Committee which will obtain a receipt for marihuana delivered.

ART. 100. *Court sales.*—Court officers in making sales of marihuana under judicial proceedings shall require the purchaser thereof, if other than an exempt official, who must be a registered person, to furnish order forms for such sales or transfers.

SEC. 2 (f). Collectors are authorized to furnish, upon written request, to any person a certified copy of the names of any or all persons who may be listed in their respective collection districts as special taxpayers under this section, upon payment of a fee of $1 for each one hundred of such names or fraction thereof upon such copy so requested.

SEC. 3240. United States Revised Statutes, as amended. Each collector of internal revenue shall, under regulations of the Commissioner of Internal Revenue, place and keep conspicuously in his office, for public inspection, an alphabetical list of the names of all persons who shall have paid special taxes within his district, and shall state thereon the time, place, and business for which such special taxes have been paid, and upon application of any prosecuting officer of any State, county, or municipality he shall furnish a certified copy thereof, as of a public record, for which a fee of one dollar for each one hundred words or fraction thereof in the copy or copies so requested may be charged.

ART. 101. *List of taxpayers.*—The list of marihuana special-taxpayers required by the foregoing statute shall be kept on Record 10, and may be inspected and copied in the collector's office at such reasonable and proper times as not to interfere with the collector's use of it, or exclude other persons from inspecting it.

SEC. 12. Any person who is convicted of a violation of any provision of this Act shall be fined not more than $2,000 or imprisoned not more than five years, or both, in the discretion of the court.

ART. 102. *Specific penalty.*—Persons who violate the Act or fail to fulfill its requirements in any particular are liable to punishment, the maximum liability being to a fine of not more than $2,000 or imprisonment of not more than five years, or both, for each offense.

ART. 103. *Correspondence.*—Correspondence relative to interpretation of the law and these regulations may be addressed to the Commissioner of Narcotics, Washington, D. C. Inquiries relative to registration and requests for blank forms should be addressed to the various collectors of internal revenue. All remittances should be sent to the local collector of internal revenue. Correspondence regarding charges of violations of the law or regulations should be addressed to the Narcotic District Supervisor in charge of the proper district. (See appendix for list of collectors and Narcotic District Supervisors.)

ART. 104. *Effective date.*—These regulations shall take effect and be in force on and after October 1, 1937.

ART. 105. *Promulgation of regulations.*—In pursuance of section 14 of the Marihuana Tax Act of 1937, the foregoing regulations are hereby made and promulgated.

## POST OFFICE DEPARTMENT.

[Order No. 10744]

### WITHDRAWAL OF POSTAL SAVINGS DEPOSITS BY MAIL

AUGUST 13, 1937.

Paragraph 5, Section 1618, Postal Laws and Regulations, is amended to read as follows:

"When a depositor desires to make a withdrawal by mail, the postmaster at any depositary office shall furnish him an application blank (Form PS 315) requesting a money order for the amount of the surrendered certificates and any interest due, less the money-order fee. This form shall be filled out and signed in duplicate in the presence of any postmaster, who shall witness the application and date it with the office stamp. The depositor shall indorse the certificates and deliver them, with the completed Form PS 315, to such postmaster, who shall forward the certificates and the original application to the postmaster at the depositary office. The postage, including registry fee, for transmitting the application and surrendered certificates, shall be borne by the depositor making the application. The duplicate Form PS 315 shall be used to assist in the identification of the depositor on the presentation of the money order for payment."

JAMES A. FARLEY,
*Postmaster General.*

[SEAL]

[F. R. Doc. 37-2912; Filed, September 30, 1937; 10:49 a. m.]

[Order No. 10745]

### WITHDRAWAL OF POSTAL SAVINGS DEPOSITS

AUGUST 13, 1937.

Paragraphs 1 (b) and 13 of section 1616, Postal Laws and Regulations, are hereby rescinded; and paragraphs 1, 5, 9, 11, and 12 of section 1616 are amended to read as follows:

"1616. Notwithstanding any other provision of law, (1) each deposit in a postal savings depository office shall be a savings deposit, and interest thereon shall be allowed and entered to the credit of the depositor once for each quarter beginning with the first day of the month following the date of such deposit, but no interest shall be allowed to any such depositor with respect to the whole or any part of the funds to his or her credit for any period of less than three months; (2) no interest shall be paid on any such deposit at a rate in excess of that which may lawfully be paid on savings deposits under regulations prescribed by the Board of Governors of the Federal Reserve System pursuant to the Federal Reserve Act, as amended, for member banks of the Federal Reserve System located in or nearest to the place where such depository office is situated; * * * (39 U. S. C. 758, as amended by the Act of August 23, 1935, 49 Stat. 721.)

"5. When sufficient funds are not on hand to meet withdrawals, a postmaster who has been authorized by the Third Assistant Postmaster General to draw on a local bank shall draw his official check on the bank designated for that purpose, as provided in section 1613, paragraph 4, and for that purpose shall procure from the bank a supply of blank checks. Such checks shall be drawn only when absolutely necessary and for the sole purpose specified. They shall be made payable to the postmaster or his authorized representative and shall be drawn substantially in the following form: 'Pay to postmaster at _____ from postal-savings fund _____ dollars.' *They shall not be made payable to depositors nor delivered to them.* The postmaster may authorize his assistant or one or more clerks to draw checks in his absence, signing the postmaster's name, 'per _____ _____' (signature of the person so authorized). He shall give proper notice to the bank of each such authorization, but he shall be liable on his official bond for the amount of all checks signed by such authorized representatives.

"9. (a) In order to obtain funds to meet withdrawals of principal or interest in excess of his daily receipts, a postmaster (other than the postmaster at Washington, D. C., or at a central postal-savings depositary post office) who has not been authorized to draw on a local bank shall draw drafts (Form PS 316) on the designated central depositary postmaster for any amount needed. However, for convenience and to avoid the too frequent use of drafts, postmasters shall use money-order funds, so far as practicable, to meet such withdrawals, and postmasters who have been granted a money-order credit with the Treasurer of the United States shall check on that credit to obtain necessary additional working funds. Memorandum slips (Form PS 622-A) to cover such temporary advances to the postal-savings account shall be placed with the money-order funds and held until reimbursement has been made. The postmaster shall reimburse the money-order account from surplus postal-savings funds subsequently received and, at the end of each month, shall draw a postal-savings draft for any amount still due the money-order account and shall dispose of the draft as money-order funds. The money-order account shall always be completely reimbursed at the end of each month, and the postmaster shall not reflect such temporary advances of money-order funds on his monthly reports to the Department. The postmaster shall debit in the daily summary (Form PS 708), or other form used in lieu thereof in accordance with specific instructions, the total amount of funds borrowed each day and shall credit in that record the total amount repaid to the money-order account. Postal-savings drafts shall not be drawn for any purpose other than that specified.

"(b) The postmaster at Washington, D. C., or at a central postal-savings depositary post office where no authority has been granted to check on a local bank, shall use money-order funds, as provided in subparagraph 9 (a) of this Section, when sufficient postal-savings funds are not on hand to meet withdrawals by depositors or to cash postal-savings drafts drawn on him by other postmasters. He shall obtain funds needed to reimburse the money-order account from the Third Assistant Postmaster General and shall requisition such funds in ample time to insure complete reimbursement of the money-order account at the end of each month, and insufficient amount to meet the estimated needs of his office. Any excess over the amount immediately needed for reimbursing purposes shall be held as cash in the post office or shall be deposited, wholly or in part, in a temporary checking account in a designated depositary for government funds, as provided in Section 120, Postal Laws and Regulations. The postmaster at Washington, D. C., or at a central depositary office where no authority has been granted to draw on a local bank, may hold as cash or deposit in such temporary checking account the current postal-savings receipts of his office, in reasonable anticipation of early needs.

"11. When the postmaster draws a draft (Form PS 316) on the designated central depositary postmaster, he shall on that day debit the amount of the draft on the line provided in his daily summary (Form PS 703), or other form used in lieu thereof in accordance with specific instructions. The total of the drafts drawn during each month shall be shown by a similar debit entry on the monthly account current (Form PS 704), and the date, number, and amount of each draft shall be entered in Abstract D on the back of said form. The stubs of the drafts (Form PS 316) shall be retained on file.

"12. The postmaster at a central postal-savings depositary post office, on receiving for payment a draft properly signed and endorsed by a postmaster authorized to draft on him, shall pay the draft from his current postal-savings receipts, or, if they are insufficient, from money-order funds (as provided in subparagraph 9 (b) or, if he has been granted a checking credit on a local bank, by cashing a check on his designated bank, as provided in paragraph 5 of this Section. If the draft is received direct from the drawing postmaster, the funds shall be sent by return registered mail, accompanied by a letter of transmittal on Form PS 319, and the remittance shall be prepared and dispatched in the manner provided in section 111."

JAMES A. FARLEY,
*Postmaster General.*

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

Issued September 29, 1937

### DETERMINATION OF PROPORTIONATE SHARES FOR FARMS IN THE MAINLAND CANE SUGAR AREA FOR THE 1938 CROP, PURSUANT TO THE SUGAR ACT OF 1937

Whereas Section 302 of the Sugar Act of 1937 provides in part as follows:

(a) The amount of sugar or liquid sugar with respect to which payment may be made shall be the amount of sugar or liquid sugar commercially recoverable, as determined by the Secretary, from the sugar beets or sugarcane grown on the farm and marketed (or processed by the producer) not in excess of the proportionate share for the farm, as determined by the Secretary, of the quantity of sugar beets or sugarcane for the extraction of sugar or liquid sugar required to be processed to enable the producing area in which the crop of sugar beets or sugarcane is grown to meet the quota (and provide a normal carry-over inventory) estimated by the Secretary for such area for the calendar year during which the larger part of the sugar or liquid sugar from such crop normally would be marketed.

(b) In determining the proportionate shares with respect to a farm, the Secretary may take into consideration the past production on the farm of sugar beets and sugarcane marketed (or processed) for the extraction of sugar or liquid sugar and the ability to produce such sugar beets or sugarcane, and the Secretary shall, insofar as practicable, protect the interests of new producers and small producers and the interests of producers who are cash tenants, share-tenants, adherent planters, or sharecroppers.

and

Whereas subsection (c) of section 301 of said act provides, as one of the conditions for payment to producers of sugar beets and sugarcane, as follows:

(c) That there shall not have been marketed (or processed) an amount (in terms of planted acreage, weight, or recoverable sugar content) of sugar beets or sugarcane grown on the farm and used for the production of sugar or liquid sugar to be marketed in, or so as to compete with or otherwise directly affect interstate or foreign commerce, in excess of the proportionate share for the farm, as determined by the Secretary pursuant to the provisions of section 302, of the total quantity of sugar beets or sugarcane required to be processed to enable the area in which such sugar beets or sugarcane are produced to meet the quota (and provide a normal carry-over inventory) as estimated by the Secretary for such area for the calendar year during which the larger part of the sugar or liquid sugar from such crop normally would be marketed.

and

Whereas the Secretary of Agriculture, on September 14, 1937, estimated the quota (including a normal carry-over inventory) for the mainland cane sugar area, for the calendar year during which the larger part of the sugar or liquid sugar from the 1938 crop of sugarcane normally would be marketed, to be 439,071 tons of sugar, raw value;

Now, therefore, pursuant to the foregoing sections of said act, I, H. A. Wallace, Secretary of Agriculture, do hereby determine that the proportionate share of sugarcane for any farm in the mainland cane sugar area for the 1938 crop shall be as follows:

(*a*) That the proportionate share shall be calculated by taking the average of the 1935 and 1936 sugarcane for sugar acreage on the farm, adding the 1937 sugarcane for sugar acreage on the farm, and dividing by 2, but in no event shall the proportionate share be in excess of sixty percent of the cropland on the farm suitable for the production of sugarcane, except as hereinafter provided.

(*b*) That the minimum proportionate share shall be the largest of

1. The sum of the acreage planted to sugarcane for sugar in the fall of 1936, the spring of 1937, and the fall of 1937 prior to October 1, 1937,

2. for farms having 30 acres or less suitable for the production of sugarcane, one-third of such acreage but not less than five acres, or

3. for farms having more than 30 acres suitable for the production of sugarcane, ten acres in any event, with a further addition of one-fourth of such acreage in excess of 30 acres, provided that there is plowed under a

leguminous crop, immediately prior to and in preparation for the 1937 fall planting of sugarcane, on an acreage equivalent to the difference between the acreage determined pursuant to this subsection (3) and section (a) above, except in any producing region of the mainland sugarcane area in which the plowing under of a leguminous crop prior to the planting of sugarcane is not practiced, in which case the minimum proportionate share shall not be in excess of the acreage in sugarcane on the farm as of October 1, 1937, less the acreage which would normally be replanted in the spring of 1938.

In addition to the foregoing, the following conditions shall be met:

1. That no change shall have been made in the leasing or cropping agreements for the purpose of, or which shall have the effect of, diverting to any producer any payment to which tenants or share croppers would be entitled if the 1937 leasing or cropping agreements were in effect.

2. That there shall have been no interference by any producer with contracts heretofore entered into by tenants or share croppers for the sale of their sugarcane.

Done at Washington, D. C., this 29th day of September, 1937. Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

G. S. R. Series 2, No. 3 Issued September 29, 1937

[General Sugar Regulations, Series 2, No. 3]

## ENTRY OF SUGAR INTO CONTINENTAL UNITED STATES FOR RE-EXPORT

### GENERAL SUGAR REGULATIONS MADE BY THE SECRETARY OF AGRICULTURE UNDER THE SUGAR ACT OF 1937

By virtue of the authority vested in the Secretary of Agriculture by the Sugar Act of 1937, approved September 1, 1937, I, H. A. Wallace, Secretary of Agriculture, in order to carry out the powers vested in me by the said act, do hereby make, prescribe, publish, and give public notice of these regulations, which shall have the force and effect of law and shall continue in force and effect until amended or superseded by regulations hereafter made by the Secretary of Agriculture.

*Article I—Definitions*

SECTION 100. As used in these regulations:

(*a*) The term "Act" means the Sugar Act of 1937, approved September 1, 1937.

(*b*) The term "person" means any individual, partnership, corporation, or association.

(*c*) The term "Secretary" means the Secretary of Agriculture of the United States.

(*d*) The term "quota" means any quota fixed by the Secretary pursuant to the Act.

(*e*) The term "allotment" means any allotment of any quota or proration thereof made by the Secretary pursuant to section 205 (a) of the Act.

*Article II—Importing Sugar or Liquid Sugar Ex-Quota by Furnishing Bond*

SECTION 200. Upon the furnishing of a bond as provided in section 201 hereof, the following sugar or liquid sugar from any foreign country, or from any sugar-producing area outside of continental United States, may be brought or imported into continental United States despite the quantities of sugar or liquid sugar already charged against the applicable quota or allotment and without being charged against such quota or allotment:

(*a*) Sugar or liquid sugar imported into continental United States for the purpose of being processed and exported as sugar or liquid sugar, and not to be used for domestic consumption in continental United States;

(*b*) Sugar or liquid sugar released from United States Customs custody and control for the sole purpose of being processed and returned thereto; and

(*c*) Sugar or liquid sugar imported into continental United States to be manufactured into articles to be exported from continental United States with benefit of drawback, or to be designated as the basis of a claim for drawback.

SEC. 201. Before any of the sugar or liquid sugar described in section 200 hereof shall be released from the United States Customs custody and control in excess of, or without being charged against, the applicable quota or allotment, the importer, consignee, owner of, or other person interested in, such sugar or liquid sugar shall furnish a bond with a surety or sureties satisfactory to the Secretary in such amount as the Secretary or his agent shall determine, or shall provide such other security as the Secretary or his agent shall determine, conditioned as follows:

(*a*) With respect to sugar or liquid sugar imported for the purpose of being processed by a processor and exported as sugar or liquid sugar from, and not to be used for domestic consumption in, continental United States, the condition shall be that the sugar or liquid sugar imported in the original or processed form, or an equivalent amount of sugar or liquid sugar processed by such processor, shall be delivered to such person or persons as the Secretary or his agent may designate for identification and inspection prior to exportation, and shall be actually exported from continental United States or destroyed within six months or such lawful extension of such time as the Secretary or his agent shall specify. In the event that the sugar or liquid sugar is exported with benefit of drawback, and inspection and identification by the collector of customs for purposes of drawback regulations is made, no further identification and inspection is required.

(*b*) With respect to sugar or liquid sugar released from United States Customs custody and control for the sole purpose of being processed by a processor and returned thereto, the condition shall be that such sugar, or an equivalent amount of sugar, or that such liquid sugar, or an equivalent amount of liquid sugar, processed by such processor, shall be returned to the United States Customs custody and control or destroyed within one month or such lawful extension of such time as the Secretary or his agent shall specify.

(c) With respect to sugar or liquid sugar imported to be used in the manufacture or production of articles to be exported with benefit of drawback, or which is to be designated as the basis for the allowance of drawback (including irrecoverable waste), the condition shall be that, within three years from the date of importation, such sugar or liquid sugar or an equivalent amount thereof shall have been exported as shown by (1) the allowance of a claim or claims for drawback, or (2) other proof of exportation satisfactory to the Secretary, or that such sugar or liquid sugar or an equivalent amount of such sugar or liquid sugar available for a drawback claim, or claims, shall have been destroyed; except that the Secretary or his agent may, under appropriate terms, permit release of any such bond or other security upon allowance of drawback based on a designation of other sugar or liquid sugar.

SEC. 202. Any bond or other security given under this article shall be further conditioned upon payment to the United States of America of all United States Customs Bureau expenses of supervision and control, if any, during the time such sugar or liquid sugar is within continental United States under the authority of these regulations.

SEC. 203. The Secretary or his agent may cancel or release any bond or other security given under this article if, upon the sale or transfer of such sugar or liquid sugar or the sugar or liquid sugar designated for drawback claim, or any part thereof, the purchaser or other person having an interest therein shall furnish in substitution a bond with good and sufficient sureties, or other acceptable security covering such sugar or liquid sugar or such part thereof as may be sold or transferred.

*Article III—Charging of Quota Upon Forfeiture of Bond*

SECTION 300. Upon the forfeiture of any bond or security given pursuant to article II, the quota for the country or area in which such sugar or liquid sugar originated and the allotment to which it would be chargeable if brought in or imported at the time of the forfeiture shall be charged as of the time of forfeiture with the amount of such sugar or liquid sugar, and to the extent that such sugar or liquid sugar exceeds the quota of such country or area, or the chargeable allotment, the forfeiture of the bond shall constitute a violation of the quota and/or allotment regulations or orders issued under the Act, and the person who has furnished such bond shall be subject to the penalties prescribed by sections 504 and 506 of the Act, insofar as said penalties may exceed the sum so forfeited under any such bond.

*Article IV—Credits Upon Exportation of Sugar or Liquid Sugar*

SECTION 400. If any sugar or liquid sugar imported into continental United States from any country is charged at the time of importation against any quota and such sugar or liquid sugar in original or processed form, or an equivalent amount of sugar or liquid sugar, is exported from continental United States and not used for consumption therein, or such sugar or liquid sugar is exported with benefit of drawback, or a claim or claims for drawback is or are allowed upon the basis of a designation of the imported sugar or liquid sugar, the amount of sugar or liquid sugar so exported shall, as of the date of exportation, be credited to the current quota unless such exportation is in compliance with a condition of a bond issued pursuant to section 201 hereof.

*Article V—Reports*

SECTION 500. The United States Customs Bureau is authorized to require from any refiner, manufacturer, processor, Regulations but notwithstanding this designation the Secrehandler, importer, consignee, owner, or other person interested in such sugar or liquid sugar in the importation, processing, or exportation thereof, such declarations, certificates, invoices, oaths, and other documents which may be necessary to carry out the provisions of these regulations.

*Article VI—Designation of Chief of Sugar Section as Agent*

SECTION 600. The Chief or Acting Chief of the Sugar Section, Agricultural Adjustment Administration, is hereby designated as the agent of the Secretary to administer these tary may appoint other agents to administer these Regulations. Any agent appointed under this section or the collector of customs responsible for the release from customs custody of any sugar bonded under these Regulations shall be a proper person to approve or cancel any bond given under these Regulations.

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed in the District of Columbia, city of Washington, this 29th day of September, 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

## NOTICE TO SUBSTITUTE WITNESSES TO PETITION FOR NATURALIZATION

AMENDMENT OF THE NATURALIZATION REGULATIONS OF DECEMBER 1, 1936

SEPTEMBER 29, 1937.

By virtue of and pursuant to authority conferred by Section 28 of the Act of June 29, 1906 (34 Stat. 606; U. S. C., title 8, sec. 356), as amended by Section 8 of the Act of March 2, 1929 (45 Stat. 1515), and Executive Order No. 6166 dated June 10, 1933, Naturalization Rule 7, Subdivision D, Paragraph 6 is hereby amended to read as follows:

PAR. 6. Where the witnesses who verified the petition cannot be produced upon the final hearing of the petition, and the petitioner desires to substitute other witnesses in their stead, notice thereof shall be given on form 2215 a reasonable time in advance of the date set for the final hearing of the petition for citizenship, either by the petitioner or the clerk of court, to the naturalization officer having administrative supervision over the district in which the petition is filed, except that where the competency and qualifications of the original witnesses have been determined and a representative of the Service attends the final hearing in person, notice of intention to substitute witnesses may be given to such representative attending such hearing. In no case shall final hearing be held until the substitute witnesses have been examined by a representative of this Service and affidavit in triplicate on form 2218-A executed before such representative or before the clerk of court. One copy of this affidavit will be attached to the original petition prior to or at the time of the final hearing and the others to the duplicate and triplicate petitions in order that the records may show the facts.

## CERTIFICATION OF NATURALIZATION RECORDS

AMENDMENT OF THE NATURALIZATION REGULATIONS OF DECEMBER 1, 1936

SEPTEMBER 29, 1937.

By virtue of and pursuant to authority conferred by Section 28 of the Naturalization Act of June 29, 1906 (34 Stat. 606; U. S. C., title 8, section 356), as amended by Section 8 of the Act of March 2, 1929 (45 Stat. 1515), and Executive Order No. 6166, dated June 10, 1933, Naturalization Rule 14 is hereby amended to read as follows:

*Rule 14.—Certification of Naturalization Records*

Subdivision A.—Procedure for obtaining certification

PARAGRAPH 1. Application may be made on form 2605 to the Commissioner of Immigration and Naturalization for certification of a naturalization record of any court, or any part thereof, or of any certificate of citizenship, for use in complying with any statute, either Federal or State, or in any judicial proceeding. The applicant shall fill out properly, sign, make oath to, and forward the application to the Commissioner of Immigration and Naturalization, Washington, D. C.

PAR. 2. If the certification be desired for use in complying with a statute, the date and citation of the statute concerned shall be stated in the application. If it be desired for use in a judicial proceeding, the application shall set forth the title and character of the proceeding and the court in which it is pending, and shall be accompanied by an order of such court requesting the Commissioner to supply the certification. The application shall state the title and address of the officer or the court to whom the certification shall be sent.

PAR. 3. If the application be for certification of a declaration of intention in lieu of one filed with a petition for citizenship, the application must be accompanied by two photographs of the applicant in accordance with Rule 5.

PAR. 4. No clerk of court shall make any certification of any naturalization records, except upon appropriate order of the court.

[SEAL] JAMES L. HOUGHTELING,
*Commissioner of Immigration and Naturalization.*

[General Order No. 254.]

EXTENSION OF TIME FOR THE NATURALIZATION OF ALIEN VETERANS OF THE WORLD WAR

AMENDMENT OF THE NATURALIZATION REGULATIONS OF DECEMBER 1, 1936

SEPTEMBER 29, 1937.

By virtue of and pursuant to authority conferred by Section 3 of the Act of August 23, 1937 (Public No. 338, Chapter 735—75th Congress), Naturalization Rule 7, Subdivision D, Paragraph 8, is hereby amended to read as follows:

PAR. 8. An alien veteran of the following description may be naturalized under the Act of August 23, 1937 (Public No. 338, Chapter 735—75th Congress), under the following exemptions and special proofs and procedure.

*I. Alien Veterans*

Veterans of the United States

An individual who—

(*a*) Was a member of the military or naval forces of the United States at any time after April 5, 1917, and before November 12, 1918; and

(*b*) Is an alien not ineligible to citizenship; and

(*c*) Was not at any time during the period described in sub-paragraph (*a*) hereof, or thereafter, separated from such forces under other than honorable conditions; and

(*d*) Was not a conscientious objector who performed no military duty whatever or refused to wear the uniform; and

(*e*) Was not at any time during the period described in subparagraph (*a*) hereof, or thereafter, discharged from the military or naval forces on account of his alienage.

Veterans of Allied Countries

An alien who—

(*f*) Was lawfully admitted into the United States for permanent residence and thereafter

(*g*) Departed therefrom between August 1914 and April 5, 1917; or

Departed therefrom subsequent to April 5, 1917, for the purpose of serving; and

(*h*) Actually served prior to November 11, 1918, in the military or naval forces of any of the countries allied with the United States in the World War; and

(*i*) Was discharged from such service under honorable circumstances.

The following countries were allied with the United States during the World War: Belgium, Bolivia, Brazil, China, Costa Rica, Cuba, Czechoslovakia, Ecuador, France, Great Britain, Greece, Guatemala, Haiti, Hejaz, Honduras, Italy, Japan, Liberia, Montenegro, Nicaragua, Panama, Peru, Poland, Portugal, Rumania, Russia, San Marino, Serbia, the Serb-Croat-Slovene State, Siam, and Uruguay.

*II. Exemptions From the Usual Requirements for Naturalization*

(*a*) No declaration of intention is required;

(*b*) Proof of the usual five years' residence in the United States and six months' county residence is not required (see III (*c*));

(*c*) No certificate of arrival is required unless applicant's legal admission to the United States for permanent residence occurred subsequent to March 3, 1924 (see III (*f*));

(*d*) Petition may be filed in the most convenient naturalization court without proof of residence within its jurisdiction;

(*e*) No petition fee is required unless petition is filed in a State court and the laws of such State require a fee, in which case nothing more than the amount required to be paid to the State shall be charged or collected.

*III. Special Proofs and Procedure*

As to Veterans of the United States and Allied Countries

(*a*) Applicant must be residing in the United States;

(*b*) Petition must be filed prior to May 25, 1938;

(*c*) Applicant and his witnesses must appear before the appropriate representative of the Service and pass preliminary examination previous to filing petition. Certification of such examination shall be made by the examiner, in triplicate, on form 2800; and sworn statement shall be made by the applicant, in triplicate, on form 169. One copy of each of said documents shall be attached to each copy of the petition;

(*d*) Applicant must produce competent proof of his service under honorable circumstances with armed forces;

(*e*) Applicant is required to prove at least two years' continuous residence within the United States immediately preceding the filing of the petition for naturalization, such residence being established pursuant to legal admission for permanent residence, in lieu of the usual five years' residence in the United States and six months' county residence;

(*f*) If admission to the United States for permanent residence occurred subsequent to March 3, 1924, a certificate of arrival must be filed with the petition;

(*g*) Applicant must prove that he has behaved as a person of good moral character during the five years immediately preceding the filing of his petition;

(*h*) Applicant must appear and file his petition in person;

(*i*) Residence and good moral character shall be proved either by the affidavits of two credible witnesses who are citizens of the United States or by depositions of two such persons made before a naturalization examiner for each place of residence;

(*j*) Final action shall not be had upon the petition until at least ninety days have elapsed after the filing of the petition;

(*k*) Applicant must take the prescribed oath of allegiance in open court.

As to Veterans of Allied Countries Only

(*l*) Applicant is required to prove that he was and had been a bona fide lawfully admitted resident in the United States for two years before August 23, 1937.

[SEAL] JAMES L. HOUGHTELING,
*Commissioner of Immigration and Naturalization.*

Approved:

FRANCES PERKINS, *Secretary.*

## RECONSTRUCTION FINANCE CORPORATION.

[Circular No. 13 (Revised)]

INFORMATION REGARDING LOANS TO INDUSTRY

For the purpose of maintaining and increasing the employment of labor, Reconstruction Finance Corporation is authorized to make loans, when so secured as reasonably to assure repayment, to solvent industrial or commercial businesses, directly or in cooperation with banks or other lending institutions, or by the purchase of participations.

I. REQUIREMENTS IMPOSED BY LAW

(*a*) The loan can only be made if credit at prevailing bank rates for loans of the character applied for is not otherwise available at banks.

(*b*) The loan must be so secured as reasonably to assure repayment.

(*c*) The loan must mature not later than January 31, 1945.

(*d*) The loan may be made only when deemed to offer reasonable assurance of maintaining or increasing the employment of labor.

(*e*) The borrower must be solvent at the time of disbursement of the loan.

(*f*) The loan is subject to such other terms, conditions and restrictions as may be determined by Reconstruction Finance Corporation.

II. TERMS, CONDITIONS, AND PURPOSES

Loans to industry will be made by this Corporation upon the following terms and conditions, and for the following purposes:

*A. Maturities*

Such loans shall mature at such time, prior to January 31, 1945, as Reconstruction Finance Corporation may in each case determine. A program of payments will be arranged with a view to the borrower's orderly liquidation of its debt.

It is contemplated that loans will not be made for a longer term than is justified by the facts of the particular case. However, the period of time so determined will be sufficient, in so far as can be estimated at the time the loan is granted, to enable the borrower to make plans for the development of future business without being unnecessarily restricted by a repayment schedule which would impair the borrower's working capital during the life of the loan. When loans are primarily to finance capital expenditures, a repayment program up to January 31, 1945, may be considered. For established industries whose need is principally for shorter term credit, such loans usually should be repaid within five years or less.

*B. Interest Rates*

Interest shall be at such rate as may be fixed from time to time by this Corporation.

*C. Purposes*

As Section 5d of the Reconstruction Finance Corporation Act, as amended, provides that loans thereunder shall be made for maintaining and increasing the employment of labor, this Corporation will make industrial loans for the following purposes:

(*a*) *Loans for labor and materials.*—This Corporation will give consideration to applications for loans, the proceeds of which will be used for the payment of labor and the purchase of material required in the operation of a business.

(*b*) *Loans to pay existing indebtedness and taxes.*—This Corporation will give consideration to applications for loans where a portion of the proceeds is to be applied to the payment of taxes and existing indebtedness. Applications for loans will be considered where a substantial portion of the proceeds is to be used to satisfy existing indebtedness on a compromise basis satisfactory to this Corporation, provided it is shown that the loan is necessary to maintain the employment of labor, that the applicant, after the debt adjustment (which may be made either by compromise settlement in full satisfaction of the debt, or by partial payment in cash and the issuance of junior obligations or equity securities), will have sufficient operating assets, and that there is reasonable assurance of continuous operation.

(*c*) *Loans for the purchase of machinery.*—This Corporation will give consideration to applications for loans when the proceeds will be used for the replacement of obsolete or worn out machinery or for the purchase of additional machinery, provided it is shown that such capital expenditures are necessary for efficient operation and are economically sound.

(*d*) *Loans for new enterprises and for the expansion of existing businesses.*—This Corporation will consider applications for loans to new industries or to enable established business concerns to expand into new fields of endeavor, provided it can be shown that such loans will be economically sound and socially desirable. Applicants must have substantial equity investment, without giving consideration to services rendered, patents, good-will, or similar intangibles, or to the potential value which will be established if the operations are successful, so that the funds advanced by this Corporation will be secured as required by law and will not be subject to the risks incident to and properly borne by equity investors. The new enterprise must be sufficiently beyond the developmental or promotional stage that profitable future operations, and therefore continuous employment of labor, can reasonably be assured. Also, it will be required that after giving effect to the loan from this Corporation the applicant will have working capital adequate to assure continuous operation. The collateral value of the security, the net worth and financial condition of the applicant, and future earning prospects will be considered carefully.

(*e*) *Loans to finance industrial construction.*—When a loan from this Corporation is to be used in whole or in part to finance industrial construction, this Corporation may advance funds for this purpose as the construction progresses, provided the initial advances shall be satisfactorily secured by existing assets of the applicant. Final disbursement will be made on the completion of the new industrial property free from all liens other than this Corporation's mortgage. In all such cases, it will be necessary to show that either out of the current assets of the company or out of the proceeds of this Corporation's loan, sufficient funds have been provided to complete the construction and to provide working capital adequate to insure continuous operation.

It is not the intention of this Corporation to make loans:

(*a*) To provide for the operation of any business in receivership, though applications will be considered for loans contingent upon the termination of the receivership, by settlement with creditors or otherwise, upon a basis which will restore the business to a solvent condition.

(*b*) To finance imports or exports, except where such imports or exports are only minor and incidental to the general business conducted.

(*c*) To finance the development or purchase of new inventions, the cost of obtaining patents, the expense of infringement suits or any other litigation.

III. ELIGIBILITY

Applications for loans will be received from industrial and commercial businesses (including the fishing industry), whether corporations, partnerships or individuals. It is the view of this Corporation that the purpose of such loans, as expressed by Congress, i. e. "maintaining and increasing the employment of labor", necessitates a construction which emphasizes the employment of labor, as in manufacturing concerns, as distinguished from the purchase of inventories, as in commercial business.

Loans to the ore industries will be made under the provisions of this Corporation's Circular No. 14 and not under the provisions of this Circular.

Loans to institutions for the exclusive purpose of financing the carrying and orderly marketing of agricultural commodities will be made only under the provisions of this Corporation's Circular No. 10.

Information regarding loans to institutions financing principally the sale of electrical, plumbing or air conditioning appliances or equipment or other household appliances, may be obtained from this Corporation upon request.

Loans on real estate which is not owned by and used in connection with the operation of an industrial or commercial business will not be considered under the provisions of this Circular. Information concerning such loans may be obtained from The RFC Mortgage Company, Washington, D. C.

IV. SECURITY REQUIREMENTS

Section 5d of the Reconstruction Finance Corporation Act, as amended, requires that all loans made thereunder shall be "so secured as reasonably to assure repayment of the loans." Loans should be secured by collateral of character and amount which, considered in connection with other factors such as the character and ability of the management and prospective earnings, will afford reasonable assurance of repayment.

The security may consist of one or more of the following: a first mortgage on real estate, plant and equipment, an assignment of warehouse receipts for marketable merchandise stored in satisfactory warehouses, a first mortgage on chattels or an assignment of current receivables (accounts, notes or trade acceptances). Such loans will not be made on the sole security of unsecured receivables, or of receivables representing non-industrial instalment purchases, or of equipment or other chattels not represented by warehouse receipts. The applicant may offer, as additional collateral, a first lien on any other assets of sound value.

This Corporation usually will not consider as satisfactory primary security the following: second mortgages, franchises, patents, good-will, foreign securities, a mortgage on property owned and occupied as his home by an individual borrower, shares of stock of corporate applicants, or shares of stock

without readily ascertainable market value. An assignment of orders will not constitute satisfactory primary security, though such orders may be important to establish the ability of the applicant to repay the loan. A pledge or mortgage of inventories generally will not be regarded as satisfactory collateral, unless stored in a bonded or otherwise acceptable warehouse, or unless the applicable State law provides for creating and maintaining a satisfactory lien upon inventory not so warehoused.

V. SOLVENCY

Section 5d of the Reconstruction Finance Corporation Act, as amended, provides that such loans shall be made only when, in the opinion of the Board of Directors of this Corporation, the applicant is solvent. If the applicant is not solvent at the time of making application, the application should indicate the manner in which the applicant will become solvent prior to the time of disbursement of the proposed loan.

VI. CHARGES, COMMISSIONS, BONUSES, FEES, ETC.

Payment of bonuses, fees or commissions for the purpose of, or in connection with, obtaining loans is strictly prohibited. However, the borrower, subject to the prior approval of this Corporation, may be allowed to pay the actual reasonable costs incurred in the making of the loan. Such charges may include reasonable compensation for services rendered by attorneys, appraisers, accountants, etc., but not in any event for alleged services in connection with the presentation of the application to this Corporation. All charges must be fully disclosed. A fee based upon a percentage of the loan will be objected to, as also will fees or charges made contingent upon the obtaining of the loan. Applicants will be required to furnish satisfactory proof in the application that no bonus, fee or commission has been or will be paid, and that no compensation, other than reasonable compensation for services required in making the loan, fully disclosed and itemized, has been or will be paid.

VII. SALARIES AND DIVIDENDS

As required by law, the applicant must agree that, so long as any portion of the loan remains outstanding, it will not pay compensation to any officer, director or employee at a rate in excess of that which appears reasonable to this Corporation.

So long as any portion of the loan remains outstanding, no dividends may be paid by any corporate applicant nor any distribution (except reasonable compensation for services) made by partnership or individual applicants, without the consent of this Corporation.

VIII. AUDITS AND APPRAISALS

In connection with preliminary applications, the Loan Agencies of this Corporation do not require audits or appraisals. With each formal application, an appraisal of plant and equipment, by an appraiser for this Corporation, or otherwise, satisfactory to the Manager of the Loan Agency, should be arranged for (if not already available as of a date not more than 6 months preceding the date of filing of the application), but only upon and in accordance with request of the Manager of the Loan Agency.

Independent audits usually are not required in the case of loans of $25,000 or less, when the applicant furnishes satisfactory sworn financial statements. An audit of the applicant, by an auditor for this Corporation or a satisfactory independent auditor, as of a date not more than 6 months prior to date of application, will ordinarily be required prior to disbursement in connection with an approved loan of more than $25,000, but should be arranged for only upon request of the Manager of the Loan Agency.

IX. LOANS IN COOPERATION WITH BANKS OR OTHER LENDING INSTITUTIONS, AND PURCHASES OF PARTICIPATIONS IN LOANS

This Corporation will receive applications from Federal Reserve Banks or other banks for the purchase by this Corporation of participations in loans of the character described in this Circular, made by such banks, and will make such loans in cooperation with Federal Reserve Banks, or other banks or lending institutions, when such loans are for the purposes and in accordance with the terms and conditions set forth in this Circular.

The provision for the purchase of participations is interpreted by this Corporation as permitting Federal Reserve Banks, or other banks, to complete loans in their own names to qualified industrial borrowers, thus maintaining the normal relationship of banker and customer. The lending bank may feel that the loan required is, for one reason or another, too large for the bank to carry, and may desire that this Corporation participate in the risk. Provided any such loan is made after consideration and approval by this Corporation of the purchase of a participation therein, and is in accordance with the terms and conditions set forth in this Circular, this Corporation has authority to purchase a participation in such loan from the lending bank or to make an agreement to purchase if requested to do so within a specified time.

The Comptroller of the Currency has ruled that the Act of Congress of June 19, 1934, relating to industrial loans (which Act was amended by the Act of January 31, 1935), was intended to expand the scope of the lending power of national banks so as to permit a national bank to make a loan under said Act which exceeds or departs from the restrictive provisions of the United States Revised Statutes, Section 5200, as amended, and the Federal Reserve Act, Section 24, provided that the national bank has obtained a commitment from Reconstruction Finance Corporation or a Federal Reserve Bank to take, within a specified period, a portion of said loan so that the net amount of the national bank's participation, after giving effect to the commitment, would be within the limitations imposed by the aforesaid restrictive provisions.

This Corporation will also cooperate with Federal Reserve Banks or other banks or lending institutions in making such loans; for instance, by making a loan directly to the borrower at the same time that another loan is made by the bank or other lending institution, or by other mutually satisfactory arrangements which will bring about cooperation between existing financial institutions and this Corporation in lending money.

This Corporation invites the cooperation of banks or other lending institutions in making loans under the program outlined herein, in the hope that such banks ultimately will take the entire loan, when conditions and the credit risk justify.

Further information concerning such participation agreements between this Corporation and lending banks may be obtained from this Corporation's Circular No. 15.

X. INFORMATION TO BE FILED AND METHOD OF FILING

Preliminary application forms and formal application forms may be obtained from the Loan Agency of Reconstruction Finance Corporation serving the district in which the applicant is located. (See list of such Loan Agencies below, and map showing Loan Agency districts on page 2073.) Preliminary application forms, requiring a minimum amount of information, and without audit or appraisals, will be considered by the Loan Agencies, in order that applicants may be spared the trouble and expense of filing a formal application where clearly not warranted by the circumstances.

Applications should be filed with the Loan Agency serving applicant's district. No application will be received directly at the Washington office of this Corporation.

All requests for information should be directed to the local Loan Agency of this Corporation serving applicant's district and not to the Washington office.

Each Loan Agency of this Corporation will, when requested, assist and advise with applicants in determining their eligibility, and in the preparation of applications; provided, however, that any such assistance, advice, or suggestions by such Agencies shall in no sense be considered as a commitment of Reconstruction Finance Corporation to make the loan.

In addition, this Corporation maintains a Special Representative at San Juan, Puerto Rico, through whom all applications from Puerto Rico should be forwarded.

XII. ACTS OF CONGRESS APPLICABLE TO LOANS OF THE CHARACTER HEREIN DESCRIBED

The following sections of the Reconstruction Finance Corporation Act, as amended, applicable to such loans, are quoted for the information of prospective borrowers:

SEC. 5d. For the purpose of maintaining and increasing the employment of labor, when credit at prevailing bank rates for the character of loans applied for is not otherwise available at banks, the Corporation is authorized and empowered to make loans to any industrial or commercial business, which shall include the fishing industry, and to any institution, now or hereafter established, financing principally the sale of electrical, plumbing or air conditioning appliances or equipment or other household appliances, both urban and rural. Such loans shall, in the opinion of the board of directors of the Corporation, be so secured as reasonably to assure repayment of the loans, may be made directly, or in cooperation with banks or other lending institutions, or by the purchase of participations, shall mature not later than January 31, 1945, shall be made only when deemed to offer reasonable assurance of continued or increased employment of labor, shall be made only when, in the opinion of the board of directors of the Corporation, the borrower is solvent, shall not exceed $300,000,000 in aggregate amount at any one time outstanding, and shall be subject to such terms, conditions, and restrictions as the board of directors of the Corporation may determine.

The power to make loans given herein shall terminate on January 31, 1937,[1] or on such earlier date as the President shall by proclamation fix; but no provision of law terminating any of the functions of the Corporation shall be construed to prohibit disbursement of funds on loans and commitments, or agreements to make loans, made under this section prior to January 31, 1937, or such earlier date.

* * * * * * *

The following sections of the Reconstruction Finance Corporation Act, as amended, are applicable to loans under Section 5d of the Reconstruction Finance Corporation Act, as amended:

SEC. 16. (a) Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any loan, or extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the corporation, or for the purpose of obtaining money, property, or anything of value, under this Act, shall be punished by a fine of not more than $5,000 or by imprisonment for not more than two years, or both.

(b) Whoever (1) fasely makes, forges, or counterfeits any note, debenture, bond, or other obligation, or coupon, in imitation of or purporting to be a note, debenture, bond, or other obligation, or coupon, issued by the corporation, or (2) passes, utters or publishes, or attempts to pass, utter or publish, any false, forged or counterfeited note, debenture, bond, or other obligation, or coupon, purporting to have been issued by the corporation, knowing the same to be false, forged or counterfeited, or (3) falsely alters any note, debenture, bond, or other obligation, or coupon, issued or purporting to have been issued by the corporation, or (4) passes, utters or publishes, or attempts to pass, utter or publish, as true any falsely altered or spurious note, debenture, bond, or other obligation, or coupon, issued or purporting to have been issued by the corporation, knowing the same to be falsely altered or spurious, or any person who willfully violates any other provision of this Act, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

* * * * * * *

(e) The provisions of sections 112, 113, 114, 115, 116, and 117 of the Criminal Code of the United Sates (U. S. C., title 18, ch. 5, secs. 202 to 207, inclusive) in so far as applicable, are extended to apply to contracts or agreements with the corporation under this Act, which for the purposes hereof shall be held to include loans, advances, discounts, and rediscounts; extensions and renewals thereof; and acceptances, releases, and substitutes of security therefor.

The following section of Public Act No. 35, Seventy-third Congress, is applicable to loans referred to in this circular:

SEC. 4. The Reconstruction Finance Corporation shall not make, renew, or extend any loan under the Reconstruction Finance Corporation Act, as amended, or under the Emergency Relief and Construction Act of 1932, (1) if at the time of making, renewing, or extending such loan any officer, director, or employee of the applicant is receiving compensation at a rate in excess of what appears reasonable to the Reconstruction Finance Corporation, and (2) unless at such time the applicant agrees to the satisfaction of the Corporation not to increase the compensation of any of its officers, directors, or employees to any amount in excess of what appears reasonable to the Reconstruction Finance Corporation while such loan is outstanding and unpaid. For the purposes of this section the term "compensation" includes any salary, fee, bonus, commission, or other payment direct or indirect, in money or otherwise for personal services.

This revised circular was approved by the Executive Committee of the Reconstruction Finance Corporation on August 4, 1937.

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 30th day of September, 1937.

[File No. 1-2391]

IN THE MATTER OF GENERAL ITALIAN EDISON ELECTRIC CORPORATION, AMERICAN SHARES REPRESENTING ORDINARY SHARES OF CAPITAL STOCK, AND THE UNDERLYING ORDINARY SHARES OF CAPITAL STOCK, 200 LIRA PAR VALUE

ORDER GRANTING APPLICATION TO STRIKE FROM LISTING AND REGISTRATION

The New York Stock Exchange, pursuant to Section 12 (d) of the Securities Exchange Act of 1934, as amended, and Rule JD2 promulgated thereunder, having made application to strike from listing and registration the American Shares representing Ordinary Shares of Capital Stock of General Italian Edison Electric Corporation, and the Underlying Ordinary Shares of Capital Stock, 200 Lira Par Value, of such corporation; and

After appropriate notice, a hearing having been held in this matter; and

The Commission having considered said application together with the evidence introduced at said hearing, and having due regard for the public interest and the protection of investors;

*It is ordered*, That said application be and the same is hereby granted, effective at the close of the trading session on October 11, 1937.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary.*

## PRESIDENT OF THE UNITED STATES.

EXECUTIVE ORDER

EXTENSION OF TRUST PERIODS ON INDIAN LANDS EXPIRING DURING CALENDAR YEAR 1938

By virtue of and pursuant to the authority vested in me by section 5 of the act of February 8, 1887, 24 Stat. 388, 389, by the act of June 21, 1906, 34 Stat. 325, 326, and by the act of March 2, 1917, 39 Stat. 969, 976, it is hereby ordered that the periods of trust applying to any Indian lands, whether of a tribal or individual status, which, unless extended, will expire during the calendar year 1938, be, and they are hereby, extended for a further period of 25 years from the date on which any such trust would otherwise expire.

This order is not intended to apply to any case in which the Congress has specifically reserved to itself authority to extend the period of trust on tribal or individual Indian lands.

**Bureau of Customs.**

[T. D. 49172]

CONVICT LABOR

FINDING WITH RESPECT TO RAILROAD TIES, WOODEN FENCE POSTS AND CHARCOAL PRODUCED ON LA SAONA ISLAND, DOMINICAN REPUBLIC, REVOKED

*To Collectors of Customs and Others Concerned:*

Reference is made to Treasury Decision 48646, approved November 17, 1936, publishing a finding, by authority of section 307 of the Tariff Act of 1930 (U. S. C., title 19, sec. 1307) and pursuant to article 665 of the Customs Regulations of 1931, that convict labor is used in the production of railroad ties, wooden fence posts and charcoal on La Saona Island, Dominican Republic.

The Bureau is in receipt of communications from the Minister of the Government of the Dominican Republic at Washington in which he states that he is authorized by his Government to say that—

"* * * the Dominican Government does not use and never has used prisoners on the work of the private enterprises established on the Island of Saona, or to produce articles of commerce for the Dominican Government."

In view of the official statements set forth above the finding published in the Treasury Decision 48646 is hereby revoked effective November 17, 1936.

## WAR DEPARTMENT.

AMENDMENT TO RULES AND REGULATIONS TO GOVERN THE OPERATION OF THE DRAWBRIDGES CROSSING ALL NAVIGABLE WATERWAYS OF THE UNITED STATES WITHIN THE STATE OF CALIFORNIA

Paragraph 8 of the Rules and Regulations to govern the operation of the drawbridges crossing all navigable waterways of the United States within the State of California approved March 4, 1936, is hereby amended by inserting the following subparagraph after the first subparagraph on page 4 of said Rules and Regulations:

LOS ANGELES-LONG BEACH HARBORS, HENRY FORD AVENUE (FORMERLY BADGER AVENUE) BRIDGE

*Closed periods.*—Between the hours of 7 a. m. and 8:30 a. m., and 4 p. m. and 5:30 p. m. daily except Saturdays and Sundays, and between the hours of 7 a. m. and 8:30 a. m., and 12 noon and 1:30 p. m. on Saturdays, the draw shall not be opened for the passage of vessels smaller than 150 tons gross displacement except police or fire boats, commercial tugboats, or vessels employed or controlled by the State of California and the United States Government.

Approved, September 23, 1937.

[SEAL] HARRY H. WOODRING,
*Secretary of War.*

FRANK C. BURNETT,
*Brigadier General,*
*Acting The Adjutant General.*

*First Assistant Secretary.*

[F. D. Doc. 37-2924; Filed, October 1, 1937; 9:40 a. m.]

General Land Office.

[Circular No. 1436]

AMENDMENT OF REGULATIONS GOVERNING EXCHANGES OF STATE LANDS

SEPTEMBER 16, 1937.

*Registers, U. S. Land Offices.*

SIRS: In order to provide that upon the filing of State-exchange applications under section 8 of the Taylor Grazing Act, as amended,[1] copies of such applications be forwarded directly to the proper Special Agents in Charge, Division of Investigations, paragraphs 2 and 3 of Circular No. 1398, approved July 22, 1936, are hereby amended to read as follows:

2. *Action by the Register.*—If the application for exchange appears regular and in conformity with the law and these regulations, the register will assign the current serial number thereto, and, after making appropriate notations upon his records, will transmit the original copy of the application to the General Land Office, together with a report as to any conflicts of record, transmitting the triplicate copy of each application to the proper Special Agent in Charge, Division of Investigations, together with a carbon copy of his report as to conflicts of record. If the selected lands are within a grazing district the Register will transmit the duplicate copy of the application to the Director of Grazing, who will report to the Commissioner of the General Land Office as to whether in his opinion the selected lands are so located as not to interfere with the administration or value of the remaining lands in the district for grazing purposes within the meaning of the act.

An application for exchange will be noted "suspended" by the register and unless disallowed, the lands applied for in exchange will be segregated upon the records of the district land office and General Land Office, and will not be subject to other appropriation, application, selection, or filing.

Circular No. 1384, approved April 15, 1936, is hereby revoked insofar as it pertains to exchanges by a State under section 8 of the Grazing Act, as amended.

3. *Action of the General Land Office.*—When an exchange is based upon equal values, upon receipt of a favorable report from the Director of Grazing (where the selected lands are within a grazing district), all else being regular, the Commissioner of the General Land Office will request the Director of Investigations to have a field investigation made for the purpose of determining the values of the offered and selected lands; whether the selected lands are occupied, improved, cultivated, or claimed by anyone adversely to the State; whether the selected lands contain minerals, timber, springs, water holes, hot or medicinal springs, or any special features which should be considered in acting on the application; and whether the reservation which the State desires to make in the offered lands, if any, together with the contemplated use of such reservation, will in any way affect adversely the administration of the grazing district, if the offered lands are within a grazing district. The field examination should be made as soon as possible, and report and special recommendation should be submitted to the General Land Office.

When an exchange is based upon equal areas, if a field examination is found necessary to determine the character of the selected lands as to mineral or springs or water holes, the Director of Investigations will be requested to have a field investigation made for either or both of such purposes.

Very respectfully,

FRED W. JOHNSON, *Commissioner.*

Approved, September 16, 1937.

T. A. WALTERS,
*First Assistant Secretary.*

[1] 48 Stat. 1269; 49 Stat. 1976.

National Bituminous Coal Commission.

[Order No. 54]

AN ORDER REQUIRING DISTRICT BOARD NO. 15 TO CONVENE IN THE CITY OF WASHINGTON, D. C.

Pursuant to Act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

1. That District Board No. 15 shall convene in the Hearing Room of the Commission at the Carlton Hotel, Washington, D. C., on the 4th day of October, 1937, at ten o'clock A. M.

2. That all members of District Board No. 15 are ordered and directed to be in attendance at such meeting, and the Secretary of the Board is hereby directed and required to give notice of such meeting in conformity with the by-laws of the Board.

3. The District Board shall bring with it all pertinent data upon which proposed minimum prices may be computed and all other data necessary for coordination.

4. That at the meeting provided for and required by this order the District Board shall give consideration to and take action on such matters as in the judgment of the Commission are necessary to give full effect to Order No. 42 of the Commission.

The Secretary of the Commission shall forthwith telegraph this order and at the same time mail a copy thereof to the Secretary of District Board No. 15.

By order of the Commission.

Dated this 30th day of September, 1937.

[SEAL] F. WITCHER MCCULLOUGH, *Secretary.*

[F. R. Doc. 37-2927; Filed, October 1, 1937; 10:30 a. m.]

## DEPARTMENT OF AGRICULTURE.

Farm Security Administration.

[Memorandum No. 738]

APPOINTMENT OF THE BOARD OF DIRECTORS OF THE FARMERS' HOME CORPORATION AND DELEGATION OF AUTHORITIES TO THE ADMINISTRATOR OF THE FARM SECURITY ADMINISTRATION

SEPTEMBER 30, 1937.

Pursuant to the powers vested in me by the Bankhead-Jones Farm Tenant Act, it is hereby ordered as follows:

1. Harry L. Brown, now Assistant Secretary of Agriculture; A. G. Black, now Chief of the Bureau of Agricultural Economics; and Will W. Alexander, now Administrator of the Farm Security Administration, are hereby appointed as the Board of Directors of the Farmers' Home Corporation created by Section 40 (a) of said Act. The Board of Directors of the Farmers' Home Corporation shall act as general adviser to the Secretary and to the Administrator of the Farm Security Administration on general policies relating to Titles I and II of said Act, and shall further advise the Secretary with respect to the coordination of the program authorized by said Titles I and II with the general work of the Department. The Corporation shall exercise such further powers and functions as may from time to time be assigned to it by my further order.

2. The administration of Title I of the Bankhead-Jones Farm Tenant Act and related provisions of Title IV of that Act, is hereby entrusted to the Administrator of the Farm Security Administration, subject to the supervision of the Secretary.

3. In administering the provisions of Title I of the Act, the Administrator shall utilize personnel, property, and equipment of the Farm Security Administration and the technical assistance of the various bureaus of the Department and the Land Grant Colleges, including their experiment stations and extension services. Within the limits of available resources the various bureaus and divisions of the Department shall make available to the Administrator such information and advice as may be helpful in carrying out the program.

4. The Administrator shall issue from time to time such procedural orders and instructions, not inconsistent with the regulations and requirements of the Department of Agriculture, as may be necessary in the administration of the program authorized by said Title I. The county committees shall be governed by the procedure and forms provided for in such orders and instructions.

5. The Administrator may delegate to any person within the Farm Security Administration the functions hereby vested in him, except determinations of general policy and the issuance of procedural orders and instructions of general application, and the power to compromise claims in accordance with Section 41 (g) of said Act.

[SEAL] H. A. WALLACE, *Secretary.*

## DEPARTMENT OF LABOR.

Immigration and Naturalization Service.

[Seventh Amendment to General Order No. 228]

PORTS FOR THE ENTRY OF ALIENS INTO THE UNITED STATES

MOREHEAD CITY, NORTH CAROLINA

SEPTEMBER 30, 1937.

By virtue of and pursuant to the authority conferred by Section 23 of the Immigration Act of 1917 (Act of February 5, 1917, 39 Stat. 892: U. S. C., Ti. 8, Sec. 102), and Executive Order No. 6166, dated June 10, 1933, Morehead City, North Carolina, is hereby designated as a port for the entry of aliens into the United States.

Paragraph 1, Subdivision A, Rule 3 of the Immigration Rules of January 1, 1930, as amended up to and including December 31, 1936, and subsequent thereto by General Order No. 228, dated December 21, 1935, and amendments thereto, is amended by inserting Morehead City, North Carolina, between Baltimore, Maryland, and Wilmington, North Carolina, in the list of ports of entry for aliens in District No. 5.

[SEAL] JAMES L. HOUGHTELING,
*Commissioner of Immigration and Naturalization.*

Approved:

FRANCES PERKINS,
*Secretary.*

[F. R. Doc. 37-2928; Filed, October 1, 1937; 10:56 a. m.]

## FEDERAL TRADE COMMISSION.

AMENDMENT TO RULES OF PRACTICE

REPORTS OF COMPLIANCE WITH ORDERS OF COMMISSION

The Commission today amended Rule XXII of its Rules of Practice, said Rule XXII to read as follows:

"In every case where an order is issued by the Commission for the purpose of preventing violations of the law, the respondent or respondents therein named shall file with the Commission, within the time specified in said order, a report, in writing, setting forth in detail the manner and form in which respondent or respondents have complied with the said order of the Commission. *Within its sound discretion the Commission may require any such respondent or respondents from time to time thereafter, to file further reports in writing, setting forth in detail the manner and form in which they are complying with the said order.*

"Reports of compliance shall be signed, in ink, by respondent or attorneys for respondent."

## VETERANS' ADMINISTRATION.

REVISION OF REGULATIONS

DEFINITIONS OF RELATIONSHIP

*General Law*

R-2502. For the purposes of the General Law the following definitions of relationships shall govern in the adjudication of claims for death pension:

(*a*) *Widow.*—The term "widow" shall mean a person who was married to the veteran at any time prior to the death of the veteran. Except when service was rendered in the War with Spain, continuous cohabitation to date of death of the veteran is required in marriages entered into subsequent to March 2, 1899, unless the marriage was entered into prior to or during service. (30 Stat. 1380.) (See R. & P. R-2515.) (August 16, 1937.) (Public No. 304, 75th Congress.)

*Indian Wars*

R-2504. For the purposes of the Acts of March 4, 1917 (39 Stat. 1199), and March 3, 1927 (44 Stat. 1361), the following definitions of relationships shall govern in the adjudication of claims for death pension:

(*a*) *Widow.*—The term "widow" shall mean a person who was married to the veteran prior to March 4, 1917. Continuous cohabitation to date of death of the veteran is required in marriages entered into subsequent to March 2, 1899. (30 Stat. 1380.) (See R. & P. R-2515.) (August 16, 1937.) (Public No. 304, 75th Congress.)

*Civil War*

R-2506. For the purposes of any service pension law granting pension to widows, remarried widows and children of veterans of the Civil War, the following definitions of relationship shall govern in the adjudication of claims for death pension:

(*a*) *Widow.*—The term "widow" shall mean a person who was married to the veteran prior to June 27, 1905. However, the $50 rate provided for in the Act of July 3, 1926, is payable only when the widow was the wife of the veteran during his Civil War service. Continuous cohabitation to date of death of the veteran is required in marriages entered into subsequent to March 2, 1899. (30 Stat. 1380.) (See R. & P. R-2515.) (August 16, 1937.) (Public No. 304, 75th Congress.)

*Spanish American War, Boxer Rebellion and Philippine Insurrection*

R-2512. For the purposes of Section 30, Title III, Public No. 141, 73d Congress (Act of March 28, 1934), and Public No. 269, 74th Congress (Act of August 13, 1935), the following definitions of relationship shall govern in the adjudication of claims for death pension:

(*a*) *Widow.* (1) For the purposes of the Act of July 16, 1918 (40 Stat. 903), as reenacted by Public No. 269, 74th Congress (Act of August 13, 1935), the term "widow" shall mean a person who was married to the veteran prior to July 16, 1918. Except when service was rendered in the War with Spain continuous cohabitation to date of death of the veteran is required in marriages entered into subsequent to March 2, 1899, unless the marriage was entered into prior to or during service (30 Stat. 1380). (See R. & P. R-2515.) (August 16, 1937.) (Public No. 304, 75th Congress.)

(2) For the purposes of the Act of September 1, 1922 (42 Stat. 834), and the Act of May 1, 1926 (44 Stat. 382), as reenacted by Section 30, Title III, Public No. 141, 73d Congress (Act of March 28, 1934), and Public No. 269, 74th Congress (Act of August 13, 1935), the term "widow" of a veteran of the Spanish-American War, the Boxer Rebellion, or the Philippine Insurrection, shall mean a person who was married to the veteran prior to September 1, 1922. Except when service was rendered in the War with Spain continuous cohabitation to date of death of the veteran is required in marriages entered into subsequent to March 2, 1899, unless the marriage was entered into prior to or during service (30 Stat. 1380). (See R. & P. R-2515.) (August 16, 1937.) (Public No. 304, 75th Congress.)

*Continuous Cohabitation*

R-2515. The requirement of any law administered by the Veterans Administration that there must have been continuous cohabitation from the date of marriage to the date of death of the veteran will be considered as having been met when the evidence shows there was no separation due to the fault of the widow. If the parties by mutual consent lived apart for purposes of convenience, health, business, or any other reason which did not show an intent on the part of the widow to desert her husband, the continuity of the cohabitation will not be considered as having been broken. Temporary separations which naturally occur in the ordinary course of life, including those caused for the time being through fault on the part of either party, will not break the continuity of the cohabitation. State laws will not control in determining questions of desertion. Due weight will be given to findings of fact in court decisions made during the life of the veteran on issues subsequently involved in the application of this paragraph, but such findings will not be conclusive as to determinations to be made by the Veterans Administration. (August 16, 1937.) (Act of March 3, 1899 (38 U. S. C. 192) and Public No. 304, 75th Congress.)

[SEAL] FRANK T. HINES,
*Administrator of Veterans' Affairs.*

REVISION OF REGULATIONS

INSTITUTIONAL AWARDS

R-1276. When an incompetent or insane disabled person entitled to disability compensation, pension or emergency officers retirement pay is a patient in a hospital or institution, payments on his account may be made by means of an institutional award in accordance with the following:

(*a*) When no guardian has been appointed or when payments to an unsatisfactory guardian have been stopped or suspended.

(*b*) When a guardian neglects or refuses to furnish the chief officer of the hospital or institution with funds required for the disabled person's comforts and desires not included in the regular support, care, treatment and maintenance of the disabled person provided by the institution.

(*c*) When a guardian requests that an institutional award be made or continued.

(*d*) In either event, in accordance with the provisions of paragraph VI of Veterans' Regulation No. 6 (c) there may be paid to the chief officer in behalf of the disabled person the $15 or $6 per month payable, or in the event the veteran has dependents and more is payable under his disability rating or there are funds to his credit in "Funds Due Incompetent Beneficiaries", such additional amount as may be needed will be allowed, on the basis of a certification by the chief officer of the hospital or institution with respect to the need and the amount required and a certification by the chief attorney concerned as to the neglect or refusal of the guardian to supply necessary funds. Accordingly, in such cases there may be awarded to the chief officer of the hospital or institution (for definition of chief officer see R. & P. R-1277) as provided above, any amount necessary for the disabled person's comforts and desires not included in the regular support, care, treatment and maintenance of the disabled person provided by the hospital or institution. Any benefits payable on account of the disabled person not paid to the chief officer of the institution or to the guardian or not apportioned to a dependent or dependents will be paid into the "Funds Due Incompetent Beneficiaries". Any excess fund in the hands of the chief officer at the end of each accounting period, which he may deem unnecessary for expenditure for the benefit of the disabled person, will be returned to the Veterans' Administration or to the guardian, if one is serving.

(*e*) Where no guardian has been or is to be appointed, or when payments to an unsatisfactory guardian have been stopped or suspended, as indicated in sub-paragraph (*a*), apportionment to dependents will be under R. & P. R-1315. (October 1, 1937.) (Veterans' Regulation No. 6 (c)).

## TREASURY DEPARTMENT.

**Federal Alcohol Administration Division.**

DECISION ON REUSED COOPERAGE HEARING CONDUCTED JUNE 28, 1937

OCTOBER 1, 1937.

*To All Bottlers of Distilled Spirits:*

On June 28, 1937, the Administration conducted a public hearing in Washington for the purpose of taking evidence upon a proposal to amend Regulations No. 5, relating to the labeling and advertising of distilled spirits, in such manner as to require the labels for American type whiskey, other than corn whiskey, produced on or after July 1, 1936, and stored in reused cooperage, to bear the following statement, or some similar statement: "This whiskey was stored in reused cooperage and is not entitled to claim age under government regulations."

With respect to American type whiskey, other than corn whiskey, produced on or after July 1, 1936, and stored in reused cooperage, the regulations as originally issued in January, 1936, and as now in effect, do not require or permit the labels for such products to contain any statement with reference to the age thereof. In thus restricting the use of age claims to whiskey stored in new oak containers, the Administration relied upon evidence adduced at public hearings to the effect that American type whiskey stored in new oak containers matures more satisfactorily and more uniformly than whiskey stored in second-hand barrels, and that consumers can be assured of uniform quality only when new containers are used.

It was upon this premise, to which the Administration still adheres, and with a view to complying with the mandate of Congress as expressed in Section 5 (e) of the Federal Alcohol Administration Act, that the regulations as originally issued differentiated, for the protection of the consuming public, between whiskey stored in new and second-hand containers. As a result of this action the following privileges have incidentally accrued to the benefit of those who use new cooperage:

(1) The exclusive right to market their product as "straight whiskey", "straight rye whiskey", "straight bourbon whiskey" and "a blend of straight whiskies"; and the denial of the designation "straight", in any form, to whiskey stored in second-hand cooperage.

(2) The exclusive right to use their product as a base for the production of "blended whiskey", "blended rye whiskey", "blended bourbon whiskey" and all other types of blends, under standards of identity which require all blended whiskies to contain a minimum of 20% straight whiskey, namely, whiskey which has been stored and aged in new barrels.

(3) The exclusive right to claim age for their product, on the label thereof and in the advertising matter relating thereto; with a resulting denial to the used cooperage user of any permission to claim for his product, either upon the label or in advertising matter, any age or maturity.

With full advance notice of these requirements of the labeling regulations a large majority of the distillers of the United States, on and after July 1, 1936, used only new oak containers. As a result, they will expect to derive the marketing advantages accruing from such use. On the other hand a comparatively small number of distillers, with equal notice of the regulations, chose to use, either wholely or in part, second-hand barrels for storage purposes. Some of the distillers in the latter category decided upon reused cooperage, feeling that their particular type of product was better in quality by reason of such storage than if new barrels were used. However, many of the second-hand barrel users resorted to the use of such barrels solely for competitive purposes. It appears from reports filed with the Administration by the distilling industry that there were in storage, in bonded warehouses in the United States, on July 1, 1937, approximately 8,905,715 barrels of American type whiskey. Of this quantity 279,855 barrels, or approximately 3 per cent of all American type whiskey then in storage, consisted of whiskey, other than corn whiskey, which was produced on or after July 1, 1936 and stored in reused cooperage.

It was represented to the Administration in June, 1937, that the existing regulations permitted this used cooperage whiskey to compete unfairly with whiskey stored in new barrels. In this connection it was said that retail dispensers of liquor, in the absence of explanatory label information, were in a position to make extravagant claims with respect to the characteristics of the product. It was upon the basis of this representation that the Administration, with a view to protecting the consumer from deception, conducted its hearing on June 28, 1937, and took testimony upon the proposal to amend the labeling regulations so as to require the labels upon reused cooperage whiskey to contain the statement "This whiskey was stored in reused cooperage and is not entitled to claim age under Government regulations" or some similar statement.

The Administration has carefully studied the transcript of the public hearing record and is not convinced by the facts available that sufficient reason exists for requiring the labels upon used cooperage whiskey to contain the legend quoted above. In arriving at this conclusion, the Administration is mindful of the following facts:

(1) That under the present regulations the consumer is adequately protected from deception with respect to the "age" of used cooperage whiskey by the prohibition against the use of any age claim in connection with such product; and he is adequately informed as to the "identity" of the product by those provisions of the regulations which require it to be designated merely as "whiskey", and preclude it from being designated as "straight" or from being used as a base for the production of blends.

(2) That the adoption of the amendment to the regulations, as proposed for hearing, or in a modified form, would not prevent unscrupulous retailers from making extravagant verbal claims with respect to the characteristics of the product.

(3) That distillers who used second-hand barrels for storing whiskey produced on and after July 1, 1936, with full notice of the labeling disadvantages resulting from such use,

should not be further handicapped at this late date with other restrictions of which they were given no notice in advance of the date upon which the whiskies affected thereby were produced and stored.

(4) That whiskey produced on or after July 1, 1936, and stored in reused cooperage is not entitled to claim age or maturity regardless of the period of storage, with the result that no advantage accrues to the used cooperage operator by storing his product for an extended period. Under the regulations as they stand whiskey stored in reused cooperage for three years must be marketed under the same label as whiskey which has been stored in reused cooperage for one month.

(5) That the existing regulations of the Administration, which are applicable only to interstate transactions, have not accorded to used-cooperage whiskey any opportunity to compete unfairly with whiskey stored in new cooperage, as is indicated by the fact that only a small quantity of used-cooperage whiskey has heretofore been shipped in interstate commerce. Practically all of the used-cooperage whiskey produced since July 1, 1936, which has to date found its way into the retail market, has been bottled exclusively for intrastate sale within states which have not adopted the labeling provisions of Regulations No. 5. In such states used-cooperage whiskey has been bottled in substantial quantities pursuant to certificates of exemption from label approval (which the Administration was compelled by statute to issue), under labels designating the product as "straight whiskey" and claiming age for the full period of storage. This practice has given the intrastate bottler of used-cooperage whiskey competitive advantages over the interstate shipper. However, it should be noted that on and after November 1, 1937, under Regulations No. 13 of the Bureau of Internal Revenue, all persons bottling distilled spirits for intrastate sale will be required to observe the standards of identity of Regulations No. 5 of this Administration, and will be precluded from placing age claims upon whiskies produced on and after July 1, 1936 and stored in reused cooperage.

At the public hearing conducted on June 28, 1937, it was suggested by producers of used cooperage whiskey, as well as by third parties who had acquired the same, that such whiskey be permitted to be marketed under a label upon which substantially the following statement appeared: "Stored in reused cooperage ------ months". The Administration has also rejected this proposal. Any statement upon the labels for used cooperage whiskey of the period during which it has been stored in wood, might be construed by the consumer as a statement of age, and the granting of permission to use such a statement would be unfair to producers who resorted since July, 1936 to the exclusive use of new barrels, with full notice of the benefits flowing from such use. The Administration does not propose to grant to used cooperage whiskey produced after July 1, 1936, any privileges which were not accorded to it under the regulations before the date of its production.

In connection with the public hearing conducted June 28, 1937, representations have been made to the Administration to the effect that certain types of whiskey should be permitted to be stored in carefully selected or specially treated second-hand barrels, and to claim age for the period of such storage, on the ground that such whiskies can properly mature only in selected second-hand cooperage. With respect to these representations, the Administration has determined to conduct another public hearing on November 15, 1937, (on this and other matters) the scope of which is outlined in the formal Notice of Hearing issued by the Administration under even date. In issuing this Notice of Hearing the Administration advises the industry that the regulations as they now exist must govern the labeling of all used-cooperage whiskey produced since July 1, 1936, and that if any amendment to the regulations is adopted as a result of the hearing to be held November 15, 1937, such amendment will have no application whatsoever to any whiskey produced prior to the date of its promulgation. In other words, it is the firm conviction of the Administration that whiskey produced on and after July 1, 1936, under the existing restrictive Standards of Identity, and stored in reused cooperage with full notice of the consequences of such storage, must be marketed under all of the restrictions which were imposed by the regulations prior to the date of its production.

NOTICE OF HEARING WITH REFERENCE TO PROPOSED AMENDMENTS TO REGULATIONS NO. 5, RELATING TO LABELING AND ADVERTISING OF DISTILLED SPIRITS

OCTOBER 1, 1937.

*To consider revision of requirements relating to age claims upon labels of whiskey stored in reused cooperage, to revise the standards of identify for corn and bourbon whiskeys and for other purposes.*

Pursuant to the provisions of Section 5 (e) of the Federal Alcohol Administration Act as amended:

Notice is hereby given of a public hearing to be held on Monday, November 15, 1937, at 10:00 A. M., at the Mayflower Hotel, Connecticut Avenue and De Sales Street, Washington, D. C., for the purpose of taking evidence with reference to proposed amendments of Regulations No. 5, Relating to the Labeling and Advertising of Distilled Spirits:

1. (a) To amend Article I (j), and other pertinent sections of the regulations, in such manner as (1) to authorize the labels upon American type whiskies produced on and after January 1, 1938, to claim age, under certain conditions and subject to specified restrictions, for the period of storage in specially selected or treated second-hand oak containers, and to require that the labels upon such whiskey indicate, in conjunction with the age statement, the type of container used for storage purposes, and (2) to prescribe standards for the selection of second-hand barrels which may be used for such storage purposes or, in the alternative,

(b) To amend Article II, and other pertinent sections of the regulations, in such manner as to create a standard of identity for so-called "light-bodied" whiskies, and to permit such whiskies to be stored in specially selected or treated second-hand oak containers, and to claim age for the full period of such storage.

2. To amend Article II, and other pertinent sections of the regulations, in such manner as to differentiate more clearly between corn whiskey and bourbon whiskey, by requiring that corn whiskey shall be manufactured from a mash comprised of not less than 80 per cent corn grain and shall be stored in uncharred oak containers, and that bourbon whiskey shall be manufactured from a mash comprised of more than 50 percent corn grain, and shall be stored in charred oak containers, or in such other manner as may be deemed necessary for the protection of the consuming public.

3. To amend Article II, Section 21, and other pertinent sections of the regulations, in such manner as to provide that brandies produced in the United States which have the taste, aroma and general characteristics of cognac, as produced in the Cognac region of France, may be designated as "cognac" if there appears in direct conjunction with such designation, in lettering substantially as conspicuous, the name of the state of other locality in the United States in which the product was produced.

4. To amend Article II, Section 21, and other pertinent sections of the regulations, to provide more specifically for the manner of labeling products which are in fact "whiskey" as known to the trade, but which do not conform to any type specified in the standards of identity; as, for example, blends of Scotch and Irish whiskies, blends of Scotch and Canadian whiskies, blends of Scotch and American whiskies, blends of Irish and American whiskies, and whiskey produced in Ireland but which does not possess the taste, aroma and other characteristics generally attributed to Irish whiskey.

5. To amend Article III, Section 32, and other pertinent sections of the regulations, in such manner as to make it optional, rather than mandatory, that age be stated for American type whiskey less than one year old.

6. To amend Article III, Section 34 (a), and other pertinent sections of the regulations, in such manner as to require that products for which there is no prescribed or recognized class or type designation, be labeled not only under a distinctive or fanciful name, but also with a truthful statement of composition.

7. To amend Article III, Section 38 (d), and other pertinent sections of the regulations, in such manner as to permit the labels upon certain classes of distilled spirits, including cordials and liqueurs, marketed under names which convey to the consumer's mind a color significance, and which derive their color exclusively from fruits, flowers, plants and other natural substances, to omit the legend "Artificially colored" and to state in lieu thereof the true source of the color of the product.

8. To amend Article IV, Section 46 (d), and other pertinent sections of the regulations, in such manner as to require that American type whiskies produced abroad and imported into the United States, under the designation "straight whiskey" of any class, be accompanied by appropriate foreign government certificates indicating, in addition to the data now prescribed, that such products have acquired their age under the same conditions as are applicable to the aging of straight whiskies produced in the United States.

## POST OFFICE DEPARTMENT.

NOTIFICATION TO SENDER WHEN COPIES OF A PUBLICATION MAILED UNDER SECTION 574½, POSTAL LAWS AND REGULATIONS, ARE FORWARDED TO ADDRESSEE AT A NEW ADDRESS

SEPTEMBER 25, 1937.

Attention is renewed to paragraph 5, section 769, Postal Laws and Regulations, which provides that when ordinary mail of the third and fourth classes is undeliverable on account of the removal of the addressee, the sender will be notified of the new address on card Form 3547 (for which a postage charge of 2 cents shall be collected upon delivery to the sender), provided the mail itself bears a request for such notice and a pledge to pay the postage thereon.

When copies of a publication mailed under the provisions of section 574½, Postal Laws and Regulations (not second-class matter), bear a request for notice on Form 3547 and a pledge to pay postage therefor, such notice should promptly be furnished the mailer, giving the new address of the addressee in case of his removal when the new address is known, including local change of address, the 2-cent charge for the notice to be collected from the mailer upon its delivery, in the same manner as other postage due is collected.

[SEAL] ROY M. NORTH,
*Acting Third Assistant Postmaster General.*

## DEPARTMENT OF THE INTERIOR.

### Bureau of Reclamation.

ORLAND IRRIGATION PROJECT

PUBLIC NOTICE OF ANNUAL WATER CHARGES [1]

SEPTEMBER 15, 1937.

1. *Annual operation and maintenance charges.*—The annual operation and maintenance charge for the irrigation season of 1937 against all lands of the Orland Irrigation Project, California, under public notice, shall be a minimum charge of one dollar ($1.00) per irrigable acre whether water is used thereon or not, which charge will permit the delivery of not to exceed 3 acre-feet of water per acre, and additional water, up to the amount of the surplus natural flow water used prior to the time it became necessary to draw upon any storage water, will be furnished at the rate of ten (10) cents per acre-foot and further additional water at the rate of forty (40) cents per acre-foot.

2. Pursuant to the act of June 24, 1936 (49 Stat. 1907), and the provisions of supplementary contracts executed thereunder, the 1937 operation and maintenance charges against all water users who have executed such supplementary contracts will be consolidated with the construction cost of Stony Gorge Reservoir and paid when such construction cost is paid. Operation and maintenance charges for the year 1937 against all water users who have not executed such supplementary contracts will become due and payable on December 31, 1937, and should be paid to the Bureau of Reclamation, Orland, California.

T. A. WALTERS,
*First Assistant Secretary.*

[1] Act of June 17, 1902, 32 Stat. 388, as amended and supplemented.

---

### National Bituminous Coal Commission.

[Order No. 55]

AN ORDER REQUIRING EACH DISTRICT BOARD WITHIN MINIMUM PRICE AREAS NUMBER ONE AND NUMBER TWO TO DETERMINE FROM COST DATA SUBMITTED BY THE PROPER STATISTICAL BUREAU OF THE COMMISSION THE WEIGHTED AVERAGE OF THE TOTAL COSTS OF THE ASCERTAINABLE TONNAGE PRODUCED IN THEIR RESPECTIVE DISTRICTS IN THE CALENDAR YEAR 1936, AND TO ADJUST SUCH WEIGHTED AVERAGE COSTS SO DETERMINED AS MAY BE NECESSARY TO GIVE EFFECT TO CHANGES WHICH MAY HAVE BEEN ESTABLISHED SINCE JANUARY 1, 1936, AND RESTRICTING PUBLICATION OF INFORMATION RELATIVE THERETO

Pursuant to act of Congress entitled "An Act to regulate interstate commerce in bituminous coal, and for other purposes" (Public, No. 48, 75th Cong., 1st sess.), known as the Bituminous Coal Act of 1937, the National Bituminous Coal Commission hereby orders and directs:

1. That each District Board within Minimum Price Areas Number One and Number Two shall, as soon as possible, determine the weighted average of the total costs of the ascertainable tonnage produced in its district in the calendar year 1936, using as the basis for such determination cost data hereinafter made available to it. Each District Board shall adjust the average costs so determined, as may be necessary to give effect to any changes in wage rates, hours of employment, or other factors substantially affecting costs, exclusive of seasonal changes, so as to reflect as accurately as possible any change or changes which may have been established since January 1, 1936.

2. That the Secretary of the Commission shall immediately transmit to each District Board the proper statistical bureau's compilation of the cost data furnished, pursuant to Order No. 15 of the Commission, by the producers whose mines are located within the district.

3. That the compilations of cost data submitted by the proper statistical bureaus of the Commission to the respective District Boards and the data of the District Boards upon which adjustments of the average costs are to be made, shall be deemed confidential and shall not be made public.

4. That on or before October 8th, 1937, each District Board shall submit to the Commission such determinations and all computations upon which they are based in order that the Commission, after review, may proceed to a determination of the weighted averages of the total costs of the tonnages of Minimum Price Areas Number One and Number Two.

The Secretary of the Commission shall forthwith mail a copy of this order to the Secretaries of the respective District Boards within Minimum Price Areas Number One and Number Two.

By order of the Commission.

Dated this 1st day of October, 1937.

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

G. R.—A. A. A.—Series G, No. 1, Amend No. 2

Issued October 4, 1937

AMENDMENT OF REGULATIONS GOVERNING MEDIATION AND ARBITRATION UNDER SECTION 3 OF THE AGRICULTURAL MARKETING AGREEMENT ACT OF 1937

By virtue of the authority vested in the Secretary of Agriculture by section 3 (b) of the Agricultural Marketing Agreement Act of 1937 (Public Law No. 137, 75th Congress), approved June 3, 1937, I, H. A. Wallace, Secretary of Agriculture, do make, prescribe, publish and give notice of the following additional amendment to General Regulations—A. A. A.—Series G, No. 1, as amended, such regulations, as amended hereby, to be in force and effect from the date hereof until further amended or superseded by regulations hereinafter made by the Secretary of Agriculture:

Section 406 of Article IV of the aforesaid General Regulations is amended by deleting paragraph C and inserting in lieu thereof the following paragraph:

"C. The arbitrator, in making the award, may use his own technical knowledge in addition to the evidence submitted by the parties."

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed, in duplicate, in the city of Washington, District of Columbia, on this 4th day of October, 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

### Bureau of Biological Survey.

AMENDMENT OF ORDER PERMITTING AND REGULATING THE HUNTING OF MIGRATORY WATERFOWL AND COOTS WITHIN DESIGNATED AREA OF THE LAKE BOWDOIN MIGRATORY WATERFOWL REFUGE, MONTANA

The first paragraph of the Order of the Secretary of Agriculture of October 7, 1936 (1 F. R. 1558), entitled "Order Permitting and Regulating the Hunting of Migratory Waterfowl and Coots within Designated Area of the Lake Bowdoin Migratory Waterfowl Refuge, Montana", is hereby amended so as to read as follows:

"Pursuant to regulations 1 and 8 of the regulations of the Secretary of Agriculture of May 7, 1930, governing the administration of Federal wildlife refuges, it is hereby ordered that migratory waterfowl (except those species not permitted to be taken under the Migratory Bird Treaty Act Regulations) and coots may be taken during the period prescribed for the taking of such birds in Montana by the said Migratory Bird Treaty Act Regulations, if permitted by State law, within the area of Lake Bowdoin Migratory Waterfowl Refuge, in Phillips County, Montana, established by Executive Order No. 7295, of February 14, 1936, embraced within the exterior boundary hereinafter described, and designated "Public Shooting Ground" on the diagram hereto attached and made a part of this order, subject to the following conditions and restrictions:"

In testimony whereof I have hereunto set my hand and caused the official seal of the United States Department of Agriculture to be affixed at the City of Washington this 30th day of September 1937.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

## FEDERAL HOME LOAN BANK BOARD.

### Home Owners' Loan Corporation.

CHANGING THE PROCEDURE FOR PAYMENT OF FEES AND LEGAL EXPENSES

AMENDING THE LEGAL CHAPTER OF THE MANUAL

*Be it resolved*, That pursuant to the authority vested in the Board by Home Owners' Loan Act of 1933 (48 Stat. 128, 129) as amended by Sections 1 and 13 of the Act of April 27, 1934 (48 Stat. 643-647) and particularly by Sections 4-a and 4-k of said Act as amended, section 602 (b) (c) and (e) of the Manual are amended as follows:

Section 602 (b) is continued by adding the following language at the end thereof:

" * * * and that no receipts or other evidence of disbursement of funds advanced shall be required for reimbursement of such State or District Office account from which such advance was made."

Section 602 (c) is amended to read as follows:

"Where the payment of any such fees or expenses is made by a salaried attorney, fee attorney, title company or trustee, an itemized statement covering such disbursements, certified to by any such attorney, title company or trustee, shall be accepted by the Auditor as sufficient evidence of the disbursement for the purpose of reimbursing the attorney, title company or trustee by whom the monies were paid or as settlement for funds advanced. Where the payment of any such fees or expenses is made by other than an attorney, title company or trustee, a properly certified voucher, or approval by the General Counsel, supported by receipts for all funds actually expended shall be accepted by the Auditor either as sufficient evidence of the disbursement for the purpose of reimbursing the individual payer or as settlement for funds advanced. The statement of the General Counsel as to the reason for the absence of any receipt shall be accepted by the Auditor in lieu thereof, provided the items for which no receipts are presented do not aggregate more than $100.00 in any one case."

Section 602 (e) is amended to read as follows:

"All monies necessary for fees, charges or expenses which may be incurred in the performance of any duty or function of the Legal Department shall be provided or advanced from the appropriate funds and charged to the appropriate accounts.

Adopted by the Federal Home Loan Bank Board on October 1, 1937.

STATE INCIDENTAL EXPENSE ACCOUNTS; LIMITATIONS AS TO USAGE AND AMOUNTS; VOUCHERS AGAINST SUCH ACCOUNTS

AMENDING THE TREASURY CHAPTER OF THE MANUAL

*Be it resolved*, That pursuant to the authority vested in the Board by Home Owners' Loan Act of 1933 (48 Stat. 128, 129) as amended by Sections 1 and 13 of the Act of April 27, 1934 (48 Stat. 643-647) and particularly by Sections 4-a and 4-k of said Act as amended, Section 721 of Chapter VII of the Consolidated Manual is hereby amended to read as follows:

SEC. 721. Incidental Expense Accounts for State, Division, Territorial or District Offices maintained with the United States Treasury shall be in such amounts as may be determined by the Treasurer with the approval of the General Counsel, General Manager, and the Budget Director, provided the maximum amount shall not exceed $2,000.00 in any account.

The State, Division, Territorial or District Manager shall have full responsibility, within their respective jurisdictions, for proper disbursements from such accounts. These accounts shall be available for the disbursement of both administrative and non-administrative expenses as stipulated in the Independent Offices Appropriation Act for the fiscal year 1938; however, wherever practicable, vouchers for administrative expenses shall be submitted to the Home Office for disbursement. Non-administrative expenses shall be submitted for reimbursement to the proper Regional Office, and administrative expenses shall be submitted for reimbursement to the Home Office.

Adopted by the Federal Home Loan Bank Board on October 1, 1937.

[SEAL] R. L. NAGLE, *Secretary.*

[F. R. Doc. 37-2939; Filed, October 4, 1937; 11:48 a. m.]

REGIONAL WORKING FUND MAINTAINED AS DISBURSING ACCOUNT; DISBURSEMENTS AUTHORIZED

AMENDING THE TREASURY CHAPTER OF THE MANUAL

*Be it resolved*, That pursuant to the authority vested in the Board by Home Owners' Loan Act of 1933 (48 Stat. 128, 129) as amended by Sections 1 and 13 of the Act of April 27, 1934 (48 Stat. 643-647) and particularly by Section 4-a and 4-k of said Act as amended, Section 716 of Chapter VII of the Consolidated Manual is hereby amended to read as follows:

SEC. 716. The Regional Working Fund in each Regional Office shall be maintained as a Disbursing Account, and funds therein shall be available only for non-administrative expenses as distinguished from administrative expenses stipulated in the Independent Offices Appropriation Act for the fiscal year 1938.

The Regional Treasurer in each respective Regional Office is authorized and directed to make disbursements from the Regional Working Fund upon, and only upon, vouchers duly certified for payment from this account by the Auditor or an authorized deputy. Transfers to the respective Regional Working Funds shall be requested by the Regional Treasurer and approved by the Regional Manager.

Adopted by the Federal Home Loan Bank Board on October 1, 1937.

[F. R. Doc. 37-2941; Filed, October 4, 1937; 11:49 a. m.]

CHANGING PETTY CASH FUND TO IMPREST CASH FUND TO BE USED ONLY FOR ADMINISTRATIVE EXPENSES

AMENDMENT OF TREASURER'S CHAPTER OF MANUAL

*Be it resolved*, That pursuant to the authority vested in the Board by Home Owners' Loan Act of 1933 (48 Stat. 128, 129) as amended by Sections 1 and 13 of the Act of April 27, 1934 (48 Stat. 643-647) and particularly by Sections 4-a and 4-k of said Act as amended, Section 705 of Chapter VII of the Consolidated Manual is hereby amended to read as follows:

SEC. 705. The Regional Treasurer is authorized to maintain an Imprest Cash Fund in an amount not in excess of $200.00 which may be obtained from the Home Office at the request of the Regional Manager. This fund shall be available only for administrative expenses as distinguished from non-administrative expenses stipulated in the Independent Office Appropriation Act for the fiscal year 1938; provided, that such administrative expenses shall be confined to postage, postage due, carfare, cost of Cashier's checks, and other items which it is not practicable to submit to the Home Office for disbursement. The Regional Treasurer shall be responsible for the propriety of all disbursements made from this fund. Vouchers for reimbursement of this fund shall be submitted to the Auditor in Washington as necessary but in no event less than once each week and the last day of each month. The Treasurer is hereby authorized and directed to reimburse the funds upon and only upon certification by the Auditor or his duly authorized deputies which certification shall specify the account from which disbursement shall be made.

Adopted by the Federal Home Loan Bank Board on October 1, 1937.

[SEAL] R. L. NAGLE, *Secretary.*

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

[Docket No. 3232]

IN THE MATTER OF AMERICAN OPTICAL COMPANY, A VOLUNTARY ASSOCIATION AND ALL ITS MEMBERS; GEORGE B. WELLS, INDIVIDUALLY AND AS PRESIDENT OF AMERICAN OPTICAL COMPANY, AN ASSOCIATION; IRA MOSHER, INDIVIDUALLY AND AS VICE PRESIDENT AND GENERAL MANAGER OF AMERICAN OPTICAL COMPANY, AN ASSOCIATION; CHARLES Q. COZZENS, INDIVIDUALLY AND AS VICE PRESIDENT IN CHARGE OF SALES OF AMERICAN OPTICAL COMPANY, AN ASSOCIATION; JOHN M. WELLS, INDIVIDUALLY AND AS VICE PRESIDENT IN CHARGE OF RESEARCH LABORATORY OF AMERICAN OPTICAL COMPANY, AN ASSOCIATION; EDWARD E. WILLIAMS, INDIVIDUALLY AND AS TREASURER OF AMERICAN OPTICAL COMPANY, AN ASSOCIATION; A. TURNER WELLS, INDIVIDUALLY AND AS SECRETARY OF AMERICAN OPTICAL COMPANY, AN ASSOCIATION; ALBERT B. WELLS, INDIVIDUALLY AND AS CHAIRMAN OF THE BOARD, AND AS REPRESENTATIVE OF THE BOARD OF DIRECTORS OF AMERICAN OPTICAL COMPANY, AN ASSOCIATION; AND AMERICAN OPTICAL COMPANY, A CORPORATION, RESPONDENTS

COMPLAINT

Pursuant to the provisions of an Act of Congress, approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", commonly known as the Clayton Act, as amended by an Act of Congress, approved June 19, 1936, (U. S. C. Title XV, Section 13), commonly known as the Robinson-Patman Act, the Federal Trade Commission, having reason to believe that the respondents named in the caption hereof have violated, and are now violating the provisions of Subsection (a) of Section 2 of said Act as

amended, hereby issues its complaint against the said respondents, stating its charges in that respect as follows:

PARAGRAPH 1. Respondent, American Optical Company, an association, is a voluntary association organized in 1912 under the laws of Massachusetts, as a common law trust, owning, holding or controlling all of the capital stock of respondent American Optical Company, a corporation, organized, existing and doing business under and by virtue of the laws of the State of Massachusetts, with its principal office and place of business at Southbridge, Massachusetts.

The American Optical Company, a corporation, was organized by respondents to engage in and carry on manufacturing and sales activities of the respondents in states where the Massachusetts trust type of association is not recognized as a corporate entity, and the said respondent corporation is licensed to do and does carry on such business and sales activities for and on behalf of respondents in the States of Pennsylvania, Virginia, Ohio, Tennessee, Alabama, Michigan, Wisconsin, Texas, California, and Idaho.

Respondents George B. Wells, Ira Mosher, Charles O. Cozzens, John M. Wells, Edward E. Williams, A. Turner Wells, and Albert B. Wells, all of Southbridge, Massachusetts, are severally here made parties respondent in their respective capacities as indicated in the caption hereof, individually, and as representative members of American Optical Company, the association.

PAR. 2. Respondents and each of them are now and have been since June 19, 1936, engaged in the business of manufacturing and selling optical goods and ophthalmic products, including lenses, frames, mountings, diagnostic instruments, optical machinery, tools and grinding and polishing materials to various retailers, independent wholesalers and chain business enterprises engaged in business as lessee-operators of the optical departments of various large department stores. Respondents effect the sale and distribution of these products through some 320 branch offices, each of which functions as a wholesaler. These branch offices are grouped into nine districts or sales territories, each with a central sales branch where the respondents maintain a stock of supplies on hand from which they supply the other branch sales offices in each district. Respondents employ over three hundred salesmen who call regularly upon the retail trade, and during 1936 did a volume of approximately $18,500,000.00 in total sales. The individual respondents herein named in their respective capacities as officers and Chairman of the Board and as representative of the association American Optical Company, control and direct the sales policies, pricing and selling activities engaged in by all of the said other respondents as hereinafter set forth.

PAR. 3. In the course and conduct of their respective businesses as aforesaid, respondents, and each of them, transports or causes to be transported the said products, when sold, from the places of their respective locations to the purchasers thereof located in the several States of the United States other than the States in which such shipments originated, and there is and has been at all times herein mentioned a current of trade and commerce in said products, between the States whrein these several respondents are located and the various other States of the United States.

Said respondents and each of them sell and distribute the aforesaid products for use, consumption or resale within the United States and the District of Columbia, in the same territories and places and in competition with various other manufacturers, distributors and wholesalers engaged in the sale of optical goods and ophthalmic products including lenses, frames, mountings, diagnostic instruments, optical machinery and tools and grinding and polishing materials.

Respondents' aforesaid purchaser customers are competitively engaged with each other and with the purchaser customers of respondents' competitors, in the resale of said products, both at wholesale and retail, within the several sales areas in which the said wholesale and retail customers respectively offer for sale and sell the said products of American Optical Company.

PAR. 4. Said respondents and each of them, in the course and conduct of interstate commerce as hereinbefore set forth, have, since June 19, 1936, discriminated in price and are now discriminating in the prices at which they and each of them have sold and do sell American Optical Company products and commodities of like grade and quality, between the different purchasers of such products and commodities, by giving and allowing certain of said purchasers a lower price than given or allowed other purchasers competitively engaged in said line of commerce, and by giving and allowing certain of said purchasers adjustments, rebates, or discounts in the form of cash or commodities not given and allowed to others of respondents' said purchaser customers. Respondents' purchaser customers in whose favor such price discrimination is made are generally the larger dealers who are thus enabled either to undersell their competitors or furnish superior facilities and services to the prospective consumer purchaser, or both, and thereby trade is diverted from the smaller retailer to the more favored and larger dealer in said products.

PAR. 5. The effect of such discrimination in price made by said respondents, as set forth in Paragraph Four hereof, may be substantially to lessen competition between the respondents and their aforesaid competitors; between the customers of respondents in whose favor such discrimination is made and respondents' other customers; and between the customers of respondents' competitors who do not grant such customers the benefit of such discriminatory prices and the customers of respondents in favor of whom respondents discriminate; or tend to create a monopoly in the aforesaid line of commerce in respondents and respondents' favored customers, and to injure, destroy and prevent competition with the said respondents and with those of respondents' customers who knowingly receive the benefit of such discrimination, and with the customers of each of them.

Such discrimination in price by said respondents, and each of them, between different purchasers of commodities of like grade and quality in interstate commerce in the manner and form aforesaid are in violation of the provisions of Subsection (a) of Section 2 of the Act described in the preamble hereof.

Wherefore, the premises considered, the Federal Trade Commission, on this 30th day of September, A. D. 1937, now issue this its complaint against said respondents, stating its charges in that respect as hereinabove set out.

NOTICE

Notice is hereby given you, American Optical Company, an association; American Optical Company, a corporation; George B. Wells, Ira Mosher, Charles O. Cozzens, John M. Wells, Edward E. Williams, A. Turner Wells, and Albert B. Wells, respondents herein, that the 5th day of November, A. D. 1937, at 2:00 o'clock in the afternoon, is hereby fixed as the time and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be held on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violation of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a short and simple statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided or failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further hearing or notice to respondent, to proceed in regular course on the charges set forth in the complaint, and to make, enter, issue, and serve upon respondent findings of fact and an order to cease and desist.

If respondent desires to waive hearing on the charges set forth in the complaint and not to contest the proceeding, the answer may consist of a statement that respondent admits all the material allegations of the complaint to be true Any such answer shall be deemed to waive a hearing thereon, and to authorize the Commission, without trial and without further evidence, or other intervening procedure, to make, enter, issue, and serve upon respondent:

(*a*) In cases arising under Section 5 of the act of Congress approved September 26, 1914, entitled "An Act to Create a Federal Trade Commission, to define its powers and duties, and for other purposes" (the Federal Trade Commission Act), or under Sections 2 and 3 of the act of Congress approved October 15, 1914, entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes" (the Clayton Act), or under Section 2 of the aforesaid Clayton Act as amended by "An act to amend Section 2 of the act entitled 'An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes' approved October 15, 1914, as amended (U. S. C., Title XV, Section 13), and for other purposes", approved June 19, 1936 (the Robinson-Patman Act), findings of fact and an order to cease and desist from the violations of law charged in the complaint;

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 30th day of September, A. D., 1937.

By the Commission.

[SEAL] OTIS B. JOHNSON, *Secretary.*

[F. R. Doc. 37-2935; Filed, October 2, 1937; 12:11 p. m.]

---

*United States of America—Before Federal Trade Commission*

[Docket No. 3233]

IN THE MATTER OF BAUSCH & LOMB OPTICAL COMPANY, A CORPORATION, COLONIAL OPTICAL COMPANY, INC., MCINTIRE, MAGEE & BROWN, A CORPORATION, RIGGS OPTICAL COMPANY CONSOLIDATED, A CORPORATION, RIGGS OPTICAL COMPANY, INC., A CORPORATION, SOUTHEASTERN OPTICAL COMPANY, A CORPORATION, AND THE WHITE, HAINES OPTICAL COMPANY, A CORPORATION

COMPLAINT

Pursuant to the provisions of an Act of Congress, approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", commonly known as the Clayton Act, as amended by an Act of Congress, approved June 19, 1936, (U. S. C., Title 15, sec. 13), commonly known as the Robinson-Patman Act, the Federal Trade Commission, having reason to believe that the respondents named in the caption hereof have violated, and are now violating the provisions of Subsection (a) of Section 2 of said Act as amended, hereby issues its complaint against the said respondents, stating its charges in that respect as follows:

PARAGRAPH 1. Respondent Bausch & Lomb Optical Company is a corporation, organized and existing under and by virtue of the laws of the State of New York, and its principal office and place of business is located in the City of Rochester in said State. It is now, and has been since June 19, 1936, engaged in the business of manufacturing and selling optical goods and ophthalmic products, including lenses, frames, mountings, diagnostic instruments, optical machinery, tools and grinding and polishing materials, to various retailers, independent wholesalers and chain business enterprises engaged in business as lessee-operators of the optical departments of various large Department Stores. Such sales are by said respondent made both directly and through the other respondents hereinabove named in the caption and hereinafter more particularly designated and described. Respondent Bausch & Lomb Optical Company owns a controlling share of the stock in each of the said other respondent companies and exercises such control in directing the sales policies, pricing and selling activities engaged in by said other respondents in their respective businesses.

PAR. 2. (*a*) Respondent Colonial Optical Company, Inc., is a corporation, organized and existing under and by virtue of the laws of the State of New York, with its principal office and place of business at 62 West 47th Street, in the City of New York in said State. Bausch & Lomb Optical Company owns and holds approximately 91% of the outstanding shares of voting stock issued by Colonial Optical Company, Inc.

(*b*) Respondent McIntire, Magee & Brown is a corporation, organized and existing under and by virtue of the laws of the Commonwealth of Pennsylvania, with its principal office and place of business at 1700 Walnut Street in the City of Philadelphia, in said State. Approximately 58% of the oustanding shares of the voting stock by it issued are owned and held by the respondent Bausch & Lomb Optical Company.

(*c*) Respondent Riggs Optical Company Consolidated is a corporation, organized and existing under and by virtue of the laws of the State of Delaware, with its principal office and place of business at 222 W. NoBank Drive, in the City of Chicago, in the State of Illinois. Approximately 82% of the outstanding shares of voting stock by it issued are owned and held by the respondent Bausch & Lomb Optical Company.

(*d*) Respondent Riggs Optical Company, Inc., is a corporation organized and existing under and by virtue of the laws of the State of Delaware, with its principal office and place of business at Flood Building, in the City of San Francisco, in the State of California. Approximately 74% of the outstanding shares of voting stock by it issued are owned and held by the respondent Bausch & Lomb Optical Company.

(*e*) Respondent Southeastern Optical Company is a corporation organized and existing under and by virtue of the laws of the Commonwealth of Virginia, with its principal office and place of business at 212 E. Franklin Street, in the City of Richmond in said State. Approximately 60% of the outstanding shares of voting stock by it issued are owned and held by the respondent Bausch & Lomb Optical Company.

(*f*) Respondent The White, Haines Optical Company is a corporation organized and existing under and by virtue of the laws of the State of Ohio, with its principal office and place of business at 82 N. High Street, in the City of Columbus, in said State. Approximately 72% of the outstanding shares of voting stock by it issued are owned and held by the respondent Bausch & Lomb Optical Company.

(*g*) Each of the respondents in said subsections (a) to (f) inclusive in this paragraph named is now, and since June 19, 1936, has been engaged in the business of selling at wholesale the aforesaid optical goods and ophthalmic products of the respondent Bausch & Lomb Optical Company.

PAR. 3. In the course and conduct of their respective businesses as aforesaid, respondents, and each of them, transports or causes to be transported the said products, when sold, from the places of their respective locations to the purchasers thereof located in the several States of the United States other than the States in which such shipments originated, and there is and has been at all times herein mentioned a current of trade and commerce in said products, between the States wherein these several respondents are located and the various other States of the United States.

Said respondents and each of them sell and distribute the aforesaid products for use, consumption or resale within the United States and the District of Columbia, in the same

territories and places and in competition with various other manufacturers, distributors and wholesalers engaged in the sale of optical goods and ophthalmic products including lenses, frames, mountings, diagnostic instruments, optical machinery and tools and grinding and polishing materials.

Respondents' aforesaid purchaser customers are competitively engaged in the resale of said products, both at wholesale and retail, to the consumers or users thereof, within the several sales areas in which said purchaser customers respectively offer for sale and sell the said products of Bausch & Lomb Optical Company.

PAR. 4. Said respondents, and each of them, in the course and conduct of interstate commerce as hereinbefore set forth, have, since June 19, 1936, discriminated in price, and are now discriminating in the price at which they and each of them have sold and do sell Bausch & Lomb Optical Company products and commodities of like grade and quality, between the different purchasers of such products and commodities, by giving and allowing certain of said purchasers a lower price than given or allowed other purchasers competitively engaged in said line of commerce and by giving and allowing certain of said purchasers adjustments, rebates or discounts in the form of cash or commodities not given and allowed to other of respondents' said purchaser customers. Respondents' purchaser customers in whose favor such discrimination is made, are generally the larger dealers who are thus enabled either to undersell their competitors or furnish better facilities and services to the prospective consumer purchaser, or both.

PAR. 5. The effect of such discrimination in price made by said respondents, as set forth in Paragraph Four hereof, may be substantially to lessen competition between the respondents and their aforesaid competitors; between the customers of respondents in whose favor such discrimination is made and respondents' other customers; and between the customers of respondents' competitors who do not grant such customers the benefit of such discriminatory prices and the customers of respondents in favor of whom respondents discriminate; and said discrimination tends to create a monopoly in the aforesaid line of commerce in respondents and respondents' favored customers, and to injure, destroy and prevent competition with the said respondents and with those of respondents' customers who knowingly receive the benefit of such discrimination, and with the customers of each of them.

Such discrimination in price by said respondents, and each of them, between different purchasers of commodities of like grade and quality in interstate commerce in the manner and form aforesaid are in violation of the provisions of Subsection (a) of Section 2 of the Act described in the preamble hereof.

Wherefore, the premises considered, the Federal Trade Commission, on this 30th day of September, A. D. 1937, now issues this its complaint against said respondents, stating its charges in that respect as hereinabove set out.

NOTICE

Notice is hereby given you, Bausch & Lomb Optical Company; Colonial Optical Company, Inc.; McIntire, Magee & Brown; Riggs Optical Company Consolidated; Riggs Optical Company, Inc.; Southeastern Optical Company; and The White, Haines Optical Company, respondents herein, that the 5th day of November, A. D. 1937, at 2:00 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violation of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a short and simple statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * * *

Failure of the respondent to file answer within the time above provided or failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further hearing or notice to respondent, to proceed in regular course on the charges set forth in the complaint, and to make, enter, issue, and serve upon respondent findings of fact and an order to cease and desist.

If respondent desires to waive hearing on the charges set forth in the complaint and not to contest the proceeding, the answer may consist of a statement that respondent admits all the material allegations of the complaint to be true. Any such answer shall be deemed to waive a hearing thereon, and to authorize the Commission, without trial and without further evidence or other intervening procedure, to make, enter, issue, and serve upon respondent:

(*a*) In cases arising under Section 5 of the Act of Congress approved September 26, 1914, entitled "An Act to Create a Federal Trade Commission, to define its powers and duties, and for other purposes" (the Federal Trade Commission Act), or under Sections 2 and 3 of the Act of Congress approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes" (the Clayton Act), or under Section 2 of the aforesaid Clayton Act as amended by "An Act to amend Section 2 of the act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes' approved October 15, 1914, as amended (U. S. C., title 15, Sec. 13), and for other purposes", approved June 19, 1936 (the Robinson-Patman Act), findings of fact and an order to cease and desist from the violations of law charged in the complaint;

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary and its official seal to be hereto affixed, at Washington, D. C., this 30th day of September, A. D. 1937.

By the Commission.

## SECURITIES AND EXCHANGE COMMISSION.

*United States of America—Before the Securities and Exchange Commission*

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 4th day of October, A. D. 1937.

[File No. 30-63]

IN THE MATTER OF BROKAW, DIXON & MCKEE

NOTICE OF AND ORDER FOR HEARING

An application having been duly filed with this Commission, by Brokaw, Dixon & McKee pursuant to Section 5 (a) of the Public Utility Holding Company Act of 1935, for an order declaring that said applicants who heretofore had filed a registration statement pursuant to Section 5 (b) of said Act, have ceased to be a holding company by reason of disposing of their control of gas utility companies.

*It is ordered*, That a hearing on such matter be held on October 20, 1937, at 10 o'clock in the forenoon of that day at Room 1103, Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C.: and

Notice of such hearing is hereby given to said party and to any interested State, State commission, State securities commission, municipality, and any other political subdivision of a State, and to any representative of interested consumers or security holders, and any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before October 15, 1937.

*It is further ordered*, That Charles S. Lobingier, an officer of the Commission, be and he hereby is designated to preside at such hearing, and authorized to adjourn said hearing from time to time, to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records deemed relevant or material to the inquiry, and to perform all other duties in connection therewith authorized by law.

Upon the completion of the taking of testimony in this matter, the officer conducting said hearing is directed to close the hearing and make his report to the Commission.

By the Commission.

[SEAL] FRANCIS P. BRASSOR, *Secretary*.

## PRESIDENT OF THE UNITED STATES.

EXECUTIVE ORDER

AMENDING EXECUTIVE ORDER NO. 7677-A, OF JULY 26, 1937, ENTITLED "CIVILIAN CONSERVATION CORPS"

By virtue of and pursuant to the authority vested in me under the Act entitled "An Act to establish a Civilian Conservation Corps, and for other purposes" approved June 28, 1937 (Public No. 163, 75th Congress), Paragraph No. 3 of Executive Order No. 7677-A dated July 26, 1937,[1] is hereby amended to read as follows:

"3. The Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Labor, and the Administrator of Veterans' Affairs are requested to cooperate with the Director of the Civilian Conservation Corps in carrying out the purposes of the said Act of June 28, 1937. Each of the said Secretaries and the said

[1] 2 F. R. 1346.

Administrator shall appoint a representative who shall, upon request of the Director, confer with him and under his direction aid him in prosecuting effectively the purposes contemplated by the said Act."

FRANKLIN D ROOSEVELT

THE WHITE HOUSE,
*Sept. 29, 1937.*

[No. 7717]

EXECUTIVE ORDER

AUTHORIZING THE INSPECTION OF CERTAIN INCOME TAX RETURNS BY THE DEPARTMENT OF NATIONAL REVENUE, OTTAWA, CANADA

By virtue of the authority vested in me by section 55 (a) of the Revenue Act of 1936 (ch. 690, 49 Stat. 1648, 1671), it is hereby ordered that income tax withholding returns, Form 1042B, filed for the calendar year 1937 and each subsequent calendar year, shall be open to inspection by the Department of National Revenue, Ottawa, Canada, for the purpose of enabling the United States Treasury Department to administer effectively the provisions of the Tax Convention, dated December 30, 1936, between the United States and Canada which was ratified August 13, 1937. Such inspection shall be in accordance with the rules and regulations prescribed by the Secretary of the Treasury in the Treasury Decision relating to the inspection of returns by the Department of National Revenue, Ottawa, Canada, approved by me this date.

FRANKLIN D ROOSEVELT

THE WHITE HOUSE,
*Oct. 2, 1937.*

[No. 7718]

---

[T. D. 4765]

INCOME TAX

REGULATIONS GOVERNING THE INSPECTION OF INCOME TAX RETURNS, FORM 1042B, BY THE DEPARTMENT OF NATIONAL REVENUE, OTTAWA, CANADA

SEPTEMBER 25, 1937.

*To Collectors of Internal Revenue and Others Concerned:*

Section 55 (a) of the Revenue Act of 1936 provides:

"Returns made under this title shall be open to inspection in the same manner, to the same extent, and subject to the same provisions of law, including penalties, as returns made under Title II of the Revenue Act of 1926; and all returns made under this Act shall constitute public records and shall be open to public examination and inspection to such extent as shall be authorized in rules and regulations promulgated by the President."

Pursuant to the above provision of law the President orders that income tax withholding returns, Form 1042B, filed under the provisions of Title I of the Revenue Act of 1936, or such Act as amended, shall be open to inspection by the Department of National Revenue, Ottawa, Canada, for the purpose of enabling the United States Treasury Department to administer effectively the provisions of the Tax Convention, dated December 30, 1936, between the United States and Canada which was ratified August 13, 1937. Such inspection shall be as follows:

Upon receipt by the Commissioner of Internal Revenue of income tax withholding returns, Form 1042B, duplicate copies thereof shall be forwarded to the Department of National Revenue, Ottawa, Canada.

ROSWELL MAGILL,
*Acting Secretary of the Treasury.*

Approved,

FRANKLIN D ROOSEVELT
*The White House.*

TREASURY DEPARTMENT.

Office of the Secretary.

[1937—Department Circular No. 1]

VALUES OF FOREIGN MONEYS

OCTOBER 1, 1937.

Pursuant to section 522, title IV, of the Tariff Act of 1930, re-enacting section 25 of the act of August 27, 1894, as amended, the following estimates by the Director of the Mint of the values of foreign monetary units are hereby proclaimed to be the values of such units in terms of the money of account of the United States that are to be followed in estimating the value of all foreign merchandise exported to the United States during the quarter beginning October 1, 1937, expressed in any such foreign monetary units: *Provided, however*, That if no such value has been proclaimed, or if the value so proclaimed varies by 5 per centum or more from a value measured by the buying rate in the New York market at noon on the day of exportation, conversion shall be made at a value measured by such buying rate, as determined and certified by the Federal Reserve Bank of New York and published by the Secretary of the Treasury pursuant to the provisions of section 522, title IV, of the Tariff Act of 1930.

[SEAL] STEPHEN B. GIBBONS,
*Acting Secretary of the Treasury.*

VALUES OF FOREIGN MONETARY UNITS (AT PAR AS REGARDS GOLD UNITS; NONGOLD UNITS HAVE NO FIXED PAR WITH GOLD)

| Country | Monetary unit | Value in terms of U. S. money | Remarks |
|---|---|---|---|
| Argentine Republic | Peso | $1.6335 | Given valuation is of gold peso. Paper nominally convertible at 44% of face value. Conversion suspended Dec. 16, 1929. |
| Australia | Pound | 8.2367 | Control of gold stocks and exports authorized Dec. 17, 1929. |
| Austria | Schilling | .2382 | Exchange control established Oct. 9, 1931. |
| Belgium | Belga | .1895 | By decree of Mar. 31, 1936. One belga equals 5 Belgian francs. |
| Bolivia | Boliviano | .0189 | Conversion of notes into gold suspended Sept. 23, 1931. |
| Brazil | Milreis | .0873 | Based upon official rate for milreis in terms of the dollar as announced by the Bank of Brazil. Conversion of Stabilization-Office notes into gold suspended Nov. 22, 1930. |
| British Honduras | Dollar | 1.6931 | Conversion of notes suspended. |
| Bulgaria | Lev | .0122 | Exchange control established Oct. 15, 1931. |
| Canada | Dollar | 1.6931 | Embargo on export of gold, Oct. 19, 1931; redemption of Dominion notes in gold suspended Apr. 10, 1933 |
| Chile | Peso | .0260 | Conversion of notes suspended July 30, 1931. |
| China | Yuan | | Silver standard abandoned by decree of Nov. 3, 1935; bank notes made legal tender under Currency Board control; exchange rate for British currency primarily fixed at about 1s. 2⅛d., or about 29⅛¢ U. S., per yuan. |
| Hong Kong | Dollar | | Treasury notes and notes of the three banks of issue made legal tender by silver nationalization ordinance of Dec. 5, 1935; exchange fund created to control exchange rate. |
| Colombia | Peso | 1.6479 | Obligation to sell gold suspended Sept. 24, 1931. |
| Costa Rica | Colon | .7879 | Conversion of notes into gold suspended Sept. 18, 1914; exchange control established Jan. 16, 1932. |
| Cuba | Peso | 1.0000 | By law of May 25, 1934. |
| Czechoslovakia | Koruna | .0351 | By decree of Oct. 9, 1936. |
| Denmark | Krone | .4537 | Conversion of notes into gold suspended Sept. 29, 1931. |
| Dominican Republic | Dollar | 1.6931 | U. S. money is principal circulating medium. |
| Ecuador | Sucre | .3386 | Conversion of notes into gold suspended Feb. 9, 1932. |
| Egypt | Pound (100 piasters) | 8.3692 | Conversion of notes into gold suspended Sept. 21, 1931. |

VALUES OF FOREIGN MONETARY UNITS (AT PAR AS REGARDS GOLD UNITS; NONGOLD UNITS HAVE NO FIXED PAR WITH GOLD)—Con.

| Country | Monetary unit | Value in terms of U. S. money | Remarks |
|---|---|---|---|
| Estonia | Kroon | .4537 | Conversion of notes into gold suspended June 28, 1933. |
| Finland | Markka | .0426 | Conversion of notes into gold suspended Oct. 12, 1931. |
| France | Franc | | Provisions of Monetary law of Oct. 1, 1936, providing for gold content of franc, superseded by decree of June 30, 1937 which stated that the gold content of the franc shall be fixed ultimately by a decree adopted by the Council of Ministers. Until issuance of such decree a stabilization fund shall regulate the relationship between the franc and foreign currencies. |
| Germany | Reichsmark | .4033 | Exchange control established July 13, 1931. |
| Great Britain | Pound Sterling | 8.2397 | Obligation to sell gold at legal monetary par suspended Sept. 21, 1931. |
| Greece | Drachma | .0220 | Conversion of notes into gold suspended Apr. 26, 1932. |
| Guatemala | Quetzal | 1.6931 | Conversion of notes into gold suspended Mar. 6, 1933. |
| Haiti | Gourde | .2060 | National bank notes redeemable on demand in U. S. dollars. |
| Honduras | Lempira | .8466 | Gold exports prohibited Mar. 27, 1931; lempira circulates as equivalent of half of U. S. Dollar. |
| Hungary | Pengö | .2961 | Exchange control established July 17, 1931. |
| India [British] | Rupee | .6180 | Obligation to sell gold at legal monetary par suspended Sept. 21, 1931. |
| Indo-China | Piaster | .6633 | Piaster pegged to French franc at the rate of 1 piaster=10 French francs. Information with regard to the relationship of piaster to franc subsequent to Sept. 25, 1936, not yet available. |
| Irish Free State | Free State Pound | 8.2397 | Conversion of notes into gold suspended Sept. 21, 1931. |
| Italy | Lira | .0526 | New gold content of 46.77 milligrams of fine gold per lira established by monetary law of Oct. 5, 1936. |
| Japan | Yen | .3449 | Embargo on gold exports Dec. 13, 1931. |
| Latvia | Lat | | Currency pegged to sterling Sept. 28, 1936, at 2,522 lati=£100. |
| Liberia | Dollar | 1.6931 | British money is principal circulating medium. |
| Lithuania | Litas | .1693 | Free export of gold suspended Oct. 1, 1935. |
| Mexico | Peso | | Decree of Aug. 28, 1936, left the monetary unit, the peso, to be later defined by law. |
| Netherlands and colonies | Guilder (florin) | .6806 | Suspension of convertibility of notes into gold and restrictions placed on free gold exports—Sept. 26, 1936. |
| Newfoundland | Dollar | 1.6931 | Newfoundland and Canadian notes legal tender. |
| New Zealand | Pound | 8.2397 | Conversion of notes into gold suspended and export of gold restricted, Aug. 5, 1914; exchange regulations Dec. 1931. |
| Nicaragua | Cordoba | 1.6932 | Embargo on gold exports Nov. 13, 1931. |
| Norway | Krone | .4547 | Conversion of notes into gold suspended Sept. 29, 1931. |
| Panama | Balboa | 1.6931 | U. S. money is principal circulating medium. |
| Paraguay | Peso (Argentine) | 1.6335 | Paraguayan paper currency is used; exchange control established June 28, 1932. |
| Persia (Iran) | Rial | .0824 | Obligation to pay out gold deferred Mar. 13, 1932; exchange control established Mar. 1, 1936. |
| Peru | Sol | .4740 | Conversion of notes into gold suspended May 18, 1932. |
| Philippine Islands | Peso | .5000 | By act approved Mar. 16, 1935. |
| Poland | Zloty | .1899 | Exchange control established Apr. 27, 1936. |
| Portugal | Escudo | .0748 | Gold exchange standard suspended Dec. 31, 1931. |
| Rumania | Leu | .0101 | Exchange control established May 18, 1932. |
| Salvador | Colon | .8466 | Conversion of notes into gold suspended Oct. 7, 1931. |
| Siam | Baht (Tical) | .7491 | Conversion of notes into gold suspended May 11, 1932. |
| Spain | Peseta | .3267 | Exchange control established May 18, 1931. |
| Straits Settlements | Dollar | .9613 | British pound sterling and Straits dollar and half dollar legal tender. |
| Sweden | Krona | .4537 | Conversion of notes into gold suspended Sept. 29, 1931. |
| Switzerland | Franc | | Order of Federal Council enacted Sept. 27, 1936, instructed the Swiss National Bank to maintain the gold parity of the franc at a value ranging between 190 and 215 milligrams of fine gold. |
| Turkey | Piaster | .0744 | 100 piasters equal to the Turkish £; conversion of notes into gold suspended 1916; exchange control established Feb. 26, 1930. |
| Union of South Africa | Pound | 8.2397 | Conversion of notes into gold suspended Dec. 28, 1932. |
| Union of Soviet Republics | Chervonetz | 8.7123 | On Oct. 28, 1936, the Council of People's Commissars issued a decree fixing the value of the ruble in foreign exchanges at 4¼ French francs. |

WAR DEPARTMENT.

MODIFICATION OF REGULATIONS GOVERNING THE USE, ADMINISTRATION AND NAVIGATION OF OHIO RIVER, MISSISSIPPI RIVER, ABOVE CAIRO, ILLINOIS, AND THEIR TRIBUTARIES

Subparagraph B "Visual Signals", under Paragraph 5 of the regulations approved by the Secretary of War on January 4, 1933, to govern the use, administration and navigation of the Ohio River, the Mississippi River above Cairo, and their tributaries, is modified to read as follows:

"B. *Visual Signals:* At locks where density of traffic or other local conditions make it appear necessary or advisable, the *sound* signals *given by the lock* will be supplemented by the following visual system:

"At single locks, a green flashing light will be displayed on the land wall opposite the upper gate, at least 15 feet above the land wall, showing upstream through an angle of 120 degrees; and the same type of light will be displayed opposite the lower gate at least 15 feet above the land wall showing downstream through an angle of 120 degrees, indicating that the lock gates are open and that the lock is ready for entrance.

"At double locks similar green flashing lights will be displayed on the land wall opposite the landward lock gates. In addition, amber lights will be displayed on the intermediate wall opposite both the upper and lower gates of the auxiliary lock indicating that the auxiliary lock gates are open and ready for entrance.

"These flashing lights will operate only when the respective gates are seated in the recesses, contact being made automatically by the gates when fully open.

"In all cases, however, vessels will use the *whistle* signals prescribed in paragraph 5A to signal for a lockage."

Approved, September 23, 1937.

[SEAL] HARRY H. WOODRING,
*Secretary of War.*

FRANK C. BURNETT,
*Brigadier General,*
*Acting The Adjutant General.*

SPECIAL REGULATIONS TO GOVERN THE OPERATION OF CERTAIN BRIDGES ACROSS THE ILLINOIS RIVER, AT PEKIN, PEORIA AND JOLIET, ILLINOIS

*Supplemental to rules and regulations to govern the operation of the drawbridges crossing the Mississippi River and all its navigable tributaries and outlets.*

THE LAW

The River and Harbor Act of August 18, 1894, contains the following Section:

SEC. 5. That it shall be the duty of all persons owning, operating, and tending the drawbridges now built, or which may here-

after be built across the navigable rivers and other waters of the United States, to open, or cause to be opened, the draws of such bridges under such rules and regulations as in the opinion of the Secretary of War the public interests require to govern the opening of drawbridges for the passage of vessels and other water crafts, and such rules and regulations, when so made and published, shall have the force of law. Every such person who shall willfully fail or refuse to open, or cause to be opened, the draw of any such bridge for the passage of a boat or boats, or who shall unreasonably delay the opening of said draw after reasonable signal shall have been given, as provided in such regulations, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not more than two thousand dollars nor less than one thousand dollars, or by imprisonment (in the case of a natural person) for not exceeding one year, or by both such fine and imprisonment, in the discretion of the court: *Provided*, That the proper action to enforce the provisions of this section may be commenced before any commissioner, judge, or court of the United States, and such commissioner, judge, or court shall proceed in respect thereto as authorized by law in case of crimes against the United States: *Provided further*, That whenever, in the opinion of the Secretary of War, the public interests require it, he may make rules and regulations to govern the opening of drawbridges for the passage of vessels and other water crafts, and such rules and regulations, when so made and published, shall have the force of law, and any violation thereof shall be punished as hereinbefore provided.

THE REGULATIONS

In pursuance of the foregoing law, special regulations are prescribed to govern the operation of the following bridges across the Illinois Waterway:

| Mile | Bridge | Vertical clearance closed | |
|---|---|---|---|
| | | Above high water | Above present low water |
| 152.0 | Margaret Street Highway, Pekin, Ill. | 9.3 | 28.4 |
| 153.0 | Peoria Terminal Company Railroad (C. R. I. & P Ry.), Pekin, Ill. | [1] 2.4 | 21.6 |
| 162.2 | Illinois Terminal Railroad, Peoria, Ill. | [1] 16.1 | [1] 34.2 |
| 162.2 | Toledo, Peoria and Western Railroad, Peoria, Ill. | −0.7 | 17.3 |
| 162.3 | Lower Highway Bridge, Peoria, Ill. | [1] 13.7 | [1] 31.8 |
| 287.3 | McDonough Street Highway, Joliet, Ill. | 16.5 | 16.5 |
| 287.6 | Chicago, Rock Island & Pacific Railway, Joliet, Ill. | 9.4 | 9.5 |
| 287.9 | Jefferson Street Highway, Joliet, Ill. | 16.4 | 16.6 |

[1] For 80-foot width of channel.

When a vessel reaches a distance of about one-half mile down-stream from the Peoria Terminal Company Railroad bridge at Pekin, Illinois; the Toledo, Peoria and Western Railroad bridge at Peoria, Illinois, and the Chicago, Rock Island and Pacific Railway bridge, at Joliet, Illinois, a call signal of 3 long blasts of a whistle, horn, or siren, or three loud and distinct strokes of a bell shall be sounded if the clearance requirements of the vessel are such that opening of the adjacent highway bridges at these respective cities is unnecessary; and if the draw is to be opened immediately, the acknowledging signal by the bridge operators on these railroad bridges shall be the same as the call signal; if the draw can not be opened immediately, or if opened must be closed immediately, four or more short and rapid blasts of a whistle, horn, or siren, or four sharp and rapid strokes of a bell to be repeated at regular intervals until acknowledged by the vessel must be sounded.

These regulations shall take effect and be in force on and after the date of approval hereof, and all regulations or parts of regulations applying to the above-named bridges in conflict therewith are hereby revoked to take effect on that date.

Approved, September 24, 1937.

[SEAL] HARRY H. WOODRING, *Secretary of War.*

FRANK C. BURNETT,
*Brigadier General,*
*Acting The Adjutant General.*

## DEPARTMENT OF AGRICULTURE.

### Agricultural Adjustment Administration.

NCR—B-101, as Amended,
Supplement No. 5 Issued October 4, 1937

1937 AGRICULTURAL CONSERVATION PROGRAM—NORTH CENTRAL REGION

BULLETIN NO. 101, AS AMENDED, SUPPLEMENT NO. 5

Pursuant to the authority vested in the Secretary of Agriculture under Section 8 of the Soil Conservation and Domestic Allotment Act, North Central Region Bulletin 101, as Amended, is further amended as follows:

1. Part I, *Definitions.*—The definition of 1937 sugar beet acreage is amended to read as follows:

1937 *sugar beet acreage* means the acreage planted to sugar beets on a farm in 1937.

2. Part IV, Section 4, last paragraph, is amended by adding at the end thereof the following:

The acreage allotment for any farm with respect to which the sugar beet payment will be made will be the 1937 sugar beet acreage. The factors to be used in computing the sugar beet payment for the States in the North Central Region in which sugar beets are planted are as follows:

| State: | Factor |
|---|---|
| Illinois | $0.374 |
| Indiana | .375 |
| Iowa | .360 |
| Michigan | .385 |
| Minnesota | .381 |
| Nebraska | .362 |
| Ohio | .371 |
| South Dakota | .392 |
| Wisconsin | .374 |

3. Part IV, Section 13 (d), first paragraph is amended to read as follows:

(d) *Phosphates.*—Application of the following minimum amounts of phosphate materials per acre on noncrop pasture or on cropland, used in 1937 for the growing of a crop specified in Section 2 of Part III, and on which noncrop pasture or cropland in connection with such application none of the crops listed in Section 1 (a) of Part III was planted in 1937, and none of the crops listed in items (1) and (2) of Section 1 (b) of Part III is planted in 1937 in excess of one-half the normal rate of seeding alone for grain or is cut for hay or grain.

4. Part IV, Section 13 (e), first paragraph is amended to read as follows:

(e) *Potash.*—Application of the following minimum amount of 50 percent muriate of potash per acre on noncrop pasture or on cropland used in 1937 for the growing of a crop specified in Section 2 of Part III, and on which noncrop pasture or cropland in connection with such application none of the crops listed in Section 1 (a) of Part III was planted in 1937, and none of the crops listed in items (1) and (2) of Section 1 (b) of Part III is planted in 1937 in excess of one-half the normal rate of seeding alone for grain or is cut for hay or grain.

5. Part IV, Section 13 (f) is amended to read as follows:

(f) *Gypsum.*—Applicable only to Beltrami, Hubbard, Lake of the Woods, Cass, and Clearwater Counties of Minnesota. Application of the following minimum amount of gypsum per acre on cropland used in 1937 for the growing of a crop specified in Section 2 of Part III, and on which cropland in connection with such application none of the crops listed in Section 1 (a) of Part III was planted in 1937, and none of the crops listed in items (1) and (2) of Section 1 (b) of Part III is planted in 1937 in excess of one-half the normal rate of seeding alone for grain or is cut for hay or grain.—(1) 200 pounds of gypsum—$1.25 per acre.

6. Part V, Section 5, first paragraph is amended to read as follows:

Payments will be made only upon application therefor filed with the county committee. Each person who applies for payment will be required to show the extent to which the conditions upon which the payment is to be made have been met. No inspection of any farm will be made for the purpose of determining the extent of performance under the 1937 Agricultural Conservation Program unless a Request for Inspection, NCR–112, duly executed by a person eligible to apply for payment with respect to such farm, requesting such inspection, is received before November 1, 1937, by the county committee. If the county committee fails to receive before November 1, 1937, a duly executed Request for Inspection, NCR–112, for any farm in a county, any person who is an owner, operator, or sharecropper with respect to such farm shall be ineligible to make an application for payment in such county. Any duly executed Request for Inspection, NCR–112, postmarked before November 1, 1937, will be deemed to have been received before November 1, 1937, by the county committee. The eligibility of a person who is an owner, operator, or sharecropper with respect to one or more farms in a county shall, subject to the provisions of Section 17 of Part IV, be determined by the performance on such farm or farms.

7. Part VI, Section 5 (a), item (a–1) is amended to read as follows:

(a–1) *Reseeding by deferred grazing.*—Natural reseeding by nongrazing on an acreage equal to not less than 10 percent of the total range land in the ranching unit from May 15 to September 30, 1937, inclusive—60 percent of the range building allowance for such ranching unit multiplied by the percentage that the non-grazed acreage is of the acreage equivalent to 25 percent of the total range land in such ranching unit, provided, (1) Payment will not be made in excess of 60 percent of the range building allowance; (2) On ranches on which cattle or horses are grazed the area to be kept free of grazing is fenced and the fence is maintained sufficiently to prevent the entry of livestock; (3) On ranches used exclusively for grazing sheep the area to be kept free of grazing is either fenced and the fence is maintained sufficiently to prevent entry of livestock or the entry of livestock on the non-grazed acreage is prevented by herding; (4) The remaining range land in such ranching unit is not pastured to such an extent as will decrease the stand of grass or injure the range, forage, tree growth, or watershed; (5) Such practice shall not be applicable to range land in the ranching unit which normally is not used for grazing during the period May 15 to September 30, inclusive; and (6) The ranch operator has submitted to the county committee in writing the designation of the nongrazing range area of the ranch previous to the carrying out of such practice; or

8. Part VI, Section 5 (b) is amended to read as follows:

(b) *Contouring.*—Construction of contour furrows on range land with slopes not in excess of eight percent and not sufficiently sandy and porous to absorb normal precipitation—$0.50 per acre for the area contour furrowed, provided, (1) the contour furrows are constructed on the contour level not less than eight inches in width and four inches in depth, (2) where necessary the contour furrows are dammed sufficiently to prevent overtopping which would cause gullying, (3) the width between the furrows on any land with a slope of three percent or less shall not exceed 25 feet, (4) the width between the furrows on any land with a slope of more than three percent shall not exceed 25 feet less three feet for each percent by which the slope is greater than three percent.

9. Part VI, Section 5 (e) is amended to read as follows:

(e) *Reservoirs.*—Construction of reservoirs and dams—$0.15 per cubic yard of fill for such construction, provided, (1) The construction of reservoirs and dams is carried out in connection with the practices set forth in sub-sections (a–1) or (a–2) of this Section 5; (2) Spillways are made adequate to prevent the dam from washing out under normal rainfall and reservoirs are located where they have a sufficient watershed to insure the filling of such reservoirs with normal precipitation.

10. Part VI is amended by the addition of the following new Section:

SECTION 9. *Adjustment in rates and allowances.*—All the rates and allowances specified in this Part VI are based upon an estimate of available funds and an estimate of approximately 85 percent participation. If participation in the North Central Region exceeds that estimated for such region, all the rates and allowances specified in this Part VI for such region may be reduced pro rata. If participation in the North Central Region is less than the estimate for such region, all such rates and allowances may be increased pro rata. In no case will any rates or allowances be increased or decreased by more than 10 percent.

Done at Washington, D. C., this 4th day of October, 1937. Witness my hand and the seal of the Department of Agriculture.

[SEAL] H. A. WALLACE,
*Secretary of Agriculture.*

### Farm Security Administration.

[Administration Order]

PLAN OF ORGANIZATION AND STATEMENT OF BASIC POLICIES TO BE FOLLOWED IN CARRYING OUT THE PROVISIONS OF TITLE I AND RELATED PROVISIONS OF TITLE IV OF THE BANKHEAD-JONES FARM TENANT ACT

I. ADMINISTRATIVE ORGANIZATION

1. *Washington office.*—(a) To execute the provisions of Title I and related provisions of Title IV of the Bankhead-Jones Farm Tenant Act, subject to approved policies and procedures, there is hereby created a major division of the Farm Security Administration to be designated as the Tenant Purchase Division.

(b) The Washington staff of the Tenant Purchase Division of the Farm Security Administration will be limited at the outset to a Director, an Assistant Director, one Executive Assistant, one Administrative Assistant, one Chief Economist, one Loan Adviser; and the necessary secretarial and clerical help.

(c) In lieu of a staff of specialists in the Tenant Purchase Division, it is understood that the Director of that Division and the Director of the Rural Rehabilitation Division will cooperate closely and the services of the present technical staff of the Rural Rehabilitation Division will be available to assist both Divisions as required.

(d) The Division of Farm Management of the Bureau of Agricultural Economics will designate a specialist in farm management to serve as an adviser to the Director of the Tenant Purchase Division with respect to farm management problems.

2. *Regional organization.*—(a) The regional director for the Farm Security Administration shall be the chief executive officer in each region for the administration of Title I of the Bankhead-Jones Farm Tenant Act.

(b) Under the regional director, the regional office set-up for carrying out the tenant purchase program shall consist of one specialist in tenant purchase loans, one assistant, and necessary clerical help. In lieu of a special staff, the specialist in tenant purchase loans shall share with the other divisions in the services of the regional Farm Management specialist and Home Management specialist, Loan and Collections section, Finance and Control Division, Business Management Division, and so forth. In other words, except for the specialist on tenant loans, his assistant, and their clerical staff, there will be no special personnel in the regional office.

3. *State organization.*—(a) Subject to the administrative authority of the regional director, or his designated assistant, the state director of the Farm Security Administration shall be responsible for supervising the execution of the tenant purchase program in the respective states. The state director shall also serve, without extra compensation, as executive secretary of the state Farm Security Advisory committee, issuing such notices of meetings, preparing such minutes, and maintaining such files and records as may be required. With the possible exception of an additional stenographer, no additions to the present staff of state directors will be required.

(b) In each state there shall be a state Farm Security Advisory committee, which shall serve in an advisory capacity with respect to all phases of the Farm Security Program, except that such committees are not intended to replace existing state Farm-Debt Adjustment committees. These committees shall be appointed by the Secretary of Agriculture in the following manner:

Each regional director of the Farm Security Administration shall, in the manner indicated in special instructions to be issued, submit to the Administrator of the Farm Security Administration for transmittal to the Secretary of Agriculture, fifteen nominees listed in order of preference with information regarding the qualifications of each nominee. The Secretary of Agriculture will consider the nominations submitted and if acceptable will select nine appointees and designate a committee chairman. If the nominees submitted are not acceptable, others shall be submitted in like manner. Nominees shall be selected from the standpoint of their qualifications for service without reference to political affiliation. Members of state committees shall serve without compensation but they shall be reimbursed for expenses incurred in attending committee meetings. Their terms of service shall be for one year or the period designated in the appointment.

4. *County organization.*—(a) Responsibility for carrying out the provisions of Title I of the Bankhead-Jones Farm Tenant Act in the counties, except that imposed by the Act or by the Administrator upon county committees, shall be vested in the county RR supervisors and applications for tenant purchase loans shall be filed with such county supervisors. Without additional compensation, the county RR supervisors shall serve as executive secretaries of county committees and shall conduct such correspondence and maintain such files and records in behalf of such committees as may be required.

(b) The land grant colleges and the agricultural experiment stations shall be recognized as authority within each state with respect to technical agricultural practices in that state and the advice of qualified representatives of these institutions shall be sought with respect to the farm and home management plans developed by the county farm and home supervisors in cooperation with borrowers as a basis for farm purchase loans. Such advice should be given in the county in which the plans are developed. The county agricultural agents of the respective counties will be requested to serve as advisers to county committees with respect to qualifications of applicants for tenant purchase loans, and local agricultural practices.

(c) The county committees, consisting of three farmer members provided for in Section 42 or Title IV of the Bankhead-Jones Farm Tenant Act, shall be selected in the following manner:

It is desired that the county RR supervisor (who shall be responsible for initiating the action) and the county agricultural agent jointly agree upon twelve nominees. These nominees, listed in the order of preference with appropriate information regarding each, shall be transmitted to the state Farm Security Advisory committee by the county RR supervisor. If the county agricultural agent does not find it possible to share in the nominations, the county RR supervisor shall proceed independently. The state Farm Security Advisory committee shall choose six acceptable nominees from the twelve submitted and endorse them for appointment to the Secretary of Agriculture. The names of the six persons endorsed, with appropriate information regarding each, shall be transmitted by the regional director to the Administrator of the Farm Security Administration, who in turn shall transmit them to the Secretary of Agriculture.

If persons nominated by the county RR supervisor and the county agricultural agent are not acceptable to the state Farm Security Advisory committee, other names shall be submitted until six acceptable persons have been nominated and if persons endorsed for appointment by state committees are not acceptable to the Secretary of Agriculture, other persons shall be endorsed by state committees. The Secretary of Agriculture shall issue notices of appointment and designate the committee chairmen.

In the event that persons appointed to membership on county committees by the Secretary of Agriculture decline to accept such appointment, the Secretary may appoint others remaining on the list, or may request endorsement of additional nominees.

All persons nominated for appointment as members of county committees shall be bona fide farmers, residing on farms and deriving their income principally from farming. At least four of the twelve persons nominated by the county RR supervisor and the county agricultural agent for the consideration of state committees shall have been tenant farmers experienced in operating family size farms, and at least two of the persons endorsed by state committees for the consideration of the Secretary of Agriculture shall have been tenant farmers experienced in operating family size farms. The term of appointment shall be to December 31, 1938. When new committees are appointed, it is the purpose to include on such committees one or more tenant farmers to whom purchase loans have been made.

(d) In addition to performing the functions specified in Section 2 of Title I of the Bankhead-Jones Farm Tenant Act, the county committee may also serve as the county Farm-Debt Adjustment committee, and as the county Rehabilitation Advisory committee, thus concentrating all county advisory functions of the Farm Security Administration in a single committee, provided, however, that compensation and reimbursement of county committee members from funds appropriated under the authority of Title I of the Bankhead-Jones Farm Tenant Act shall be limited to payment for services rendered in connection with carrying out the provisions of the Title.

II. ALLOCATION OF LOAN FUNDS TO STATES AND COUNTIES

1. Funds for loans to enable eligible farmers to acquire farms shall be distributed to the respective states on the basis of farm population and the prevalence of tenancy.

2. During the fiscal year 1937–1938, the number of counties in which loans shall be made shall be limited to approximately 300 and the number of loans per county shall not be less than five, nor more than ten (except in states in which the total number of loans shall be less than five). If appropriations are made as authorized during the fiscal years 1938–1939 and 1939–1940, it will be possible to extend the loaning program into additional counties on the basis of farm population and prevalence of tenancy.

3. Within each state the particular counties in which loans are to be made during each fiscal year shall be determined by the Secretary of Agriculture with the advice of the state Farm Security Advisory committee, which committee shall take into account data on farm population and prevalence of tenancy submitted by the Secretary of Agriculture.

III. SELECTION OF APPLICANTS

1. Each applicant for a tenant purchase loan shall be required to submit a statement certifying to the following:

(a) His age, marital status, and number of dependents.

(b) That he is a citizen of the United States.

(c) That he is or has been recently engaged in farming as a means of providing the major portion of the family income, as farm tenant; farm laborer; sharecropper; or recent owner.

(d) That he is unable to obtain an adequate loan under reasonable terms for the purchase of a farm from other sources.

(e) That in case he obtains a loan for the purchase of a farm, he will cooperate with representatives of the Farm Security Administration in developing and carrying out a sound farm and home management plan and maintaining such records and accounts as may be required until his debt is repaid.

(f) Whether he is able to make an initial down payment and, if so, in what amount.

(g) Whether he owns livestock and farm implements necessary successfully to carry on farming operations on a family-sized farm.

2. In a given county, the committee shall, with the aid of its secretary, and with the advice of the county agricultural agent, select from among all the applicants those to whom loans can be made and, in the process of selection, the committee shall be guided by the following criteria:

(a) The family must have a reputation for paying its debts and meeting its responsibilities.

(b) The family must have shown reasonable stability of residence.

(c) The family should have demonstrated in the past acceptable evidence of initiative and resourcefulness and successful farming ability and managerial capacity.

(d) The family must be free from physical disabilities or infectious diseases that are likely to obstruct fulfillment of the obligations to be assumed.

(e) The operator or family head must be unable to obtain an adequate loan for the purchase of a farm through private or governmental sources, other than the Farm Security Administration.

(f) The family as a whole should desire the opportunity being made available and both husband and wife should so indicate by signing the application form.

(g) There should be no discrimination based on nationality, race, creed, or political affiliation.

IV. SELECTING FARMS

1. Within the price limit specified for farms to be purchased in a given county, each successful applicant for a purchase loan shall be given large latitude in the selection of the farm which he desires to purchase, but each farm proposed for purchase shall be examined and appraised by the county committee and the committee shall be satisfied that the farm with respect to which the application is made is of such character that there is a reasonable likelihood that the making of a loan with respect thereto will carry out the purposes of Title I of the Act and shall be further satisfied that considered from the standpoint of price, location, topography, soil type, fertility and past history of production, the applicant has made a relatively good selection within the county.

V. REASSIGNMENT OF FUNCTIONS

1. Functions may not be added to, transferred between, or dropped from, staffs except upon the written approval of the Secretary.

VI. REGULATIONS

1. All functions are to be performed in accordance with applicable Department of Agriculture Regulations.

[SEAL] WILL W. ALEXANDER, *Administrator.*

Approved, October 5, 1937.

H. A. WALLACE,
*Secretary of Agriculture.*

[F. R. Doc. 37-2950; Filed, October 5, 1937; 12:41 p. m.]

## FEDERAL POWER COMMISSION.

Commissioners: Frank R. McNinch, Chairman; Clyde L. Seavey, Vice Chairman; Claude L. Draper, Basil Manly, John W. Scott.

[Projects Nos. 67, 96 and 120]

SOUTHERN CALIFORNIA EDISON COMPANY LTD.; SAN JOAQUIN LIGHT AND POWER CORPORATION

ORDER FOR REHEARING

Upon application dated San Francisco, California, August 6, 1937, filed by San Joaquin Light and Power Corporation for a rehearing with regard to paragraphs 5, 6 and 7 of the order of the Commission dated July 10, 1937, directing said company and the Southern California Edison Company Ltd. jointly to compute for each year from 1923 to 1936, inclusive, the amounts to be paid by the San Joaquin Light and Power Corporation to the Southern California Edison Company Ltd. on account of headwater benefits as between licensed project No. 96 and licensed projects, Nos. 67 and 120, in accordance with the decisions, criteria and principles set forth in said order (including said paragraphs 5, 6 and 7);

The Commission orders: That a rehearing be held on the issues specifically raised by said application, in the Commission's hearing room, 1800 Pennsylvania Avenue NW., Washington, D. C. beginning at 10 a. m. on the 4th day of November, 1937.

Adopted by the Commission on September 30, 1937.

LEON M. FUQUAY, *Secretary.*

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 30th day of September, A. D. 1937.

Commissioners: William A. Ayres, Chairman; Garland S. Ferguson, Jr.; Charles H. March, Ewin L. Davis, Robert E. Freer.

[Docket No. 3050]

IN THE MATTER OF CHRISTMAS CLUB, A CORPORATION

FINDINGS AS TO THE FACTS AND CONCLUSIONS

Pursuant to the provisions of an Act of Congress approved September 26, 1914, entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes", and pursuant to the provisions of an Act of Congress approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", the Federal Trade Commission on February 5, 1937, issued, and on February 8, 1937, served, its complaint in this proceeding upon respondent, Christmas Club, A Corporation, charging it with the use of unfair methods of competition in commerce in violation of the provisions of said Act, entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes", and with violating Section 3 of the aforesaid Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914, and with violating Section 2 (a) of the said Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", as amended by Section 1 of an Act of Congress approved June 19, 1936, entitled "An Act to amend Section 2 of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes', approved October 15, 1914, as amended (U. S. C., title 15, sec. 13), and for other purposes." After the issuance of said complaint and the filing of respondent's answer, the Commission, by order entered herein, granted respondent's motion for permission to withdraw said answer and to substitute therefor an amended answer, in which respondent stated that while not conceding that it has violated any law of the United States, nevertheless for the sole purpose of avoiding the trouble and expense incidental to further continuation of this proceeding, it desired to waive hearing on the charges set forth in said complaint and not to contest the proceeding, and solely for the purpose of disposing of this proceeding consented that the Commission might, without trial, without the taking of evidence and without any further procedure enter its findings as to the facts, including such inferences as the Commission might draw from the facts admitted in the said amended answer, and issue and serve upon it an order to cease and desist from the acts admitted in the said amended answer, and in which said amended answer respondent stated that all consents and admissions given or made by the respondent therein were given and made solely on the conditions and for the purposes aforesaid and insofar as they constituted admissions were not made as, nor were they to be taken as, admissions of fact for any other purpose or in any other proceeding whatsoever. Thereafter, this proceeding regularly came

on for final hearing before the Commission on the said complaint and said amended answer, (briefs and oral arguments of counsel having been waived) and the Commission having duly considered the same and being now fully advised in the premises, finds that this proceeding is in the interest of the public and makes this its findings as to the facts and its conclusions drawn therefrom.

FINDINGS AS TO THE FACTS

1. The respondent is a corporation organized, existing and doing business under and by virtue of the laws of the State of New York, with its principal office and place of business at 341 Madison Avenue, New York City, in said State.

2. The respondent is now and for more than three years last past has been engaged, among other things, in the sale of pass-books, account books, advertising literature and other paraphernalia for use by banks and trust companies in the conduct by them of Christmas Clubs and other savings systems (which said pass-books, account books, advertising literature and other paraphernalia are hereinafter referred to as "systems").

3. In the course and conduct of its business, the respondent now causes to be shipped and for more than three years last past has caused to be shipped such "systems", when sold by it from Harrisburg, Pennsylvania, to the purchasers thereof, some located in the State of Pennsylvania and others located in various other states of the United States and in the District of Columbia; and there is now and for more than three years last past has been a constant current of trade and commerce by the respondent in such "systems" between and among the various states of the United States and in the District of Columbia.

4. In the course and conduct of its business, the respondent is now, and for more than three years last past has been, in substantial competition with other corporations and with persons, firms and partnerships engaged in the sale of "systems" for use by banks and trust companies and their depositors in the conduct of Christmas Clubs and other savings systems in commerce between and among the various states of the United States and in the District of Columbia.

5. In 1936 there were approximately 17,800 banks and trust companies throughout the United States, of which approximately 5,200 operated Christmas Clubs.

6. The respondent now furnishes, and for more than three years last past has furnished, "systems" to more banks and trust companies, for use by them in the conduct of Christmas Clubs and other savings systems, than has or does any one of its competitors.

7. The annual revenues of the respondent from furnishing "systems" to banks and trust companies now exceeds, and for more than three years last past has exceeded, that of any of its competitors.

8. While prior to 1934 the respondent represented to banks or trust companies that it had the sole and exclusive right to the use of the name or phrase "Christmas Club" and represented that such name or phrase had been trade-marked by it for use on "systems", during the past three years it has not made such representations except as to the name of a magazine.

9. In 1910 Merkel Landis conceived the Christmas Club plan and in 1911 transferred to the Landis Savings Club Company all of his right, title and interest in the plan. Early in 1912 Mr. H. F. Rawll acquired from the Landis Savings Club Company the right to use the plan. Mr. Rawll immediately gave the plan the name "Christmas Club" and operated his business under the unincorporated name "Christmas Club" from March, 1912, until June, 1914, when he incorporated his business under the name "Christmas Club, A Corporation", the respondent herein. The respondent subsequently acquired all the assets of the Landis Savings Club Company. While prior to 1934 the respondent represented that it had the right to the exclusive use of the name or phrase "Christmas Club", it has not established such right in any judicial proceeding. From time to time, various persons, firms and corporations, other than the respondent, have been engaged in the business of supplying banks and trust companies with "systems" inscribed with the name "Christmas Club" for use in the operation of Christmas Clubs and from 1929 to 1932, inclusive, the respondent acquired the assets of a number thereof for a substantial consideration.

10. Since March, 1927, the respondent has been and now is the owner of the registered trade-mark "Christmas Club" for use as the title of a magazine in Class 38 (Reg. No. 225139), but the name or phrase "Christmas Club" has not been so registered by it as a trade-mark for "systems". The aforesaid representations made prior to 1934, that the respondent had the sole and exclusive right to the use of the name or phrase "Christmas Club" without having registered it or having established it in a court of competent jurisdiction, and that such name or phrase had been trade-marked by it for use on "systems" without having registered it or having established it in or by a court of competent jurisdiction for use on "systems" has had the capacity and tendency to mislead certain banks and trust companies purchasing such "systems" from the respondent into believing that such representations were true and to purchase "systems" from respondent in such erroneous beliefs.

11. Certain forms of contracts entered into by the respondent prior to the issuance of the complaint herein contained the statement that "systems" would be shipped "f. o. b. its factories". However, approximately 95% of the "systems" furnished to banks and trust companies by the respondent are manufactured for its order by manufacturing and printing concerns in which the respondent has no financial or other interest and approximately 5% of such "systems" are printed by affiliated corporations, the stock of which is owned by a corporation which also owns a part of the stock of the respondent. All "systems" furnished by the respondent are manufactured and printed for it under its directions and instructions. Said statement contained in such forms of contracts that "systems" would be shipped by the respondent "f. o. b. its factories" has had the capacity and tendency to mislead certain banks and trust companies purchasing "systems" from the respondent into believing that the respondent itself manufactured and printed its own "systems" and to induce them to purchase "systems" from the respondent in such erroneous belief.

12. At various times the respondent has represented, without explanation of the sense in which the term "promoting" is used, that it has spent over a period of time more than $3,500,000 in promoting the Christmas Club name and idea among the banks and people of the United States, such figure representing an arbitrary fraction of the total selling expenses, other than cost of goods sold, and executive selling expenses, over a period of years, of the respondent and certain other companies the assets of which have been acquired by the respondent. Such representation without explanation of the sense in which the word "promotion" has been used has not informed banks and trust companies as to the sense in which respondent has used the word "promotion" and has induced them to purchase "systems" from respondent without knowing the sense in which the word "promotion" was used.

13. By the representations hereinbefore described, trade has been diverted to respondent from its competitors and substantial injury has been done by respondent to substantial competition in interstate commerce.

14. Prior to the issuance of the complaint herein, the respondent contracted to furnish "systems" to banks and trust companies under forms of contracts, many of which were for a term of seven years and provided that the bank or trust company should purchase "systems" from the respondent exclusively.

15. Certain banks and trust companies having such contracts with the respondent have not, by reason thereof, purchased "systems" from competitors of the respondent, and the effect of such contracts has been and is to substantially lessen competition or tend to create a monopoly in the respondent.

16. Since June 19, 1936, and prior to the issuance of the complaint herein, the respondent entered into and is carrying out contracts with banks and trust companies providing that the respondent would furnish "systems" of like grade and quality to each bank or trust company and would accept in payment therefor a percentage of the deposits made in the Christmas Club of the bank or trust company. All of such contracts did not provide for payments on the same percentage basis. However, under the terms of such contracts the bank or trust company was privileged to requisition unlimited quantities of "systems" from the respondent regardless of the rate of percentage paid by the bank or trust company or regardless of the total deposits in its Christmas Club.

17. Under such contracts the respondent has, in the course of interstate commerce, discriminated and is still discriminating in price between different purchasers of "systems" of like grade and quality, the effect of which discriminations has been and is to substantially lessen competition or tend to create a monopoly in interstate commerce in "systems".

CONCLUSIONS

1. The aforesaid acts and practices of the respondent Christmas Club, A Corporation, as described in paragraphs 8, 9, 10, 11, 12 and 13 of the foregoing Findings, considered in connection with the facts set forth in paragraphs 1, 2, 3, 4, 5, 6 and 7 thereof, are to the prejudice of the public and of respondent's competitors, and constitute unfair methods of competition in commerce, within the intent and meaning of Section 5 of an Act of Congress approved September 26, 1914, entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes".

2. The aforesaid acts and practices of the respondent Christmas Club, A Corporation, as described in paragraphs 14 and 15 of the foregoing Findings, considered in connection with the facts set forth in paragraphs 1, 2, 3, 4, 5, 6 and 7 of the foregoing Findings, constitute a violation of the provisions of Section 3 of an Act of Congress entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914.

3. The aforesaid acts and practices of the respondent Christmas Club, A Corporation, as described in paragraphs 16 and 17 of the foregoing Findings, considered in connection with the facts set forth in paragraphs 1, 2, 3, 4, 5, 6 and 7 thereof, constitute a violation of the provisions of Section 2 (a) of an Act of Congress entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914, as amended by Section 1 of an Act of Congress entitled "An Act to amend Section 2 of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes,' approved October 15, 1914, as amended (U. S. C., Title 15, Sec. 13), and for other purposes", approved June 19, 1936.

By the Commission.

[SEAL] W. A. AYRES, *Chairman.*

Dated this 30th day of September, A. D. 1937.

[Docket No. 3050]

IN THE MATTER OF CHRISTMAS CLUB, A CORPORATION

ORDER TO CEASE AND DESIST

This matter coming on to be heard by the Commission on the complaint filed herein on February 5, 1937, and the amended answer of the respondent filed herein on September 28, 1937, and the Commission having made its findings as to the facts and conclusions of law; (1) that the respondent has violated the provisions of an Act of Congress approved September 26, 1914, entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes"; (2) that said respondent has violated the provisions of Section 3 of an Act of Congress approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes"; (3) that said respondent has violated the provisions of Section 2 (a) of the said Act of Congress approved October 15, 1914, entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", as amended by Section 1 of an Act of Congress entitled "An Act to amend Section 2 of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes' approved October 15, 1914, as amended (U. S. C. Title 15, Sec. 13), and for other purposes", approved June 19, 1936.

*It is ordered,* That respondent Christmas Club A Corporation, and its successors, officers, agents, servants and employees, forthwith cease and desist in connection with the business of selling or offering for sale "systems" (as that term is defined in the aforesaid findings as to the facts) in interstate commerce and in the District of Columbia, from doing and performing any of the following acts and things:

1. Representing that it has the right to the sole and exclusive use of the name or phrase "Christmas Club" for "systems"; and representing that the name or phrase "Christmas Club" has been trademarked by the respondent for use on "systems": *Provided, however,* That nothing contained in this order shall prohibit the respondent from exercising its lawful right to prevent other corporations, persons, firms, or partnerships from unlawfully using the name or phrase "Christmas Club" or from unlawfully using as a trademark, the name or phrase "Christmas Club";

2. Representing through advertisements, circulars, correspondence, stationery, or in any manner whatsoever, that it is the manufacturer and printer of "systems", unless and until it actually owns and operates, or directly and absolutely controls, a printing establishment wherein are printed any and all "systems" by it sold or offered for sale;

3. Representing that it has spent over a period of time more than $3,500,000, or any other sum, in promoting the Christmas Club name and idea among the banks and trust companies and the people of the United States, without accurately explaining the manner in which such sum has been computed;

4. Entering into contracts for the sale of "systems" or continuing to make sales of "systems" on the condition, agreement and understanding that the purchaser thereof shall not purchase or deal in the "systems" of a competitor or competitors of the respondent: *Provided, however,* That nothing contained in this order shall prohibit the respondent from entering into contracts whereby it agrees to furnish purchasers with such "systems" as they may requisition from the respondent if such purchasers are free to purchase "systems" from competitors of the respondent;

5. Unlawfully discriminating in price as found in Paragraph Sixteen and Seventeen of the aforesaid findings as to the facts, and conclusions.

Nothing contained in this order shall be construed to prevent the respondent from continuing to deal with banks or trust companies so long as such dealings shall not violate the provisions of this order.

*It is hereby further ordered,* That the said respondent shall within ninety (90) days from the date of service upon it of this order, file with this Commission a report in writing, setting forth in detail the manner and form in which it shall have complied with this order.

By the Commission.

IN THE MATTER OF ABRAHAM AND STRAUS, INC., A CORPORATION

ORDER APPOINTING EXAMINER AND FIXING TIME AND PLACE FOR TAKING TESTIMONY

This matter being at issue and ready for the taking of testimony, and pursuant to authority vested in the Federal Trade Commission, under an Act of Congress (38 Stat. 717; 15 U. S. C. A., Section 41),

*It is ordered,* That W. W. Sheppard, an examiner of this Commission, be and he hereby is designated and appointed to take testimony and receive evidence in this proceeding and to perform all other duties authorized by law;

*It is further ordered,* That the taking of testimony in this proceeding begin on Monday, October 11, 1937, at ten o'clock in the forenoon of that day (eastern standard time), in Room No. 338, Victoria Hotel, Seventh Avenue at Fifty-First Street, New York, New York.

Upon completion of testimony for the Federal Trade Commission, the examiner is directed to proceed immediately to take testimony and evidence on behalf of the respondent. The examiner will then close the case and make his report.
